i loaded xf2000 from emulators, inc. i don't get a ready prompt just a
blank screen. can
you suggest a simple atari 800xl emulator that i can load & be able to
save my program
on my computer disk in ENGLISH.

I believe I already suggested Atari800winplus 3.1, and gave a URL for it. I
use it regularly.
It requires that you get the OS and BASIC ROMs from somewhere else. Since
you have XFORMER, you already have the mentioned ROMs, at least the OS ones,
I'm not sure about the BASIC ROM..
Atari800winplus isn't totally simple, as you desire.
You have to have some patience and perseverance.
You've mentioned XFORMER since you started this
thread, but don't seem to have gotten any other
emulator.
I know of no single ZIP file that you can just unzip,
and it installs like a sophisticated Win32 program, then
just click on the icon and go. These emulators, other
than XFORMER, are all free, small (compared to
100s of megabytes commercial programs). I believe XFORMER was sold at first
and may be free now,
but it too was written by a single person.

It might help if I mention the names of the ROMs you will need.....:
ATARIXL.ROM
ATARIOSB.ROM
ATARIBAS.ROM
They must be in the 'ROM' directory where you
put the .EXE emulator program, I think.
When you unzip atari800winplus31.zip, with a create directory, probably
automatically does this, there will be a ROM directory, you must put the ROM
files there.
After that, just run the atari800winplus.exe file and then you can access
the help index, or as here in comp.sys.atari.8bit

I think I figured out one thing. XFORMER doesn't
have the BASIC ROM, just the OS ROMs, that's why you don't get a READY
prompt with it, you gotta get a ATARIBAS.ROM and put wherever XFORMER
requires it, either in a ROM directory or the same directory as XFORMER.
Also, since you get a blank screen, you don't have the OS ROMs right either,
you should get a 'memo pad' with
ATARIOSB.ROM, or the self test screen with ATARIXL.ROM.

with DOS i get memo pad & hit F12 to return to basic. i loaded X25 &
basic works better
but all the directions to SAVE do not work.

what does 130 mean. i have tried SAVE"D1:WORLD.BAS" every which way
but NOTHING works.

error 130 is 'unknown device'.
it means you don't have DOS loaded at bootup.
(DOS disk operating system).
You don't have a 'D:' device handler, because you haven't
loaded DOS.
To load DOS, you need to "put a disk in drive 1", using the menu items with
the emulator.
The disk you put in is called an image, with a .ATR
extender on the end, eg. MYDOS453.ATR or
FRE32G.ATR or DOS25.ATR.
You can get a DOS image at the Holmes archive at
www.langesite.com/atari/holmes and search for
DOS images.
```

Mostly what Russ said. Error 130/Memo Pad means the emulator could not
find the DOS image disks in the default directory.

I'm not to familiar with Xformer but I think it defaults to booting
the first disk image with the .ATR extender and the same directory as
the emulator.

So you want Xformer.exe or .com or whatever it is in the same directory
as a disk image. The disk image will probably be a 90k MS DOS file named
something like

DOS25.ATR

or a 180k file that has a double density DOS on it.

REALLY Foggy memory but I *think* in some of the early MSDOS versions
you had to specify the file in the command line i.e.

Xformer DOS25.ATR

Once you get the DOS loaded, you should be able to just type
DOS

From BASIC and it will load a file called DUP.SYS which stands Disk Utility Package and has all the commands to do things like format a disk or load a binary file.

If you get that far, you should be able to get back to BASIC by using the RUN option of the menu with the run address $A000.

If you want to go back and forth between BASIC and DUP, you need to create a MEM.SAV from the DUP menu. Most people don't bother since you can perform most of the functions you need from BASIC.

The disks images I have seen are usually pretty full. You may have to create a new one with only DOS and DUP on it to have room for your programs.

Rick

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.
Atari, headquartered at the time in Sunnyvale, California, USA, produced this
line of computers from 1979-1992.

To see what Atari, Inc. is up to today, visit: http://www.atari.com/

NEWSGROUP BACKGROUND
comp.sys.atari.8bit was created in November 1986 (as part of the Great
Renaming) as a direct replacement for: net.micro.atari8

Former (before 1987) Usenet newsgroups for Atari computer discussion:
net.micro.atari8 - created Feb 1986
net.micro.atari - created Nov 1982
net.micro - created Jan 1982

comp.sys.atari.8bit is unmoderated, and has no formal newsgroup charter.

The comp.* hierarchy of Usenet newsgroups is managed by the Big-8 Management
Board: http://www.big-8.org/

RELATED USENET NEWSGROUPS

1100. XL/XE ROM RAM Test

Newsgroup: comp.sys.atari.8bit
Date: 2007-08-14 17:37:03 UTC
From: DocRotCod <rahbart@cox.net>
Message-ID: <hJlwi.213595$LE1.170920@newsfe13.lga>
Source record: 4337

The ROM test indicates a red bar on the ROM on the right ROM in self test.
Does this indicate a specific ROM or is it just a blanket "you have a bad
ROM somewhere"?

TIA

Thomas

1101. Re: XL/XE ROM RAM Test

Newsgroup: comp.sys.atari.8bit
Date: 2007-08-14 23:18:00 UTC
From: Jason Harmon <jharmon@us.net>
Message-ID: <7KCdnRDBzJ51ql_bnZ2dnUVZ_tyknZ2d@comcast.com>
Source record: 4338

I think there are only two physical ROM chips in an XL/XE.

One is the OS and the other is the BASIC interpretor. What I don't know is
if the ROM test is just the OS ROM or both the OS and the BASIC ROM.

1102. Re: XL/XE ROM RAM Test

Newsgroup: comp.sys.atari.8bit
Date: 2007-08-15 00:44:49 UTC
From: Russg <russgilb@MUNGEsbcglobal.net>
Message-ID: <4%rwi.5570$i85.691@nlpi061.nbdc.sbc.com>
Source record: 4339

This is off topic, but this is the only message I have in Outlook Express.
It puzzles me, I want to keep all messages, but periodically, as has
happened just now, all messages except one dissappear!
I have 'Don't synchronize.' set for all my groups.
These strange messages seem to preceed the wipeout of my messages,
something like 'cmesage cancel... blah blah.
It doesn't work to unsubscribe and re-subscribe.

1103. Re: atari 800xl emulator

> program to 'disk' (ATR image).

If the emulator simulates a tape drive, the C: device is part of the OS,
so you could do CSAVE or SAVE "C:" :^)

Additionally, you could do something silly like LIST "P:" if the
emulator's printer 'device' has been redirected to a file. Then you'll
at least have an ATASCII dump of the listing which you could then load later
using the ENTER command.

;^)

I had a gecko (small lizard like reptile) in my STE once. That was back when I lived in the tropics. Unfortunately it got fried on the PSU as I was playing a game (I had no idea it was in there). Smoke started coming up from the STE's vents while I was playing and I panicked and shut the computer of thinking I fried a circuit or something. Imagine my surprise when I open the computer up to find a scroched gecko lying on the PSU. Poor little thing... geckos are cute.

Joshua.

: >The (remote) possibility remains that 'Mike Corley' is either
: >not schizophrenic (but is 'pretending' to be so) or 'he' is
: >a product of a number of persons (?psychology students).

: Given other ways in which I have seen people exploit some of The Internet's
: capabilities to disrupt or indulge in sophistry, or to exploit a medium
: that resembles speech without the non-verbal and intonation cues, etc
: as a means of denigrating others, I question your use, albeit in quotes,
: of the word "remote". I'm not saying it isn't remote and therefore it is
: great, I'm just saying that I don't think we can easily classify it as
: remote, moderate, or great.

I think you can build up quite a good picture based on what someone says
and on their posting patterns. I don't think "The Internet" (capitals, no
less) is as opaque a medium as you make it out to be.

: It is not easy to determine the validity of all information on The
: Internet without making use of extra supplementary information.

: We do have the problem, pointed out by someone else, of the possibly
: "too perfect" textbook characteristics of what is being posted.

I explained that one, but I don't mind explaining it again (you don't
mind having it explained again to you, do you now?). The reason my
"symptoms" are such a perfect fit to the textbook is because the people
causing the campaign "fitted me up" in such a way that what they did
would resemble the symptoms of schizophrenia. Hence TV, radio, other
media, people in the streets etc. By a fortunate coincidence (for them)
these mthods of harassment are the ones which offer easiest channels of
access (for them).

It's really quite neat. All it takes is for people to start believing
that the "symptoms" aren't symptoms but reality, though, and the house of
cards collapses in a heap. And there are _lots_ of people now who knoiw
full well what has gone on.

: If harrassment by email, etc, has happened by someone out of the country,
: can a complaint be made that results in arrest or whatever upon that
: person's entry into the country? An interesting point which Mike may be
: able to inform us about, as he's said he will be in the UK in a few weeks
: time.

Picture the scene at the airport;
"I arrest you for being Mike Corley and mailbombing people"

"But my name isn't Corley. Who he? Mailbombing isn't illegal is it? You'd
have to lock up a lot of people if sending annoying email was a crime"

"Er....."

==========

: context-free parts of articles, conversations and things-on-the-TV and
: assume they are meant for you. Mike, this is called paranoia.

But that's the way real abuse works, too. People interject words and
phrases into what they say which they know will have meaning for the listener.

And sometimes, they make it obvious. The very first evening of my job in
Oxford, we went for a drink with the technical director, and a couple
of other employees. The TD said in an "as-if" aside to one of the others,
"Is this the bloke who's been on TV?" (he said it directly in front of
me, and obviously meant mke to hear him saying it). The other person
replied, "Yes, I think so".

I think the subtext of what the TD said was "Why are they bothering with
him? He's so insignificant, why would they possibly want to spend the
resources going after him and putting all that expensive technology in
his home, when there must be much better targets?". The Technical
Director was given to sometimes disrespecting people, you see, and in my
case he couldn't see the point of anyone expending money on harassing me.

Illtud Daniel (idaniel@jesus.ox.ac.uk) wrote:
: Probably 'cos you come across as reasoned & articulate, it's a pity
: about the other stuff :)

Veracity is so unreasonable.

: >>pps. You should still see a doc again Mike.
: >
: >Doing so. Trouble is, all this mental-illness stuff provides camouflage
: >for the harassment, which is real. It alows people who otherwise would
: >consider the harassment seriously to disregard it. It makes conversations
: >with a lawyer or police brief when otherwise it would merit discussion.

: The point is that there are two possibilities happening here-

: 1. There's a large conspiracy of people out to get you, for no
: other reason than that they have the means to do so, and that
: it involves a lot of the Media & a proportion of the public

: 2. You (who admit to having some headspace problems) are suffering
: from acute paranoid schizophrenia.

: Possibility #1 is _possible_, but would be unprecendented (OTOH,
: how would we know?), unfeasible, and many other things beginning
: with _un_ which I can't think of at the moment. Besides, if there
: was something going on, chances are some of us here would know
: about it, and I'm convinced that nobody does.

"Unprecedented" hits the nail on the head. It _is_ unprecedented, but we
have only just reached the technical stage at which it is feasible, and
we know video-spying is done to other people (NB the Diana-Hewitt
episode) and is a routine tool of security agencies.

Perhaps what is unprecedented is not the technical side, but the social
manipulation of many people by a concealed element in what other
countries would be called the secret police. The most disturbing element
is the degree to which people allow themselves to be unquestioningly
manipulated by an evil element within the state.

Peter Ceresole (peter@cara.demon.co.uk) wrote:
: In article <Ds0L1o.BMF.0.bloor@torfree.net>,
: bu765@torfree.net (Mike Corley) quoted a typical, overblown Bernard Levin
: piece, which sounds exactly like any number of other pieces by Levin over
: the past thirty years.

: He then goes on to draw an anguished parallel with a totally unrelated
: incident that had happened between him and a friend a few days earlier.

It is in the same style as his other pieces, but it's so close to what
actually happened a few days previously, that it's completely reasonable
to assume that someone told Levin about the meeting, hammed it up a
little bit and motivated him to write that article.

Look at the parallels;

1. "madman running loose about London"

2. it's about a meeting which took place recently

3. the police are called (he must be controlled, however much that
consumes in resources)

4. he might be violent, approach with caution, yes we're laughing but
really we're afraid of him, or is it perhaps our own propaganda that
we're letting manipulate us

5. he "bursts into tears, and swears it's all true - and it is" a very
exaggerated impression of the conclusion of that meeting

Don't worry if you don't believe me, neither my friend to whom I
explained this nor my GP believe me either (until the friend found out
otherwise!). If someone just presented this to you as I am presenting it
now then I wouldn't find it credible (most likely), so it's not until you
actually find out it's true that you can find it credible. And by then
it's too late, because they've got you in their trap and explained how
"funny" the abuse is.

"Unprecedented" hits the nail on the head. It _is_ unprecedented, but we
have only just reached the technical stage at which it is feasible, and
we know video-spying is done to other people (NB the Diana-Hewitt
episode) and is a routine tool of security agencies.

Perhaps what is unprecedented is not the technical side, but the social
manipulation of many people by a concealed element in what other
countries would be called the secret police. The most disturbing element
is the degree to which people allow themselves to be unquestioningly
manipulated by an evil element within the state.

David Stretch (dds@leicester.ac.uk) wrote:
: In article <19960418.000817.55@hotch.hotch.demon.co.uk>,
: Iain L M Hotchkies <iain@hotch.demon.co.uk> wrote:
: >The (remote) possibility remains that 'Mike Corley' is either
: >not schizophrenic (but is 'pretending' to be so) or 'he' is
: >a product of a number of persons (?psychology students).

: Given other ways in which I have seen people exploit some of The Internet's
: capabilities to disrupt or indulge in sophistry, or to exploit a medium
: that resembles speech without the non-verbal and intonation cues, etc
: as a means of denigrating others, I question your use, albeit in quotes,
: of the word "remote". I'm not saying it isn't remote and therefore it is
: great, I'm just saying that I don't think we can easily classify it as
: remote, moderate, or great.

I think you can build up quite a good picture based on what someone says
and on their posting patterns. I don't think "The Internet" (capitals, no
less) is as opaque a medium as you make it out to be.

: It is not easy to determine the validity of all information on The
: Internet without making use of extra supplementary information.

: We do have the problem, pointed out by someone else, of the possibly
: "too perfect" textbook characteristics of what is being posted.

I explained that one, but I don't mind explaining it again (you don't
mind having it explained again to you, do you now?). The reason my
"symptoms" are such a perfect fit to the textbook is because the people
causing the campaign "fitted me up" in such a way that what they did
would resemble the symptoms of schizophrenia. Hence TV, radio, other
media, people in the streets etc. By a fortunate coincidence (for them)
these mthods of harassment are the ones which offer easiest channels of
access (for them).

It's really quite neat. All it takes is for people to start believing
that the "symptoms" aren't symptoms but reality, though, and the house of
cards collapses in a heap. And there are _lots_ of people now who knoiw
full well what has gone on.

: If harrassment by email, etc, has happened by someone out of the country,
: can a complaint be made that results in arrest or whatever upon that
: person's entry into the country? An interesting point which Mike may be
: able to inform us about, as he's said he will be in the UK in a few weeks
: time.

Picture the scene at the airport;
"I arrest you for being Mike Corley and mailbombing people"

"But my name isn't Corley. Who he? Mailbombing isn't illegal is it? You'd
have to lock up a lot of people if sending annoying email was a crime"

"Er....."

==========

: context-free parts of articles, conversations and things-on-the-TV and
: assume they are meant for you. Mike, this is called paranoia.

But that's the way real abuse works, too. People interject words and
phrases into what they say which they know will have meaning for the listener.

And sometimes, they make it obvious. The very first evening of my job in
Oxford, we went for a drink with the technical director, and a couple
of other employees. The TD said in an "as-if" aside to one of the others,
"Is this the bloke who's been on TV?" (he said it directly in front of
me, and obviously meant mke to hear him saying it). The other person
replied, "Yes, I think so".

I think the subtext of what the TD said was "Why are they bothering with
him? He's so insignificant, why would they possibly want to spend the
resources going after him and putting all that expensive technology in
his home, when there must be much better targets?". The Technical
Director was given to sometimes disrespecting people, you see, and in my
case he couldn't see the point of anyone expending money on harassing me.

What BASIC languages are available for the Atari 8-bit systems? I've been doing some benchmarking and am stunned with how poorly the BASIC in the XL ROM performs given the relatively high 1.79 mhz CPU clock.

Peter Ceresole (peter@cara.demon.co.uk) wrote:
: In article <Ds0L1o.BMF.0.bloor@torfree.net>,
: bu765@torfree.net (Mike Corley) quoted a typical, overblown Bernard Levin
: piece, which sounds exactly like any number of other pieces by Levin over
: the past thirty years.

: He then goes on to draw an anguished parallel with a totally unrelated
: incident that had happened between him and a friend a few days earlier.

It is in the same style as his other pieces, but it's so close to what
actually happened a few days previously, that it's completely reasonable
to assume that someone told Levin about the meeting, hammed it up a
little bit and motivated him to write that article.

Look at the parallels;

1. "madman running loose about London"

2. it's about a meeting which took place recently

3. the police are called (he must be controlled, however much that
consumes in resources)

4. he might be violent, approach with caution, yes we're laughing but
really we're afraid of him, or is it perhaps our own propaganda that
we're letting manipulate us

5. he "bursts into tears, and swears it's all true - and it is" a very
exaggerated impression of the conclusion of that meeting

Don't worry if you don't believe me, neither my friend to whom I
explained this nor my GP believe me either (until the friend found out
otherwise!). If someone just presented this to you as I am presenting it
now then I wouldn't find it credible (most likely), so it's not until you
actually find out it's true that you can find it credible. And by then
it's too late, because they've got you in their trap and explained how
"funny" the abuse is.

>

From what I remember:

There is of course Atari Basic (rev. A to C). The main source of its slowness is the floating-point math.

Then we have TurboBasic, which is a lot faster because it replaces the math pack by its own routines. It is backwards compatible to the Atari basic.

There is also Microsoft basic available for the 8bits. I do not have a clear picture about its speed, though. It is quite different and not compatible to Atari Basic whatsoever.

Then we have BasicXL from OSS which was also IIRC backwards compatible with Atari Basic, but not faster, only richer.

Finally, if speed is your issue, then I would also suggest to look into compilers. For Atari Basic, a purely integer based compiler is the "ABC" which has also been widely used by professional software (Micropose did use it a lot) and the Turbo Basic compiler. There are a couple of others, but I never tried them.

So long,
Thomas

Given that Mr Corley clearly holds a certain fascination for some people,
and that his website, although "informative", isn't exactly ideal for
encouraging discussion of the sort that we all enjoy so much (including
Mike himself, by the look of things), would anyone be up for a Mike
Corley newsgroup - uk.fan.mike-corley, alt.fan.mike-corley, whatever?
(Sorry, I'm not very well up on these things.)

This would be a perfect place for Mike to post his writings, and perhaps
the occasional "look at the ...mike-corley newsgroup" posting in uk.misc
and so on would be accepted in place of the current cross-posts.

Because he has made himself into a martyr and now he finds it impossible to
back down. Mike's big secret has now been exposed. He made everything up.

Every time Mike makes allegations against the police, MI5,
Tom-Dick-and-Harry etc. those organisations have taken people off vitally
important work to ascertain whether or not there was any substance in Mike's
ranting allegations.

When I'm told by someone who really does know such things that there was
never any plot to get Mike then I trust that person sufficiently enough to
accept his word.

The problem is Mike has escalated matters to an extreme level and like many
silly billys he will find it impossible to give up all his self created crap
and to live a normal life. After all what can Mike do now this crap has
been exposed as untrue ? What new cause can Mike dedicate himself to ?
(Some might read that as: who else can Mike now start upsetting ?)

So Mike write to John Major, c/o the Private Secretary, 10 Downing Street,
London SW1A 2AA and ask the Prime Minister to help you. I'd normally
disclose his fax numbers but if I did that you might jam up the lines with
abusive postings just like you do here on Usenet.

Is anyone interested in joining with me to do a mass e-mailing of protests
to Anon Penet and to Toronto Free Net in an attempt to flood their computer
systems thus forcing them to seriously consider pulling the plug on Mike ?
I'm not sure but is my proposal called a "flame" ?

Perhaps we should give Mike 7 days from today (6 July 96) to come to his senses and they start a massive multiple E-mailing campaign to Toronto Free Net. If all us victims send multiple copies of E-mails to the right addresses in Toronto then perhaps the Canadians will begin to get the appropriate message.

Copy e-mailed to Mike, just so he knows what is coming if he persists.

I see. So they're not wasting six years of manpower to persecute you. They're wasting six years of manpower to prove I'm _not_ being persecuted.

I wish I was clever enough to think of something like that. I really, really do.

>When I'm told by someone who really does know such things that there was
>never any plot to get Mike then I trust that person sufficiently enough to
>accept his word.

Come on "Big Ears", why don't you admit that you made this posting? This is exactly the same line you were feeding me a few months ago. The posts are from the same news server, it's even the same newsreading software (Forte Agent .99e/16.227).

I'm afraid that if you friend "in the know" denied the existence of a plot then he was being, as they say, economical with the truth. Judging by the extreme reaction in London in May, and the panic you're showing now, as well as the replay post yesterday, I would say that things are hotting up again. But for you this time, not for me. I am out of harm's way, and there is very little you can do as long as I stay out of the UK.

Hi Payton!

An ATARI friend of former days and today, sweared to 'Turbo Basic' by Frank Ostrowski, released somewhere in the eighties in 'Happy Computer' Magazine. In case of speed!!!.... and command-set (IMHO)!

There were also very nice software available for 'TB', in that times. I remember good the Happy Computer logo popping up shortly, while the the 1050 Turbo-loader (with the PAR Connector) made its work :-) (in some seconds finished ;-))

Best regards,

Daniel Mandic

When I'm told by someone who really does know such things that there was never any plot to get Mike then I trust that person sufficiently enough to accept his word.

The problem is Mike has escalated matters to an extreme level and like many silly billys he will find it impossible to give up all his self created crap and to live a normal life. After all what can Mike do now this crap has been exposed as untrue ? What new cause can Mike dedicate himself to ? (Some might read that as: who else can Mike now start upsetting ?)

So Mike write to John Major, c/o the Private Secretary, 10 Downing Street, London SW1A 2AA and ask the Prime Minister to help you. I'd normally disclose his fax numbers but if I did that you might jam up the lines with abusive postings just like you do here on Usenet.

Is anyone interested in joining with me to do a mass e-mailing of protests to Anon Penet and to Toronto Free Net in an attempt to flood their computer systems thus forcing them to seriously consider pulling the plug on Mike ? I'm not sure but is my proposal called a "flame" ?

Perhaps we should give Mike 7 days from today (6 July 96) to come to his senses and they start a massive multiple E-mailing campaign to Toronto Free Net. If all us victims send multiple copies of E-mails to the right addresses in Toronto then perhaps the Canadians will begin to get the appropriate message.

Copy e-mailed to Mike, just so he knows what is coming if he persists.

I see. So they're not wasting six years of manpower to persecute you. They're wasting six years of manpower to prove I'm _not_ being persecuted.

I wish I was clever enough to think of something like that. I really, really do.

>When I'm told by someone who really does know such things that there was
>never any plot to get Mike then I trust that person sufficiently enough to
>accept his word.

Come on "Big Ears", why don't you admit that you made this posting? This is exactly the same line you were feeding me a few months ago. The posts are from the same news server, it's even the same newsreading software (Forte Agent .99e/16.227).

I'm afraid that if you friend "in the know" denied the existence of a plot then he was being, as they say, economical with the truth. Judging by the extreme reaction in London in May, and the panic you're showing now, as well as the replay post yesterday, I would say that things are hotting up again. But for you this time, not for me. I am out of harm's way, and there is very little you can do as long as I stay out of the UK.

Can't disagree with that sentiment.

Wasn't it documented that MI5 sometimes "bought" journalists and broadcasters?
I remember reading a report by some jouralist who had been offered an extra
tax-free income by MI5 to become their covert mouthpiece, and had refused.

Bet you lots of others didn't refuse. Why do you think MI5 have such easy
access to the BBC and media? Because they're directly paying them off, that's why.

It has been reported several times. The most recent was in Private Eye,
a few months back. As I recall they also wanted information from him;
journalists would be a natural choice for members of the Security Service
and the Secret Intelligence Service for information sources.

> It might be interesting to see what he had to say regarding their
> attempt to recruit him.

He was most concerned that many others would have accepted such an
offer. However, we can probably make an educated guess as to some of
those who accepted: Nigel West (Rupert Allason, MP) and Chapman Pincher
would come near to the top of the list.

<snip>
What Thomas said and I actually owned the MMG compiler and it worked really well. It had the fewer restrictions and came with run times that supported floating point if you needed it. Matter of fact, first program I distributed on a local BBS was an 80 column terminal program compiled with MMG.

http://www.faqs.org/faqs/atari-8-bit/faq/section-56.html

Is an excellent list of what is available BASIC and programming wise.

Can you say what you want to use it for? I mean if you only need 20%-40% speed increase for personal use, you can install Omnimon OS. If you are trying to do something like a terminal program or word processor you will need to do your own screen handling routines.

This is true. I frequently employ private detectives to spy on people
(there's a good reason for this and I'll tell you if you guess
correctly) and one such detective showed me the latest technology only
last week. A small rucksack. One strap of the rucksack has a tiny hole
in it that you wouldn't notice unless someone pointed to it. That's the
camera: the wires lead into the rucksack itself where there is a video
tape recorder little bigger than a Walkman. I don't know if that's what
Roger Cook uses but it certainly explains why it is that the subject can
look straight into the lens and not realise (s)he's being filmed. Now, I
say "latest technology" and I think that's the technology that the
police use as well as the retired police who become private detectives,
but no doubt the security services have far more sophisticated
equipment.

: >Corley's allegations are true, there needs to be evidence of two
: >things. Firstly, there must be evidence of subversive activity on
: >his part. Secondly, there needs to be evidence of MI5 taking
: >measures to counter this subversive activity, in proportion to the
: >magnitude of the threat posed. Upon reading Mike Corley's posts,

: Alan,

: What about the following scenario? MI5 conducts "experiments" including
: field trials of novel surveillance methods. Say there was a "research
: project" underway to see just how invasive a surveillance of an
: individual could be. Perhaps it wasn't research, perhaps it was for
: training of novice personnel. Either way, there is a sizeable risk of
: detection. In order to minimise the consequences of this, you choose
: someone who is out of the public eye, and if possible someone whose
: credibility is already damaged - by diagnosis of schizophrenia, for example.
: This will facilitate the "plausible denial" if something goes wrong.

: I think this would be closer to Mike's theory.

: Mike, if you are reading, please don't post the story again. Anyone can
: read it at [snip] if they are interested. Also, don't
: think that I actually *believe* the above. On cost alone, it is extremely
: unlikely to be true, and some elements of the story (people in the media
: being "in on it") are just too crazy (though I can see how the paranoia
: builds to the extent that you can see "them" everywhere).

My argument is that the fact that it's so totally crazy is what makes it so
plausible and so hard to prove.

I shall continue to try to find ways to kick down the house of cards. Because
it is a brittle structure. It only needs one person to corroborate, and then
it's all over.

: P.S. Anyone else ever thought of "what-ifs" along the same lines? I
: remember as a boy daydreaming that maybe I was the focus of national
: attention in a "let's follow the life of one person from life to
: death" study - that while I was out or in bed there were programmes on
: the television about my life so far, etc. It makes for a good fiction,

Perhaps MI5 have become victims of their own paranoia. Their agency has been thought of as acting disreputably, so when their decision arrives, they don't think twice about breaking the law. Whereas say CSIS (the Canadian equivalent) is at pains to point out how it would never ever do anything in contravention of the law, and how it is strictly controlled in what it does and how it does it.

If this matter does ever make it into the public gaze, then it won't just be a few individuals in the media or security service who'll get hit. The UK is supposed to be a civilized democratic country (East Germany called themselves a democracy and they had the Stasi, but anyway). In a civilized country these things shouldn't be happening - and it is ultimately Parliament and the government who are answerable for not imposing sufficient restraints and accountability on those who are supposed to be ensuring security for citizens, not jeopardising it.

I don't have florid symptoms. But I'm in a difficult situation, because those people who don't know, aren't going to believe, and those who do, they just go along with the crowd. It's never a good idea to go against the grain, and the grain here is defined by interests in the establishment and the media. Even people who could say out loud what was happening won't, because then there's a risk that they'll be seen as traitors and ostracised.

Usually this type of 'hidden abuse' is racial and targetted at a racial minority within a country. You keep the minorities out of the good jobs, but you don't admit discrimination exists. It happens everywhere, not just in Britain. The persecution that is going on now is in reality a refined form of racism. Instead of "nigger" it's "nutter", and abusing the mentally ill is still socially acceptable today. In 50 years it might not be, but today there isn't any social or legal sanction against it.

So really they've refined racial harassment down to a minority of one. The words may be different, but the methods are the same.

(sent 20/11/96)
Subject: No Justice for those with mental illness
Newsgroups: uk.misc,uk.legal
Organization: Toronto Free-Net
Summary:
Keywords:

Well, the "legal option" has just foundered on the rock of lawyers refusing to deal with me on the grounds that my perception of harassment must be due to the disease.

So we're back to square one again, the same place we were two years ago.

Now perhaps one of our uk.legal participants can clarify this point. To me it seems illogical that lawyers should have the final say on whether you are allowed to proceed with a civil case or not. Is there a default mechanism or agency for cases such as mine where it is difficult to find a solicitor to represent you? What exactly is the "official Solicitor"? What is it possible to do if you can't find a lawyer to represent you?

A chance to get a useful response out of the uk newsgroups! perhaps they can be good for something else besides spamming.
.....

Represent yourself....like the defendants in the McLibel trial.
you will need to read some law..but you CAN legally represent yourself I believe.
Mike W.
.....
From: burridge@osiris.win-uk.net (Paul Burridge)

Yes, a lot of people do this nowadays. Saves on legal fees too. Lots of reading up required first, though.

What can I do to get competent legal help though? If the case is on the face of it so bizarre that no solicitor would represent me or talk to me, then surely there must be a default mechanism? What is the "official Solicitor" that's been mentioned?
.....

All you need do is go to a good library & read up about it - that's what the McLibel 2 did.

Subject: "Absolute Obscene" David Hepworth (GLR)
Newsgroups: uk.misc,uk.legal,alt.radio.uk,uk.media,uk.media.radio.misc
Organization: Toronto Free-Net
Summary:
Keywords:

Last night (21/Feb/97), I was listening to BBC GLR. You have to understand that I was listening by stealth. Back in 1990 I used to have Capital blaring out of the speakers all over the garden ("if he listens to Capital then he can't be all bad", thanks ever so much). But now I listen on my walkman on headphones with the volume turned right down. It could not possibly be overheard by any listening device, no matter how sensitive, because sound does not carry from the headphones.

Yet somehow they are still able to tell which station I am listening to on the walkman. And last night, I bravely tuned to GLR 94.9FM at around 8.45pm. Everything went well for the first half hour or so. The DJ (today GLR told me it was David Hepworth) had a "rock star spelling competition" (how do you spell Shakespear's Sister?), no trouble there. I was recording the show onto tape just in case anything unpleasant happened, as I had reason to think it might.

Around 9.10pm, it did. Here, precisely, is what Hepworth said after the song "Come Around" by the Muttonbirds (I have this on tape, and at some point will be posting the audio on my website);

"New album's called 'Envy of Angels', that comes out soon, that's the single that's already out, I would imagine, that's 'Come Around', the Muttonbirds, er, coming up after this, we got the rock-and-roll A-level, we have, I assume, Brian do we have an embarrassment of prizes in there, we do, don't we, (EMPHASIS) absolute obscene (END-EMPHASIS) amounts of prizes, there will no doubt be a riot at the back door", and that's, er, A-level coming up after this"

The key phrases in what he said are, "EMBARRASSMENT of prizes", and what he himself emphasized verbally, "ABSOLUTE OBSCENE amount of prizes". It is my belief (based on content and tone of voice) that when he spoke these phrases he knew I was listening, and that the phrases refer directly to my situation. The "EMBARRASSMENT" is the embarrassment he and other media people would feel at having their wrongdoing exposed; the "ABSOLUTE OBSCENE" (which he verbally emphasized) described the disgusting sexual abuse which the harassers have been throwing at me.

Needless to say, I can't prove this is what he meant, although this has happened enough times that it's hard not to recognise it when you see it. But I shall be sending him a copy of this explanation. We'll see what he has to say

for himself.

I will try to explain with greater clarity.

I am prone to have ideas of "interactive watching" by people on TV, and
"interactive listening" by people on the radio; which means as I listen to
their programme, they are aware that I am listening (because my home is spied
on, and those doing the spying phone up the radio station and tell them that I
am listening to them), and they then interject nasty remarks in what they say.
This is what I believe may have happened on Friday night with GLR, and what I
was trying to explain in my article.

It's happened before with other radio stations, most worryingly when I am
listening quietly on my walkman as happened on Friday. This time, the
interjected words were "embarrassment" and "absolute obscene". The "absolute
obscene" referred to the abuse which is currently being directed at me.

I hope that's a little clearer.

But it is possible that those two sets of interjected words could have
validly referred to something else.

Subject: "Scandalous, Frivolous or Vexatious"
Newsgroups: uk.misc,uk.legal
Organization: Toronto Free-Net
Summary:
Keywords:

A couple of weeks ago I issued a summons against the BBC in my local county court, for the tort of private nuisance caused by the spying by their newsreaders on my home. My argument was that their spying had prevented me watching the news at home, and therefore interfered with my normal use of my home.

The BBC's Litigation Dept at White City have replied not with a defence, but with an application for my claim to be struck out because;

(a) it discloses no reasonable cause of action; and/or
(b) it is scandalous, frivolous or vexatious.

Their application will be heard next week. They have not made any affidavit in support of their application, nor have they given particulars as to why they consider my summons to be unarguable in law, which would be a necessary condition for there to be no reasonable cause of action.

I am more worried about point (b). Allegations are scandalous (says Stuart Sime's book) if they impute dishonesty against another party; which my allegations do, against the BBC's newsreaders. As for frivolous or vexatious, I think that will be up to me to make a good argument for the effect the BBC's spying has had on my life, and up to the district judge's opinion of my case.

Apparently seeking to have a claim struck out in this way is common practice when the plaintiff is a litigant-in-person. Even if it is struck out, there is always the opportunity to appeal. I think we could be in for a fight next week.

Yep. Just not, the, I think 180 posts, one week, when his illness
got really bad. Oh yeah, and there was only three real posts,
just repeated 60 times.

>Mike does a first class job of drawing out the real personality
>of the person hiding behind a node name. The way people react
>to Mike gives it all away.

Erm, explain this rather dubious statement.

>As for you. Don't you think it's a trifle condescending to refer
>to people as mad. I know they are homeless and without internet
>access, but maybe they are just eccentric.

Congratulations. This is my first real flame for about a year.

I try to control my anger when I come across another uninformed
naive idiot on usenet, but sometimes it goes free. We've had Corley
for well over three years now, and his constant spams of various degrees
have killed a couple of usenet groups I really rather lied. uk.media,
to name but one. I gets my goat to read another useless fucker
thinking he is a harmless eccentric.

Mike is mentally ill. He is unwilling to deal with it. He seems to
think that uk.misc is some sort of forum that MI5 reads. And it
should be avenged. He's mailbombed a large quantity of people,
because they opposed his spamming.

1. He thinks MI5 watches him through his television
2. He thinks all references to mad people, refer to him
3. He thinks all people shouting, are shouting at him.
4. He's been diagnosed as mentally ill, just not a paranoid
schizophrenic.
5. He gives not a shit about any newsgroups he abuses.
6. He goes through quiet periods, then _very_ nasty periods.
7. All evidence of this great conspiracy is laughable, to say the
least.
8. He gives internet/usenet a bad name to the media. Including
mailbombing Chris Tarrant and faxing various celebrities.

I do not condescend to him. I actually know what he does, and has done
in the past, and am frankly not too respectful of him. He can be openly
referred to as "mad" because he is. Let's check my mailbox saves:

>
>WTGROMT (well that's got rid of me then!)

Have you actually visited his web page, and read the massive conspiracy
that is supposed to be against him? Apparently MI5 watch him, but for
no reason. They do it for a laugh. Because they can. It costs them a lot
of money, but they still do it. Reality is but a memory for this man.

>MC had seen the light and stopped spamming.

He hadn't seen the light at all. His level of spamming had got to
such outrageous proportions that we had to mount a concerted
attempt to get his account(s) closed. The reason for the lack of
spam lately is that Mike has been furiously swotting up on Law so
he can bring an action as a LIP against the BBC (all solicitors
having quite rightly and honourably declined to act for him). When
this course of action is exhausted without result, I confidently
predict that we will once again be the innocent victims of his ire
and the spamming will commence again.

Subject: I am being ignored
Newsgroups: uk.misc,uk.legal
Organization: Toronto Free-Net
Summary:
Keywords:

Something mildly unusual is happening. Nobody has been getting at me for the last couple of weeks. Best of all, about three weeks ago I bought a video recorder to try to get some evidence from the News etc, and despite having watched Martyn Lewis, Michael Buerk and the whole lot of them, not one of them has said anything to me in the last three weeks. And I have been listening to and recording Capital, with no ill effect. All in all, I am being comprehensively ignored.

Of course, I should have video-taped the news programmes back in 1990/91/92 (and even 93) when it was still all going on. Anthony Johnsson (casually name-drop to stick the knife in) will tell you how intelligent a person I am, yet I didn't have the good sense to record the programmes at the time, and it's a bit late now.

Today another avenue of exploration closed when my second summons against the BBC was struck out (basically through lack of evidence), and an order was made by the district judge saying that I could not sue John Birt again without the express permission of the court. She explained that this was for my own good, to save me the summons fees. Costs were not awarded though (the BBC didn't even really seek costs), and I am free to sue anyone else I take a shine to.
.....
It is not that you are being ignored.... it is just that as your mental health improves, so your paranoia eases.

OR...

The dark forces are gathering strength for the final battle with you...

Seriously though, it's nice to see you back - cos as long as they are persecuting you, I can relax knowing they haven't got time to bother me!

Mike Corley (bu765@torfree.net) wrote:

[unreasonable optimism snipped]

Well, that didn't last very long, did it?

Capital Radio this evening approx 8.35pm, Neil Long's programme a few moments after I switched to it (I am listening to it as I type this). The following spouted from his mouth;

"want to see Jacko in town? what a gig it's going to be, that guy is amazing, and PSYCHOTIC, but amazing on stage, 0171-4200958, on stage he's a MADMAN but he's wonderful"

God, I am so tired of this. It's been going on for seven years. When's it going to stop?

I have the above extract on tape. When I get around to it I will post it, and the Hepworth snippet, as audio files on the website. Of course, all the doubting Thomases and Smids can carry on doubting, because the mere fact that moments after switching on the DJ starts talking about "psychotic", that's not proof is it?

I wrote an aggrieved letter to Chris Tarrant at Capital and sent it off today, copied to Richard Park, Group Director of Programmes. I suppose they'll just lie as usual. Bastards, basically.
.....
The solution is surely to not have a TV, video, radio or telephone in the house, Mike. That way they can't be used to watch you.

>The solution is surely to not have a TV, video, radio or telephone in
>the house, Mike. That way they can't be used to watch you.

No. I tried that strategy in 1990/91 when I sold my television and stopped
listening to the radio. It didn't work because they got at me through
co-workers and eventually the general public.

The solution is to gather evidence by recording everything, and then complain
or sue if possible. I wish I'd recorded it all five or six years ago, then I
might be more successful in a legal action now.
.....
Did anyone else watch the X-Files on Sky last night (Sunday 13th April) and
recognise Mike's symptons in the chap with the tattoo? It was quite
interesting to see someone responding in precisely the same way, picking up
on individual words and phrases in ordinary sentences and applying parts to
themselves as though they were intended.

Not a pleasant ending though. You take care, Mike, and keep taking the
medication. uk.misc just wouldn't be the same without you now.

>moments after switching on the DJ starts talking about "psychotic", that's not
>proof is it?

No, it isn't, but you knew that anyway.

Mike, how is it that you think that this can't be a coincidence because
it happened 'moments' after you switched on the radio? Haven't you just
told us that you haven't heard a thing for two weeks? Going two weeks
watching TV & listening to the radio without a reference to 'mad', 'crazy'
or 'loony' is quite an acheivement, especially given the trashy radio you
seem to prefer.

I've just spent a lot of the weekend trying to keep a manic depressive
under control, so that she doesn't have to go back into hospital and
lose the last few months' memories to ECT. One thing I've noticed is
that manic depressives almost seek to foster their fantasies, they
enjoy the control and the high. You seem to be the same - you refuse
to answer the points put to you that explain away what you call persecution
totally - do you have the courage of your convictions to reply to this?
Or do you enjoy the attention your illness brings you?

Mike Corley wrote:

> Something mildly unusual is happening. Nobody has been getting at me for the
> last couple of weeks.

Do please tell the *truth*. It has been longer than *2* weeks as I'm sure
you have noticed, hasn't it ?

Well I claim responsibility for the absence of persecution. When I rang
John Major's personal private secretary, not the personal political one or
any of the others in the same office, and I said you would vote for the
Conservative Party at the General Election the secretary said Johnny would
be so happy and as a sign of gratitude he rang-up the Head of MI5 and told
them to save money for tax cuts by abandoning forthwith their campaign
against you. Consequently MI5 and MI6 have been able to redeploy urgently
needed resources (i.e. manpower and telecoms interceptions) against an
international band of (*****censored*****).

On behalf of the law-abiding and decent citizens in the British islands, I
would like to sincerely thank you for your invaluable contribution to
crime fighting by your instrumental achievement in releasing badly needed
and very scarce MI5 and MI6 resources.

Many thanks,

Please don't forget it is National Election time and the news broadcasts
at 21:00 on BBC1 are preoccupied with British politics.

> Of course, I should have video-taped the news programmes back in 1990/91/92
> (and even 93) when it was still all going on.

Any particular date in mind ? I have a few in the library. You can also
purchase copies from the BBC on 0181-743 8000 (central switchboard).

> Anthony Johnsson (casually name-drop to stick the knife in) will tell you how intelligent
> a person I am, yet I didn't have the good sense to record the programmes at the time,
> and it's a bit late now.

Perhaps it is for the best. Now that it is all over, you can return to
Canada. Did you manage to get your Canadian citizenship ? What did your
contracts at MI5 say about you becoming Canadian ? You never did mention
the name of your MI5 liaison officer nor of any of the others.

That's true. But as it is now all over there is no need to worry about
the past. MI5 said your file has been removed from the Registry and put
in a burn-bag so there is nothing left for anyone ever to find.

By the way, what was the URL of your famous Corley web site ?

I have to admit that it is actually mildly amusing to have newsreaders watching
you, although it is tiresome after a bit. I am currently in an interesting
situation, because after my lawsuits against them I think the BBC newscasters
have stopped watching me entirely; I also think that ITN, in particular John
Suchet, *are* still watching but they're being subtle about it (his blink
pattern followed mine).

Being called nasty words is quite horrible though, and seems gratuitous; what
do they gain by it, except to exercise their sadism?

: >I think we all ought to remember that schizophrenia is a

You have. They're not pleasant atmospheres, especially the secure wings,
which have more in common with prisons ('airlock' doors, list of 'banned'
articles, continuous observation). They have to be that way, unfortunately.

>Uh-oh. Peak Practice slagging you off as well now, eh Mike?

You better believe it. Tuesday's episode had one of its characters being
labelled as a "lunatic" with "something wrong with them". I changed channels
rapidly at this point, but in retrospect perhaps I should have carried on
watching and taped the program.

A few days ago I bought a video recorder (about time too) for evidence
gathering purposes. But strangely the TV news (both BBC and ITN) haven't
uttered a sound over the last few days. Almost as if they know they're being
taped...

And?

There are many characters in TV programmes who _are_ lunatics with
'something wrong with them'. Why do you think this alludes to you?

In the eponymous book, Cervantes' Don Quixote is described as 'crazy'
'mad' and 'lunatic'. Do you think this is a reference to yourself,
albeit written by a time-travelling 17th century Spaniard?

If you accept that the character of Don Quixote can be described thus
without it being a reference to you, what problem do you have with
Peak Practice? Or do you enjoy tilting at your own little windmills?

A friend's lodger has turned out to be paranoid schizophrenic. Her
obsessions are strikingly similar to yours, she is convinced that she
is being bugged, and that students at her college are making fun of
her for being foreign. She has been looking for the services of a
private detective. Maybe Oxford has this unfortunate effect on foreigners?

I must say that I'm surviving rather well, or that's what the man
under the stairs told me yesterday.

1142. MI5 Persecution: Victor Lewis-Smith 9/5/97 (16157)

Newsgroup: comp.sys.atari.8bit
Date: 2007-08-20 18:43:20 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07072018431655@4ax.com>
Source record: 4229
Cross-posted to:
comp.sys.atari.8bit,fr.comp.sys.mac.materiel,microsoft.public.sqlserver,sfnet.keskustelu.politiikka,tw.bbs.literal.lyrics

Victor Lewis-Smith has broken the silence in his TV review column "Goon and best forgotten" in the Evening Standard (on Thursday 8/May). He said, "If I sound paranoid, that's probably because I once worked there. Eventually, I had to leave because they were all trying to kill me but, for sheer pathological hatred of the Corporation, I couldn't hold a candle to Spike Milligan".

I take this to be about me, because recently I wrote to both the BBC and Capital Radio, saying "I believe the current purpose of the harassment is to force me to kill myself to prevent the harassers, yourselves included, from being brought to justice, and last year there were several incidents of people shouting 'suicide' at me, which would appear to corroborate that view." I think VLS's words about the BBC "all trying to kill me" shows he has seen or heard of what I sent to the BBC or Capital.

Nasty eh? I believe that VLS or his mates read this newsgroup. I wonder how he would explain his article?

Erm, Mike, I'm a bit of a fan of Victor Lewis-Smith, ever since his days of "BuyGones". I must admit, he often likes to play the flawed lunatic evil nasty person. He's been doing it for years, with prank calls, far

before your illness. Its his act. He wouldn't be VLS without it.

He doesn't like the "Goons" either. It isn't about you.

>I take this to be about me, because recently I wrote to both the BBC and
>Capital Radio, saying "I believe the current purpose of the harassment is to

>VLS's words about the BBC "all trying to kill me" shows he has seen or heard of
>what I sent to the BBC or Capital.

I don't think Victor Lewis-Smith has worked for the BBC (or Capital) for
several years (1994 was the last time...), so the connection, is paranoia
here.

Personally, I believe VLS as a person of reasonable integrity, who wouldn't
give a fuck about you...

>Nasty eh? I believe that VLS or his mates read this newsgroup. I wonder how he
>would explain his article?

Keep up the medication, not as many people read this newsgroup as you think,
even though you are now incorporating that into your illness.

Victor? Are you there?

Subject: David Hepworth (GLR) is taking the piss
Newsgroups: uk.misc
Organization: Toronto Free-Net
Summary:
Keywords:

>Last night (21/Feb/97), I was listening to BBC GLR. You have to understand that
>I was listening by stealth. Back in 1990 I used to have Capital blaring out of

Not much changes. Today I was listening again to David Hepworth's show on GLR,
having more or less waded in on it by accident. Here is the exchange;

David: "we have executive drivetime, we have Brian in charge of the prize
cupboard. Brian it's not a bad prize cupboard this week is it?"

Brian: "no David it's an absolute (EMPHASIS) embarrassment (END-EMPHASIS) of
prizes this evening" (laughter)

David: "what have we got?"

Brian: "well in my left hand alone we've got that .... Gary Clale, I don't know
if you remember him obviously still alive and kicking...."

David: "Rock and roll spelling test is your first opportunity to take advantage
of this embarrassment of prizes"

What do I read into this exchange? The laughter after the word "embarrassment"
shows they're aware of the last complaint I made on usenet (copied by
snail-mail to them). The "left hand" business is I think a coded way of calling
me a w***er (the term would be better applied to Brian and David).

I have a tape of this exchange, and will eventually get around to posting it on
the website.

1144. MI5 Persecution: Overview (258)

Newsgroup: comp.sys.atari.8bit
Date: 2007-08-20 19:44:20 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07072019441635@4ax.com>
Source record: 4231
Cross-posted to:
comp.sys.atari.8bit,fr.comp.sys.mac.materiel,microsoft.public.sqlserver,sfnet.keskustelu.politiikka,tw.bbs.literal.lyrics

Overview

What all these snatches of video and audio, and newspaper articles, have in common is that none of them provide conclusive or very convincing
evidence of their being directed against me, or forming part of a campaign against me. Other people with my illness doubtless could produce similar
non-proof if they were minded to do so.

Good, now we've got the disclaimer out of the way, we can describe precisely what it is that is on display in this part of the site. In the video
section, we have Quicktime (MPEG-4) clips of Jon Snow of ITN in action, also interviews with Ken Clarke and John Major of the ousted Tory regime. These are
embedded in the page using QuickTime. While each audio/video clip is coded to automatically download the QuickTime player, you may find it helpful to
download QuickTime from Apple's website before you start viewing the media files.

Note that each item is awarded a rating of the confidence I feel that it is directed at me, expressed as a percentage. Items with 50% or
more are probably about me; 100% indicates a "dead cert".

In audio we have MP3 files of harassment at work in Canada in late 1996, also GLR's David Hepworth not even trying to pretend that he isn't getting
at me, and a snippet of Capital. There is also an album track which I have taken as being about me. The newspapers section contains articles by Bernard
Levin on his encounter with a madman who "bursts into tears, and swears it is all
true - and it is". Also a Private Eye cover, and snippet from Victor Lewis-Smith.

I have added several recordings of abuse "in public". By Sept/1998 I had seven minidiscs of such recordings, unfortunately containing mostly very
nasty sexual slanders which I will not be publishing on this website. The recordings were made on a Sony Minidisc Walkman MZ-R30, which I purchased
in Canada in July/1997, with ECM-T140 microphone. After both the MZ-R30 and the microphone reached the end of their lives, in June/2001 I purchased as
replacement my current recording gear, an MZ-R900 walkman with ECM-T145 microphone.

Share and Enjoy! I hope you enjoy partaking in my delusions which have been recorded with high fidelity digital equipment and presented for your
listening pleasure.

comp.sys.atari.8bit,fr.comp.sys.mac.materiel,microsoft.public.sqlserver,sfnet.keskustelu.politiikka,tw.bbs.literal.lyrics

Ken Clarke (1), April 1997

Certainty level: 30%

The first of two video segments from the same program, this shows
Jon Snow interviewing Ken Clarke in April 1997, during the general
election campaign. The following exchange is heard;

Jon Snow: "You say we are booming in your posters, the bust's around the corner"

Ken Clarke: "You took that from three years ago, when I was being
advised to do all kinds of mad things to stimulate the economy,
and being told that I had to take desperate measures to get it going"

At this time I was watching television almost continuously at home,
with a video recorder whirring away, trying to obtain from the
newscasters a reaction which would give them away. I think this is an
instance where it happened. Ken Clarke first darts a glance straight at
the video camera (and perhaps at a monitor next to it showing my living
room), then comes out with "all kinds of mad things", while engaging in a
facial display involving raising of eyebrows and lowering of eyelids.
To me at the time, and also now, it looked as if he was selecting a
context into which he could drop the word "mad" as a directed insult against me.

The main motivation is to see what the expected user experience would be for someone using the most common basic available on a platform. I wound up using the Atari BASIC in the 800/600 XL ROM on my 1200XL, but I'm not convinced this is the solution Atari would have tried to push as it's prohibitively slow compared to other 8-bit machines (2.5x times slower than an Apple //e despite having a CPU that's nearly twice as fast).

In the future I'll probably compare BASIC compilers for different platforms, too.

1147. MI5 Persecution: Ken Clarke (2), April 1997 (2704)

Newsgroup: comp.sys.atari.8bit
Date: 2007-08-20 20:16:42 UTC
From: MI5Victim@mi5.gov.uk

Ken Clarke (2), April 1997

Certainty level: 30%

The second of two video segments from the same programme, this shows
Ken Clarke during the election campaign. He makes the following statement;

"we have a party, and we have a Cabinet which has produced a manifesto
consistent with our policy of the last five years;
people are challenging us on the basis there's been some monstrous
conspiracy between all the politicians to guide us we know not where,
we know where we're going, we wish to be a leading influence in the European Union"

It should be fairly obvious what I read into in the above sentences.
The "monstrous conspiracy between all the politicians" could of course
apply to the public perception of closer European integration, but
I took it as referring to the conspiracy of politicians and
media people against me. Again, facial expression comes into it; as Clarke
speaks of the "monstrous conspiracy" his eyebrows twitch and it is clear
that something or somebody is being made fun of.

1148. MI5 Persecution: Dimbleby / John Major, April 1997 (3927)

Newsgroup: comp.sys.atari.8bit
Date: 2007-08-20 20:33:41 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07072020333707@4ax.com>
Source record: 4235
Cross-posted to:
comp.sys.atari.8bit,fr.comp.sys.mac.materiel,microsoft.public.sqlserver,sfnet.keskustelu.politiikka,tw.bbs.literal.lyrics

Dimbleby / John Major, April 1997

Certainty level: 90%

Dimbleby interviews John Major during the election campaign. Here is
the exchange, regarding Neil Hamilton, the "sleazy" Tory candidate;

Dimbleby: "It's a direct quotation from what he said to Sir Gordon Downey
and what he said to his local newspaper, the Knutsford Guardian".
Major: "Well, heaven forfend that I should doubt what the Knutsford
Guardian actually said"
Dimbleby: "Well I should hope so"
Major: "Absolutely, it would be quite unforgivable to doubt the
Knutsford Guardian"

What I find in this segment is an assonance between "Knutsford" and "Nut"
or "Nuts". I think Dimbleby deliberately invents the play on words,
and says it clearly enough for Major to pick it up and repeat it.
You can gauge Dimbleby's intent from his facial expression of false
honesty when he uses the words "Knutsford Guardian"; and Major's reaction
follows from his recognition of Dimbleby's intent; Major smiles and says
it would be "unforgivable to doubt the Knutsford Guardian".
These are much clearer on the original video than on this Quicktime clip.

Source record: 4236
Cross-posted to:
comp.sys.atari.8bit,fr.comp.sys.mac.materiel,microsoft.public.sqlserver,sfnet.keskustelu.politiikka,tw.bbs.literal.lyrics

Channel Four TV News - 12/Feb/1999

Certainty level: 100%

I am positively, utterly, completely sure this item is about me. It's a bit subtle so the objective reader might not understand my certainty. Here is
what happened. I was watching Channel Four News with Jon Snow, on the day Clinton "got off" (as it were) in the Monica-gate scandal. Snow said;

"[and we're anticipating that the President himself will make his] first comments after the trial in which he has now been cleared at around half-past seven. So we'll have more on the historic judgment, we'll also be considering [starts smiling] the winners and losers in this whole sorry saga. Now further doubts have been...."

When Snow said "half-past seven", I looked at the clock on the mantelpiece above the TV. Snow saw my glance, and in reaction to my glance at the clock,
smiled. I think he was smiling at what he perceived as my self-importance.

Usually when newscasters or radio presenters laugh at me, there is an excuse for their laughter; usually they manage to find some reason for my
being "funny"; their amusement is blamed on me; it is my "fault" they are laughing. And so it was with this instance; Jon Snow thought it was funny
that I should be so interested in seeing Clinton, and his half-smile while reading the words "winners and losers" expresses that.

I wrote to Snow at ITN shortly after this broadcast to ask him about his behaviour; of course, he didn't reply.

Cross-posted to:
comp.sys.atari.8bit,fr.comp.sys.mac.materiel,microsoft.public.sqlserver,sfnet.keskustelu.politiikka,tw.bbs.literal.lyrics

Chris Tarrant - 10/March/1999

Certainty level: 25%

This one might be aimed at me, or it might be tinged with a whiff of intent, although I only give one chance in four for Tarrant's thoughts being aimed
at me when he said this. During his "Who wants to be a Millionaire" TV show in March 1999, he said;

if you're watching the show jumping up and down screaming at the telly,
remember you could be here. You can either seek professional help or call us...

The background is as follows. In early March I'd sent a quantity of emails to Capital FM, the London radio station where Mr Tarrant has his breakfast
show. They were addressed to the email account which Mr Tarrant used to read emails posted on Capital's website. Capital objected to the quantity
of emails - in fact, they contacted the Metropolitan Police's Computer Crime unit, who, in turn, "felt my collar" by giving me a verbal warning
over the phone to cease this behaviour.

The emails contained the words which I had heard Mr Tarrant speak in early 1994, namely;

"You know this bloke? He says we're trying to kill him.
We should be done for attempted manslaughter".

At the time of writing (May 1999), the Police have not told me what aspect of the emails was "illegal", nor despite my repeated urging have they
questioned Mr Tarrant about his remarks from 1994.

Regarding the clip from Tarrant's show above. The Police spoke to me on the afternoon of Wednesday 10 March 1999. Tarrant's live show went out
that same evening. The Police have told me that after speaking to me they told Capital FM that they'd spoken to me regarding the emails. So Tarrant
would have known by the time of the show who'd sent the emails and why.... and it's quite possible that his remarks about "seeking professional help"
were aimed at me personally following my attempts to persuade him to own up to his 1994 remarks.

Thanks! BTW: I agree with your results so far, Atari BASIC is a real dog.
It does have a few blessings but they are few and far between. Just as a
for instance, all variables are treated as 6 byte<?> floats. You end up
with a slower but more accurate system but it doesn't do the industry
standard 4 and 8 byte floats everyone else does. IOW: You can't drop to
4 byte floats for speed or go to 8 byte floats for accuracy but are
stuck in the middle.

Then there is the strings of any length vs. the ability to dim string
arrays.

Ultimately when you go to compiling or assembly or faster languages I
believe it will still come out more like a tie. The problem is the Atari
ANTIC chip shuts down the 6502 while the display is up. This makes the

1.79 MHz clock speed ~1.2 MHz when it comes to instruction execution.

Rick

1152. Superdos 5.1

This is actually one of the main reasons.

One can switch DMA off to get a very(!) noticeably speed increase.
The only problem is that you get a screen "full of background color".

IIRC one only needs to POKE 559,0 to switch DMA off.
To restore the picture later one would first PEEK the original value.

Another solution would be using a screen mode with 20 instead of
40 characters per line which reduces the amount of ANTIC accesses.

bye
Marcus

1158. MI5 Persecution: Chris Tarrant - 10/March/1999 (258)

Newsgroup: comp.sys.atari.8bit
Date: 2007-08-25 05:49:06 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07072505491225@4ax.com>
Source record: 4245
Cross-posted to:
comp.sys.atari.8bit,fr.comp.sys.mac.materiel,microsoft.public.sqlserver,sfnet.keskustelu.politiikka,tw.bbs.literal.lyrics

Chris Tarrant - 10/March/1999

Certainty level: 25%

This one might be aimed at me, or it might be tinged with a whiff of intent, although I only give one chance in four for Tarrant's thoughts being aimed
at me when he said this. During his "Who wants to be a Millionaire" TV show in March 1999, he said;

if you're watching the show jumping up and down screaming at the telly,
remember you could be here. You can either seek professional help or call us...

The background is as follows. In early March I'd sent a quantity of emails to Capital FM, the London radio station where Mr Tarrant has his breakfast
show. They were addressed to the email account which Mr Tarrant used to read emails posted on Capital's website. Capital objected to the quantity
of emails - in fact, they contacted the Metropolitan Police's Computer Crime unit, who, in turn, "felt my collar" by giving me a verbal warning
over the phone to cease this behaviour.

The emails contained the words which I had heard Mr Tarrant speak in early 1994, namely;

"You know this bloke? He says we're trying to kill him.
We should be done for attempted manslaughter".

At the time of writing (May 1999), the Police have not told me what aspect of the emails was "illegal", nor despite my repeated urging have they
questioned Mr Tarrant about his remarks from 1994.

Regarding the clip from Tarrant's show above. The Police spoke to me on the afternoon of Wednesday 10 March 1999. Tarrant's live show went out
that same evening. The Police have told me that after speaking to me they told Capital FM that they'd spoken to me regarding the emails. So Tarrant
would have known by the time of the show who'd sent the emails and why.... and it's quite possible that his remarks about "seeking professional help"
were aimed at me personally following my attempts to persuade him to own up to his 1994 remarks.

comp.sys.atari.8bit,fr.comp.sys.mac.materiel,microsoft.public.sqlserver,sfnet.keskustelu.politiikka,tw.bbs.literal.lyrics

Nicholas Witchell - 10/April/1999

Certainty level: 100%

This clip is of Nicholas Witchell reading the BBC2 evening news at 7pm on Saturday 10 April 1999. You have to understand that the psychopaths of
the Security Service consider their abuse of me to be "so funny"; and central to their persecution of me is their inducement of their "bought
journalists" like the BBC's Nicholas Witchell to laugh at me on television.

So in this clip we see Witchell smirking and grinning while he reads the news. Only part of the news broadcast is shown in the clip; preceding it,
Witchell's upper lip quivers in mirth for several minutes, until his entire mouth twists into the uncontrollable smile shown in this clip,
through the excuse of a weak non-joke about sports fixtures.

1160. MI5 Persecution: England expects every man to do his duty (2704)

Newsgroup: comp.sys.atari.8bit
Date: 2007-08-25 06:41:45 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07072506415231@4ax.com>
Source record: 4247
Cross-posted to:
comp.sys.atari.8bit,fr.comp.sys.mac.materiel,microsoft.public.sqlserver,sfnet.keskustelu.politiikka,tw.bbs.literal.lyrics

"England expects every man to do his duty"

Certainty level: 90%

This video clip portrays a fairly-certain case of unpleasant MI5 harassment; because of context, surrounding events,
not just this one happening. It's the first time an MI5 agent has been caught on video, and, presumably to their chagrin,
their paid agent is either engaging in an onanistic practice, or, more probably, pretending to do so, in order to
carry out an act of harassment.

The background is as follows. In late June 2000 I had posted the following message to Usenet, about MI5's making
obscene noises at me on several recent occasions;

>From: bu765@torfree.net (Mike Corley)
>Subject: relax, don't do it (mi5 again)
>Date: 22 Jun 2000 00:00:00 GMT
>
>you will recall that a couple of weeks ago I was supposing what MI5 were
>doing with their 'single'handed' posting antics at 2am
>
>exciting stuff
>
>so about a week ago someone rings me up at home.... 'is that Emmanuel
>Goldstein?' then he phones back the following day and goes 'huaaaagh' on
>the phone before dropping the handset in excitement
>
>and a day or two later, just coming out of our house to put something in
>the rubbish bin, a pair of blokes over the other side of the road, again
>start making orgasmic noises
>
>I'm not paranoid enough to record minidisc when I pop out for a few
>seconds..... but perhaps I should be

The video clip, which was captured on 1/September/2000, is the culmination of that thread of harassment. You
have to understand that MI5's abuse is in threads; they choose a topic, and then continue with it for months
and years. Sometimes they drop a topic, usually to be replaced by a worse one, and you never hear of it again.

If the person in the video clip were not an MI5 agent, then he would deserve privacy, despite carrying out a real
or feigned act in a public place. But I am almost 100% sure, because of context, that this man was one of their
operatives, which removes any consideration of privacy from his act. He is facing away and cannot be clearly
identified from this clip. I've never seen this man before or since, but that is true of most other such incidents.

1161. MI5 Persecution: C4 SnowMail - January/2001 (3927)

Newsgroup: comp.sys.atari.8bit
Date: 2007-08-25 07:12:49 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07072507125528@4ax.com>
Source record: 4248
Cross-posted to:
comp.sys.atari.8bit,fr.comp.sys.mac.materiel,microsoft.public.sqlserver,sfnet.keskustelu.politiikka,tw.bbs.literal.lyrics

C4 SnowMail - January/2001

Certainty level: 50%

In January 2001 I signed up for Channel 4 TV News's email service SnowMail, under an anonymous email address.
Quite soon Jon Snow and others started getting at me in the SnowMail bulletins, so I promptly unsubscribed.
Here are three distributed messages which may be intended to be against me; I have given these items a joint
probability of 50% only, since it is quite difficult to be sure these are against me, although I think they
may well be.

First item is from 5 January 2001. "Back passage contacts" might genuinely be about Labour were communicating
in a shielded way with ITN; but it may be about Snow's covert communications with me on his programme and in
this bulletin; and it's a slightly strange thing for him to say, it suggests the human body's back passage.
"I wish they'd come and talk on our website".... Snow knows I'm subscribed to his mailing list, and he may be
encouraging me to talk to him by email; again, if that comment were genuinely about Labour, then it would be
a strange thing to say, since the politicians talk to Snow by phone and on his programme, so they wouldn't talk
to him by email; my suspicion at the time is that he was trying to persuade me to talk to him by email,
so he could decently lie that my thoughts of reference were incorrect.

From: "Snow C4N, Jon"
Subject: Channel 4 News briefing
Date: Fri, 5 Jan 2001 17:15:06 -0000
MIME-Version: 1.0

January 5, 2000

Good afternoon dear viewer,

Well the 'snowmail' drew a little ire from Labour HQ yesterday. A sensitive call at 6.35pm from my friendly
mentor there sought to correct the impression I gave in yesterday's missive that in some way Labour was bounced
into naming these latest millionaire donors. Well I'm afraid they were...rest assured Paul

Hamlyn would not have
been named without the diligent sleuthing of my colleagues, and had HE not been named
neither would these latest two.

The only serious inaccuracy I must plead to was the promise that we would put these matters to a 'senior Labour
person'...alas none was forthcoming...I shall make no such rash promise again. My same mentor was on the phone again
during last night's Channel 4 News urging us to 'get some reality into the programme'. I fear we may have touched a
sensitive nerve...and the election campaign has not even started, or has it? I shall try to keep you posted with these
'back passage contacts' as the campaign unfolds..from all sides. I do wish they'd come and talk things over with all
of us on the web site...here's an open invitation...

So to today:

Harold Shipman murdered as many as 250 people it now turns out. But he is never to be tried and relatives who seek
closure to their uncertainties will never reap satisfaction..we have the DPP, the Chief Medical Officer and a solicitor
for aggrieved and bereaved families on the programme..the world's second-worst mass murderer..can he be allowed to
escape further action?

Sending private/sexy emails in company time gets workers the sack..Big Brother spies on office premises..is electronic
life in the work place getting out of hand? We explore what we can...and if you are not sure what you can and can't
send, our site spells out the legal dos and don'ts and gives you the chance to put your views to us.

The CIA publishes its risk assessment for the world in the coming years..beyond the CIA itself, what's the biggest
threat to life and liberty? Find out on Channel 4 News..and a major encounter with a man expected to take a top job
in the Bush administration...

And a sumptuous piece from Nicholas Glass in Valencia..a city transformed by a brilliant young architect for half
the price of what the Dome cost us.

Lots moving, see you at 7.00,best as ever,

Jon Snow

The next contact was on 11 January, with the unsubtle words "the lunatics have taken over the newsroom"
from Krishnan GM. The phrase needs no explanation as to why it might be a dig at me.

From: "Guru-Murthy C4N, Krishnan"
Subject: Channel 4 News briefing
Date: Thu, 11 Jan 2001 16:56:25 -0000

MIME-Version: 1.0

January 11, 2001

Good Afternoon. Jon's away so the lunatics have taken over the newsroom. I am joined by Samira for tonight's show.

The Depleted Uranium confusion deepens. What did Ministers and senior officers know about the risks to soldiers?
What did they tell others? And why the lack of candour over the recent documents that have surfaced? Having
dismissed the army report leaked yesterday warning of the dangers of exposure to DU as written by a trainee and
littered with mistakes, the Ministry of Defence now accepts it was written by an experienced officer.
But they won't say who. More awkwardly it emerges that senior officers decided a month after it was written that
the report should be circulated to all personnel likely to come into contact with DU. But was it? Nobody seems to
know. Our Science Correspondent Andrew Veitch has also visited the lab in Oxford that could begin testing
veterans for Depleted Uranium within six months, but they have had no contact from the government as yet. From
the Tories, Mr Duncan Smith is likely to join us. And we have Defence Secretary Hoon coming into the studio to
answer the obvious (and not so obvious) questions.

No interest rate cut today from the Bank of England, but could it be next month? As real fears are raised about
the likelihood of recession in the US how could it affect us over here? There's been a recent consensus that
Britain could weather the storm instead of falling into the usual pattern of shadowing American trends. But how
realistic is that? And what about all that inward investment we rely on from the States? Liam Halligan has been
looking at just what impact economic downturn across the water would have on us.

The former Bosnian Serb President Biljana Plavsic pleaded not guilty to charges of warcrimes including genocide
today. She was number two to Karazdic and a reputed hardliner during the "ethnic cleansing" of Bosnia.
But has a deal been done on her sentence if found guilty? Just why did she get on a plane and give herself up
to the Hague War Crimes Tribunal? Nobody seems to have any explanation. Her lawyers are asking for special
accommodation and even the possibility of bail. Gaby Rado is there and joining us live is the first Prosecutor
in the Hague Judge Goldstone to discuss whether plea bargains and deals are the only way to get the real villains.

Also the astonishing news that scientists in America have bred the first genetically engineered monkey. What will

they be used for and what's the next step? Does anybody really believe they won't do it to humans before too
long? Julian Rush will have details.

All that and loads more at seven. See you then, I hope. Krishnan.

The third and final item is from 24 January, shortly after which I unsubscribed from SnowMail. Again, it is difficult
to be sure if this item refers to me; it may do, it may not do, 50% captures the possibility. Snow refers to
"third leg of [Blair's] political footstool". In English culture "third leg" indicates one's male member;
Snow's phrase may be a sexual reference, of which there were others around that time.

From: "Snow C4N, Jon"
Subject: Channel 4 News briefing
Date: Wed, 24 Jan 2001 16:37:36 -0000
MIME-Version: 1.0

January 24, 2001

Good evening dear Channel 4 News viewer,

There are times in this business when you suffer severe attacks of deja vu...haven't I already said "Mandelson
Resigns!"...I'm afraid I have, and tonight I shall say it again. He's gone, the fat lady has not only sung but
died completely and utterly on his career...that is the end of the former Northern Ireland Secretary's political career.

It's a body blow against Blair for whom Mandelson was a mentor, manipulator, calculator, friend, brother and the
third leg of his political footstool.
It's a body blow for a Prime Minister who has had to have him resign not once but twice. It calls into question
Tony Blair's judgement. Mandy, probably one of the most brilliant spirits in politics, flew too close to the
sun...suffering finally at the hand of his own diabolical flaw.
Amazingly it's a flaw Blair understood more keenly than anyone...

And then there are the Hindujas who have compromised every political party with ridiculous photographed party
poses..who are they and how do they work?
Masses moving on all fronts on this story tonight. We have the resignation speech in full on our site www.channel4.com/news;
if you want to see how Mandelson bowed out.

There are other developments:

The cancer tragedy at Nottingham Queens medical centre..the wrong drug going into the spinal column of an eighteen-year-old
Leukemia victim who's now in intensive care, dangerously ill...it's happened before..why has it happened again?

And a moving interview with Sharon Sage who's mother Lorna Sage wrote a spell binding memoir highly rated in last night's
Whitbread Prize. An exceptional piece....

A highly political night....see you at seven on four...best, as ever, Jon

After this email I unsubscribed from SnowMail. I could not be sure that these items were or were not about me,
but it's an unpleasant feeling that Mr Snow might be getting at me in writing, as he certainly was when he watched
me while presenting the news; so I cut my losses, so to speak, and bailed out.

BBC-TV "See You, See Me" - 7/Dec/2001

Certainty level: 80%

On Friday 7 December 2001, BBC Schools aired a TV programme from their "See You, See Me" series.
The series was based in Scotland, with Grant Stott and Wilma Kennedy trying to find some stolen jewels.
Its web home is www.bbc.co.uk/scotland/education/seeyouseeme/

The programme appeared to make some "subtext" references to my situation. Kennedy refers to "it's not fair",
which is a key phrase; its existence started with OCTS MD Hugh S.-W. who humorously referred to my treatment
with the same phrase.
The subtle statement is that it is fair, because we're doing it, and we're always right, even when we're wrong.

The phrase "useless idiot" from the police chief is a clear insult directed at me, and needs no explanation.

But it is the third item in this clip which is most telling. Stott says the words, "humiliating in front of
the whole public, it would crucify us" if the investigation were called off. That's the phrase that assures
this clip of an 80% probability rating. MI5 are trying to humiliate me "in front of the whole public",
and their strategy is a mixture of ambiguous covert, such as this very programme, and clear overt.

Channel Four TV News - 10/April/2002

Certainty level: 80%

I was watching Jon Snow on Channel Four TV News on Wednesday 10 April, and he again reacted on seeing me
watching his programme. At 7.25pm he was reading an item on atrocities during the Balkan war;

JS: "It was Europe's worst massacre since the Second World War, and Dutch army officers [cough] and the
United Nations should share the blame. So says the first authoritative report into the murder of
thousands of Muslim men in Srebrenice at the height of the Bosnian war in 1995. The 7,500 page document
took Dutch Government researchers six years to prepare, and it condemns military and political leaders
for sending peacekeepers on a mission impossible. Our Foreign Affairs correspondent Gaby Rado,
who went to Srebrenice very soon after the massacre, is with us now. Gaby, how damning is this report?"

GR: "Well it is very severe. It accuses the Dutch Government of sending badly armed and badly briefed
Dutch soldiers into a very dangerous space out of a sense of national arrogance basically. It accuses
the United Nations basically of..."

There are two incidents in this one recording. The first (80% certainty) is when Jon Snow develops a frog in
his throat in the first sentence, shortly after reading the text "Europe's worst massacre". There is both
verbal expression and facial expression at that point; he is laughing at me, which is at odds with the serious
material he is reading. His eyebrows twitch upwards, and he is smirking at the phrase "Europe's worst massacre", and its application to the Security Service's actions against me. Another aspect
is that when Snow said "Europe's worst massacre", I facially reacted; in return, Snow would have seen
my change of expression, and followed it with his own reaction. He almost says "United States" instead of
"United Nations"; he isn't looking at his autocue, his mind is off what he is reading, instead he is looking
at me in the little monitor where he sees me through the television.

The first incident I'm fairly sure about, but the second I only give a 20% certainty to; it's when Gaby Rado
talks of a "sense of national arrogance", supposedly about the Dutch, but perhaps the English actions
against me for over a decade. If Rado's statement were about me, then it would be condemnatory of MI5
as being "arrogant"; but I cannot be reasonably certain it's about me, or much less so that Snow's
reaction in the first instance, anyway.

BBC1 TV News - 18/Dec/2002

Certainty level: 30%

This item occurred on Wednesday 18/December/2002, on BBC1 TV News shortly after 6pm. It is one of the "coincidence"
category of happenings, where people by supposed coincidence repeat exactly the words I have said or thought very recently.
In this case, the BBC's New York correspondent Stephen Evans, live from NYC, says the words "airy fairy language",
during a piece on Britain's entry in the competition for a successor to the WTC after 9/11.

I had been thinking the words "airy fairy" a day or two previously and may have spoken them in my sleep. I did not speak them awake.
The TV practice in 1990-92 had been to repeat on TV/radio (or at work) words which I had either spoken while awake, or words I had
thought but not said consciously - since I know that I sometimes say things in my sleep, but cannot later recall saying them,
obviously since I was unconscious at the time. The TV news reader or reporter then finds a context in which to drop a particular phrase;
this practice has a famous exemplar in the "Phil the Greek" item relating to the Duke of Edinburgh - who had been called Phil the Greek
in Private Eye, then a TV reporter managed to structure his report to include the words "fill the Greek community with alarm".
It might appear funny, but when such "intentional coincidence" happens a lot, as in 1990-92, and when it supports other methods of obscenity,
then the amusement value wanes.

The choice of words appears to form a homosexual reference - the way it works is that the Security Service are blokes fantasising continually
about another bloke, so to avert the obvious observation of their being gay
see here for another instance of unwholesome MI5 fantasising in public),
they try to assign the attribute to the victim - they do this sort of thing all the time, with all sorts of attributes. However, in this
particular case I give it only a one in three probability, since this incident seems to have been a one-off at that particular time.

1165. MI5 Persecution: Life is so hard (258)

Newsgroup: comp.sys.atari.8bit
Date: 2007-08-25 09:49:01 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07072509490746@4ax.com>
Source record: 4103
Cross-posted to:
comp.sys.atari.8bit,fr.comp.sys.mac.materiel,microsoft.public.sqlserver,sfnet.keskustelu.politiikka,tw.bbs.literal.lyrics

Life is so hard

Certainty level: 100%

This relates to harassment at my workplace in Canada. Yes, "they" had
their claws into my employers in North America, it doesn't just happen
in England, it happens here as well.

During the second half of 1996, at work, I was sitting near a co-worker
whom we shall call Mark (we can, because that's his name). This guy
occasionally came out with words and phrases that made me think that
"they" had got to him and were supplying him with information about my
home life (not social life please note, because of course I don't actually
have a social life here).

During November 1996 I tried to catch him in the act of saying something
"meaningful", a difficult exercise because as soon as he saw a tape
recorder, he shut up completely, except for times when he knew he would
be out of range of the walkman. (Note that the quality of this recording
is not very good; I was just using a four-year-old tape walkman with
a cheap microphone, quite low-tech).

During the evening of 12 November 1996, at home in my apartment (flat to
you UK-ers), I said "life is so hard, and then you die". A nihilistic,
negative thing to say, but quite distinctive. The following day,
13 November, Mark said loudly, "life is so hard eh, and then you die"
followed by loud laughter.

In my book the precise repetition of the words makes this incident a
100% certainty. You, the reader, may differ, but then living in a free
country allows each of us to have our own opinions, doesn't it?

1166. MI5 Persecution: GLR: David Hepworth (21/Feb/1997) (1481)

Newsgroup: comp.sys.atari.8bit
Date: 2007-08-25 10:21:03 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07072510210927@4ax.com>
Source record: 4104
Cross-posted to:
comp.sys.atari.8bit,fr.comp.sys.mac.materiel,microsoft.public.sqlserver,sfnet.keskustelu.politiikka,tw.bbs.literal.lyrics

GLR-David Hepworth (21/Feb/1997)

Certainty level: 80%

I was listening to BBC Greater London Radio (GLR) by stealth, ie. on my walkman with headphones, with the sound turned right down, to prevent anyone from hearing what I was listening to. Yet somehow "they" are still able to tell what station I am listening to on the walkman. After half an hour or so listening to GLR, DJ David Hepworth came out with this;

"I assume Brian, do we have an embarrassment of prizes in there, we do, don't we, absolute obscene amounts of prizes, there will no doubt be a riot at the back door, and that's A-level coming up after this"

The key phrases in what he said are, "EMBARRASSMENT of prizes", and what he himself emphasised verbally, "ABSOLUTE OBSCENE amount of prizes". It is my belief (based on content and tone of voice) that when he spoke these phrases he knew I was listening, and that the phrases refer directly to my situation. The "EMBARRASSMENT" is the embarrassment he and other media people would feel at having their wrongdoing exposed; the "ABSOLUTE OBSCENE" (which he verbally emphasised) described the disgusting sexual abuse which the harassers have been throwing at me.

Of course, I can't prove that this is what he meant, although this has happened enough times that it's hard not to recognise it when you see it. I sent David Hepworth a copy of this explanation, with the results listed in a subsequent item (David Hepworth 9/May/1997).

Source record: 4105
Cross-posted to:
comp.sys.atari.8bit,fr.comp.sys.mac.materiel,microsoft.public.sqlserver,sfnet.keskustelu.politiikka,tw.bbs.literal.lyrics

GLR-David Hepworth (9/May/1997)

Certainty level: 100%

This time I deliberately listened to Hepworth with the sound turned up on the radio, to try to get a reaction. Sure enough, he and his cronies reacted;

David: "we have executive drivetime, and we have Brian in charge of the prize cupboard. Brian it's not a bad prize cupboard this week is it?"

Brian: "no David in fact it's an absolute (EMPHASIS) embarrassment (END-EMPHASIS) of prizes this evening" (laughter)

David: "what have we got?"

Brian: "well in my left hand alone we've got that .... Gary Clale, I don't know if you remember him obviously still alive and kicking.... and that's just in my left hand"

David: "So it's certainly worth competing. Rock and roll spelling test is your first opportunity to take advantage of this embarrassment of prizes"

What I "read into" this item should again be quite obvious. Remember, I sent off a letter of complaint to Hepworth after his spying activity during the previous show. Here the emphasis on "absolute embarrassment" of prizes shows he knows this is a "key" phrase.

It might be interesting to try to talk to DJs like Hepworth and ask them what they get out of abusing their listeners. But if you challenge them directly, they show their true colour (yellow) by either not answering the challenge, or by denying that harassment has taken place.

Capital Radio (11/April/1997)

Certainty level: 10%

A nice easy one here. The DJ is heard to say (around 8.30pm);

"Jacko in town, what a gig it's going to be, that guy is amazing, and
psychotic, but amazing on stage, 0171-420-0958, on stage he's a madman
but he's wonderful"

I was listening to Capital loud and clear, trying to get a reaction.
The above may have been a reaction. I'm not sure if it was, and I'm not
sure that it wasn't.

Neil Fox's Juke Box on Capital Radio (week ending 15/March/1998)

Certainty level: 70%

Here is an excerpt from Neil Fox's show on Capital Radio 95.8FM, sometime during the week ending Sunday 15/March/1998 (probably during the weekend, but I don't remember).

First I will give the text of the conversation between Neil Fox and telephone caller Martin, then I will state my interpretation.

(conversation) (F=Dr Fox, M=Martin the caller)

F: coming up on the jukebox, the hotline's 0171-4848-958, just a quick shout here and so who's this going to be then Mr Producer?
(staff, shouting) MARTIN!
F: Couldn't quite hear you, it's going to be?
(staff, normal voice) Martin.
F: Thank you. Martin, hello.
M: Hello, Foxy.
F: How are you Martin.
M: Er, knackered.
F: Why?
M: Didn't get much sleep last night. Party down the road.
F: What time did you go to bed?
M: Four o'clock this morning.
F: Well that sounds quite a reasonable Saturday night if you ask me.
M: I was up at eight.
F: You were up at eight this morning?
M: Yeah.
F: That's sick. Why? What on earth made you get out of bed at eight this morning?
M: My father.
F: Well that's no good. Why is he being sicko, is he being a sadist?
M: No, he out there, sort of clearing room.
F: Listen, is your dad there?
M: No, he's downstairs.
F: Oh mate, can you get him?
M: No.
F: Does he not let you on the phone? The only reason is that I wouldn't mind having a chat with someone who makes anyone get up at eight o'clock on a Sunday morning. I'm sorry, that's ill isn't it, that's out of order.
M: It's sick.
F: I'm just going to ask around here. What do you think then, eight o'clock

Sunday morning? That's out of order isn't it, for any father?
(staff) Yeah, definitely.
F: Is he like victimising you or something, is there any reason why he wanted you up at eight o'clock? To clean your room?
M: Well as I say I got up at eight this morning to clean my room and it looks worse that it did yesterday.
F: Well I should have just left it and stayed in there until eleven o'clock if I was you.
M: Well I was up, I didn't get out of bed.
F: What, you didn't get out of bed at eight o'clock? No, he woke you up at eight o'clock. Did you do any cleaning at all?
M: I haven't touched my bedroom.
F: Top man. Boy you're going to get your arse kicked later aren't you. Now a song for you, what can we play?
M: Guns and Roses, "Sweet Child of Mine".
F: And we're going to dedicate this to your father?
M: No we're not, we'll dedicate this to my good mate Jamie, who's sitting on the bed now.
F: Right, hello Jamie. And anyone else? Any top totty in your life at the moment?
M: Unfortunately no.
F: The totty factor is quite low at the moment is it?
M: It's dead.
F: It's dead? What, nothing?
M: Nothing.
F: What, zero? Well, that's pathetic. No wonder you're down. You stay out til four o'clock and nothing. We'd better have words when we're off the radio I think. We need to give you a team talk. You have a good night tonight.
M: And you.
F: Take care.
(song starts)
F: Actually something was going through my mind. I think I'll leave it.

I'm not really sure whether this is in any way about me. It probably isn't. Probably it's just my nasty suspicious mind finding links where none exist. However, here is an explanation of why it might, possibly, be about me.

Throughout this interview, I was throwing abuse at the radio, and to my mind, Neil Fox was hearing the abuse, and responding interactively. This explains why he sounds so stressed when talking to telephone caller Martin, and the general violence of his words including "Boy you're going to get your arse kicked later aren't you".

The piece starts of with the producer shouting the name of the caller, which might be related to my loud vocalisations at the radio. The trouble starts off with Fox saying "That's sick". "Sick" might be taken as a reference to my condition. Then Fox says, "Why is he being sicko, is he being a sadist?", again sick = my illness, "sadist" = attitude of my oppressors towards me. "that's ill isn't it" = further comment on my illness. "Is he like victimising you or something" = again what my enemies are doing to me.

Fox sounds quite happy when he gets Martin to say "It's sick"; as you would expect him to, if the comment were directed at me. It is a constant feature of my enemies' harassment of me that they get intermediaries to verbalise the abuse. Immediately after saying "victimising you" Fox gives a little laugh, to show he thinks the victimisation (of me, not Martin) is funny.

Fox gets increasingly nasty as the piece progresses. "Boy you're going to get your arse kicked later aren't you" is not really what you would expect him to say if he were just talking to Martin. Fox is on the same side as Martin, so why would he be so verbally aggressive to him? On the other hand, if the piece is about me, then his strong words start to make sense.

Fox's jubilation at finding that Martin's "totty factor" is "dead" again doesn't make much sense unless you think that he might not be considering Martin's totty factor, but mine, since it's a fairly well known fact that my "totty factor" is not significantly above zero.

To round off the 135 second interchange, just as the next track is starting, Fox says, "Actually something was going through my mind. I think I'll leave it". Given that I was chucking abuse at Fox throughout, it is only natural for him have thought up a reply that he would have wished to have made, except that such a reply would (a) probably not be suitable for a family show, and (b) have given the game away completely.

So there you are. You the jury, what say you in the case of plaintiff vs. Neil Fox's Juke Box, guilty or not guilty?

Foxy's Showtime on Capital FM 25/11/98 7.35pm

Certainty level: 100%

This one, I can say with absolute certainty, is about me. It was recorded on my Sony Recording Walkman on the evening of Wednesday 25 November 1998. It doesn't mention me by name, so the objective observer might have trouble understanding why I'm so sure it's about me. I'm sure, because the harassment had restarted over the period when this piece was broadcast, and what Capital transmitted would have been in context with events at the time. (Sorry if that explanation is somewhat opaque, but I don't really want to embarrass myself by giving an explanation in detail, and an intelligent reader should be able to work it out for him/her self.)

This isn't the first time Capital have "got at" me; they were doing so right at the very beginning in summer 1990, when they said, "if he listens to Capital then he can't be all bad"; and Tarrant made remarks about me in his breakfast show in spring 1994, when he said, "you know this bloke? he says we're trying to kill him. We should be done for attempted manslaughter."

Unfortunately I didn't record those previous, much more conclusive instances of harassment by Capital DJs, and Capital Radio tells me they only keep recordings for three months. But lately I've been recording everything, and here is one product of that recording.

Neil Fox was introducing some petite Swedish songstress, sounded like Amelia, when he said something about her petite-ness ;

"she's a big big girl, actually she's really about tiny, she's this big, would you say what less than....."

then one of his studio staff shouted, "six inches"

then Fox laughed and said, "less than a meter tall, definitely"

What I think the "six inches" referred to should be obvious. I think it's sexual abuse directed at me.

Also there were a lot of words like "crazy", "mad" etc on this programme, which reinforced my belief that this was on purpose directed at myself.

I think Fox may be something of an unwilling participant in this abuse, he doesn't want to be an abuser but the persecutors are using his show and his staff to get at me. This is not the first time this sort of thing has happened from his show; and my guess is that it won't be the last

Hi,
Program speed was never a priority with Atari Basic. There are ways to speed it up, but they are compromises. Remember that its always running in floating point mode, line number "jumps" are mostly tested line
number by line number, all code is pseudo and thus interpreted every time. But the fact you can change even 1 byte in the program and just goto or rerun without any compiling makes programming faster for most
people. To get decent speed, the program has to be compiled. I use Monarch ABC with excellent results. But even it is not truly compiled. MMG is supposed to convert to machine language, but all I have heard is
all of the bugs.

The vast majority of my programming is using Basic XL or assembly.

Do any of the devices had external control ports? I/R ports? Then
you'd have to manually wire in some type of control access.

Otherwise, is possible, but of dubiuos value.

Some ST have been, may still be, used for cash register and inventory.

There are Cookbook programs oput there, though none integrated with
automated ingredient dispensers that I know of.

It does output assembly language but it defaults to deleting the files.
I can't remember offhand what the procedure was to get it to save the
files. I recall they took up so much room on the disk that it was near
impossible to save them and not get an out of space disk error.

They were interesting in their simplicity and execution. Everything was
passing parameters and jumping to a line number or precompiled routine
in the ~4k runtime package. IIRC ~ RPN type evaluation of line and every
line number became a label to jump to i.e. 10 PRINT "Hello" would first
translate to something like

```
L10
V1
.byte 'H
.byte 'e
.byte 'l
.byte 'l
.byte 'o
.byte EOL
LDA >V10
PHA
LDA <V10
PHA
JSR <somewhere in RT with canned code to print>
```

If you had a GOTO or GOSUB anywhere else in the program, it would just
JSR/JMP L10 since it is an assembler variable.

I never noticed any bugs but the runtime was canned code interpretation
of what the BASIC code would do. Most stuff worked really close to what
you expected but I do recall an oddity or two.

Rick

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.
Atari, headquartered at the time in Sunnyvale, California, USA, produced this
line of computers from 1979-1992.

To see what Atari, Inc. is up to today, visit: http://www.atari.com/

NEWSGROUP BACKGROUND
comp.sys.atari.8bit was created in November 1986 (as part of the Great
Renaming) as a direct replacement for: net.micro.atari8

Former (before 1987) Usenet newsgroups for Atari computer discussion:
net.micro.atari8 - created Feb 1986
net.micro.atari - created Nov 1982
net.micro - created Jan 1982

comp.sys.atari.8bit is unmoderated, and has no formal newsgroup charter.

The comp.* hierarchy of Usenet newsgroups is managed by the Big-8 Management
Board: http://www.big-8.org/

RELATED USENET NEWSGROUPS

We're getting junk (MI5 crap), and cmsg cancel crap.
And then my server keeps deleting old messages.
I don't want any csa8 message deleted, but it automatically does that in OE.

Hi Russg,
With OE on the upper line: File Edit View Tools Message Help
Clik on View and the drop down box Hoover on Current View-- Select-- Show
Downloaded Messages

I believe that in the option selection you can request how long to keep
messages I have mine set for 31 days.
That would be-- clik on Tools on drop down list select options. This bring
up a Dialogue box with tabs. Select the Maintenance tab and edit your
selection for days to keep news.

I hope this helps
RoyE

I did it and you were correct, I had delete messages after 5 days set in my
maintenence. I just unchecked that box.
Now I hope it will save my messages.
Thanks

Considering you MI5(crap) this stuff can be filtered using the Tools --
option clik Tools-- and Hoover over the Message Rules-- clik News. Set
your filter to delete MI5

Your Welcome

Hi all, just wondering if there are any physical magazines out there (glossies) that cover all the old games and computers we used to own and love, like Commodore 64, Amiga, Atari ST, etc.

I heard of Retro Gamer but it seems to have been discontinued in 2005/6.

Thanks!

C.

Retro Gamer (in the UK) is still going strong, I think Future Publishing
picked it up. Bought a copy last month and they've just launched a
special edition on CD of all the back issues (I think it's issue
20-something now)

No we don't:

Posted via NewsDemon.com - Premium Uncensored Newsgroup Service
ï¿œ ï¿œ ï¿œ ------>>>>>>http://www.NewsDemon.com<<<<<<------
Unlimited Access, Anonymous Accounts, Uncensored Broadband Access
---

The poster is particular stupid and even told us which provider he is using
(by not deleting the advertising ;-)) - all you need to do is complain to
http://www.newsdemon.com/abuse.php.

And I guess it has been done as the crap suddenly stopped :-)

Martin

Hi,

> is he thinking of PILOT? I don't think there was a cartridge
>Lisp for the 8bit Atari's.

Perhaps not on cartridge, but ISTR having a disc based LISP for my Atari
back in the day - "APX"?

TTFN - Pete.

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.
Atari, headquartered at the time in Sunnyvale, California, USA, produced this
line of computers from 1979-1992.

To see what Atari, Inc. is up to today, visit: http://www.atari.com/

ABOUT THIS DOCUMENT
Additions/suggestions/comments/corrections are needed! Please send to:

Michael Current, michael@mcurrent.name

The latest version of this document is posted to the following Usenet
newsgroups every 7 days:
comp.sys.atari.8bit, comp.answers, news.answers

NEWSGROUP BACKGROUND
comp.sys.atari.8bit was created in November 1986 (as part of the Great
Renaming) as a direct replacement for: net.micro.atari8

Former (before 1987) Usenet newsgroups for Atari computer discussion:
net.micro.atari8 - created Feb 1986
net.micro.atari - created Nov 1982
net.micro - created Jan 1982

comp.sys.atari.8bit is unmoderated, and has no formal newsgroup charter.

The comp.* hierarchy of Usenet newsgroups is managed by the Big-8 Management
Board: http://www.big-8.org/

RELATED USENET NEWSGROUPS
alt.binaries.comp.atari8bit
Programs for Atari's 6502-based orphans.
```

comp.sys.atari.advocacy
Attacking and defending Atari computers.

comp.sys.atari.announce
Atari related hard/software announcements. (Moderated).

hg schrieb:
> Can all the special graphics modes(APAC,C8,TIP,RIP) on an 800xl be viewed through the standard TV-output? Or are some modes only
> viewable through the monitor output?

They're all available on TV. This is because the whole video output is oriented towards TVs in first place, and it's not that
adjustable to let it run too much out of the specs.

So long,
Thomas

Hi,

All of the work is done on the new memory upgrade for the 130XE that
uses 4 64K drams.

Turned out very nice.

Here are the links:

Main More Than Games:
http://www.a8maestro.com/sites/mtgcat/mtgcat.htm

130XE 2 dram upgrade, 256K:
http://www.a8maestro.com/sites/mtgcat/proda8/adv-ek0040.htm

I've updated the standard 130 upgrade too.

I have Inter-Lisp from DataSoft, Inc. on 1 disk, and a copy of the APX disk
too.
So maybe datasoft dropped it, and APX took it over.
Rick

Hi:

To all respective forum readers, please take notice:

1) First of all, my apologies for such a wide off-topic cross-
posting. It's unusual, and very frowned upon. But I deem it
necessary in lieu of recent events. You can just disregard if you
will.

2) There is a user on the net who has impersonated "Don Klipstein",
me, as well as other respectable Usenet posters. He/she is using our
names, email addresses, and profiles to post nonsense on Usenet
newsgroups. This impersonator seems to be located either in Burma or
Korea and has the IP address of 54.66.208.171.

3) Doing a WHOIS checkup on 54.66.208.171 locates the source to be in
Seoul, Korea:

inetnum: 54.66.208.171 - 54.66.208.171
netname: HANANET
descr: Hanaro Telecom Co.

to
completely undo all the good they've accomplished by over-confidently pushing themselves to extremes in their work or recreation. One of the saddest examples of this error that I know of was the case of a young, bright, determined AIDS patient who had completely cured himself of all visible and clinical evidence of the disease, but subse-quently consistently and relentlessly overworked at his demanding corporate job. Eventually, he fell ill, relapsed and was not able to recover. However, in another case, a person who had recovered from a seriousillness experienced a relapse from overexertion, but complete rest and intense urine therapy led to an excellent recovery. But why put your-self through that ordeal and risk the chance of seriously undermining your body's hard-won repair work?

Assiduous urine therapy can give you such renewed vigor and energy, that it's easy to become overconfident and overdo, which, is not a huge problem for normal people. But for people recovering from major illnesses, exhaustion can pose a life-long threat, so protect your new-found health and your natural immune defenses with lots of rest, fresh air, moderate exercise and minimized stress.

Kidney Disorders

If you have a history or presence of a kidney infection, limit the initial amount of oral urine therapy you take to small doses such as 1-5 drops once or twice a day, or use a homeopathic dilution as described in the section on. Homeopathy and Urine Therapy in this chapter. Decrease or eliminate meat ingestion. and acid-forming foods before beginning the therapy. Also, check your acidity levels with pH s

colour, not too sharp or bitter and not too concentrated.
Women can drink their urine during their men-struation period. Many
women experience this as unpleasant, in which case it is better to
stop for a few days. It is always best to consider what feels good for
yourself.

It is advisable to monitor and balance your pH, i.e. the acid/alkaline
condition of your body, espe-cially with intensive application of
urine therapy & fasting.Your urine pH should ideally vary from
approximately 5 (more acid) to 8 (more alkaline) during the course of
a day. When there is a ten-dency to either overacidity (acidosis) or
overalkalinity (alkalosis), your body is not function-ing
correctly .

Everything you eat and drink has an effect on your body and
consequently on your urine. The healthier your dietary habits are, the
better your urine will taste. Urine therapy in itself does not perform
mira-cles. Unless you provide your body with the essen-tial nutrients,
it will not possess the raw materials needed to maintain good health.
If you eat healthly an

8) So you can see how this net-abuser has impersonated me. He/she has
also impersonated Don Klipstein. It's likely that he/she won't stop
just with us two but will go on impersonating anyone he/she until
stopped. As I've recently found "RHRRC" has also been impersonated.

Don, RHRRC, and others, please check your messages, you'll find posts
that are definitely not yours.

RHRRC, see this:

http://groups.google.com/group/sci.lang/msg/0bdffc7edbb1e4da?dmode=source

Don, see this:

http://groups.google.com/group/sci.lang/msg/e458793775a43343?dmode=source

Obviously neither of you posted the above two messages.

Much like I didn't post the following message:

http://groups.google.com/group/rec.pyrotechnics/msg/1762bed639005379?dmode=source

From last I heard there are two still going. One out of the UK and one in
Germany. I have a bunch of the old ones for the ST (Start, etc.) and some for
the 8-bit. I just read them for the memories.

1202. printing with atari800 emulator

Newsgroup: comp.sys.atari.8bit
Date: 2007-09-10 03:03:36 UTC
From: Bob Hays <rdhays3@bresnan.net>
Message-ID: <x7ednd-MB5YkLnnbnZ2dnUVZ_rignZ2d@bresnan.com>
Source record: 4140

I have the Atari800 emulator installed on a Windows ME system that is on a LAN. There is no printer connected to the computer. There is a LAN printer on line and Windows ME does have the drivers installed and working. IE I can print to it from Windows ME applications. How do I configure the emulator to use the default printer. "lpr %s" does not work.

Try installing the printer as a local port using the standard tcp/ip
port for printing and not the network printer install. Using IP
printing may solve your problem. You can also try upgrading to a more
current and might I add better OS like XP.

If you have Atari800Win.exe version 4.0 installed. Under the Atari menu
header select [Setting] or press Alt+E and in the dialogue box that opens
select enable P: patch [] and below that select use alternate print
command[] and in the box below that type the path to your favorite text
editor.
C:\Program Files\UltraEdit\UEDIT32 %s '<-- this little bit is required
%s'
The text editor can then print to your Windows installed LAN printer. You
can even add to or delete parts of Atari file, reformat margins, etc...
Before sending to the printer with the application chosen.
and if you can get the Windows Font called ATARI.FON from the Dis6502
application package install this to C:\windows\font\ directory then your
better hex/texteditor can use it to see Highlighted text.. Font size set to
12 normal.
Good Luck
RoyE

The default printer is a local tcp/ip port. but I do not know how to enter
the command to use it. What would I type into the cfg file:
"PRINT_COMMAND=?????????"

1208. now available for the atari 8bit computer, xenophobe on a xe super cartridge

Newsgroup: comp.sys.atari.8bit
Date: 2007-09-11 03:36:29 UTC
From: Video61@tcq.net
Message-ID: <1189481789.025852.189600@g4g2000hsf.googlegroups.com>
Source record: 4146
Cross-posted to: comp.sys.atari.8bit,comp.sys.atari.st,rec.games.video.classic,rec.games.video.atari,alt.games.video.classic

we have a small supply of this fantastic unreleased game for the
atari 8-bit computers on a xe super cartridge.
it is a one player, or two player simultaneous play, requiring a
atari 8-bit xl/xe/xegs 64k computer.
for pricing and ordering information please go here,
www.atarisales.com
thank you.

1209. Do spiders like ATARIs?

Newsgroup: comp.sys.atari.8bit
Date: 2007-09-11 08:28:53 UTC
From: Greg Goodwin <Greg.Goodwinp0.f2.n8.z8@fmlynet.org>

FamilyNet International Newsgate

opened a Atari floppy drive and found hundreds of tiny roaches once. :)

Doc Clu
Typed on a Dreamcast...

> From: "Spiderman" <spiderman@spider.bite>

> X-No-Archive:yes

> When opening old ATARI computers I often find spiders
> living happily inside the computer.

> It seems to me that spiders *love* ATARIs, while maggots
> and worms are attracted to Commodore systems.

> Do you have spiders in your ATARI, too?

1210. How to use the ATARI as a kitchen utensil???

Newsgroup: comp.sys.atari.8bit
Date: 2007-09-11 08:28:54 UTC
From: Greg Goodwin <Greg.Goodwinp0.f2.n8.z8@fmlynet.org>

FamilyNet International Newsgate

Honestly I think honeywell was the only computer that was made with it being in mind as a kitchen computer... complete with cutting board. :)

There are X-10 modules for operating appliances for the Atari and other computers. People were doing this in the 80's. modules to get the coffee brewing at a certain time, activate lights, feed pets with automatic feeders.

Activating the power with an Atari is kinda easy. Now setting a microwave for a certain seting with an Atari and cooking a TV breakfast might be challenging.

DC on a DC.

> From: Victor Smootbank <mean_priests@yahoo.com>

1212. Easy Atari BBS List

Newsgroup: comp.sys.atari.8bit
Date: 2007-09-11 08:39:51 UTC
From: Greg Goodwin <Greg.Goodwinp0.f2.n8.z8@fmlynet.org>
Message-ID: <03ef050c@familynet-international.org>
Source record: 4150

FamilyNet International Newsgate

For all you newbies to BBS'ing, we have an easy BBs list that contains all
the current Atari BBS's in one simple directory. Brief instructions:

-telnet//pb.darktech.org
-get to the main menu (enter... enter.. enter..)
-X for internet menu
-A for Atari menu

At this point, select an Atari BBS!

many of these Atari BBS's are run on real Atari 8-bit and ST Computers!

just added, Marius' BBS (option 10) just added this week!

Hope to see you on the BBS's!

Doc Clu

Hi,

> I have Inter-Lisp from DataSoft, Inc. on 1 disk, and a copy
>of the APX disk too....

Hmm, now you mention it, I may have had (may still have somewhere in fact)
the Datasoft release. I vaguely recall the manual being in one of those
soft, A5 sized binders....of that particular colour Datasoft used (but then
I had a lot of Datasoft products).

Thanks for clearing that up.

BTW It's amazing just how many programming tools there were available for
the A8.

TTFN - Pete.

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.
Atari, headquartered at the time in Sunnyvale, California, USA, produced this
line of computers from 1979-1992.

To see what Atari, Inc. is up to today, visit: http://www.atari.com/

ABOUT THIS DOCUMENT
Additions/suggestions/comments/corrections are needed! Please send to:

Michael Current, michael@mcurrent.name

The latest version of this document is posted to the following Usenet
newsgroups every 7 days:
comp.sys.atari.8bit, comp.answers, news.answers

NEWSGROUP BACKGROUND
comp.sys.atari.8bit was created in November 1986 (as part of the Great
Renaming) as a direct replacement for: net.micro.atari8

Former (before 1987) Usenet newsgroups for Atari computer discussion:
net.micro.atari8 - created Feb 1986
net.micro.atari - created Nov 1982
net.micro - created Jan 1982

comp.sys.atari.8bit is unmoderated, and has no formal newsgroup charter.

The comp.* hierarchy of Usenet newsgroups is managed by the Big-8 Management
Board: http://www.big-8.org/

RELATED USENET NEWSGROUPS
alt.binaries.comp.atari8bit
Programs for Atari's 6502-based orphans.

1219. Diamond OS

Newsgroup: comp.sys.atari.8bit
Date: 2007-09-14 11:34:47 UTC
From: jerry.young@gmail.com
Message-ID: <1189769687.175505.267010@r29g2000hsg.googlegroups.com>
Source record: 4157

Has anyone used Diamond OS? I found it in a folder of stuff I
downloaded off the net some time back and can get it to load but the
cursor wont move in the Atari800win emulator I am using? I have tried
the different mouse settings in the emulator and got nothing. I don't
think I can use it on my 130xe as it is a cartridge rom, unless I have
forgotten something over the years about running them on a real
machine. Sucks getting older.

From: "christianlott1@yahoo.com" <christianlott1@yahoo.com>
Message-ID: <1189913012.726277.239000@57g2000hsv.googlegroups.com>
Source record: 4162

I noticed the atari archives have SynCalc and a few others listed. I would like to retrieve the c64 versions of these apps which were included on the same disk as the atari versions.

Are there any who have the disk(s) and would be willing to make D64's of the c64 versions? Synfile+, Syntrend, SynStock, SynChron, SynComm?

http://www.atarimagazines.com/v3n10/syntegrated.html

Manual scans would be great as well :)

Thanks,

Christian

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.
Atari, headquartered at the time in Sunnyvale, California, USA, produced this
line of computers from 1979-1992.

To see what Atari, Inc. is up to today, visit: http://www.atari.com/

ABOUT THIS DOCUMENT
Additions/suggestions/comments/corrections are needed! Please send to:

Michael Current, michael@mcurrent.name

The latest version of this document is posted to the following Usenet
newsgroups every 7 days:
comp.sys.atari.8bit, comp.answers, news.answers

NEWSGROUP BACKGROUND
comp.sys.atari.8bit was created in November 1986 (as part of the Great
Renaming) as a direct replacement for: net.micro.atari8

Former (before 1987) Usenet newsgroups for Atari computer discussion:
net.micro.atari8 - created Feb 1986
net.micro.atari - created Nov 1982
net.micro - created Jan 1982

comp.sys.atari.8bit is unmoderated, and has no formal newsgroup charter.

The comp.* hierarchy of Usenet newsgroups is managed by the Big-8 Management
Board: http://www.big-8.org/

RELATED USENET NEWSGROUPS
alt.binaries.comp.atari8bit
Programs for Atari's 6502-based orphans.
```

comp.sys.atari.advocacy
Attacking and defending Atari computers.

comp.sys.atari.announce
Atari related hard/software announcements. (Moderated).

I had been wondering the same thing. There seemed to be a lot more traffic
on both of the comp.sys.atari groups a few months back. Maybe its seasonal,
and lots of people are on summer holiday now.

Boo Hoo Hoo Hoo.....
It's those Commodore C= people. They keep coming here and asking stupid questions like 'How do you use an Atari for a kitchen utensil'. and 'How do you make an Atari into a bomb.' Dumb questions are driving the real Atarians and newbies away.
Let's go to comp.sys.cbm and ask some stupid questions!

Summers for newsgroups are always slow and we seem to lose a few each
summer.

Seems like newsgroups are in decline anyway. Most companies that tried
to participate in them have gone to web based forems where they have
control over content.

We get the same garbage posted over there at c.s.cbm, so don't blame us. I've actually seen an incredible thawing over there (and here and c.s.a2) that leads me to believe that a common, unified community of collectors is starting to emerge.

It appears all those posts are coming from one person using a Turkish (and at least once an Italian) ISP, so I don't see any reason to think it is "Commodore people", or anything other than one person who has way too much free time on his hand since his mom hasn't made him get a job and move out of the basement yet.

I've actually seen an incredible thawing over there (and here and c.s.a2)
that leads me to believe that a common, unified community of collectors is
starting to emerge.

I always wanted to see some C= stuff, like
Sargon III for C64. So I went to cscbm and got some help finding the program
and also how to get it to run. It is a real advantage to be able to see
stuff from both computers. I believe cscbm gets more traffic than csa8, and
there are helpful people there.
Glad to see someone interested in Ataris.

1242. Found some old floppy disks for my 130XE (any way to verify or recover data?)

Newsgroup: comp.sys.atari.8bit
Date: 2007-09-25 22:43:14 UTC
From: techman41973@yahoo.com
Message-ID: <1190760194.377911.257880@22g2000hsm.googlegroups.com>
Source record: 4180
Cross-posted to: comp.sys.atari.8bit,comp.sys.atari.st,comp.sys.atari.advocacy

I recently went home to my parents house and found 2 bins of 5-1/4
disks from the mid-80s for my Atari 130XE (although I can't find the
computer and hard drive right now).
I miss all of these games and applications. More importantly I miss
many of the programs in basic I wrote. I truly wonder if all of the
data is destroyed (it has been almost 20 years).
Has anyone found old disks from their Atari that survived such a long
time?
Is there a way I can verify if the data is still preserved using a
5-1/4 disk drive from an IBM PC?
Even better if I can find a way to recover the data if possible and
copy it onto a new 5-1/4 disk, preserving
the file format etc. I would looking to understand my options.
Thanks

You need to remember what floppy drive you had.
Your BASIC programs could be on single, enhanced or double density. You
probably had a 1050, XF551 or some other party drive. If you don't
remember, then get a double density drive, it will do all three formats.
You will need to find your 130XE and drive setup.
There is a 10502PC or something like that adapter to read floppies directly
to PC from a Atari floppy drive.
What you might want to do is send the disks to someone to test and copy for
you. Probably wouldn't want to make new 5 1/4" copies, but copy to .ATR
images, which you could then use in a PC Atari emulator. You could also
copy the files from floppy to an .ARC file.

The chances that the data is still readable isn't too bad. My 20 year
old Atari disks *are* still readable. Those were designed to last...

> Has anyone found old disks from their Atari that survived such a long
> time?

Yup.

> Is there a way I can verify if the data is still preserved using a
> 5-1/4 disk drive from an IBM PC?

Unlikely, unless you formatted them to double density (something the
regular Atari drives couldn't do). The problem is that the single or
enhanced density uses 128 bytes per sector, which is different from
the 256 bytes/sector an IBM compatible floppy controller is able to
understand (at least most of them).

> Even better if I can find a way to recover the data if possible and
> copy it onto a new 5-1/4 disk, preserving
> the file format etc. I would looking to understand my options.

Try to find someone near you that still owns an Atari disk, read
them from there, transfer them to a PC and write them onto your
hard disk or burn them on CD.

So long,
Thomas

Hi peeps

fortunately there is more space on ye olde 5.25 disks so the datastream
isnt as compacted.

The 1050 drive wasnt a true double density:(but 1.5. You would need dos
2.5 at least i would think.

As with backing disks up, best way would be to use an 8-bit machine,
ideally 130xe for the extra memory. Transfer it using taritalk or
something similar to the ST.

the st can work with 5.25 disk so if you have my favourite happy cart,
you can copy 5.25 to 5.25, well do whatever you want with it as you
would any other disk.

i did produce disk back up software (that could correct some crc errors,
typical disk copy protection terchnique of the time), along with tape to
disk when i wrote "the mockingbird menu" system. unortunately i lost all
my source in a house fire in the later 80's:(page 6 library was sent
copies, as in the pd, along with a few others, whether they have
survived is another matter.

i was building up my 8-bit stuff as i did enjoy programming those
machines. Jury's still out at the moment..

If anyone is, say for the show this weeked or anything else, I'm looking for someone who might be able to pick up a machine for me sometime in the near future (pick-up in just north of Chicago, delivery to Indy or as close as possible). You can email me by reversing each segment of my email address here, and I'll certainly care of any additional gas that might be required.

Thanks!

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.
Atari, headquartered at the time in Sunnyvale, California, USA, produced this
line of computers from 1979-1992.

To see what Atari, Inc. is up to today, visit: http://www.atari.com/

ABOUT THIS DOCUMENT
Additions/suggestions/comments/corrections are needed! Please send to:

Whereabouts do you live? I've got the means to back those disks up. I'm in central Oklahoma.

Hello Doc,

Yes it is kind of slow. I hope it picks up. My work hours vary, so I usually
get on 1-2 times a week. I still look forward just as much as I always have.

1259. William Kendrick still here?

Newsgroup: comp.sys.atari.8bit
Date: 2007-09-29 13:19:12 UTC
From: Vidar Olavesen <olavese@online.no>
Message-ID: <iJGdnQ_wiseOzGPbRVnzvQA@telenor.com>
Source record: 4197

I am asking, because I need a favor. You made Gemdrop, right and it has some more colors than usual. I need an explanation or preferably a little assembler routine to be able to do the same. I am planning an Shining Force type game, based on Stargate and if I can, go storywise over to Stargate Atlantis later. It looks too bad with the three colors and if I have no alternative, I'd have to go for PM graphics on the character being commanded and just use the same colors on the others as the background.

Any help here would be appreciated. Thanks and take Atarian care

Hey Vidar! Yes, I'm still around, but with a busy job and a little baby,
haven't had too much time for Atari or usenet. :)

> I am planning an Shining Force
> type game, based on Stargate and if I can, go storywise over to Stargate

The 'mode' used in Gem Drop is what I called "Super IRG mode." I simply
used alternating character sets in IRG mode to achieve the perception of
something like 13 colors.

For example, imagine your color palette includes black and red.
You can create a dark red color by flipping pixels between black and red.

Here's an ASCII diagram of how I'd do it to create a solid dark-red block
(4x8 pixels in IRG mode).

Character set #1 (every odd refresh):

```
#.#.
.#.#
#.#.
.#.#
#.#.
.#.#
#.#.
.#.#
```

Character set #2 (every even refresh):

```
.#.#
#.#.
.#.#
#.#.
.#.#
#.#.
.#.#
#.#.
```

Perceived image:

====
====
====
====
====
====
====
====

I did Gem Drop in Action!, and the code is available in the Gem Drop .ARC.
The mode is simply a single VBI which toggles between the two character
sets every interrupt. :)

Now, best of all, I created a Super IRG font editor that you can use to
make characters. It has a mode that lets you edit 4 characters at once,
displaying them in a 2x2 layout. (I used this to create the 8x16 puzzle
pieces for Gem Drop... I _think_. I may have written the editor after
finishing the game! :^))

You can download it here:

http://www.newbreedsoftware.com/sife/

The .ARC on the download page also includes the Action! source to SIFE. :)

Enjoy and good luck!

Thanks a bunch. I'll check it and see if I understand it and can implement
it in my assembler code.

Have a good time with the little one (the baby, the other ones size I do not
know ;-))

> cleveland. So if that can work for you in anyway?
>

Hey Chuck - thanks for the offer. Assuming you're taking the most direct
route back to Cleveland, it doesn't like you'll really get much closer to
Indy than Chicago is. Otherwise, I'd take you up on it! :)

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.
Atari, headquartered at the time in Sunnyvale, California, USA, produced this
line of computers from 1979-1992.

To see what Atari, Inc. is up to today, visit: http://www.atari.com/

ABOUT THIS DOCUMENT
Additions/suggestions/comments/corrections are needed! Please send to:

Michael Current, michael@mcurrent.name

The latest version of this document is posted to the following Usenet
newsgroups every 7 days:
comp.sys.atari.8bit, comp.answers, news.answers

NEWSGROUP BACKGROUND
comp.sys.atari.8bit was created in November 1986 (as part of the Great
Renaming) as a direct replacement for: net.micro.atari8

Former (before 1987) Usenet newsgroups for Atari computer discussion:
net.micro.atari8 - created Feb 1986
net.micro.atari - created Nov 1982
net.micro - created Jan 1982

comp.sys.atari.8bit is unmoderated, and has no formal newsgroup charter.

The comp.* hierarchy of Usenet newsgroups is managed by the Big-8 Management
Board: http://www.big-8.org/

RELATED USENET NEWSGROUPS
alt.binaries.comp.atari8bit

------------------------------
```

Subject: Introduction

Conventions

All commercial vendors, developers, publishers, and repair shops should be listed here. "Active" PD/freeware/shareware developers should also be listed. Persons or entities holding rights to products, but not selling or supporting them in any way, should NOT be listed here.

"Vendor" = Reseller of products produced by others. Types of products sold are given in categories: new hardware, used hardware, PD/freeware/ shareware, (new) commercial software, used (commercial) software.

"Developer" = Producer of products. Titles of products produced by the developer are listed. No prices are given.

"Publisher" = Publishes a print or disk magazine, or a book. Complete subscription or ordering information should be given, including prices. Authorized online publishers of originally print or disk magazines are also listed. Online books are not listed.

"Repair Shop" = Can repair 8-bit Atari or related hardware devices. Be sure to make advance contact before sending anything to work on!

Entries are presented alphabetically by company name, or publication title. If no company name exists, a personal name is used. "See" references indicate complete information may be found under the given heading. "See also" references indicate closely-related information may be found under the given heading.

The month/year that vendor information was most recently fully verified is given at the "upper-right" of each entry.

Every entry must contain a valid postal address or web page address.

Unless explicitly requested by the vendor, no entries will include an email address due to the overwhelming amount of spam that would result.

The following is from http://www.upu.int/irc/en/ (2004.03.27)

When one writes to a stranger and requests a reply, it is considered polite to enclose a self-addressed stamped envelope. This works well when both persons live in the same country. However, if they are from different countries, the enclosed postage stamp will not be valid.

This technical problem was solved in 1906 when the Universal Postal Union, during its Congress in Rome, introduced the International Reply Coupon service. International Reply Coupons (IRC) are exchangeable in all member countries for the minimum postage of a priority item or an unregistered airmail letter sent to a foreign country.

The UPU's International Bureau processes approximately six million coupons each year and takes care of all accounting aspects. Developed countries are the largest users. The International Bureau does not sell ICRs directly to

customers; they must buy them from their local post office. Although they are not obliged to sell ICRs, it is mandatory for all Posts of the UPU member countries to exchange the coupons.

Verfications -> YOU!

This list is in a constant state of development, and comes with no guarantees. Information of this nature constantly ages; therefore, the information contained in this list is constantly updated. Please use the latest release of this list whenever possible!

Remember, the success of this list is dependent on YOU, the reader, to send me updates that correct errors that you find. If you use this list, please do your part in keeping it useful for everyone!

The Atari 2600, known in the 70s as the Atari VCS ~ Video Computer
System, is 30 years as of October 2007. it's birthday was actually
at the start of this month, but I didn't realize it until just now.
it's incredible knowing that the videogame console industry is over 30
years old.

Better yet: new games are still being produced for Atari 2600. Come
and check Atariage store for some games that are far better than what
we had in 1970's and 1980's like Medival Mayhem.

Q-B is a great title (whatever it is named). It is a QBert type game
that works real well on the 2600.

- Rich

Sweet!!

Look forward to seeing this. And if you like the old school rivalry between
Atari and Commodore, then I might have a story series released soon. :)

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.
Atari, headquartered at the time in Sunnyvale, California, USA, produced this
line of computers from 1979-1992.

To see what Atari, Inc. is up to today, visit: http://www.atari.com/

ABOUT THIS DOCUMENT
Additions/suggestions/comments/corrections are needed! Please send to:

NEWSGROUP BACKGROUND
comp.sys.atari.8bit was created in November 1986 (as part of the Great
Renaming) as a direct replacement for: net.micro.atari8

Former (before 1987) Usenet newsgroups for Atari computer discussion:
net.micro.atari8 - created Feb 1986
net.micro.atari - created Nov 1982
net.micro - created Jan 1982

comp.sys.atari.8bit is unmoderated, and has no formal newsgroup charter.

The comp.* hierarchy of Usenet newsgroups is managed by the Big-8 Management
Board: http://www.big-8.org/

RELATED USENET NEWSGROUPS
alt.binaries.comp.atari8bit
Programs for Atari's 6502-based orphans.

comp.sys.atari.advocacy
Attacking and defending Atari computers.
```

comp.sys.atari.announce

Yes it is great, but the really incredible thing is that I paid over $300 for
the system. That was a really hefty price for back then. But, it really was
worth it. I still have mine and it works.

Sounds like it could be a good one and I like the "kill C64 computer" idea.
Keep us informed as to your progress. This sort of thing has been done for the
ST where Atari battled C64.

Sheesh that is a broad search! I put Cortese in the search term and it spewed just about as many hits. I didn't think there were that many Cortese inventors but it shows everything from sewing machines to espresso makers dating back before I was even born.

Thanks for the location. I normally use the http://patft.uspto.gov/ but their search engine leaves a lot of be desired.

First I heard of a 2600 was in a Tepe's catalog which listed it at $299. I think the catalog was out before the system was officially released so I don't know for sure if it actually sold for that price at the very beginning. The regular old selling price for a long time was $199 and that was the target price I was saving up for. By the time I hit $150, Toys R Us put it on sale for $150...I was very happy to get it early.

I don't know MyDOS 3.01AX. I suspect it is a special version for a special
peripheral. Have you tried MyDOS 4.53? I think that is the latest one.
Error #146 is trying to access some device improperly, output to keyboard or
something.

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.
Atari, headquartered at the time in Sunnyvale, California, USA, produced this
line of computers from 1979-1992.

To see what Atari, Inc. is up to today, visit: http://www.atari.com/

ABOUT THIS DOCUMENT
Additions/suggestions/comments/corrections are needed! Please send to:

Michael Current, michael@mcurrent.name

The latest version of this document is posted to these Usenet newsgroups
every 7 days: comp.sys.atari.8bit, comp.answers, news.answers

NEWSGROUP BACKGROUND
comp.sys.atari.8bit was created in November 1986 (as part of the Great
Renaming) as a direct replacement for: net.micro.atari8

Former (before 1987) Usenet newsgroups for Atari computer discussion:
net.micro.atari8 - created Feb 1986
net.micro.atari - created Nov 1982
net.micro - created Jan 1982

comp.sys.atari.8bit is unmoderated, and has no formal newsgroup charter.

The comp.* hierarchy of Usenet newsgroups is managed by the Big-8 Management
Board: http://www.big-8.org/

RELATED USENET NEWSGROUPS
alt.binaries.comp.atari8bit
Programs for Atari's 6502-based orphans.

comp.sys.atari.advocacy
Attacking and defending Atari computers.
```

comp.sys.atari.announce
Atari related hard/software announcements. (Moderated).
An archive of c.s.a.a posts and the guidelines for posting to c.s.a.a:

Yes that is an Axlon specific version of MyDos. So unless you happen to
have one, just use a more current version of MyDos.

Thanks Jess,
I think that it is the Axlon Memory effecting turbobasic. Thanks

Yes I do have current versions, Thanks for info.

1313. Jack Tramiel at CHM - Dec. 10 !!!

Newsgroup: comp.sys.atari.8bit
Date: 2007-10-20 09:32:58 UTC
From: rbernardo@value.net
Message-ID: <1192860437.333112.295390@z24g2000prh.googlegroups.com>

Gigantic surprise! Former CEO of Commodore Business Machines and of Atari Corp., Jack Tramiel, will be making a rare public appearance! Yesterday I received a message on the answering machine from Karen Tucker, CMO/VP of Public Programs for the Computer History Museum in Mountain View (San Jose area), California. Here is part of what she said:

... I thought you might be happy to know that the museum is going to have a celebration of the impact of the Commodore 64 on December 10. It's kind of a 25th anniversary celebration, and Jack Tramiel will speak as well as Steve Wozniak and William C. Lowe, the father of the IBM PC, and Adam Chulaniak (sp?) who was the Amiga guy at Commodore, and we're still settling on the moderator. But I thought that if you are still part of the Fresno Commodore User Group... that you guys might want to make the trip down to Mountain View for this event on December 10.

All day today I've been playing phone tag with Karen in order to get more details and received another message saying that the exact title of that night's program is "The Impact of the Commodore 64: A 25-Year Celebration". More details to come when I find out more.
The Computer History Museum is located at 1401 N. Shoreline Blvd., Mountain View, California 94043. The website is http://www.computerhistory.org

I am so there for this event!

I hope someone is planning on videotaping this and making it available
for download??!??

1317. Memo Pad - Release 5

Newsgroup: comp.sys.atari.8bit
Date: 2007-10-21 05:03:19 UTC
From: eric <joyfulcoder@gmail.com>
Message-ID: <1192942999.945902.291720@y27g2000pre.googlegroups.com>
Source record: 4056

Hello,

I want to let everyone know that Memo Pad Release 5 is ready for
downloading.

New in Release 5 is:

- Fixed a crash that sometimes occurred when scrolling or resizing the
window after converting the end-of-line.

- Added support for the Atari 8-Bit International and Arabic fonts and
the Atari ST color (low/med res) and monochrome (high res) fonts.
- Added support for reading tokenized Atari BASIC files. These files
are parsed and converted to ATASCII text files.
- Added "Open as" option to the Open file dialog. Files can be opened
as Text, Binary, and Atari BASIC. The "Open as" choice is saved and
used by the "Open Recent" menu item.

The new URL is http://joyfulcoder.com/memopad/

Thanks,
Eric

I tried it. There is no 'Open as' in the File menu.
I tried opening a tokenized BASIC file, it just gave an ATASCII screen. You
sure you put the 5 version?

Hello,

Perhaps my description was not clear. The "Open as" is not a menu
option. It is an option in the file open dialog. Do "Open..." from
the "File" menu. At the bottom of the file open dialog you will see
the "Open as" option.

Thanks,
Eric

Hello,

This is good. Much more fun than converting with CHKBAS.EXE, although I haven't been able to convert Turbo Basic files yet...HINT... The only thing I would like added is Mouse Wheel Scrolling.

Thanks,
RoyE

OK, I got it this time. But I get an error when opening an Atari BASIC
saved file. Here's the error in Windows98SE.

MEMOPAD caused an invalid page fault in
module MEMOPAD.EXE at 016f:0040545e.
Registers:

Hello Russg,
Can you still send me that Microsoft QuickBASIC file? I would like to find out why Memo Pad crashes instead of telling you it is not an Atari BASIC file. You can send it to Joyful Coder at G mail period com.

Hello RoyE,
If you can point me to where the TurboBASIC file format is described I will look into adding support. I will also look into adding mouse wheel scrolling.

Thanks,
Eric

Hello Eric,

The closest I could come to finding info. on TurboBASIC file format is at
this LINK in the PC sources for CHKBAS: Jindrich Kubec 'Author' GNU
Public License. I believe that he has abandoned the Atari :-(

http://www.atarimax.com/jindroush.atari.org/asoft.html

Scroll down page. The sources for this PC program has a file called
'basic_tb.h'. Token information.
Also as basic-xe.h, and basic-xl.h Token information.

1326. Where to find Atari 400 Tape Drive Belt

Newsgroup: comp.sys.atari.8bit
Date: 2007-10-22 10:07:00 UTC
From: Zero dB <no@email.com>
Message-ID: <79toh3plbnena0entunr5kpfu9t7va5haj@4ax.com>
Source record: 4065

Greetings,

I recently got out all my old computing equipment to set up again, and when I went to load "Ghost Encounters" on my Atari 400 tape drive, I noticed that the mechanisms would not turn.

Upon inspection, the main drive belt is stretched and exhausted.

I was wondering if anyone knew of a good source for this main drive belt off the top of their head ?

I have a Fry's electronics locally and they have a selection of belts that I plan to look at tomorrow, though I don't recall seeing any square belts when I was last there. Hopefully I can find something close or identical.

I would like to find an exact replacement if possible, however.

ANY information you may have on this main drive belt would be most appreciated!

with dreams of gear drives,
-Jayson

If my memory is correct, Turbobasic only runs on XL/XEs, and Axlon Ramdisks
are only for 800s, so even if you have a working Axlon is your 800, I don't
think your config will work.

I put a caliper on the belt and got all the measurements, went to
action-electronics.com and ordered several sizes (to compensate for an
unknown amount of stretch.)

Will report back which exact belt from action-electronics.com is an
exact match after putting it through the paces.

I suspect the square 9.0" x 0.40" x 0.40" will be an exact match,
though I purchased from 8.6 to 9.2 incrementally.

This is for an atari 410 tape drive.

If nothing else, for information's sake and to satiate the need to
talk to myself ;)

1329. Update on Jack Tramiel at CHM - Dec. 10 !!!

Newsgroup: comp.sys.atari.8bit
Date: 2007-10-23 01:35:24 UTC
From: rbernardo@value.net
Message-ID: <1193103324.252521.230300@i38g2000prf.googlegroups.com>
Source record: 4068
Cross-posted to: comp.sys.atari.8bit,comp.sys.atari.st

Today I was able to make phone contact with Karen Tucker of
the Computer History Museum and question her on the details for
the event, "The Impact of the Commodore 64: A 25-Year
Celebration". Here are the specifics:

Location: Computer History Museum, 1401 N. Shoreline Blvd,
(exit from the 101 Freeway) Mountain View, California
94043 Phone: 650 810-1010

Time and format of the event: Monday, Dec. 10
6 pm - 7 pm -- Museum member's reception with the guests.
Beer, wine, and hors' doeuvres served.
7 pm - 8:30 or 9 pm -- First words/speech by Jack Tramiel,
panel discussion, question-and-answer session
Afterwards, informal chit-chat and possible autographs

Admission -- for the reception, free to museum members ($65
membership)
for the event, free general admission ($10
donation requested)

Seating capacity -- 400

Webpage -- Karen remarks that they are "stupidly slow" at
updating the events' page at
http://www.computerhistory.org/events/ but assures that
the event "is really going to happen... definitely".

Guests to speak/appear (updated) -- Jack Tramiel (pronounced
/tra mel/, Karen tells), former CEO of Commodore Business
Machines

Steve Wozniak of Apple fame

William C. Lowe, father of the IBM PC

Adam Chowaniec, former vice-president of technology for
Amiga at Commodore Business Machines

John Markoff, moderator of the panel discussion and New
York Times reporter and author of the computer history
book, "What the Dormouse"

Leonard Tramiel, former vice-president of software
development and v.p. of advanced technology at Atari
Corporation

Jeri Ellsworth, engineer behind the CommodoreOne and the
C64 DTV

Media recording - photography (no flash), videography, and
audio-taping permitted. Possible webcast from Liquid
Computing of Canada (Chowaniec's current company),
which is sponsoring the event.

Some items are still in flux; when I have further updates, I will
post them.

Truly,
Robert Bernardo
Fresno Commodore User Group

Hello,

I noticed Jindrich's page indicates his stuff is GPL, which is fine,
but because I do not have plans to release my source code at this time
it is best I avoid his stuff.

I got the Atari BASIC format from De Re Atari. And Gury's site seems
to indicate the Turbo BASIC format is very similar to Atari BASIC. It
simply extends the command and operator list using new IDs. And the
only real difference is how numeric constants are stored.

Thank you,
Eric

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE, 130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from 1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by Atari Interactive, which is managed by today's Atari, Inc. Both of these are divisions of Infogrames Entertainment.

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by
Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of
Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from
1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by
Atari Interactive, which is managed by today's Atari, Inc. Both of these
are divisions of Infogrames Entertainment.

I have the complete set of 4 DVD's on this subject. I bought them all online. I cannot remember the site, but I would just Google "Once Upon Atari" and you should get it. It is pretty good actually. Atari was pretty big when it started. Too bad it is gone.

1349. Jack Tramiel Update

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-07 19:09:13 UTC
From: Brian Bagnall <bbagnall@mts.net>
Message-ID: <w3oYi.3341$_S5.1297@newsfe21.lga>
Source record: 4088

Last week I received a call from Karen Tucker, who is organizing the December 10th appearance of Jack Tramiel at the Computer History Museum in California. The event will include key people from Apple, IBM, and Amiga (see below). When writing the book "On the Edge: the Spectacular Rise and Fall of Commodore" I tried getting an interview with Jack by calling him almost a dozen times, writing several letters to him, and getting his son Leonard to convince him - everything short of showing up at his ranch and demanding an interview. I'm in awe that Karen has been able to make this happen. Apparently she and Leonard convinced Jack that it was important for him to talk about his experiences before it was too late.

Karen wanted me to pass on some information. Basically Jack is done with the confrontational period of his life where he had to be hard nosed in order to run a company in a cutthroat industry. He's now a retired grandfather who spends most of his time traveling with his family. Karen wants Jack to feel welcome, where everyone in the audience can listen to his history with an open mind. Hopefully if he feels welcome at the museum he will participate in other events and we can eventually piece together his experiences in the early computer industry. Karen knows that most people will be receptive to Jack, but she was a little worried that a few might decide to throw his kind gesture back in his face by confronting him. If you know of anyone who plans to do this, please discourage them from attending.

From what I could gather, this is in celebration of the 25th anniversary of the C64. There will first be a one-on-one interview with Jack moderated by John Markoff of the NY Times. After that, Steve Wozniak (Apple II), Bill Lowe (IBM PC) and Adam Chawniac (Amiga) will take to the stage for more discussion. The discussions will probably focus on Commodore, though it's possible his Atari history will be included. Everyone is welcome and if you aren't in the area there will be a video webcast of the event available on their website. This promises to be a great event, and I hope to see you there!

More information should be available soon at:
http://www.computerhistory.org/events/

All the best,

Brian Bagnall

speaking of this. Remember the helicopter game where you the enemies
would sometimes be an apple logo or C= for the 8bit? I think it was
Fort Apocalpse but Im not sure.

Foxy's Showtime on Capital FM 25/11/98 7.35pm

Certainty level: 100%

This one, I can say with absolute certainty, is about me. It was recorded on my Sony Recording Walkman on the evening of Wednesday 25 November 1998. It doesn't mention me by name, so the objective observer might have trouble understanding why I'm so sure it's about me. I'm sure, because the harassment had restarted over the period when this piece was broadcast, and what Capital transmitted would have been in context with events at the time. (Sorry if that explanation is somewhat opaque, but I don't really want to embarrass myself by giving an explanation in detail, and an intelligent reader should be able to work it out for him/her self.)

This isn't the first time Capital have "got at" me; they were doing so right at the very beginning in summer 1990, when they said, "if he listens to Capital then he can't be all bad"; and Tarrant made remarks about me in his breakfast show in spring 1994, when he said, "you know this bloke? he says we're trying to kill him. We should be done for attempted manslaughter."

Unfortunately I didn't record those previous, much more conclusive instances of harassment by Capital DJs, and Capital Radio tells me they only keep recordings for three months. But lately I've been recording everything, and here is one product of that recording.

Neil Fox was introducing some petite Swedish songstress, sounded like Amelia, when he said something about her petite-ness ;

"she's a big big girl, actually she's really about tiny, she's this big, would you say what less than....."

then one of his studio staff shouted, "six inches"

then Fox laughed and said, "less than a meter tall, definitely"

What I think the "six inches" referred to should be obvious. I think it's sexual abuse directed at me.

Also there were a lot of words like "crazy", "mad" etc on this programme, which reinforced my belief that this was on purpose directed at myself.

I think Fox may be something of an unwilling participant in this abuse, he doesn't want to be an abuser but the persecutors are using his show and his staff to get at me. This is not the first time this sort of thing has happened from his show; and my guess is that it won't be the last

Jackie King from the Flying Eye 14/3/99

Certainty level: 40%

In early March 1999, Capital Radio alleged they had received some emails, one of which was forwarded to me. It contained the words, "you know this bloke, he says we're trying to kill him, we should be done for attempted manslaughter!" which Chris Tarrant had said in 1994.

Following these emails there was an explosion in abuse activity, both from Capital Radio, and from MI5 themselves. MI5 followed me around and hurled abuse at me. The following audio file contains what may be abuse from the radio station.

Jackie King from the Flying Eye made these remarks on Sunday (14/3/99) lunchtime 12.24pm; "gas main work being, er, HANDLED if you like (laughs, embarrassed) outside Madame Tussauds, Euston Road obviously feeling the backlash of that".

The key word is "handled", which she sounds embarrassed to be saying; to me it looks like an attempt at a sexual slander. Capital Radio aren't even pretending not to get at me any more. I asked Chris Tarrant several times about his remark from 1994, and he has consistently avoided answering.

Virgin Radio-Johnny Boy (21/August/1998)

Certainty level: 60%

On Saturday 15 August 1998 I attended a gathering of contributors to newsgroup uk.misc at London's Victoria railway station. Also present was Simon G, who had previously given this description of what he would be wearing;

At 06:36 AM 13/8/98 GMT, Simon wrote:
>further clarification to aid recognition, i'll be wearing
>a t shirt, a brown suede waistcoat, a brown suede miniskirt,
>& a pair of patchwork leggings (& may have a widebrimmed straw
>hat, too).

It is my belief that my persecutors, who monitor my home telephone line (and consequently read all modem communications including email), were aware of this meeting, and may even have observed the "meat" taking place.

Following the "meat" it seemed to me that one or two attempts were made by my persecutors to portray me as "gay", on the basis of Simon's suede miniskirt, which in their inventiveness my persecutors attributed to me, not Simon. (Just for the record, Simon is hetero, and has agreed to the above email extract being published.) The following item from Johnny Boy's Wheels of Steel (between 7pm-11pm, Friday 21/8/98) is one such attempt.

(conversation) (J=Johnny-Boy, H=Hipster)

J: Texas of course part of V98 this weekend enjoy it if you're going. Keep your eyes out on Sunday in Chelmsford for Hipster, because he's going to be there. What are you going to be wearing?

H: I'll be wearing my, er, my suede shorts.
(sycophantic laughter)

J: and believe me he ain't joking, he ain't joking. OK coming next at Virgin on the Wheels of Steel...

Why do I think Hipster's "suede shorts" refers to Simon's mini-skirt? Because "suede" in both cases (obvious!); because "suede shorts" indicates "gay" which they were trying to pin on me; because "shorts" = something short, such as a "mini"-skirt; and because the two DJs both laughed as soon as Hipster said "suede shorts", they knew what the joke was, they knew that they were meant (and probably paid) to find it funny.

1365. MI5 Persecution: Johnny Boy (19/June/1999) (7039)

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-11 07:32:15 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07101111284361@4ax.com>
Source record: 3905
Cross-posted to: es.alt.sexo,uk.environment.conservation,alt.fan.british-accent,alt.music.black-metal,comp.sys.atari.8bit

Virgin Radio-Johnny Boy (19/June/1999)

Certainty level: 30%

I'm not quite sure about this one, so I've given it a one in three chance of being about me. First the background.... from mid-March 1999 for some three or four months, every weekend, I bombarded Westminster MPs with faxes about the terrible, all-encompassing MI5 Persecution. (Jesting aside, it really is terrible and all-encompassing, in the UK anyway.) Of course each week some MPs replied; but in June 1999, after I'd been at it some three months, I started getting "covert" feedback from Virgin Radio.

The first feedback I got was from Danny Baker, on Sunday 13th June. That weekend I was sending an article which contained biting criticism of the police inaction in this case. Danny Baker on his Virgin radio show started an angry rant that "he knows it's rubbish", ie. he was rubbishing what I'd said in that weekend's faxed article. Unfortunately I wasn't recording this programme.

The next possible Virgin-Radio feedback was a week later on 19th June 1999. This is contained in the audio file above, in which Johnny Boy on his "Wheels of Steel" programme says;

"and if you would like to put a triple play together, ahhh.... because quite frankly Hipster and me are running out of ideas...."

He goes on to counter Hipster's "how dare you" with a protestation that he is "only joking".

What I reckon is that my article faxed to MPs that weekend was forwarded by one of the recipients to Virgin Radio. My article had included the words;

"I am beginning to run out of both new topics and energy to write these articles."

So what I reckon is that Johnny Boy read the article.... and rephrased the above line "run out of ... new topics" to "running out of ideas". I recognise that this is a pretty tenuous inference to make.... but do listen to the audio file, from the "ahhh...." pause in JB's speech you can guess he is about to say something "risky" and at someone's expense. Anyway, I listen to the Wheels of Steel regularly and will continue to do so, recording it as I always do - so any future funny remarks will get immortalised on these pages!

Brighton Day Trip - 24/Sept/1998

Certainty level: 5%

On a day trip to Brighton, carrying a minidisc recorder, I managed to collect several indistinct instances of what I think were people swearing at me. Between the 0.5 and 1.5 second marks of the above recording is something that sounds like "nutter". I recorded at least three other much more obscene sexual words on the same day.

I don't honestly think the "nutter" recorded here is part of the conspiracy against me. I've been called similar things elsewhere, where it's been blindingly clear that the insult does form part of the conspiracy - but not in this case. This illustrates quite a worrying point - as a result of the many years of abuse "in public", I now sometimes simply don't know whether somebody is insulting me because they think I look like a dweeb, or whether the conspiracy is in action. Sometimes, due to background noise and people talking quietly relative to ambient noise, I can't be sure of what's being said, even after listening to it again on my minidisc. Or put another way, I now have a mild form of what I recognise to be occasional auditory delusions - but these are fuelled by the many years of actual verbal abuse.

POSK Cafe - 2/Feb/1998

Here are two independent segments, both of which occurred in London on
the same day, the first at a Polish cafe, the second on the Tube.

Certainty level: 100%

POSK is the Polish Social-Cultural Centre in Hammersmith, London. It has
quite a nice cafe which does pierogi, golabki etc. I went there with my
mother early in 1998. Seated at the window table were three Polish men
talking amongst themselves. One of them let rip with a sexual obscenity
which was clearly directed at me (it's the same one that's been heard
again and again since about November 1995), and which was recorded on my
minidisc walkman. I have not included it in the above excerpt, which shows
the reaction of another of the trio to the first man's swearing - namely,
"jestes swinia jednak" which in English is "nevertheless you're a swine".

Certainty level: 20%

Somewhere on the London Underground. "Psycho" (I think - a little unclear).

1369. MI5 Persecution: Leicester Square 9/2/98 (13561)

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-11 10:37:07 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07101114333656@4ax.com>
Source record: 3909
Cross-posted to: es.alt.sexo,uk.environment.conservation,alt.fan.british-accent,alt.music.black-metal,comp.sys.atari.8bit

Leicester Square - 9/Feb/1998

In February 1998 I spent some time in Leicester Square, in the West End of London. This is a very busy area of London, and one which can be relied on to produce "contacts". Capital Radio's offices and their cafe are located here, the Trocadero is nearby, and the place is full of cinemas and entertainment venues.

Certainty level: 100%

A young girl is heard to say, "Alright I'm going to talk to myself" to her friends, followed by all of them laughing together, as I passed by.

Believe me, I do not look mad in real life, these young people would not have directed their comments and laughter at me unless they had already been told by others that I was ill. I am absolutely certain that their behaviour was directed at me, and this audio file is particularly clear.

Certainty level: 60%

This one was recorded in a cafe in Green Park. Two women are talking to each other, one of them says to the other, "something wrong with him", with an emphasis on the "wrong".

The words "something wrong with him" have been repeated at me dozens of times, at my former workplace in Canada, in England, etc. The words are quite deliberately chosen to have two meanings; they obviously imply that I am ill, without forcing the abusers to demean themselves by using more pejorative terms, although they have shown that they have no compunction in that area; and secondly, the words "wrong ... him" make me at fault, and place the guilt for the abusers' wrongdoing on my shoulders.

Certainty level: 30%

Recorded on a Victoria line tube train leaving Green Park station.
If you listen carefully you can pick up the word "hunchback". The speaker had emitted a swear word immediately before this excerpt; both the swear word, and the "hunchback", were (I believe) directed at me.

BA984 LHR->TXL 13/June/1998

Certainty level: 100%

In June 1998 I travelled on the above British Airways flight to Berlin with my mother, to visit her family. There were two women in seats 30D/E, about 4/5 rows behind us. It was quite obvious from the torrent of abuse during these flight that these women had been instructed to harass me and attempt to obtain a reaction.

I did manage to record much of the flight, but unfortunately much of the recording is unclear because of high background noise on the aircraft. The following three excerpts from the recording are the best I can do.

The segment at position 11:34 minutes on my recording contains a fairly quiet word "paranoid", followed immediately by a much louder "yeah, he's paranoid, yeah". During the flight the abuse was not sexual, as it so often is elsewhere, but attacking my mental health.

One of the women in seats 30D/E said "paranoid" very clearly towards the end of the flight, but unfortunately I had run out of minidisc space and stopped recording by then. There is absolutely no doubt in my mind that these women were directed to harass me. This harassment happens without fail on British Airways flights; I've been on something like three or four BA flights in the last 5 years and it's happened each time. Presumably this is because of international law which says incidents on aircraft during flight are actionable in the airline's country of origin - so my persecutors want a reaction from me, and they want to see me "done" in the UK where they can influence the justice system.

These incidents never happen on foreign-domiciled carriers.

In one of those threads on AtariAge, Eru (the main author, I believe) was talking about working on a version that would be compatible with NTSC. So I'm hoping that happens. The current version is definitely PAL only.

It sure does look cool though, and it's actually even quite fun in an emulator.

1373. MyIDE Tool V0.30 released

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-12 13:25:16 UTC
From: Matthias Reichl <usenet-200711@hias.horus.com>
Message-ID: <slrnfjgl1s.9v7.usenet-200711@camel.hias.horus.com>
Source record: 3912

MyIDE Tool V0.30 is now available from my homepage
http://www.horus.com/~hias/atari/

MyIDE Tool is a program for Linux/Windows PCs that provides
direct access to MyIDE harddrives. Just hook up your IDE harddrive
or your CompactFlash card (either with a CF-IDE adapter or with
a cardreader) to your PC and quickly transfer ATR files from/to
your MyIDE drive!

This version also supports Shawn Jefferson's MyIDE Image Manager
(version 4.1 is required, previous versions are not compatible
with MyIDE Tool) so you can specify category names, sort image
manager lists etc. on your PC.

so long,

Hias

1375. Memo Pad Release 6

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-13 04:27:29 UTC
From: eric <joyfulcoder@gmail.com>
Message-ID: <1194928049.143672.53530@k79g2000hse.googlegroups.com>
Source record: 3914

Hello All,

Memo Pad Release 6 is ready for downloading.

- Fixed a crash that appeared when opening a non-Atari BASIC file as
an Atari BASIC file.
- Fixed the file dialog; it was not remembering the previous path
used. I broke this while implementing the Open As feature for Release
5.

- Added support for opening Turbo-BASIC files.
- Added error messages to report why a BASIC file failed to open.
- Added support for mouse wheel scrolling.
- Added an option to Binary View Preferences to allow changing the
number of data bytes displayed on each line.

http://joyfulcoder.com/memopad/

Thanks,
Eric

Awesome game!!!!!

I have been yoomping for the past 20 minutes straight and can't get enough.......

One of the most addictive A8 games I've ever played; huge kudos to the authors.

Thanks for the heads up :)

Ok, so 2nd place in the recent ABBUC contest is a jump-and-run game
that looks a little like Super Mario Bros 3 from the Nintendo NES,
or Sonic the Hedgehog from Sega.

From a technical standpoint, I think it's incredible. And from a gameplay
standpoint, it's absolutely the best Atari 8-bit platformer game I've seen.
(The graphics help, of course, but regardless of that, it's a very snappy,
smooth game, compared to, say, Bros. or Fred.)

I haven't had time to get too far in the game, yet, but just in the
first two levels you've got:

* Circle wipe effect (game screen appears when you start, and disappears
when you die or beat the level, covered by a growing/shrinking circle
outline)

* Two layers of faux-alpha-blended animated wavy water

* Multi-level parallax scrolling (at least one of which is behind the
foreground playfield, so they didn't cop out by making all of it above
the scrolling game area / foreground :^))

* Numerous multi-colored sprites (your character, stars that you collect,
an enemies are all multi-color! There's a little flicker when more than
two are on the same scanline, but it's worth it, and nothing the NES
didn't do in some games... Bayou Billy, anyone? :^))

It requires 128KB, and I believe also requires PAL. But it works flawlessly
under the "Atari800" emulator on my Linux laptop, so most folks out here
should be able to give it a whirl.

Not sure if they have a website, but you can learn about it, see screenshots,
and download a disk image from "Atarimania" (a site I just discovered via
Google, in fact... *shame* :))

http://www.atarimania.com/detail_soft-TYPE_CODE-G-MENU-8-ADV-0-VERSION_ID-20358-SOFT_ID-14
604.html

Enjoy! Now I need to go check out the other ABBUC contest entries. :^)

Thanks for the info, Bill. I can't get passed
level 3 in YOOMP!, even with 255 lives (A5),
heh. I did see the final 'congratulations' screen.
Cheating the level and lives.
I can't, never could, figure those horizontal
scrolling games, like crownland. And I'm not
searching for lives cheats either. Nice game tho.

I tried the demo for this, which came out a couple months ago. It really is spiffy looking and has great play value. I really hadn't seen that high quality of graphics in an Atari 8bit platformer before. Neither Pitfall 2 nor Bruce Lee, Canyon Climber or Miner 2049 have graphics at that level, and Crownland scrolls too!

I also use an emulator (Atari800, on FreeDOS PC) to try it, and I think the keyboard playing degrades my ability somewhat. I would like to try it with a joystick on a real Atari 8bit, esp. my 64K Atari800 or my XE Game system. I would really like to see this in cart form with the memory down to 64K even if perhaps my 800 won't handle it for "RAM under the ROM" incompatibilities.

Some kind of year for ABBUC competition!

I've bought a 130xe PAL UK and SIO2PC usb interface off ebay. Some games and demos are working with this combination, but others
crash out. All the software works in an emulator. Biggest problem is the one game which I really bought the entire setup to play
(Dropzone) isn't working.
Any ideas on what's happening? I'm a complete newbie to the Atari 8's so any help would be much appreciated.

Being a newbie, there could be a number of things.
First, Dropzone, if you have the .EXE or .XEX, binary load file, requires a
boot loader disk (image).
You might want to get a Dropzone .ATR of the game, which will load on boot.

http://www.langesite.com/Atari/Holmes/Holmes%201/ATR%20Games/Games%20A-L/

download dropzone.atr

The game may require a 128K machine, probably not. To go back. If you are
trying to load the game from a DOS disk, it won't work, the game is too big
and writes over DOS, causing the computer to crash.

You also need to be sure BASIC is disabled on boot, which on your actual A8
is hold down OPTION when booting.

There may be other issues, but you can try these.

Well, I was wrong about the 128K, you have 130XE. And the binary load .COM
does load satisfactorily if BASIC is off, it doesn't require a boot loader.

You are welcome!

Transferring data with SIO to my MyIDE drive was way too slow
(especially movies or 16MB ATRs), that's why I started to write
MyIDE Tool last year.

I built a CF-IDE adapter into my 800XL and made the CompactFlash slot
accessible from the outside (mounted directly above the SIO jack),
now it's really fun to work with MyIDE :-)

> (Honestly, I'm seriously considering getting an SIO2IDE, since it'd be the most
> compatible with wacky euro demos & games I enjoy :^))

I'd recommend getting a SIO2SD interface in this case. I have one since
half a year now and it's really nice. SD cards are cheap and small and
you also can hook them up directly to your PC to transfer data. I use
a 2x20 LCD (instead of the standard 2x16), so I can use longer
filenames (unfortunately the current SIO2SD firmware doesn't scroll
if the filename is longer than the display width).

so long,

Hias

1391. MI5 Persecution: BA984 LHR->TXL 13/6/98 (520)

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-17 02:30:40 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07101706270124@4ax.com>

BA984 LHR->TXL 13/June/1998

Certainty level: 100%

In June 1998 I travelled on the above British Airways flight to Berlin
with my mother, to visit her family. There were two women in seats 30D/E,
about 4/5 rows behind us. It was quite obvious from the torrent of abuse
during these flight that these women had been instructed to harass me
and attempt to obtain a reaction.

I did manage to record much of the flight, but unfortunately much of the
recording is unclear because of high background noise on the aircraft.
The following three excerpts from the recording are the best I can do.

The segment at position 11:34 minutes on my recording contains a fairly
quiet word "paranoid", followed immediately by a much louder
"yeah, he's paranoid, yeah". During the flight the abuse was not sexual,
as it so often is elsewhere, but attacking my mental health.

One of the women in seats 30D/E said "paranoid" very clearly towards the
end of the flight, but unfortunately I had run out of minidisc space and
stopped recording by then. There is absolutely no doubt in my mind that
these women were directed to harass me. This harassment happens without
fail on British Airways flights; I've been on something like three or
four BA flights in the last 5 years and it's happened each time.
Presumably this is because of international law which says incidents on
aircraft during flight are actionable in the airline's country of
origin - so my persecutors want a reaction from me, and they want to see
me "done" in the UK where they can influence the justice system.

These incidents never happen on foreign-domiciled carriers.

Evil old bat in BHS 18/12/98

Certainty level: 40%

Not quite sure how sure I am about this one. I went down to Croydon (Surrey) with my mother to buy her a beret. After doing the shopping, we went to the BHS store restaurant to lunch on fish and chips.

You can guess the rest. Auditory hallucinations my shrink calls them, faithfully recorded on Sony minidisc. Some old cow going on about "see that chap, the one over there, something's wrong with him".

It is quite tiring being attacked by random idiots in the street, or as in this case, by some random, evil old bat in a restaurant. Fortunately it is only a sporadic occurrence. My enemies seem of late reluctant to waste resources in my direction. Should I take this as an insult? Am I not worth the millions of taxpayers money which has been wasted on me? Are the obsessives of MI5 themselves the "nutters" and "really mad" which they accuse me of being? Interestingly this suggestion as to the psychological profiles of Security Service personnel has been made by others... it does lead one to wonder, doesn't it?

Ravenscourt Park 20/3/99

Certainty level: 70%

On Saturday I went to Hammersmith, specifically Ravenscourt Park. There had recently been a resurgence of persecution activity, following the Capital spams. I went to the cafe in the park and had a cup of coffee outside, with my mother. As I went inside the cafe to return the cups, a woman shouted a sexual obscenity (not present on this audio file - don't ask), and she said loudly "something's wrong with him". You can just about hear it in the audio file; listen very carefully, several times; it is distinguishable.

Much less subtle is the male voice shouting "take care he's a nutter" immediately after the woman's voice. As on the other recordings there's a lot of noise, but what the people say can be clearly heard.

Given that I take medication and look and behave quite sanely, and that there had been increased abuse over the last couple of weeks, it seems pretty unlikely that this incident was just spontaneous.... of course, you couldn't prove otherwise, but then that's the way MI5 mean their abuse to look.

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by
Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of
Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from
1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by
Atari Interactive, which is managed by today's Atari, Inc. Both of these
are divisions of Infogrames Entertainment.

Battersea Library 29/3/99

Certainty level: 60%

This one is quite dull. During the month of March 1999, MI5 made another determined attempt to "get" me, substantially through radio programmes, through Jon Snow on Channel Four News, and through abuse in public, of which this is one example.

Recorded on my minidisc-walkman on Monday 29 March 1999, this audio file consists of two girls talking. One says to the other, "he's got something wrong with him." The usual words. How many millions a year do the Security Service waste on this? But they've denied it - how silly of me to forget. And they're not liars either, are they?

Royal Festival Hall 15/4/99

Certainty level: 100%

Another "day in the life of", this one. January and February were quiet; in March it all started again; by the middle of April the resurgence of abuse had been going on for over a month. And this, with 100% certainty, is one manifestation of the abuse.

On Thursday 15 April 1999, 1pm lunchtime, I was at the booking office at the Royal Festival Hall near Waterloo Station in London, buying a ticket for a friend. A woman was at the counter next to me. She said;

"it would kill it, you know, it would just be overkill...
.. they can't stop can they"

It was obvious to everyone, the ticket agents included, that her comments were directed at me, and that "they" (ie. MI5) were "killing" me.

I've heard similar things said at various other times, but rarely have their intentions been expressed as clearly as this. The woman also expressed the obsessive nature of MI5's preoccupation with me, by saying, "they can't stop can they".

Balham - LT bus (8/July/1999)

Certainty level: 90%

I am very sure about this one. I got back from holidays on Wednesday. There were two incidents, both on the tube, on the way back from the airport. There was a further incident the following day, Thursday, on the bus (the 155 I think) in Balham, where two girls started spouting abuse about "crazy", etc. Naturally I had my minidisc with me and was able to record their words.

The cynical reader might think my demeanour or behaviour had given rise to the taunts of "crazy" recorded above. But I assure you my behaviour on the bus would not have made anyone think I was ill; and the taunts the previous day were the same sexual words as previously; so I'm quite sure that these incidents are either deliberately staged, or indicative of an overall high level of awareness among the London public, particularly in the part of London where I live.

Source record: 3939
Cross-posted to: alt.fan.british-accent,alt.music.black-metal,comp.sys.atari.8bit,de.sci.informatik.ki,fr.comp.sys.mac.materiel

Clapham South (17/Feb/2000)

Certainty level: 100%

In February 2000, MI5's hate campaign against me was in full swing. They sent people into the road where I live in south London, to swear at me and abuse me as I was leaving or returning home. One such instance is recorded on the above audio file.

On Thursday 17 February 2000, I had just left my home, en route for Croydon, when two youths approached, going in the other direction. One of them said with a smile on his face something which I didn't recognize, and still don't understand despite it being on this audio clip. His demeanour made it clear his statement was directed at me. I coughed, and in response to that, he continued his insult, calling me a "wanker", which is very clearly recorded on this audio clip.

Two days later, in the very early morning of Sunday 20 February 2000, MI5 inflicted another insult against me just outside my house, when, returning from Croydon, two youths approached (MI5 agents always go in packs of at least two - they're too cowardly to go anywhere on their own) and one of them said quietly and bitterly to the other that "he's shitty, very shitty".

It is still comparatively rare for MI5 to send people to my house, or to my road, to harass me. Usually they know where I'm going to, since they have bugs on my phone and in each room of my house; and they send people to that location, or on the train or tube getting there.

1401. MI5 Persecution: Clapham Junction 6/5/00 (15745)

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-17 13:35:51 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07101717321147@4ax.com>
Source record: 3940
Cross-posted to: alt.fan.british-accent,alt.music.black-metal,comp.sys.atari.8bit,de.sci.informatik.ki,fr.comp.sys.mac.materiel

Clapham Junction (6/May/2000)

Certainty level: 60%

On Saturday 6 May 2000, I was in Clapham Junction, shopping and visiting the library. At precisely 12:29pm, the above audio clip was recorded, in front of Arding and Hobbs department store. One girl was saying to her friend,

"He's a homosexual, they can say whatever they want."

There are several reasons why I think this comment might be about me. Firstly, temporal proximity to other such incidents. The persecution had restarted about two to three days before this clip was recorded. Cause of restart unknown. Personally I think it's because I was going on holiday to France the following Monday - MI5 do like to take holidays abroad at the taxpayer's expense, and inventing reasons to resurrect their hate campaign just before I go on holiday is something they've done before.

Secondly, although I am not gay, they have used such references against me before. At Oxford Computer Group in 1994, manager Steve Mitchell simultaneously abused me and another employee but saying we were "of a similar bent". Such insults show latent or quite overt homosexuality on the part of the abuser.

Thirdly, the sort of people who abuse on the basis of mental illness are the same people who abuse others on the basis of sexuality, race, religion, etc. If they can abuse a disabled man, then they will surely do so based on the other criteria mentioned.

There is still some room for doubt, though, which is why I have assigned this recording a certainty level of only slightly above evens. But "they can say whatever they want" is what gives the game away; they just choose a differentiating feature on which to base their abuse; and if one such feature gets too boring ("we've called him a nutter for the last ten years so now we'll call him something else") then they invent a different lie to throw at me.

Balham High Road (3/Nov/2000)

Certainty level: 60%

On 3 November 2000, I had just got off the bus in Balham High Road,
when I heard a group of schoolgirls shouting and laughing. One of them yelled;

"He's an idiot you know."

You can hear this on the above clip; it is followed by laughter. I am
not quite sure this is about me, which is why I have only given it
a two in three probability. I have been attacked many times with the
word "idiot", which seems to be a favourite with intellectual lightweights
who want to bring down bigger game. (Back in 1992 I was so worried by the
attacks on my intelligence that I took the test and joined Mensa......
does that make me a *clever* idiot? Never mind.)

Steve Tucker has the USB interface for $60 and
the APE Windows registered for $50, and a complete kit for $105, if I
understand what he's offering.
Steve often sells on ebaY as well.
I've done businuess with him and been pleased.
(It is a little confusing what he's offering, but he should clarify in
e-mail if you have questions.)
Oh, and probably doesn't have Linux software,
but he can tell you if it work with a Win emulator or something.

Crescent Grove, Clapham Common (2/Dec/2000)

Certainty level: 100%

This is one of those clips where I am absolutely, 100% certain it's inflicted by MI5 on me, because of background, context. On Saturday 2 December 2000, I was walking from my home to a pub on Clapham Common, and on the way was in proximity to a group of three English youths who were walking the other way. They turned from the main road into a private estate called Crescent Grove. Here is what they said;

(first youth) "He masturbates!"
(his mate responds) "Yeah, he masturbates!"
(and again) "Thief!"

There is a lot of context associated with this incident, which I will now relate.

Firstly, the verbal sexual abuse is a popular one with MI5, and as a statement about me is currently mostly in their imaginations. The accusation has to be seen relative to MI5's persecutory actions in late November and early December 2000, and in fact for some months leading up to this. Their relevant activities in June 2000 are documented in a message in this evidence item; following from that, they sent someone to simulate an act in front of my window, which was captured on film.

It is the publication of the video of their agent performing the act on himself which caused MI5 to restart this thread of harassment in the first few days of December 2000. But there are some subtleties; I uploaded the digitised video to this website on 26/November/2000; but I did not announce its existence on the newsgroups until Sunday 3/December/2000. These youths' slur was made the previous day, on Saturday 2/Dec. That tells us quite a lot. According to my website logs, there were no accesses to the video file before Sunday 3/Dec. So why did MI5 restart this particular thread of abuse, before their agent's activities were published on the newsgroup? The conclusion we reach is that they were watching my internet connection, either decoding the telephone line, or at the ISP; and/or they may be able to physically see what is on my notebook computer's screen, from RF transmissions from its VGA circuitry. I do not know whether the latter is technically feasible, but the former certainly is, and I have known for years that MI5 bugs my internet activities and phone calls. It is from their observation of my internet connection that they were able to tell, without accessing the video file over the net, that it was of their agent in a compromising position; and it was from that observation that their shouted slur on 2/Dec emanates.

The second accusation, "Thief!", is even more interesting. It relates to occurrences from June of 2000, some six months before these youths threw the word at me. It shows just how wide in reach geographically and temporally the MI5 persecution is; they react to something which happened half a year previously.

In the first half of 2000, MI5 made a determined assault on my friendships. In one particular case, that of A. whom I had known for virtually all my life, they partly succeeded. This person made pointed references to me which made it clear he knew what was happening; at one point he started asking "do you know anything about the FBI and the CIA". In June 2000, we went to see a film in the West End. I paid for both of us, and then asked him to return what I had paid for his ticket, some £7.50. He was reluctant to do so. Eventually he returned £5, settling for the lesser gain of £2.50.

I did not call him a thief to his face, but I may have spoken the word while I was at home, either conscious or in my sleep. MI5 have very tight control over everything I do and say in my home through their bugs; if I say anything against someone in "their" camp, they turn round the accusation against me. So, from the fact that A. tried to garner a few pounds at my expense, MI5 create the accusation, six months later..... "thief!".

1406. MI5 Persecution: Jon Holmes (4-5/Jan/2002) (22270)

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-17 20:35:15 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07101800314390@4ax.com>
Source record: 3948
Cross-posted to: alt.fan.british-accent,alt.music.black-metal,comp.sys.atari.8bit,de.sci.informatik.ki,fr.comp.sys.mac.materiel

Virgin Radio-Jon Holmes (4-5/Jan/2002)

Here are two segments from Virgin FM, one on Friday, the other on Saturday,
both from the Jon Holmes evening show.

Certainty level: 80%

In early January 2002 I listened for the first time in some months to Virgin Radio,
specifically to the Jon Holmes evening show on Friday 4 January 2002. They promptly
attacked me verbally. Again, context is relevant. There are three instances in the
space of two minutes on this extract;

00:18 "are you lying?"
00:22 "it's not fair"
01:24 "everyone at the amateur c+ turbo programmers club found it hilarious"

The first phrase is a straight slander. MI5 were trying to portray me as a liar at
around this time; I have other audio with the same accusation. "are you lying?";
unsophisticated.

It's closely followed by the words "it's not fair". Note carefully the way he says it,
quickly, as if to deny what he says. The phrase "not fair" was first created by OCTS MD
H S.-W. in Nov/1992, and picked up on my first visit to hospital soon after
"they should have paid your fare").
Again, unsophisticated parrotting of a key phrase.

The third phrase is explicable through contemporaneous context. That morning I had
phoned about a C++ course. "c+ turbo programmers club"... again, somewhat brazen
we're-listening-to-what-he-says-on-the-phone, and he-can't-prove-it. Something got lost
in translation from MI5's watchers to Virgin, because "c+ turbo" means nothing.... there
is no C+ turbo language, only C++, of which Turbo C++ is one implementation.

Certainty level: 80%

I wasn't entirely convinced from Friday's programme, but the following evening's
show confirmed it. It contained a number of references to my condition, of which the
following excerpt is one such;

00:09 "I'm not well, and no-one cares"
00:24 "my voice sounds all funny"
01:01 "do you mean people that aren't mad"
01:05 "medical problem is it"

"I'm not well" doesn't mean he has a cold; it means he is being sarcastic about my
mental illness. "my voice sounds all funny" refers to the change in nature of my
voice when acute illness hits. "do you mean people that aren't mad" is obvious.
"medical problem is it"..... rubbing salt into the wound.

1407. Re: Best way to get SIO2IDE... or wait for SIO2USB?

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-17 21:59:57 UTC
From: Matthias Reichl <usenet-200711@hias.horus.com>
Message-ID: <slrnfjup2t.jv6.usenet-200711@camel.hias.horus.com>
Source record: 3945

On 17 Nov 2007 08:21:39 GMT, William Kendrick wrote:
> Are there any good places/people from which I could purchase an
> SIO2IDE adapter?
>
> Or perhaps should I wait (and save up) for an SIO2USB? (SIO2SD was also
> mentioned, though it sounds as though the former will be better...?)

Actually all three are fine devices, each with its pros and cons.

The big advantage of SIO2SD and SIO2USB is that you can control them
independently from your Atari, for example swap disk images with a
few key presses (this is sometimes absolutely necessary, for example
if you play a multi-disk game and have to exchange disks somewhere
in the middle of the game).

The SIO2USB is a really awesome device (I saw it live at the ABBUC JHV),
but it also costs a lot. Since I already have a SIO2SD and MyIDE I
didn't buy one. SIO2USB is extremely well built, the internal RTC is
also nice and you can control it either with a program from your Atari
or with the menu keys and LCD.

A slight drawback of the SIO2USB is that only a few USB sticks are
compatible. There's currently a discussion about this on the german
ABBUC forum:

http://www.abbuc.de/modules.php?name=Forums&file=viewtopic&t=3241

I bought my SIO2SD from Wolfram Fischer (mega-hz) and it cost some
40EUR (without LCD, keys, enclosure, SIO-cable - just the assembled
PCB). Currently he sells a newer version with LCD and keys for 60EUR,
or with enclosure for 80EUR (both versions are without a SIO cable).

http://mega-hz.no-ip.com/Angebote/angebote.html

The SIO2SD interface can also be controlled either with a program
on your Atari or with the LCD/keys. Like the SIO2USB the SD-card
can be hot-plugged and it "remebers" the last drive setup. But
it doesn't have a RTC and you can't create empty disk images
on the fly (IIRC the SIO2USB is able to do this). BTW: the SIO2SD
is also powered by the SIO bus, no need for an external power supply.

Concerning your initial question: Wolfram has the SIO2IDE (but only
version 3.3) on his website, listed for 29EUR (I don't know if it's
still available). I'd guess a version 4.x SIO2IDE with USB shouldn't
cost more than some 40-50EUR. Considering the current exchange rate
this would be some 60-75USD - so I'd say the auction you mentioned is
a little bit overpriced.

so long,

Hias

1408. Looking for Colorview pictures

Newsgroup: comp.sys.atari.8bit

Balham Hill Post Office (14/Nov/2002)

Certainty level: 80%

By mid-November 2002 the persecution had again dwindled, as happens sometimes, when along came this item.
I spent most of my time at home, going occasionally to the shops in Clapham South, or into town to meet people. On this particular
Thursday I only left the house once, for less than fifteen minutes to post a letter (special delivery, because my ordinary and
recorded delivery letters had been disappearing en route for some time - not that anyone would accuse MI5 of such petty harassment).
At the post office counter there was an Asian guy talking into his mobile phone and grinning away. There is a probability that
his comments were directed at me, as I will explain further. The second segment of audio closely follows the first segment.

"you'll do it today? let's meet about 3 o'clock and have some lunch. I got stuff to do and I'll go to the bank,
get this sh.. fucking moving yeah. Even just a little bit do something. He doesn't understand, you know what it is,
I don't want to tell him again cause then he might, he thinks we're having a go at him, I'm not having a go at him,
I'm explain to him"

Explanation: The guy is talking about some bloke who is unnamed, however it might be interpreted as being in code about me.
"I'll go to the bank"... variously interpretable, either literally, or as sounds-like "wank" which has been a consistent
theme in MI5's abuse. "get this shit fucking moving"... abuse... could be interpreted as MI5's criticism of my inertness.
The state spends hundreds of thousands of pounds a year - they want to see some result, not just neutrality and ordinariness.
"he doesn't understand"... MI5 claim I'm stupid... but the numbers and bits of paper prove otherwise, so perhaps what that
is really about is their agents' subconscious perception of themselves.

"having a go at him"... sounds like they're having a go at me, doesn't it? You might take the audio at face value and assume
it's about some other guy, but it's normal MI5 procedure to pretend to be talking about someone else, and make the content of
the message very relevant to me, or their perception of me.

"for some reason it doesn't get into his head, I don't know why... he's lost it completely, hasn't he"

What reason is there for it not getting into his (my) head? Stupidity is implied. Also implied is that it does get into his head;
we're intentionally causing him damage. He's lost it completely... for some time I have suffered from OCD... lost it completely
is the persecutors' observation of my illness, which they see through the surveillance on my home, which they caused.

There's colrview by Jeff Potter and colorsquashview by Clay Halliwell. And,
I think, both only work on NTSC machines. You can find a colrview ATR at
the Holmes site,

http://www.langesite.com/Atari/Holmes/

You should download the catalog and search for colrview.
There are a lot of colrfull demos. I can't remember the name of the guy,
uhmm... did fantastic pictures.
Well, you can search the graphics and video areas.
And the ATR area.
There are lots of PAL graphics demos.
You might try:
http://ftp.pigwa.net/stuff/collections/atari_forever/

in the dema folder.

1411. MI5 Persecution: Eclipse pub 20/12/02 (26620)

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-18 01:46:44 UTC

Eclipse pub in Balham (20/Dec/2002)

Certainty level: 70%

On Friday 20/December/2002 I went to Balham to do some shopping and eating. When I went into the Eclipse pub for a meal
there were two girls already at the bar being server, I ordered and sat down near the window. They sat down at the opposite
window seat, out of sight. After a few minutes they started screaming repetitively "section, section". They were reading
something and were trying to pretend that they were just repeating from what they were reading, but in reality it was quite
obvious they were talking about me, specifically to confinement under mental health.

As you can guess the behaviour of these unwise young things shows them to be from the underprivileged category which due to
the natural laws of society is seldom seen in the better classes of restaurant - the McDonald's next door is their more
usual habitat. My guess is that these two females were deliberately placed in the Eclipse with orders to be offensive to
me personally. The alternative would be that no-one had ordered them and they were just being rude on their own account,
but that is improbable, for two reasons; first, I was out of sight of them and one does not usually "pick on" a person
one cannot see; secondly, there had that afternoon in Balham been other, less distinct incidents immediately preceding this,
and it is inferable that MI5 were making quite a serious effort to create a physical incident, as they have done on
numerous occasions previously. I give my interpretation a two in three chance of validity.

Cross-posted to: alt.fan.british-accent,alt.music.black-metal,comp.sys.atari.8bit,de.sci.informatik.ki,fr.comp.sys.mac.materiel

Barbican Library - 6/Feb/2003

Certainty level: 100%

Here's an item from early February 2003, at which time Security Service were re-igniting hostilities against me, a direct result of my appeal
for a legal hearing against their organisation. On Thursday 6/Feb/2003 I went to the Barbican in central London with my mother to visit the library
and have a meal. Security Service naturally knew about it because it had been mentioned the previous day in our house which is under constant
surveillance on grounds of "National Security", so they may have been able to inform staff there to say something to me, as has been done elsewhere.
Two of the people at the Enquiries desk in the library obviously knew of my circumstances, I spoke to one of them who was very polite, and while
I was waiting I heard the other speaking with a little less politeness, as recorded on this audio file. He said, "I spy", to start a game of
guess what "I spy"; unsubtle, MI5 Spy. Then, at the 34 second mark on this clip he said;

"So obvious you couldn't even get that. I shall have to kill you. ha, ha, ha"

The words "I shall have to kill you" are interesting because such overt expression is rarely heard. Security Service wish me extinct.
Some years ago they were openly shouting "suicide" at me, so that is established. But there is an element of doublethink in their attitude;
they use people's natural prejudice against mentally ill, who are popularly painted by media as being aggressive, to try to tinge the group's
view of me and MI5's actions against me. The Security Service religion is that the country's enemies are deadly, and must therefore be
extinguished. Hence, we must seize eagerly upon the disabled schizophrenic from Clapham, and throttle him, because who knows what'll happen if we don't.

There may be a subtle agenda of population control in what the Security Service have been doing in this country since 1990. In the current issue
of 2600 Magazine (the Hacker quarterly, which I read from time to time) there is a quote from Hermann Goering on page 2; "the people can always
be brought to the bidding of the leaders. All you have to do is tell them they are being attacked. It works the same in any country".
2600 printed the quote as a comment on the projected war against Iraq, which does not appear to pose any threat to the territory of
those countries which wish to invade it. However the quote is somewhat relevant to my case, which is widely known about within Britain;
the security service instructs all right thinking citizens to do MI5's bidding and band together against a common enemy, while at the same time
there is a suggestion of "look what'll happen to you if you don't obey us".

1413. MI5 Persecution: Bernard Levin - The Times (30970)

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-18 07:38:32 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07101811345820@4ax.com>
Source record: 3952
Cross-posted to: alt.fan.british-accent,alt.music.black-metal,comp.sys.atari.8bit,de.sci.informatik.ki,fr.comp.sys.mac.materiel

Fanatic's Fare for the Common Man

Certainty level: 90%

The article reproduced below was penned by Bernard Levin
for the Features section of the Times on 21 September 1991. To my mind, it
described the situation at the time and in particular a recent meeting with
a friend, during which I for the first time admitted to someone other than
my GP that I had been subjected to a conspiracy of harassment over the
previous year and a half.

There is a madman running loose about London, called David Campbell; I have
no reason to believe that he is violent, but he should certainly be
approached with caution. You may know him by the curious glitter in his
eyes and a persistent trembling of his hands; if that does not suffice, you
will find him attempting to thrust no fewer than 48 books into your arms,
all hardbacks, with a promise that, if you should return to the same
meeting-place next year, he will heave another 80 at you.

If, by now, the police have arrived and are keeping a close watch on him,
you may feel sufficiently emboldened to examine the books. The jackets are
a model of uncluttered typography, elegantly and simply laid out; there is
an unobtrusive colophon of a rising sun, probably not picked at random.
Gaining confidence - the lunatic is smiling by now, and the policemen, who
know about such things, have significantly removed their helmets - you
could do worse than take the jacket off the first book in the pile. The
only word possible to describe the binding is sumptuous; real cloth in a
glorious shade of dark green, with the title and author in black and gold
on the spine.

Look at it more closely; your eyes do not deceive you - it truly does have
real top-bands and tail-bands, in yellow, and, for good measure, a silk
marker ribbon in a lighter green. The paper is cream-wove and acid-free,
and the book is sewn, not glued.

Throughout the encounter, I should have mentioned, our loony has been
chattering away, although what he is trying to say is almost impossible to
understand; after a time, however, he becomes sufficiently coherent to make
clear that he is trying to sell the books to you. Well, now, such quality
in bookmaking today can only be for collectors' limited editions at a
fearsome price - £30, £40, £50?

No, no, he says, the glitter more powerful than ever and the trembling of
his hands rapidly spreading throughout his entire body; no, no - the books
are priced variously at £7, £8 or £9, with the top price £12.

At this, the policemen understandably put their helmets back on; one of them draws his truncheon and the other can be heard summoning reinforcements on his walkie-talkie. The madman bursts into tears, and swears it is all true.

And it is.

David Campbell has acquired the entire rights to the whole of the Everyman's Library, which died a lingering and shameful death a decade or so ago, and he proposes to start it all over again - 48 volumes this September and 80 more next year, in editions I have described, at the prices specified. He proposes to launch his amazing venture simultaneously in Britain and the United States, with the massive firepower of Random Century at his back in this country, and the dashing cavalry of Knopf across the water, and no one who loves literature and courage will forbear to cheer.

At the time this article was written I had believed for some time that columnists in the Times and other journalists had been making references to my situation. Nothing unusual about this you may think, plenty of people have the same sort of ideas and obviously the papers aren't writing about them, so why should my beliefs not be as false as those of others?

What makes this article so extraordinary is that three or four days immediately preceding its publication, I had a meeting with a friend, during the course of which we discussed the media persecution, and in particular that by Times columnists. It seemed to me, reading the article by Levin in Saturday's paper, that he was describing in some detail his "artist's impression" of that meeting. Most telling are the final sentences, when he writes, "The madman bursts into tears, and swears it is all true. And it is." Although I did not "burst into tears" (he seems to be using a bit of poetic licence and exaggerating) I did try hard to convince my friend that it was all true; and I am able to concur with Mr Levin, because, of course, it is.

At the beginning of the piece Levin reveals a fear of being attacked by the "irrational" subject of his story, saying "I have no reason to believe that he is violent, but he should certainly be approached with caution". This goes back to the xenophobic propaganda of "defence" against a "threat" which was seen at the very beginning of the harassment. The impression of a "madman running loose" who needs to be controlled through an agency which assigns to itself the mantle of the "police" is also one which had been expressed elsewhere.

In the final paragraph of this extract, his reference to Everyman's Library as having "died a lingering and shameful death a decade or so ago" shows clearly what sort of conclusion they wish to their campaign. They want a permanent solution, and as they are prevented from achieving that solution directly, they waste significant resources on methods which have been repeatedly shown to be ineffective for such a purpose.

Private Eye, 23 Oct 1992

Certainty level: 25%

I'm not really sure whether this cover was intended to get at me,
or whether it was re-interpreted after publication to be about me.
This issue of Private Eye came out in October 1992, by which time I had
been under severe continuous pressure at work and from the general
population in Oxford for many months. It had John Major saying to his
wife, "Come back, Norma!" under the title "Major's support lowest ever".

There's a story behind this. In late October I was in the local pub
(the Rose and Crown, nice traditional name eh) with two people from
work, Simon and Phil. Phil had with him a copy of the current Private
Eye. These are both "nice people" and on my side, I hasten to add.
Simon pointed out the message on the magazine's cover to Phil, and asked
"what do you think about that". Phil answered, "Well usually they
[Private Eye] get it right". This exchange happened in front of me.
Although I was ill at the time (this was before I'd started taking
medicines) I hadn't read anything into the Eye cover until these guys
pointed it out to me.

Sometime later, again in the same road, a student shouted to
one of his friends, "so when are you COMING BACK?", again in front
of me.

What I realised Phil thought it meant was a double-entendre, the
"coming" referring to the act of ejaculation, the "back" referring
to the human back-side. So in a play on words you get a person who
is referred to as a back-side ejaculating. Charming.

Of course, Phil could have been wrong. Perhaps there was no such meaning
intended by Private Eye. Perhaps he saw meaning which wasn't there.
Perhaps the moon is made from green cheese. Who knows?

1415. MI5 Persecution: Victor Lewis-Smith (35320)

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-18 10:37:47 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07101814341455@4ax.com>

Victor Lewis-Smith

Certainty level: 10%

Victor Lewis-Smith has issued a denial through his webmaster
John Hayward-Warburton regarding this article; he says quite categorically
it's not written about me. I kind-of sort-of believe him, but I think
the conspiracy is so wide that the phrase "Eventually, I had to leave
because they were all trying to kill me" could have been intended to be
as if from any paranoid person, but could have been influenced by my
case in the particular. So the influence could have been sort-of
subconscious.

This article is from the Evening Standard of Thursday May 8, 1997.
It is titled "Goon, and best forgotten" and may be found on page 31.

I think VLS has written/produced stuff specifically about me in the past,
both in his Evening Standard column, one of which is reproduced below
(in another case, he was talking about computer hacking, and I think that
was directed at me), and a television programme in around late 1993
when he has a taxi driver who says "they're all trying to kill me guv"
and VLS responds "you're supposed to be quite intelligent aren't you".

However, his webmaster has issued a formal denial on his behalf, so it
is not for me to oppose what he has stated categorically.

1416. MI5 Persecution: Introduction to Sent Faxes (520)

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-18 12:30:16 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07101816264464@4ax.com>
Source record: 3955
Cross-posted to: alt.fan.british-accent,alt.music.black-metal,comp.sys.atari.8bit,de.sci.informatik.ki,fr.comp.sys.mac.materiel

Introduction to the Sent Faxes webpages

Between 1998 and April/2000 I sent some thirty articles on the subject of the MI5 Persecution to
British politicians, media, legal and diplomatic entities in the UK. Of those articles 24 are reproduced
on this part of the website. They were originally composed as Microsoft Word documents, and saved to HTML
form for publication here. A few of them were slightly edited in format for readability.

You will see that these articles cover quite comprehensively what has been going on since 1990, there being
quite a lot of material to cover, since it is a rare week that goes by without MI5 making some harassing
or threatening action against me. "How could it be True?"... they use the mental illness which they induced
in me as a ready explanation for my complaints. Who started it, why did it start, why it continues...
these faxed articles provide examination in more depth of the treatment in the Frequently Asked Questions webpages.
The sheer meaninglessness of the Secret Police actions is highlighted; their operatives make their livelihoods
by cynically exploiting the taxpayers, when in a more responsible country they would be looking at the inside of
prison cells.

The validity of this observation is proven by their reaction to my several suggestions in the articles that I
would cease sending faxes if MI5's agents (and it's always the same people doing the persecution) desisted from
continually harassing me. A number of times, you will see in the faxed articles, I have suggested that
we come to a "peace of mind agreement" where I cease complaining and they cease harassing. On one occasion,
I wrote to Hugh S.-W., the director of OCTS where I was employed in 1992-94 and who is aware of the
circumstances, asking that he intercede to bring this matter to a close, by initiating a meeting between
myself and the persecutors to mutually settle our differences; he didn't reply, but MI5 did soon after - they said "This is what you wanted, wasn't it?, some sort of confrontation?". The reality is the people stalking me are not interested in any settlement; for them crime pays, and
pays handsomely; moreover it is State-approved crime; the Police will never investigate or take action;

it is corruption on an incredible level and scale, and it has gone on for over a decade.

You will see that the articles contain three elements; firstly, there are original written articles,
many in the first half of 1999 when I was writing new articles every week and sending them by email and
fax during the weekend; then there are "MI5 Persecution Update" articles, which list happenings recent to
a particular transmission; and finally there is the "old faithful" Frequently Asked Questions article
which was sent on a few occasions during the three year period. These articles generated a number of
interesting responses from politicians and other recipients, many of which are documented in the
"received faxes" area of these webpages.

I hope you enjoy reading these articles. I'm not as angry as these articles necessarily make out,
only sometimes, usually soon after the persecutors have said something unpleasant at me; the purpose
of putting lots of fire and ire into the mix is to try to chuck it into the public domain which might
lead to MI5 being forced to curb their actions. Unfortunately that aim was not achieved, despite
many, many thousands of faxes being sent. Also, if any policemen are reading this, then I'm (a bit) sorry
about the rude things I said about "the Bill" in one or two of the articles; the police have never done me
any harm (yet) by commission, only by omission of doing anything to investigate my complaints or treat
them seriously.

1417. MI5 Persecution: Faxes Sent to Diplomatic/Legal (2695)

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-18 13:35:53 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07101817322107@4ax.com>
Source record: 3956
Cross-posted to: alt.fan.british-accent,alt.music.black-metal,comp.sys.atari.8bit,de.sci.informatik.ki,fr.comp.sys.mac.materiel

Faxes Sent to British Diplomatic/Legal logs

During the 1998-2000 period my records indicate that I sent at least 3,642 faxes to diplomatic and legal offices
located in the British isles, of which 3,345 went via TPC's email-to-fax service and 297 were sent via fax-modem
direct from my computer. The actual figure is somewhat higher since, for most of this period, whenever a recipient
asked to be deleted from my mailing list, I totally wiped all entries including that from the logfile.

In the records "Y" indicates successful transmission from fax-modem, "N" indicates failed transmission from fax-modem.
"E" indicates an error occurred while transmitting via fax-modem and a fax may have been only partly transmitted.
"y" and "n" indicate success or failure via TPC.

In April 2000 I changed the method of operation by recording "R" when a recipient requested removal, rather than
wiping their details from my mailing list and records; and keeping "B" records for when TPC actioned a ban on a
recipient's fax-number, but the recipient did not write to ask me to cease faxing. The purpose of these changes
was to keep more accurate and complete records, but the intention was thwarted by the police complaint.

Faxes Sent to British Media logs

During the 1998-2000 period my records indicate that I sent at least 6,137 faxes to the British media,
of which 5,775 went via TPC's email-to-fax service and 362 were sent via fax-modem direct from my computer.
The actual figure is obviously higher since, for most of this period, whenever a recipient asked to be deleted
from my mailing list, I totally wiped all entries including that from the logfile.

In the records "Y" indicates successful transmission from fax-modem, "N" indicates failed transmission from fax-modem.
"E" indicates an error occurred while transmitting via fax-modem and a fax may have been only partly transmitted.
"y" and "n" indicate success or failure via TPC.

In April 2000 I changed the method of operation by recording "R" when a recipient requested removal, rather than
wiping their details from my mailing list and records; and keeping "B" records for when TPC actioned a ban on a
recipient's fax-number, but the recipient did not write to ask me to cease faxing. The purpose of these changes
was to keep more accurate and complete records, but the intention was thwarted by the police complaint.
Also in April 2000, I added some further fax numbers to my media mailing list and records, which is why some of the
faxnumbers below have only a single entry, and some indeed have none.

Faxes Sent to British Parliament logs

During the 1998-2000 period my records indicate that I sent at least 14,480 faxes to the British Parliament
in Westminster, of which 9,138 went via TPC's email-to-fax service and 5,342 were sent via fax-modem direct from
my computer. The actual figure is obviously much higher since, for most of this period, whenever a recipient asked to
be deleted from my mailing list, I totally wiped all entries including that from the logfile.

In the records "Y" indicates successful transmission from fax-modem, "N" indicates failed transmission from fax-modem.
"E" indicates an error occurred while transmitting via fax-modem and a fax may have been only partly transmitted.
"y" and "n" indicate success or failure via TPC.

In April 2000 I changed the method of operation by recording "R" when a recipient requested removal, rather than
wiping their details from my mailing list and records; and keeping "B" records for when TPC actioned a ban on a
recipient's fax-number, but the recipient did not write to ask me to cease faxing. The purpose of these changes
was to keep more accurate and complete records, but the intention was thwarted by the police complaint.

1421. ST225 XF551

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-18 20:22:31 UTC
From: Jack Tseng <tseng4@hotmail.com>
Message-ID: <4a10j.2593$hV2.2588@newsfe19.lga>
Source record: 3958

ST225 20MB and XF551 are the same MFM devices but I wonder if ST225 can
connect to XF551 circuit ???

Thanks!
Jack

1422. Atari 8bit items for sale ICD MIO

Newsgroup: comp.sys.atari.8bit

I have posted a message at atariage forum with items for sale. what ever is not sold by Tuesday the 20th of November will be listed on Ebay. the message is below.

I have the following for sale thought I would list it here before Ebay

1-ICD Multi I/O 256k
1-ICD Multi I/O 1 Meg
3-XF551 drives NEW int the box.Box in excellent condition with matching serial numbers.
5-1050 drives with US Doubler. various conditions yellowing and scratches.
1-1050 drive yellowed and scratches
3-TRAK drives used 2 are AT-D2 Turbo
1-810 happy drive
4-ICD PR: Connection
6-RAMBO XL RAMupgrade NEW
2-US Doublers upgrade for 1050 drive NEW
2-XM-301 modem NEW
6-Atari 800XL computer in original box
1-UPrint model A
1-UPrint model A16

Make me a offer on a item or the whole lot. Pickup is available in the So Cal area. All offers are plus shipping.

No, same method but different signals and not enough smarts in the XF551 ROM. There are some floppy type devices that will work of course. A favorite hack is to get a 3.5" 720k floppy and modify the ROM so it will use all 80 tracks.

To use the ST225 you need a scsi interface for the Atari on one end and one to go from SCSI to MFM on the other. It isn't a cheap proposition and most people seem to be opting for something newer unless they are collectors going for a vintage system.

Rick

1424. Atari home pong (dedicated console) hacks? homemade (PIC) dedicated consoles?

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-19 20:30:36 UTC
From: mad.scientist.jr@gmail.com
Message-ID: <e4cf11cb-37ce-49db-b126-954c51be1450@a28g2000hsc.googlegroups.com>
Source record: 3963

Does anyone know if the 70s Atari/Sears pong units were hackable in
any way, such as
* adding additional pots so each player could control a paddle's "Y"
position
* adding a switch/resistor/etc to change the paddle size
* changing the speed the game plays

Has anyone built any dedicated Pong or vector games by using a PIC
chip, and coding the games themselves on a PC compiler?

Thanks

1425. XF551 rom 3.5 720K

The modified XF551 rom file can be found on the internet, as long as you have a eprom writer. If not, I'm sure someone would be willing to make one for you.

I don't have my EPROM burner set up right now. Since 1990 I have had
back to back relationships where if my hobby can be seen, it gets tossed
in the trash, so my gear is hidden.

If no one offers to sell you one or get one to you, post another message
here next week and I will see if I can sneak one in.

1432. Bit3 Column Card with Axlon Ramdisk

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-24 02:55:18 UTC
From: Jason Harmon <jharmon@us.net>
Message-ID: <pcednbkxregcD9ranZ2dnUVZ_qainZ2d@comcast.com>
Source record: 3971

I just received a Bit3 80 column card for my 800. It goes in the last RAM slot on the 800, and you need to put a 32K card (which I have) in the 2nd RAM slot to have a full 48K of RAM available. In this configuration, the 32 K card effectively acts as the RAM for both the 2nd and 3rd slots.

However, in my 800, I have a Magna 512K card (Axlon compatible) in the 2nd slot, meaning the 32K card would have to move to slot 1. Unfortunately, the 32K card can only act as the RAM for slots 2 and 3, while what I functionally need is a 32K card that acts as the RAM for 1 and 3.

Does anyone know of a hack for an Axlon Rampower 32 card to allow it to work from Slot 1 so that it can coexist with a Bit3 80 column card in slot 3 and an Axlon 128 compatible card in slot 2?

Right now I have to choose between the Bit3 and the Magna card and I'd like to be able to have them all work together.

Thanks.

Jason Harmon

Posting-Frequency: 7 days
Last-modified: October 20, 2007

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by
Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of
Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from
1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by
Atari Interactive, which is managed by today's Atari, Inc. Both of these
are divisions of Infogrames Entertainment.

1434. MI5 Persecution: Faxes Sent to Parliament1 (520)

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-24 06:25:46 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07102406253324@4ax.com>
Source record: 3973
Cross-posted to: alt.fan.british-accent,alt.music.black-metal,comp.sys.atari.8bit,de.sci.informatik.ki,fr.comp.sys.mac.materiel

Faxes Sent to British Parliament logs

During the 1998-2000 period my records indicate that I sent at least 14,480 faxes to the British Parliament
in Westminster, of which 9,138 went via TPC's email-to-fax service and 5,342 were sent via fax-modem direct from
my computer. The actual figure is obviously much higher since, for most of this period, whenever a recipient asked to
be deleted from my mailing list, I totally wiped all entries including that from the logfile.

In the records "Y" indicates successful transmission from fax-modem, "N" indicates failed transmission from fax-modem.
"E" indicates an error occurred while transmitting via fax-modem and a fax may have been only partly transmitted.
"y" and "n" indicate success or failure via TPC.

In April 2000 I changed the method of operation by recording "R" when a recipient requested removal, rather than
wiping their details from my mailing list and records; and keeping "B" records for when TPC actioned a ban on a
recipient's fax-number, but the recipient did not write to ask me to cease faxing. The purpose of these changes
was to keep more accurate and complete records, but the intention was thwarted by the police complaint.

MI5 Persecution: How Could It Be True?

If you have the patience to read these articles you will be struck by how apparently fantastic the claims being put forward are. You may ask yourself why such seemingly nonsensical assertions are made. This matter has been discussed on the Internets UK-local newsgroups for three years now, and the denizens of the uk.misc newsgroup (the so-called "miscreants") have come up with a number of theories to explain these posts; it has been variously suggested that they are a troll (an artificial creation for the amusement of its author), that they are made by MI5 themselves with the purpose of discrediting other conspiracy theories, and that the poster is mentally ill and the articles are symptomatic of the illness (the view held by most miscreants).

Are these claims the product of mental illness, or is that just a cover?

The most obvious explanation, that the claims made result from the admitted mental illness of the author, is the one which the persecutors intend be the one accepted without consideration being given to the possibility of the claims being true. The persecutors have actually been very clever about this, both in selecting as their target someone who was known from school or university as being borderline schizophrenic, and in ensuring the nature of their persecution corresponds to what often features in the delusions of a schizophrenic.

The very first incident of the persecution occurred in June 1990, when I was still a student at university in London. It consisted of a reaction (giggling) from the newsreader, Sue Carpenter of ITN, to what she saw happening in my living-room at my parents home where I was living. Before your imagination gets the better of you I should make clear that what the newsreader was reacting to was not too embarrassing in nature; my mother had brought an apple for me into the the room, and Sue Carpenter found this amusing.

I recognized that Carpenter had reacted to what she had seen in my living-room, yet this idea still seemed completely fantastic to me. My reaction was to continue watching television, particularly the news, to see if this incident would be repeated. It was, many times, both on BBC and ITV. An intelligent person would have thought to obtain a video recorder and capture some of these incidents in order to try to explain to an observer what he saw in these broadcasts. Unfortunately, I failed this test of intelligence, since I did not record these programmes. I have recently attempted to obtain from ITN tapes of their news programmes dating back to summer 1990, but, unhappily, they have advised me that they do not have complete programmes including newsreaders comments dating back

to that period.

From the outset, the persecutors structured their actions to ensure that any complaint would be met with disbelief, and dismissed as delusional. This is why they chose as their target someone who was known at school and university to be borderline mentally ill; and it is why they fired the first shots of their campaign through the broadcast media. Schizophrenics commonly believe the media harass them; it would be exceptional for "full-duplex television" to exist in reality. Those with schizophrenia also commonly believe people are talking about them; again, the persecutors have shown themselves very rarely, but act through intermediaries, both in the workplace, and in public and during travel.

Mental illness is not the cause of these claims, but the simulation of its symptoms is a cover used by the persecutors to deny their victim the ability to have his compaints believed.

What evidence exists to support these claims of "interactive television/radio";?

Quite frankly, I have very little evidence to support my claims. You may examine the "Evidence" area of my website to see such evidence as I have been able to gather. None of it is remotely conclusive. The "smoking guns" all date back to 1990/91, and it is really rather late now to start trying to look for material dating back seven or eight years. In 1997 I started tape-recording every programme I watched or listened to. I also started carrying with me a high-fidelity minidisc-recorder with good quality microphone to catch incidents of public harassment, but this also has not been as successful or conclusive as I had hoped.

Perhaps the best item in the "Evidence" section is the audio file "Life is so hard" (it is labelled with Garfield the cartoon character on the site), which I have given a certainty level of 100%. This item relates to harassment at my workplace in Canada in 1996. A co-worker called Mark was coming up with phrases and expressions which were repeating things being said at my Canadian residence, consequently leading me to believe that my apartment and home phone were bugged, and that the persecutors were passing their gathered information on to Mark. On one particular evening I said in my apartment, "life is so hard, and then you die". The following day I was able to record Mark saying exactly the same phrase at work.

Unfortunately when "they" know you are recording them, they simply dont say things which would unambiguously show harassment. When Mark the co-worker knew he was being recorded, he only made his remarks out of range of the recorder, for example outside the building. When the TV newscasters or radio disc jockeys know they are being taped, they limit themselves to saying things which are ambiguous, which even in my mind may or may not be personally directed against me.

Who knows about this persecution?

Surprisingly many people know. People in the media, such as BBC and ITN newscasters including Martyn Lewis and Michael Buerk, and radio disc

jockeys such as Chris Tarrant of Capital Radio, know what is going on, and take part in it. Some co-workers at my former workplaces in England and Canada have known about the harassment. Quite a few people in the general public are also included. I believe the police are aware of the persecution, but, unfortunately, have chosen not to take any action to stop it. I have complained at my local police station in London several years ago, and I have stated on the internet newsgroups that I have done so, hence the police will be well aware of my wish to see the matter resolved. I believe their inaction denotes a dereliction of duty, but without good evidence, I am powerless to compel them to take steps to prevent further harassment, or deal with what has already taken place.

What is the purpose of sending these faxes?

These faxes are being sent to three distinct groups of people, namely Members of Parliament, the media, and diplomats & legal people. As you will have observed I am making use of the email-to-fax gateway at Demon Internet to send these faxes. I am forced to use this gateway since I currently live in North America, and cannot afford the high cost of direct phone calls to the UK.

My purpose in publicising my claims is firstly to discourage the persecutors from continuing their campaign, and also to attempt to bring their campaign out into the open, and thus perhaps identify the persecutors. Neither aim has been achieved yet, but I hope that with sufficient stimulation these aims may yet be accomplished.

The problem with the second aim is that those who read this article will fall into two groups, those who dont know anything about the persecution and consequently will disbelieve my claims as delusional, and those who do know about the harassment and may have some idea of who is behind it, but realise that if the harassers are exposed and the truth brought out into the open, then powerful British institutions will substantially lose prestige, and be exposed to ridicule.

It would give me hope to believe that these faxes will create a third group of people, those who find out that I am telling the truth, and who follow their consciences in standing up and seeing justice done. Only time will tell if this hope will be realized.

1437. MI5 Persecution: Why do you think MI5 are responsible? (7045)

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-24 08:10:13 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07102408100079@4ax.com>
Source record: 3976
Cross-posted to: alt.fan.british-accent,alt.music.black-metal,comp.sys.atari.8bit,de.sci.informatik.ki,fr.comp.sys.mac.materiel

Why do you think MI5 are responsible?

The question of who is ultimately responsible for this eight-year harassment is one which is very difficult to answer, as the persecutors have never clearly made their identities known to the persecutee. However, I believe I am correct in attributing the continuing victimisation to elements of the British Security Service MI5, and in this article, I will try to explain the reasons for this belief.

The British internet magazine ".net" featured my website on page 17 of their March 1998 issue (number 42). Their review kindly describes it as an "excellent site" and gives some details of what the net surfer will find there. Should you wish to reply to this article you can do so;

"When did you first suspect MI5 were responsible?"

Over Easter 1995 I went to see a local solicitor in London with a view to talking to the police about the harassment. Soon afterwards I did go to my local police station in Clapham and spoke to an officer there. The solicitor made a comment which suggested to me that the persecution I had been experiencing may have been organised by an intelligence service.

Up to this point, I did not have any clear idea as to who was behind the harassment. Only their agents were visible, in the media, on television news programmes, and on the radio; in the workplace, where things said at my home were repeated verbatim; and in some cases abuse in public and during travel, for example on the trip to Poland in June 1992 which I have already described.

Both from the fact that widely disparate individuals and organisations were employed as agents in the campaign against me, and from the fact that an entity would be required to marshal their resources in the areas of spying on my home and giving gathered information to their agents, it was clear to me that a single entity was responsible for carrying out the campaign. Yet from June 1990 until Easter 1995 I did not have a clear idea of who might be responsible. I guessed that perhaps some private individual or group of persons who saw themselves as my enemies had perhaps paid private detectives to organise the harassment. Alternatively, since the campaign had started in the media, I made a far-fetched supposition that perhaps it was an ad-hoc group of media people who had set themselves up in opposition to me. After Easter 1995 I saw that these guesses were wrong, and I made an I believe much more accurate estimate as to who my enemies really are.

"Why couldn't a private group be behind the persecution?"

There are several reasons why a private individual or group would not be behind this campaign.

Quantity of resources / Money. Here is what one Usenet (internet newsgroup) participant had to say (several years ago) on the topic of how much money it would cost just to keep the surveillance going.

PM: >But why? And why you? Do you realize how much it would cost to keep
PM: >one person under continuous surveillance for five years? Think about
PM: >all the man/hours. Say they _just_ allocated a two man team and a
PM: >supervisor. OK., Supervisor's salary, say, #30,000 a year. Two men,
PM: >#20,000 a year each. But they'd need to work in shifts -- so it would
PM: >be six men at #20,000 (which with on-costs would work out at more
like
PM: >#30,000 to the employer.)
PM: >
PM: >So, we're talking #30,000 x 6. #180,000. plus say, #40,000 for the
PM: >supervisor. #220,000. Then you've got the hardware involved. And
PM: >any transcription that needs doing. You don't think the 'Big Boss'
PM: >would listen to hours and hours of tapes, do you.
PM: >
PM: >So, all in all, you couldn't actually do the job for much less than
PM: >a quarter million a year. Over five years. What are you doing that
makes
PM: >it worth the while of the state to spend over one and a quarter
million
PM: >on you?

A private individual or group would not spend over a million pounds to verbally torture a victim without some financial motive or gain. Private industry is driven by the profit motive, and there is no financial profit to be had from carrying out a campaign in this way. If a private enterprise were behind it then they would have taken direct physical action a long time ago.

State enterprises, on the other hand, can afford to be wasteful, since they are funded by the taxpayer. They do not have to show a money profit. The employees or contractors employed by a state organisation such as MI5 are driven by their own personal profit motives, to make the most money out of their employers for the longest period of time. MI5 is funded to the tune of #150M p.a.; even a few hundred thousand a year would to them be affordable if their managers could convince themselves of the necessity of what they were doing.

Quality of resources / Technical resources - electronic and other surveillance. In summer 1994 a reputable and competent private detective agency was employed to conduct a counter-surveillance sweep of my home in London. They charged us over #400 for this, conducted a thorough search for radio transmitting devices, hard-wired "probe" microphones and also tested the telephone line. They found nothing. This was not altogether surprising, since it had been made very clear to me that there were bugs in my home; the "buggers" would not have made this clear unless they had felt their bugs were of sufficient sophistication as to be safe from

detection.

But there is another lesson to be gained from the failure of the private detectives to find anything. The agency employed was one of the most reputable in London. They were employed on the principle of "setting a thief to catch a thief", for if the harassment were being carried out by private detectives, as I then believed, then surely another set of private detectives would be able to find the bugs that they had planted. That these "private eyes" were unable to find anything, and that the harassers were confident that they would not be able to find any bugs, points to the harassers being an order of sophistication above a private agency, and leads me again to believe that a state intelligence service is responsible for the surveillance and harassment.

Quality of resources / Technical resources - Interception of Postal service. In summer 1994 when I emigrated to Canada to try to escape the harassment, I wrote letters home to my family and friends in London. Quite soon after my arrival in Canada, the harassers were able to find precisely where I was staying. The only way I can see of "their" being able to find out my new address was by interception of my letters to the UK.

Later in 1994, I conducted an experiment to see if my letters home were indeed being read. In a letter home I wrote of being depressed and talked in vague terms of suicide. I deliberately chose this topic, since I believed it was the outcome my harassers were trying to achieve, and that if they read the letter, they would "echo" its contents. Sure enough, soon afterwards there were two incidents of people shouting "suicide" at me in public places in Canada.

It is inconceivable for a private agency to have the ability to intercept postal mail. The state security service on the other hand is well known to engage in these activities.

Quality of resources / Access to Media. One of the strangest aspects of this case is the access "they" have to the broadcast and print media. I still do not understand what could persuade newscasters such as Martyn Lewis and Michael Buerk, who consider themselves "gentlemen", to behave in an almost voyeuristic way by "peeking" into the living room of one of their viewers. A year ago I wrote to the BBC asking if these newscasters would confirm or deny the accusations made against them. The BBC replied that their newscasters had denied the accusations, but refused to do so in writing.

It is well known that MI5 have the ability to plant stories in certain newspapers, but convincing television newscasters to "watch" a viewer while they read the news would surely be very difficult for them to accomplish, unless they presented themselves to these journalists as being, for example, a group in the media who were seeing to it that I got my "deserved" treatment. MI5 has a history of manipulating the media, so it might not be too difficult for them to accomplish such a trick, whereas a private group would not have this ability.

"Have they ever denied that they are the Security Service?"

No. Never. This is in fact the main reason why I believe "they" are MI5 and not a privately funded group. If my guess had been wrong then I am sure that "they" would have crowed over my mistake, but they have never admitted nor denied that they are employees of MI5.

In early January 1996 I flew on a British Airways jet from London to Montreal; also present on the plane, about three or four rows behind me, were two young men, one of them fat and voluble, the other silent. It was quite clear that these two had been planted on the aircraft to "wind me up". The fat youth described the town in Poland where I had spent Christmas, and made some unpleasant personal slurs against me. Most interestingly, he said the words, "he doesnt know who we are".

Now I find this particular form of words very interesting, because while it is not a clear admission, it is only a half-hearted attempt at denial of my guess that "they" = "MI5". Had my guess been wrong, the fat youth would surely have said so more clearly.

"If MI5 were behind it, why would they wish to mask their involvement?"

I have heard a number of times a belief from people in the media that it is they, the media people, who are behind the abuse. In spring 1994 Chris Tarrant the Capital Radio D.J. said sarcastically on his breakfast show, "You know this bloke? he says were trying to kill him. We should be done for attempted manslaughter". We, we, we. Tarrant thought it was a media conspiracy.

Returning to the question of "interactive watching" by television newscasters, it would again be much easier for them to take part in that sort of activity if they convinced themselves that the surveillance and abuse were organised by "their own", by media people. It must be second nature to MI5 to mask their involvement in the matters they deal with; in this case, they pretend the campaign is organised by a group in the media, and any journalists who suspect otherwise keep their silence.

Conclusion

Over the last three years I have stated with some force my belief that MI5 are responsible for my misfortunes. I have done so on Internet newsgroups, in letters and faxes to people in politics and the media in the UK, and in 1997 I made a formal complaint to MI5 regarding their activities; the Security Service Tribunal replied in June 1997 that "no determination in your favour has been made on your complaint". (I believe the statement by the Security Service Tribunal can be disregarded, as they have never, ever made a ruling in favour of a complainant.) In three years of naming MI5 as my oppressor "they" have never denied the charge. To me, their silence on this point indicates that my guess was accurate. I believe my persecutors stand identified. The question of why they should carry out this campaign is one I will try to answer in a future article.

MI5 Persecution Update: Friday 15 May, 1998

The persecution has been quite severe for the last week. It appears that my enemies are reacting to the steady stream of faxes making their way over the Atlantic to the fax machines of Westminster politicians and the media. Here is whats happened in the last few days;

The week started off with an incident in the cafeteria at a local shopping centre where I habitually drink my morning coffee. My enemies have concentrated since winter 1995/96 on throwing a particularly horrible sexual slander against me. They "put people up" to repeat this slander against me, and this is what happened again here.

On Thursday morning (yesterday), instead of going to the usual cafeteria I went to a nearby convenience store for coffee. The same horrible sexual slander was shouted at me very loudly by a member of staff as I walked into the store. This was the first time I had ever bought morning coffee in that shop. The other staff obviously knew what was going on, one of them said, "they screwed up my life".

The fax gateway I use to send these faxes to the UK has been working hard these last few days to shut down my access by barring the accounts I use to send these faxes.

I have received an anonymous threat from fax number 0171-219-6101 (the machine gave its name as "ETRA-HoC") which said, "Stop sending to this fax no 0171-219-6101 or else" (the consequences of continued transmission were unspecified). I invited the sender to apologise for his threat, but received no response.

This all adds up to quite a severe reaction to my faxes of the last few weeks. I actually find this quite heartening since it shows that my faxes are finding the mark and there may yet be a breakthrough in my efforts to expose the Security Service conpiracy of abuse against me which has now been going on for eight years.

MI5 Persecution: "Why would they be doing this to you, sir?"

This article will concentrate on the difficult question of "Why". The question which forms the title of this piece was asked of me by the police officer I spoke to in Easter 1995, when I went to make my complaint.

There are really two sides to this question. Firstly, why should MI5 be harassing anybody in this fashion? Secondly, if they choose to behave in this way, why should they have selected me in particular, and not somebody else? Alternatively, why did the persecution start, and why is it

continuing?

I do not have definite answers to either side of this question, since my persecutors have usually kept themselves hidden and only acted through other parties. To know "why", one would have to know who the persecutors are, and something of their personalities, since their abuse is almost certainly symptomatic of a personality disorder of the abusers. Certain things however can be deduced about the abusers from the nature of their behaviour, and I will talk about this later in the article.

Why did it start?

It is clear that the persecution must have been initiated by someone who knew me personally, either at school, or at university, or socially, and knew that I was borderline mentally ill, since this is what makes me a target for the persecutors. Unfortunately, the originators have never been identified, and there are several possible candidates. Neither has the link from the originators of the persecution, to the persecutors themselves, ever been made clear. So who are the originators?

University Staff

The identity of the originators may lie in the timing of the persecution. It started in June 1990, while I was finishing a course at Imperial College in London, and a year after I graduated from Cambridge, where I received a degree in computer science. At Cambridge I had achieved some notoriety in the computer lab from various nefarious exploits. Roger Needham attacked me by saying that "there were great hopes for it, but it failed terribly". When I started at Imperial I found that my reputation had preceded me; Cambridge computer lab had spoken to I.C. lecturers about me. I.C. lecturer Frank McCabe summed up commenting about "setting up a straw man so you can tear him down". (Despite being "torn down" by the Cambridge computer labs lecturers, I still achieved a good first degree and a Masters degree at Imperial.)

Other students at university

So, the originators may have been university staff who knew me from my student days. But there are other possibilities. I had other enemies at university, including some fellow students. At my Cambridge college it was common knowledge that my mental health was dubious, and it was known that I talked to myself in my sleep - the floor and walls were quite permeable to noise, so other students heard. I was given the nickname "gibber" because of this habit. Sometime later, I managed to catch myself talking in my sleep when I woke up in the middle of the night.

Here is a quote from a participant in the internet newsgroup where I have been posting for the last three years;

>One thing which has been missing from this discussion is this simple
>prognosis: that maybe he is right and that, despite his admitted
>mental condition, there really is a campaign against him organised by
>now-influential ex-students of his university.

People I knew socially

I had yet other enemies in 1990 (I am a man of many enemies!). In January 1990 I broke up with some people I had been going out with socially. One of them, by the name of Andy Turner, wrote a letter to Alan Freeman, who at the time was a Radio 1 DJ. Freeman read part of the letter out on his Rock Show, about the "one who wore out his welcome with random precision", saying "thats a hell of a letter you wrote there Andy", and "with a schizophrenic youre never alone".

It is my belief that Andy Turner and his friends were trying to make trouble for me, and Turner wrote to Freeman with this in mind. Freeman may have discussed the letter with others, and things may have snowballed from there. This is, of course, pure supposition. The fact is that I do not know who the originators are, and can only guess.

Once it started, why is it continuing?

The answer to this question is obvious. It is unacceptable to the "powers that be" in the UK to have somebody running around who knows he has been targeted by the Security Service and media organizations, and who is in a position to embarrass British institutions. This has become particularly evident in the last week; as I send more faxes to UK politicians and media, so the pressure on me grows, and the volume of abuse increases.

Part of the reason the persecution continues is in the personalities of the abusers, and it is this subject to which I will turn to next, since the key to understanding the persecution lies in understanding those who carry it out, as much as we can.

The Security Service operatives, the persecutors, are they psychopaths?

Let us first examine the definition of the term "psychopath". DSM-IV defines "anti-social personality disorder" as a "pattern of disregard for and violation of the rights of others ... deceitfulness, irritability and aggressiveness ... consistent irresponsibility and lack of remorse". The Harvard Mental Health Letter of Sept 1995 describes these people as using "charm, manipulation, intimidation and violence to control others and satisfy their own needs. Lacking in conscience and in feelings for others, they cold-bloodedly take what they want and do as they please", having "no guilt or regret".

I must say, reading this description of the condition, that it fits the persecutors perfectly. The persecutors have never shown the slightest remorse or guilt. Even when I was severely ill, they continued to abuse me. They have repeatedly blamed their actions on me, which is another trait common amongst psychopaths. They have no respect for my legal or personal rights, and they use intimidation and verbal violence.

If the MI5 operatives are psychopaths then it would explain both why the persecution started, and the degree of verbal violence. Psychopaths by definition damage other people; here, the MI5 operatives find an outlet for their personality disorder, through "cripple-kicking".

Xenophobia on the basis of mental illness, and race

My enemies have made clear many times that one of the reasons they are persecuting me is because of my admitted mental illness. However, it is my belief that they are also persecuting me because I am not of ethnic English origin, and the fact that there have been several incidents of an overtly racist nature reinforces this view.

In one case, two youths on a tube train in London made openly racist references to me as a "soft toy, not up to British Standards". Another person near my home made remarks about "Polish people". In yet another incident in Croydon, a youth made comments about "foreigners".

But the main thrust of their xenophobia is because of my mental illness. I should make clear that I do not look ill; if you met me, you would not know that I had the illness. I take a relatively low dose of medication, and feel quite well. But the persecutors have repeatedly harped on about my supposed serious mental illness; they have called me a "nutter", a "schizophrenic", etc. They have also persuaded other people to use these terms of abuse. They are able to get away with this because abusing the mentally ill is still something which is mostly acceptable in Britain; the media do it, "nutter" is not taboo in the way that "nigger" is.

Conclusion

There are several groups of people who might have wished to cause me trouble, and I still do not know who originated the persecution. Nor do I know how the originators came to be in contact with the (presumed) Security Service operatives who have been carrying out the campaign. To know conclusively why it started, we would have to know who started it, and this information is not available.

However, we can infer some things about the personalities of the persecutors from their methods, and from the degree of verbal violence they employ. It is clear that a main reason for the continuing harassment is the psychopathic disorder of the MI5 agents who carry it out. That they have never been "brought to book" for their misdeeds reinforces their belief that they do no wrong; and, unhappily, until they are brought to book, their persecution campaign looks set to continue.

MI5 Persecution: .net Magazine Applauds my Website

The March 1998 issue (number 42) of .net Magazine reviews the MI5
Persecution website describing it as an "excellent site". The webpages
describe in detail the nature of my persecution since 1990 by what are
believed to be elements of the UK security service.

(snip image)

You are encouraged to read the web pages which include

o a FAQ section outlining the nature of the persecutors, their methods
of harassment through the media, people at work and among the general public
o an evidence section, which carries audio and video clips of media and
workplace harassment, rated according to how directly I think they refer to me
o factual descriptions of the state security agencies involved
o scanned texts of the complaints I have made to media and state security agencies involved
o posts which have been made to netnews over the last three years on this topic

MI5 Persecution Update: Friday 13 November, 1998

If You Intend To Reply, Please Read This

If you have any questions or observations you would like to share with me, then you are very welcome to reply to my fax number 0171-681-1190. But please.... keep your response to one page if you can! I have had several people faxing my article back to me, including one MP faxing back twenty pages. I do not know if he had anything intelligent to say in his 20-page fax because I applied judicious use of the "Delete" key on my computer. Faxes over a page or two will be deleted without being read.

MI5 Resume Hostilities in Response to these Faxes

When I wrote last weeks "MI5 Persecution Update" I remarked how quiet my life had become. No longer! MI5 have restarted hostilities with a vengeance the past week, in response I believe to the faxes I have been sending to members of the House of Commons.

On Saturday 7 November I went to Clapham Picture House cinema to see the film "Antz" (a very enjoyable film). At the cinema, I was verbally assaulted by a group of teenagers with the words "still crazy", repeated about ten times. There was a film with that name showing at the cinema, but it was clear their abuse was directed at me. I do not look ill, so why would they pick on me? answer, the incident was set-up by the persecutors. One of the teenagers also said to another, "I don't know what we're laughing at".

The following day, Sunday 8/11/98, I was on my way to play squash when I was verbally assaulted by a youth who said "it was so funny", without the slightest trace of humour. What he meant by this phrase was that was funny, and they were trying to humiliate me. I have heard this phrase "it was so funny" used at me before many, many times over the last eight and half years.

Please Encourage Keith Hill MP to Help Me

I live in a bugged house, bugged both for audio and video. My movements are monitored by MI5. The Security Service have followed me to Canada, to Poland and the Continent, to the States. I cannot work anywhere, not in England, not in Canada, because MI5 will destroy whatever employment I am able to obtain. I have asked Keith Hill MP to help me, and he has refused.

The situation is intolerable. It is Mr Hills job to help me out of this mess. So, please, as I said in the last fax a week ago: Do not waste your time returning multiple copies of my faxes to my fax mailbox, as some of

you have done. Instead;

Please encourage Keith Hill M.P. to help me.

I am sorry to be using this device to encourage Mr Hill to help, but I think eight and half years are quite enough and it is time something was done to bring this matter to a close.

MI5 Persecution : BBC Newscasters Spying on my Home

This week's topic is the quite extraordinary claim that BBC newscasters such as Martyn Lewis and Michael Buerk have spied on my living room while they read the news. I currently have an advert running for the next six months in Private Eye's "Eye Say" column (at a cost of over ₱200) which says,"MI5 Persecution - BBC Newscasters Spying on my Home"; the story of my campaign in the Eye is on my Website
at; http://www.pair.com/spook/evidence/plaint/priveye.htm

BBCs staff magazine Ariel also ran my advert "BBC Newsreaders Spying on my home" for one issue in the Personal category on 8/July/1997 before it was spotted and axed by editor Robin Reynolds; please see
webpage; http://www.pair.com/spook/evidence/plaint/ariel.htm

Beginnings

The very first incident in the "MI5/BBC Persecution" occurred in June of 1990, when a newsreader reacted to what she saw in my living room at home as she read the news. My mother had brought an apple for me into the room, whereupon the newsreader smirked and giggled, apparently finding this funny. I couldn't believe what I was seeing. I carried on watching news and other television programmes to see if presenters would show signs of "interactive watching"; to my surprise, this happened again and
again. Unfortunately, I did not have my wits sufficiently about me to videotape these programmes, and it is now almost impossible to obtain recordings dating back to 1990.

Most of the "TV watching" has occurred on the news, and most of it in summer 1990, although some as late as autumn 1993. My website has a few extracts of what might be politicians "getting at" me, in particular John Major and interviewer Dimbleby sharing a joke about the "Knutsford Guardian" which is almost certainly about me.

I sold my portable TV in autumn 1990 and stopped watching television regularly. I realise now that this may have been a mistake. What I should have done was to watch TV and listen to the radio, but tape-record everything and make a note of what each excerpt meant to me. I would then be in a much stronger position as regards to evidence that I am now. That is what I am trying to do now, but unsurprisingly the TV/radio presenters have stopped getting at me, now they know they are being recorded.

Examples of Media Harassment

Here are a few examples which I can still remember of media harassment;

In early 1992 I was watching the BBC news with Martyn Lewis on a small black-and-white portable television at my then home in Oxford. I threw a term of abuse at Lewis; he flinched, then gave a grin and made a comment from which I understood that he had been on my side, but might have changed his mind as a result of what Id just said to him.

Victor Lewis Smith in his TV (BBC2?) program at the end of 1993, had a taxi-driver saying, "theyre all out to get me", to which VLS replied, "but you're quite intelligent aren't you?" (what a nice chap VLS is, compliments no less!)

Paul Daniels the TV magician, sometime in 1990-92 (sorry I can't be more precise but it was so long ago), made a "crying face" and put his face in his hands, which was his way of expressing that I was frequently crying in 1990-92, and that he and other media people found my crying funny.

Kenny Everett (deceased) on some talk show, compared me to a "huge ape" who "scratches himself"; he made some other remarks about what the "ape" got up to which unfortunately I cant remember. (I remember that Everetts comments were quite sympathetic and human, but were obviously about me.)

Stephen Fry on another talkshow (Wogan I think) talking about "masturbatory fantasies", he then referred to me with the words "you prat"; I wonder if the studio audience knew what he was talking about and to whom his comments were directed?

Griff Rhys Jones on Clive James' TV show, made a "lunatic face" (wide fixed grin) to which I said to the TV that he had a "face like a horse's arse", to which Clive James said to GRJ "did you hear that?"

Crimestoppers summer 1990, remarks by a Midlands police officer on the programme, while Nick Ross was presenter (as far as I can remember). The officer talked about "in car entertainment". Nick Ross said to officer, "why don't you stop doing it?" to which he replied, "we can't while he's like this".

BBC2 Newsnight in autumn 1993 had a piece on football hooliganism. A black interviewee said apparently of the hooligans, but in fact of me; "they're just idiots, carry on with the surveillance".

There was an incident with Jonathan Ross which I remember clearly; he was on both BBC and ITV television at the same time, one (ITV I think) was recorded, the other channel was live. Ross has a speech impediment which causes him to pronounce his "r"s as "w". I sarcastically said something about "Mr Woss" to the recorded channel, then turned over to where he was live, and he repeated "Woss" with heavy emphasis and sarcasm.

On the radio, in spring 1994, Chris Tarrant made a sarcastic remark in his morning show, saying "he says were trying to kill him, we should be done for attempted manslaughter", to which another of the studio staff said, "oh no, dont say that". His comment was in reply to a comparison Id made the previous evening between my persecutors and the Polish secret police who murdered dissidents.

Martyn Lewis Denies & Lies, But Wont in Writing

In February 1997 I wrote to BBC Viewer & Listener Correspondence and asked them to investigate the claim that their newscasters had engaged in "interactive watching". They replied that they had asked Martyn Lewis and Michael Buerk whether they had engaged in such practices, and that they had both made verbal denials to VLC, but were refusing to put their denials in writing.

I can understand that they might think that if they were to make written denials to me, then many other people with my condition might write to them with similar questions. But Ive asked a couple of journalists if theyve been writing about me, theyve made written denials, Ive believed them, and I have not put their denials on my website because, since I believe their denials, it would not be relevant to publish them.

To me it looks as if Lewis and Buerk are happy to lie verbally but not in writing, because written falsehoods would place them unambiguously in the wrong, whereas they can try to talk their way out of verbal lies if they are ever caught, or perhaps even deny the verbal lies completely? If they lie without shame, then why would they have any shame about future lies about lying?

One of the strangest aspects of "TV watching" is that Buerk and Lewis have convinced themselves that their "interactive spying" is reasonable behaviour. Martyn Lewis thinks of himself as a "gentleman". He expressed in 1992 that he was "on my side". If this matter ever comes out into the open, I wonder what these newscasters will have to say for themselves, and what the British public will make of their behaviour?

Media Persecution Evidence on my Website

You may directly access the Evidence section on my website at URL;

The category currently contains four video segments, a number of audio files and three published articles. The first video of ITN's John Suchet is unfortunately a mistake - after looking at it again it is obviously not about me. The two Ken Clarke excerpts may or may not be about me; it is funny that he should keep on harping about "paranoia" and "madness", but I have given these ratings of only 30% certainty, as it is more likely that they are not about me in particular, and Clarke is simply displaying the normal prejudices against the mentally ill found in much of society.

The piece I find most interesting is the Dimbleby/John Major interview from April 1997. I have assigned this a 90% rating. Dimbleby starts by emphasising a report from the "Knutsford Guardian". Major recognizes what's going on and joins in with a falsely apologetic "heaven forfend". The emphasis is on the first syllable pronounced "nuts" in "Knutsford", which is repeated three times. Of course this is hardly anywhere near convincing evidence; the really clear items were all in 1990-92, and they are basically unobtainable now.

If you're reading the website, have a look at the two files from David Hepworth's programme on GLR radio. The first one from 21/Feb/1997 has him

talking about an "embarassment" of prizes and "absolute obscene", in reference I believe to the verbal sexual abuse that was being used against me at the time (and which unfortunately is still current). In the second file dated 9/May/1997 he again talks about "absolute embarrassment" of prizes, followed by laughter. To my mind he knows I am listening to his programme, and deliberately makes these remarks for my benefit, with very little attempt to disguise their purpose.

Bernard Levin - "Fanatic's Fare for the Common Man"

On 21 September 1991 this article by Bernard Levin appeared in The Times. It is reproduced in the Evidence section of the website, or may be accessed directly at URL;

To my mind, Levin's article described the situation at the time and in particular a recent meeting with a friend, during which I for the first time admitted to someone other than my GP that I had been subjected to a conspiracy of harassment over the previous year and a half.

Levin writes about a "madman running loose about London" who "bursts into tears, and swears it is all true. And it is." I am pleased to agree with his assertion that "it is all true" because the truth is what I presented to my friend in September 1991 and it is what is being presented to the readership of these articles now.

Conclusion

The harassment, in particular media persecution, was at its strongest in 1990-92. Today, I am recording everything I watch, read and listen, and the media have pretty much given up. It is now incidents "in public" which make up what there is of MI5s persecution. But much of the material from 1990-92 still exists in archives, although the organisations which have those archives generally wont make the material available to the public, for copyright and other reasons.

MI5 can no longer employ the media to persecute me, partly because journalists now know who is behind the persecution, and also because I would publish any instances. My mistake during 1990-92 was to not record instances as they happened; Ive learned from that mistake, and know better now.

Does anyone have a copy of Clarence Dyson's webpage about Atari mods?
http://www.geocities.com/atari
do not work.

Regards,
Jurek.

Hi guys. It's been years since I wrote ColrView, etc. Didn't I write a converter from GIF to ColrView?? Should be simple to build a collection of pictures from that. Or hasn't someone done a JPG converter, which they could modify to output in ColrView (it's not like I hid the details behind how it works, or anything like that).

Your eight-bit friend,

Jeff Potter

Hello Jeff,
afaik I did write you an e-mail in the late 90s because I wanted to register for Apacview and Jview. You answered me, that there would be no need to register any more since you do not use the A8 any longer nor create any updates of these programs...

Anyways, I can send you copies of all your programs, along with the JPEG grayscale and color decoder (by Raphael Espino) and of course also some nice *.RGB, *.HIP, *.RIP and *.TIP pictures (with approx. 20-30 ATR images for each picture format). The RGB pictures were done with Apacview and a separate program (by Clay Halliwell) called CV-Squash. Later I used Jview to convert directly from GIF to *.RGB (RLE-compressed R,G,B picture, much shorter than 3x 62 sectors)...

[Sidenote for Russ: the Gr. 15 RGB mode works very well on PAL Ataris, Gr.8 RGB does not produce colors, but "only" up to 8 grayscales - I guess this is normal; alas the Gr.9 RGB mode does not produce up to 4096 colors, at least not on my PAL 800XL; most of these Gr. 9 RGB pictures have 3-5 colors each with 16 luminances, do not know why I cannot get more colorfull results in the Gr. 9 RGB mode; thats why I only used the Gr. 15 RGB mode after a while; maybe my PAL Atari has a bug or maybe this Gr. 9 RGB mode works only with full 4096 colors on NTSC machines...]

If you are still interested in the programs or pictures - just write me an e-mail: andiko -no spam- at -no spam- web -no spam- point -no spam- de (remove all those no spam entries and replace at with "@" and point with ".") greetings - Andreas Koch.

(Replies to hisself.)
I looked thru my archives.
The name I was trying to remember for the most
colorful 10/12 colors pictures was S. Dong.
Steve Dong. Chalger, Buddha, Citydemo,
Desire, Roxane, and Shore.obj. All are .obj
files, must load from a DOS 2.5/2.0/MyDOS
DOS, will work on NTSC or PAL (in Emulator).
Anybody remember these? See them if you haven't.

1447. Guitar Hero on C=64

Newsgroup: comp.sys.atari.8bit

When I first played Guitar Hero on the PlayStation 2, I noticed that
the controls would more-or-less map to an Atari controller, and the
tall-as-the-screen player/missile graphics on the Atari would be good for
the notes coming at you.

(Five colored buttons could be joystick up/down/left/right/fire, the fret
switch could be one paddle, and the wah-wah bar or tilt could be the other.)

Well, apparently a C=64 owner thought the same, and actually hacked together
an interface, "PSX64" which does that (but better), and more (programmable!).
And it should work with Atari 8-bit systems! :)

1448. What to do with 130XE and tape drive? (totally noob question)

Newsgroup: comp.sys.atari.8bit
Date: 2007-11-28 11:10:06 UTC
From: Linards Ticmanis <ticmanis@gmx.de>
Message-ID: <474d4c93$0$27131$9b4e6d93@newsspool1.arcor-online.net>
Source record: 3987

Hello,

I just happened to stumble across an unused 130XE with tape drive, but no disk and no manuals. Never used any Atari 8-bits before but I do know my way around with several other 8-bit systems (which shall remain nameless lest another flame ware erupt).

There were a few tapes included and I figured out how to load them with the help of the Atari 8-bit FAQ. But how do I get any more software onto it? Are there archives of tape-based Atari games? What file formats are used for tape images?

All the info in the FAQ about getting software onto the Atari seems to require a modified 1050 drive and a 5.25" floppy drive on the PC, if I understood it correctly. Is there some other way, like building a cable from a PC parallel port to the SIO port or whatever?

Thanks,
--

Connect your Atari to a PC (also with Vista) using SIO2PC USB version and
you will be able to do *everything* with your 130XE.

What Philsan said but with a little more info about the lower end. Even the simple non-USB cables will provide you with all the functionality you would probably need. There's two sets of software people use, either SIO2PC for MS DOS based computers or APE for Windows.

The simple SIO2PC cables simulate an Atari disk drive on the MS/clone box. You just download Atari programs or disk images off the internet to your clone and they load and run with the software just like your clone is an Atari 1050 drive. It is actually much better then that since your clone can simulate multiple drives and hot swap disks on the fly.

The more sophisticated cables can also drive a 1050 type Atari drive from a PC. This is useful for making backup copies of protected software you may own. Since if I read this right, you don't have any disk based software, you don't need this capability.

The ~$25 for a cable is pretty reasonable IMHO but if you want to get away even cheaper you can build your own cable for ~$5. There are several sites on the web that have plans. Most people default to the 1489/14C89 one chip type designs.

Rick

Right, getting a PC-SIO(Atari port) cable is the
way to go. Then you can load disk images from
the PC. You mention a PC<->Atari parallel port
cable. Those aren't made. However, if you have
a parallel port, you probably also have a serial port.
Today, many PCs don't have a serial port, so a Atari<->PC USB cable and
software is available.
www.atarimax.com is a place to get such software and equipment. Good Luck
and welcome to Atari.

And AtariSIO for Linux (though it needed a slight tweak to compile on the
latest 2.6 kernel on my Kubuntu 7.10 system).

I have Steven Tucker's AtariMax SIO2PC device, and it's great!

Not quite true - they are homemade ;P, but SIO2PC
is better, altough little more complicated to build
as it has more elements than just few wires :)
plus with SIO2LPT CPU has to work harder as all
transmission stuff is done by PC, not by serial device.
Anyway SIO2LPT hardware is cheap&simple :P.

OK, yes, there are probably some SIO2LPT
schematics somewhere, maybe Poland.
But, I believe the APE/PRO SIO2PC serial
and USB are the most comman/available.
And I gave a link. Some vendors may also have
interfaces, I just don't know them off the top.
Hmm... I think the OP is from the UK, so
there are probably more local sources for
interfaces.

Ooops, From Deutchland, sorry. Certainly
there are German sources for interfaces.
Maybe try ABBUC website. Or Polish sources,
I know there are a few good ones.
So, tell us the Polish and German sources.
And, the OP didn't seem to be adventurous,
or the schematic for a 1486 chip one is easy to make if one has the cables.

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by
Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of
Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from
1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by
Atari Interactive, which is managed by today's Atari, Inc. Both of these
are divisions of Infogrames Entertainment.

> No! he should put in his dues and suffer with the tapes like we did
> back in the day!

Absolutely!

I remember my first Atari's (yep I had more than one at the time). A 600xl,
800xl, and XEGS. 2 Tape drives to use with em. Loved it! Getting my first
1050 was ecstatic!

Learn from the beginning and enjoy yourself! The old atari days were great!
There's still lots of resources and reading material out there to help you.

Just remember to have fun and you'll really enjoy the 8bit :)

1463. MI5 Persecution: Browse the Website (3511)

MI5 Persecution Update: Friday 25 March, 1999

If You Intend To Reply, Please Read This
Please.... keep your response to one page if you can!. Faxes over a page or two will be deleted without being read.

The Usual Words

The persecutors-who-wont-admit-theyre-MI5 have been active again this week. On Saturday 20/3/99 I visited Ravenscourt Park in west London, and was verbally assaulted with the usual words, "something wrong with him". This audio file is on the web at URL;

This afternoon (Friday 26/March) I was again verbally assaulted while travelling by bus. The same sexual obscenity was thrown at me, and the incident was recorded on my minidisc-walkman. Because of the deeply offensive nature of the slander, I will not be posting this on the website.

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Persecution : Browse Website

The March 1998 issue (number 42) of .net Magazine reviews the website describing it as an "excellent site". Since August 11, 1996 over 50,000 people have browsed this website.

You are encouraged to read the web pages which include

a FAQ (frequently asked questions) section outlining the nature of the persecutors, their methods of harassment through the media, people at work and among the general public

an evidence section, which carries audio and video clips of media and workplace harassment, rated according to how directly I think they refer to me

objective descriptions of the state security agencies involved

scanned texts of the complaints I have made to media and state security agencies involved

posts which have been made to netnews over the last four years on this topic

This article outlines what is to be found on the webpages, which you are encouraged to browse for the complete story.

Frequently Asked Questions

Your excursion through the website starts with the "FAQ - Frequently Asked Questions" portion. MI5s campaign of harassment against me has been going on for almost 9 years, and its longevity and breadth is reflected in the FAQ. Many thousands of people in Britain and abroad, including some recipients of this fax, have known for many years of MI5s activities against me. The FAQ describes the mass "Omerta suppressing its publication"; we pretend Britain is part of the "Free World", yet the British Secret Police, which is what MI5 are, carry on for many years a campaign which politicians and the media know about, and rely on the silent complicity of so many thousands of people.

The FAQs introductory article names those who are "in the know"; media figures like Martyn Lewis, Michael Buerk, entertainment figures like Chris Tarrant, politicians and many in the general public, "all united in a conspiracy which breaks the laws which the UK does have regarding harassment, and all completely uncaring for any semblance of decency or elementary respect for individual rights.

Broadcast media play a key role in the harassment. The very first incident in June 1990 was when a television newsreader reacted to what she saw happen in my living room at home; such incidents of "interactive television" are still happening in 1999. The same goes for radio stations such as Capital FM. In spring 1994, Chris Tarrant on his Capital morning show made an aside to someone else in the studio, about a person he didn't identify. He said, "You know this bloke? He says we're trying to kill him. We should be done for attempted manslaughter". Tarrant and Capital have made strenuous efforts to avoid answering this charge.

Perhaps worst of all, MI5 have deliberately set-up many incidents in public places such as tube stations, shops, cinemas, where they have paid people to throw abuse at me. Since MI5 obtains funds to the tune of 160 million a year to fund its criminal activities, it has funds both to pay its operatives and to "buy" media figures and members of the public to take part in its campaign of persecution.

The Security Service are professional liars. They throw slanderous abuse, yet they refuse to admit out loud that they are doing so. When challenged about their activities through the Security Service Tribunal they lie and deny their activities. They induce other workers and managers at places of employment to take part in their campaign of abuse, presumably by buying them in the same way they buy media figures.

Complaints, and Press Coverage (BBC Lies, MI5 Lies)

As you might expect I have challenged both the Security Service, through the Security Service Tribunal, and offending broadcasters, to own up to what they have been doing. And as you might also expect, all of these people have lied through their teeth. Still worse, they have refused to commit unambiguous lies on paper; they have couched their lies in bureaucratic language, and allowed others to make false assurances and tell lies on their behalf. So when their lies are exposed, they will then tell further Clintonesque lies about how they werent really telling lies in the first place!

On 6/Feb/1997 the BBC told me they would "never engage in any form of surveillance activity such as you describe". The BBC told me Buerk and Lewis had refused to put their lies in writing, but had stated verbal falsehoods denying my accusations of "interactive watching" during news broadcasts. Clearly Buerk and Lewis fear being caught and exposed, so they hide behind their Viewer Correspondence department.

In March 1997 I issued a summons against the BBC to try to "smoke them out". This summons was struck out as "disclosing no reasonable cause of action", because I had acted as a Litigant-in-Person and most LiP summons are treated thus. My case was arguable in law, so the striking out was unjust.

In June 1997 the Security Service Tribunal wrote to me regarding the complaint I had brought against MI5 in February. They say, "The Security Service Tribunal have now investigated your complaint and have asked me to inform you that no determination in your favour has been made on your complaint." I think you can guess the contempt which I feel for the Security Service Tribunal, who have never made a determination against MI5, and act as merely a whitewashing body for the Security Service. Unsurprisingly in May 1997 the Interception of Communications Tribunal gave the same result.

The last few items of "Press Coverage" give details of mentions of the MI5 Persecution in various magazines and newspapers such as BBCs Ariel, the Observer and .net magazine.

Evidence

Some audio and video clips of evidence have been recorded. My weakness in this area is because most of the really unambiguous evidence would have been obtainable in 1990-92, but I wasnt taping anything at the time, and its very difficult to now obtain recordings from that period.

The audio clip "Life is so Hard" relates to harassment at my workplace in Canada. In the latter half of 1996, I was sitting near to co-worker Mark Lee, who kept coming out with words and phrases which showed MI5 were supplying him with data from my home life. For example, I would say something on the telephone at home, and the following day he would repeat verbatim what I had said. When Mark Lee saw I was recording what he was saying, he started to make his remarks more ambiguous, or make the obvious ones out of earshot of the recorder.

However, during the evening of 12 November 1996, at home in my apartment (flat to you UK-ers), I said "life is so hard, and then you die". A nihilistic, negative thing to say, but quite distinctive. The following day, 13 November, Mark said loudly, "life is so hard eh, and then you die" followed by loud laughter. I captured this on my tape-walkman and the computer-audio file is posted on the website.

There are a number of other audio files in the websites "Evidence" area demonstrating the abuse to which MI5 subject me to through their paid agents.

Also in this section is a very interesting article by journalist Bernard Levin, which followed a meeting I had with a friend in 1991, and to my mind describes in some details Levins "artists impression" of the meeting. He talks about a "madman" who "bursts into tears, and swears it is all true. And it is."

Internet Newsgroup (Usenet) archive

From May 1995 until the present day, this matter has been discussed exhaustively on internet newsgroups. The most interesting articles from the first two years of posts are documented here. This area is worth reading since most of the questions which the reader would ask, have been asked at some time or another by someone on usenet. Perhaps the very first article posted sums it all up so succinctly;

Date: Thu May 4 18:27:24 1995
Newsgroups: alt.conspiracy
Subject: BBC's Hidden Shame

Remember the two-way televisions in George Orwell's 1984? The ones which watched you back? Which you could never get rid of, only the sound could be turned down?
Well the country which brought Orwell into the world has made his nightmare follow into the world after him. Since 1990 the British have been waging war against one of their own citizens using surveillance to invade privacy and a campaign of abuse in the transmitted media in their efforts to humiliate their victim.
And the most remarkable thing about it is that what they do is not even illegal - the UK has no laws to protect the privacy of its citizens, nor does it proscribe harassment or abuse except in the case of racial abuse.
A lot of people in England know this to be going on, yet so far they have maintained perfect "omerta"; not a sound, not a squeak has escaped into the English press, and for all the covert harassment absolutely nothing has come out into the public domain.
Have the British gone mad? I think we should be told.

So how much deeper will the persecutors-who-wont-admit-theyre-MI5 sink in their campaign of lies and intimidation? Each time I thought they could sink no lower, they have managed to surprise me. You thought it could never happen here? When the MI5 British Secret Police make their smears against me, it is the corruption of the Establishment, which they are part of, that is demonstrated.

I would, if there is a tape image archive in existence. I found a few links to some Russian site (atari.da.ru) but it's dead. Is there a surviving mirror of that site, or are there other tape image sites?

Also, I would like to say a belated "thank you" to all who answered. I'll probably get or build a SIO2PC when I get around to it (not before Christmas).

I wonder, is that special plug for the Atari SIO sockets still in production? Or would you have to find and buy a a used disk I/O cable, if not a whole disk drive? I don't really want to cut apart the cassette thing. What's the name of this plug anyway?

Regards,

Have a look at ftp://ftp.pigwa.net/stuff/collections/stryker/cas
there are several cas images available (I'm currently working
on cas support for AtariSIO).

These plugs have become very rare. You either have to butcher an IO
cable or you can also build a plug by yourself:

Get a female DB-9 connector (you only need 5 pins for SIO2PC), take
it apart and just use the pins (they fit nicely onto the male SIO
connector of the Atari).

Then solder wires to the single pins, plug them onto the SIO connector
of the Atari, put a small piece of PCB (without copper) between the
upper and lower row of the pins and glue it all together. Voila,
a homemade SIO plug :-)

You can also build the whole SIO2PC interface plus the SIO connector
on a small strip of PCB with just the width of the SIO plug and
then either solder a serial cable or a DB9 connector to the PCB
so you've all got in a small, single piece.

so long,

Hias

Here
http://www.best-electronics-ca.com/
http://www.myatari.com/
you can buy complete SIO cables.

In fact - I haven't seen any ;). That's why I wrote "homemade"
and unfortunately there is no any standard for it like
for RS-232 transmission or cable pin connections so software
like APE is problem too ;). I've made one from scratch for myself
for fun because I had couple of DB25 plugs and had no any MAX chips,
but soft is in really really alpha stage ;P altough it works
quite fine for now.

> But, I believe the APE/PRO SIO2PC serial
> and USB are the most comman/available.

I think so, too.

> And I gave a link.

Heh, cool. I just wrote that an option to SIO2PC exists, but
it's only advantage currently is simple construction for
home making and it's dangerous as always using LPT and atari
SIO ports directly. That is just my blah blah talking (writing).
For someone who wants just interface and soft for Atari-PC connection
I suggest SIO2PC+APE too - it's easier & more safe that way :).

Matthias Reichl:

> These plugs have become very rare. You either have to butcher an IO
> cable or you can also build a plug by yourself

Another solution is to destroy :) but reuse XC-12 or another media
cable and DB plugs - I prefer DB25 using 13 upper (1-13) pins of it.
Atari SIO port has 13 pins and if you want it compatible for future
(don't know which pins some future device will need) you better
connect all of them (even if not required) in this fashion:

[XC-12]---------SIOplug
^cut here

redo 2 cables for example that way:

[XC-12]----DB25-female-plug
(wires at apropriate pin NUMBERS as earlier in SIOplug)
DB25-male-plug-------SIOplug
(straight DB pins 1-13 (upper row) to SIO pins 1-13 connection)

This way your XC-12 is still working fine after connecting
male&female DB25's and you have an short DB25toSIOplug cable
and may stop worrying about ATARI SIO plugs accesibility
(DB25 plugs are much more popular and easier to get).
Then you can use it for many other devices/connections
(ANYTHINGtoDB25-female cable) assuming pins on the Atari
side are correctly assigned (line-in,line-out,+5V,ground etc.),
anything device requires.

Just FYI: I could have my point of origin wrong but I believe the first SIO/LPT use and schematic came with the ST Xformer software. I think I paid ~$25 or $35 for one from B&C Computer Visions. This was for hooking a real 1050 drive to your ST and Xformer would access it just like a real drive. Derek converted the software to MS DOS but I recall the timing was difficult to impossible to set unless you were in a very narrow range of PC speeds, something like a 16 mHz 386SX to 25 mHz 486.

YOOMP! will work on a NTSC Atari.
IF you use a PAL Antic and a Commodore 1902A
monitor. Modern TVs have the composite RCA
inputs, but the video rolls and there's no vertical
sync on my TV.
I also got Crownland working on the same computer
(a 256K Newell).
I can't do my cheats, like with emulator, but my
grandson wants to play it straight anyway.
Both games look and sound terrific! Thanks
Bill Kendrick for pointing to the games, and ABBUC
for sharing them.
I could do the cheats in the load file, or put the
PAL Antic in my Omnimon.
Atari is alive!

I got Omnimon to work once, then couldn't repeat that.
So, a few instructions on page six, loaded in prior to
running YOOMP!, and one small change to the .XEX,
and can set level and lives.
Alter JMP $3600 in the .XEX to JMP $600 and put the
lives on page 6 at $3634 and level at $3922, then
JMP $3600. Load program at page 6, don't execute it.

**********************************************************************

UPDATES SINCE PREVIOUS POSTING:
2007.12.01 Thomas Richter, atari++ 1.53
2007.12.01 trub updates, including CP/M project for Indus/LDW/CA drives
2007.12.01 MadTeam, Atari Commander 1.81
2007.11.16 deleted: Sunmark (announced going out of business)
2007.11.15 Eric Parent, Memo Pad for Windows Release 6
2007.11.15 HiassofT, MyIDE Tool V0.30
2007.11.12 added: Motelsoft
2007.11.12 Shawn Jefferson, MyIDE Image Manager 4.1
2007.11.12 added: Mario Caillahuz, developer of Plague Attack,
Voyage to Home, Accion, MULE Wars
```

2007.11.11 added: Yoomp!
2007.11.09 Mark Grebe, Atari800MacX 3.8.1 and Sio2OSX 2.0
2007.10.21 Eric Parent, Memo Pad for Windows Release 5
2007.10.07 Piotr Fusik, ASAP 1.0.1, xasm 3.0.1
2007.10.05 added: Blackened Technologies
2007.10.05 added: Atari8Warez
2007.10.05 MadTeam, MADS 1.7.8
2007.09.29 BAKTRA, DTX Manager

Subject: Introduction

Conventions

All commercial vendors, developers, publishers, and repair shops should be listed here. "Active" PD/freeware/shareware developers should also be listed. Persons or entities holding rights to products, but not selling or supporting them in any way, should NOT be listed here.

"Vendor" = Reseller of products produced by others. Types of products sold are given in categories: new hardware, used hardware, PD/freeware/shareware, (new) commercial software, used (commercial) software.

"Developer" = Producer of products. Titles of products produced by the developer are listed. No prices are given.

"Publisher" = Publishes a print or disk magazine, or a book. Complete subscription or ordering information should be given, including prices. Authorized online publishers of originally print or disk magazines are also listed. Online books are not listed.

"Repair Shop" = Can repair 8-bit Atari or related hardware devices. Be sure to make advance contact before sending anything to work on!

Entries are presented alphabetically by company name, or publication title. If no company name exists, a personal name is used. "See" references indicate complete information may be found under the given heading. "See also" references indicate closely-related information may be found under the given heading.

The month/year that vendor information was most recently fully verified is given at the "upper-right" of each entry.

Every entry must contain a valid postal address or web page address.

Unless explicitly requested by the vendor, no entries will include an email address due to the overwhelming amount of spam that would result.

The following is from http://www.upu.int/irc/en/ (2004.03.27)

When one writes to a stranger and requests a reply, it is considered polite to enclose a self-addressed stamped envelope. This works well when both

persons live in the same country. However, if they are from different countries, the enclosed postage stamp will not be valid.

This technical problem was solved in 1906 when the Universal Postal Union, during its Congress in Rome, introduced the International Reply Coupon service. International Reply Coupons (IRC) are exchangeable in all member countries for the minimum postage of a priority item or an unregistered airmail letter sent to a foreign country.

The UPU's International Bureau processes approximately six million coupons each year and takes care of all accounting aspects. Developed countries are the largest users. The International Bureau does not sell ICRs directly to customers; they must buy them from their local post office. Although they are not obliged to sell ICRs, it is mandatory for all Posts of the UPU member countries to exchange the coupons.

Verfications -> YOU!

This list is in a constant state of development, and comes with no guarantees. Information of this nature constantly ages; therefore, the information contained in this list is constantly updated. Please use the latest release of this list whenever possible!

Remember, the success of this list is dependent on YOU, the reader, to send me updates that correct errors that you find. If you use this list, please do your part in keeping it useful for everyone!

4JAYS (Jay Colen) 9/04
519 W 4th St
Antioch CA 94509-1246
USA
Shop Phone: 925-777-1160
Store Hours: Tuesday thru Friday 12-6pm - Saturday 11-5pm
http://www.4jays.com/
Vendor: new and used hardware and commercial software

8-Bit Classics (Mr. Corey Koltz) 4/06
302 W Dewey St
Cassville WI 53806-9733
USA
Phone: 608-725-2137
http://www.8bitclassics.com/
Vendor: new and used hardware and commercial software

A-ONE Online Magazine 2/07
See: Dana P. Jacobson

ABBUC HAR -- Hannoverschen ABBUC Regionalgruppe 2/07
Hanover
Germany
http://www.bertelmann.org/har/
Vendor: XF351 Upgrade-Kit includes Floppy + Cable + EPROM + Bootdisc,
Used Atari 800 XL PAL, Speedy1050 TDS. Not all items online available--
Ask for more information. Additionally vendor of:
- all items from Frank Heuser Shop
- all items from Wolfram Fischer
Special lower prices for ABBUC members available.

ABBUC Regionalgruppe Frankfurt / Main (RAF) 5/07
Dillenburgerstrabe 61
60439 Frankfurt / Main
Germany
http://www.abbuc-raf.de/
Vendor: MultiJoy8 cable and adapter
Developer: SIO2PC, Network Interface, 2 computer interface (automatic
2 computer switch for use the same peripherie), Schaltnetzteil
(Power supply), 8 channel digital voltmeter, SIO2USB

Advantage Web Solutions & Computer Services (Jim Mason) 7/04
PO Box 561
Mason City IA 50402-0561
USA
http://www.jamess.com/
Developer: The Atari Weather Station -- build your own dedicated
temperature monitoring station using simple thermisters and the provided
software. Also available: source code listing, temperature data aggregation
utility

Alhart Enterprises Presents (AEP) 8/06
c/o Paul V. Alhart
524 N Z St
Lompoc CA 93436-5019
USA
tel: (805) 736-4624
"encoded" email: OOOp.alhartOOO@OOOverizonOOO.OOOnetOOO
Vendor: used hardware--mainly reconditioned disk drives: 810 (no case),
810 w/case, 810 w/Archiver, 1050, Rana 1000, 1050 w/doubler, Indus GT
Developer: AtariWriter+ Companion (disk), AtariWriter+ Companion II (disk),
StarStuffer (disk), Search System II (disk), Atari BASIC Enhancements (disk),
8-bit TTL Logic Analyzer (disk), MagicCalc (disk), Games disk:
Jacks Cargoship + Light Pen/(Light Gun) Tic-Tac-Toe (disk).
Publisher: RANA Repair Guide (book) - US$12
Repair shop: Atari disk drives

Altronic E.I.R.L. 6/04
Bolognesi 952
Bellavista
Callao 2
Peru

tel: (51)(1) 429-4298
Repair Shop.

Alltronics 8/05
PO Box 730
Morgan Hill CA 95038-0730
USA
Phone: 408.778.3868 Hours: 10am to 4pm Monday - Friday
Fax: 408.779.2608
http://www.alltronics.com/
Vendor: Atari CX85 Numerical Keypad, Blaster! Auto Fire Module,
TV/Computer Switch

Art Transfair Berlin (Andre Motzkus) 2/07
Brunsbuetteler Damm 223d
13581 Berlin
Germany
http://www.art-transfair.de/
Vendor: Computer, expansion, Floppy, memory-upgrades up to 16 mb,
Audio A/D changer, additional many other Atari items (16/32/64bit).
Special lower prices for ABBUC members.

Atari800 Development Team 6/06
See also: Mark Grebe
See also: Christian Groessler
See also: Piotr Fusik
See also: Kostas Nakos
See also: Vasyl Tsvirkunov
See also: Ludovic Jacomme
Petr Stehlik (maintainer), Troy Ayers (Playstation 2), Michael Borisov (POKEY
sound), Piotr Fusik (core developer), Mark Grebe (Mac OSX), Christian
Groessler (Sega Dreamcast), Perry McFarlane (cycle-exact ANTIC and GTIA),
Kostas Nakos (Windows CE), Krzysztof Nikiel (Win32), Jacek Poplawski (SDL),
Vasyl Tsvirkunov (Windows CE), James Wilkinson (DOS, BeOS, Win32),
Ludovic Jacomme (PSP)
http://atari800.sourceforge.net/ or http://atari800.atari.org/
Developer: Atari800 2.0.2 - an Atari 400, 800, 600XL, 800XL, 130XE
and 5200 emulator for Unix, Linux, Win32, Amiga, MS-DOS, Atari TT/Falcon,
BeOS, WinCE, Mac OSX, Playstation 2 and other systems

Atari8Warez (Ray) 10/07
Toronto, Ontario
Canada
http://atari8warez.for-the.biz/
Developer: SIO2PC serial interface cable,
10502PC / ProSystem Serial Interface cable

AtariAge (Albert Yarusso, Alex Bilstein) 4/06
PO Box 27217
Austin TX 78755-2217
USA
http://www.atariage.com/

Vendor: new hardware (includes homebrew project supplies by Pixels Past)
Developer: Beef Drop cartridge (by Ken Siders)

AtariArchives.org (Kevin Savetz) 6/05
USA

1478. RetroChallenge Winter Warm-up 2008

Newsgroup: comp.sys.atari.8bit
Date: 2007-12-06 05:38:17 UTC
From: "Simon D. Williams" <email@ld8.org>
Message-ID: <3b2d9f67-6e5a-489c-911c-8f85aba7297e@e23g2000prf.googlegroups.com>
Source record: 3817

Subject: RetroChallenge Winter Warm-up 2008

Retrocomputing enthusiasts the World over are cordially invited to participate
in the 2008 RetroChallenge Winter Warm-up, commencing January 1, 2008.

RetroChallenge is an opportunity for fans of "obsolete" platforms to spend a
month pushing their retrocomputing limits in the company of like-minded geeks.
Participants set their own goal(s) and typically keep the community apprised of
progress via weblogs or on the Retro BBS.

Challenges are as unique as the individual RetroChallenger -- in the past
participants have programmed games; created music and video content; performed
dangerous hardware hacks or simply spent a month trying to get an old computer
to boot.

RetroChallenge is not so much about competing, as it is about sharing. Think of
it as an on-line show-and-tell for RetroGeeks. Because the individual challenges
are self-posed, the RetroChallenge is equally well-suited to hoary old wizards
and tender newbies alike. It's not about winning, but about *doing*.

RetroChallenge is open to *all* retrocomputing platforms. For the sake of
simplicity (and to avoid the usual endless debate), the criteria for what
constitutes a "retro system" is left up to the conscience of the participant.
Although it's very much a matter of perspective, we would hope that nobody's
going to bring their 5-year-old Dell to the games!

The Rules? Well... there really aren't any.
RetroChallenge runs from January 1st, 2008 to January 31st, 2008. Participants
are encouraged to announce their intentions prior to December 31st (but
stragglers, as always, will be accommodated). Other than that, have

fun and try
to keep the platform wars to a minimum.

Archive-name: atari-8-bit/welcome
Posting-Frequency: 7 days
Last-modified: October 20, 2007

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by
Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of
Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from
1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by
Atari Interactive, which is managed by today's Atari, Inc. Both of these
are divisions of Infogrames Entertainment.

According to this thread
http://www.atariage.com/forums/index.php?showtopic=112459&hl=atari-explorer

it was supposed to be moving to http://www.atariexplorer.com/

Although, that was several months ago.

OK, so Tramiel is officially pronounced /tra mel/ according to Karen
Tucker of
the Computer History Museum.

I still don't know how to say that!

From this article,
http://www.escapistmagazine.com/articles/view/issues/issue_112/1375-Three-Unappreciated-De
mon-Slayers.4

As Leonard so astutely put it, "It's pronounced Tram-ell
[ell is in italics on the web page]. It rhymes with 'done well.'"

Putting these two together, I think I would type the pronunciation like
this:

truh-MELL

Would this be right?

I never heard it, don't know what it is supposed to be,
but I always pronounced it Jack Tra-meal', with the
accent on the meal. I always do that, from the German
rules of pronunciation where ie is pronouced eee
and ei is pronounced eye. I dunno. Truh-Mell
would give the ie one of the A sounds.

References trimmed.

A rough cut should be up shortly at

http://video.google.com/videoplay?docid=504862715223996474&hl=en

I just noticed two typos while scanning the cut. I mistakenly rigged
the date
as 12/11 (not 12/10), and it should be Monte Sereno, not Mount. This
is what
you get for trying to do this quickly, but it takes about nine hours
to
render, transcode and upload, so people can just deal with that for
now.

The quality of the video is not very good because I had only a single
camera,
there was audience activity I could not always get, and there were
glitches
in the PA system. Robert's two camera video will undoubtedly be
better, so
I am not going to lose a lot of sleep over it.

Well, if I were to write it phonetically, the a in the first
syllable would
be a schwa and I'd have an accent mark on the last syllable. :-)

Correct. The acid test was when I used it in front of Leonard
Tramiel and Bil Herd, and neither of them corrected me (Bil said I was
right).

Go to www.vintagetechnology.co.uk to download latest issue (January '08). Only £0.79p / $1.60 for a 40+ page magazine devoted to the collection, preservation and history of all aspects of digital and electronics technology, including computers, arcade games, calculators, led watches, mobile phones, appliances, gadgets, robots, radio, audio and tv.

This issue includes articles on:
Osborne-1 computer
Origin of emoticons
The beginning of computer adventure games
Potted history of Pac-Man
Nintendo Game & Watch games
TI-59 programmable calculator
1970s/80s calculator watches
First ghettoblasters
Early portable turntables
1970s novelty radios
The first mobile phones
How to placate your non-collector, ultimatum-issuing partner
Interview with Wayne Ratliff - creator of dBase
Commodore disk drives - diagnostics & repair
Cleaning old electrical equipment
Commodore 64 memories

Plus sections on museums & collections, latest events & news and book review.

You can also get the printed version for £2.60/ $6.0 per issue (includes delivery).

VTM aims to explore the legacy of recent past technology, explore new 'electronica' which could become or already is collectible, be an enjoyable resource for collectors & historians and celebrate the history and personalities surrounding this subject.

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE, 130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from 1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by Atari Interactive, which is managed by today's Atari, Inc. Both of these are divisions of Infogrames Entertainment.

Cross-posted to:
comp.sys.atari.8bit,de.sci.informatik.ki,fr.comp.sys.mac.materiel,microsoft.public.sqlserver,sfnet.keskustelu.politiikka

MI5 Persecution: How Could It Be True?

If you have the patience to read these articles you will be struck by how apparently fantastic the claims being put forward are. You may ask yourself why such seemingly nonsensical assertions are made. This matter has been discussed on the Internets UK-local newsgroups for three years now, and the denizens of the uk.misc newsgroup (the so-called "miscreants") have come up with a number of theories to explain these posts; it has been variously suggested that they are a troll (an artificial creation for the amusement of its author), that they are made by MI5 themselves with the purpose of discrediting other conspiracy theories, and that the poster is mentally ill and the articles are symptomatic of the illness (the view held by most miscreants).

Are these claims the product of mental illness, or is that just a cover?

The most obvious explanation, that the claims made result from the admitted mental illness of the author, is the one which the persecutors intend be the one accepted without consideration being given to the possibility of the claims being true. The persecutors have actually been very clever about this, both in selecting as their target someone who was known from school or university as being borderline schizophrenic, and in ensuring the nature of their persecution corresponds to what often features in the delusions of a schizophrenic.

The very first incident of the persecution occurred in June 1990, when I was still a student at university in London. It consisted of a reaction (giggling) from the newsreader, Sue Carpenter of ITN, to what she saw happening in my living-room at my parents home where I was living. Before your imagination gets the better of you I should make clear that what the newsreader was reacting to was not too embarrassing in nature; my mother had brought an apple for me into the the room, and Sue Carpenter found this amusing.

I recognized that Carpenter had reacted to what she had seen in my living-room, yet this idea still seemed completely fantastic to me. My reaction was to continue watching television, particularly the news, to see if this incident would be repeated. It was, many times, both on BBC and ITV. An intelligent person would have thought to obtain a video recorder and capture some of these incidents in order to try to explain to an observer what he saw in these broadcasts. Unfortunately, I failed this test of intelligence, since I did not record these programmes. I have recently attempted to obtain from ITN tapes of their news programmes dating back to summer 1990, but, unhappily, they have advised me that they

do not have complete programmes including newsreaders comments dating back to that period.

From the outset, the persecutors structured their actions to ensure that any complaint would be met with disbelief, and dismissed as delusional. This is why they chose as their target someone who was known at school and university to be borderline mentally ill; and it is why they fired the first shots of their campaign through the broadcast media. Schizophrenics commonly believe the media harass them; it would be exceptional for "full-duplex television" to exist in reality. Those with schizophrenia also commonly believe people are talking about them; again, the persecutors have shown themselves very rarely, but act through intermediaries, both in the workplace, and in public and during travel.

Mental illness is not the cause of these claims, but the simulation of its symptoms is a cover used by the persecutors to deny their victim the ability to have his compaints believed.

What evidence exists to support these claims of "interactive television/radio";?

Quite frankly, I have very little evidence to support my claims. You may examine the "Evidence" area of my website to see such evidence as I have been able to gather. None of it is remotely conclusive. The "smoking guns" all date back to 1990/91, and it is really rather late now to start trying to look for material dating back seven or eight years. In 1997 I started tape-recording every programme I watched or listened to. I also started carrying with me a high-fidelity minidisc-recorder with good quality microphone to catch incidents of public harassment, but this also has not been as successful or conclusive as I had hoped.

Perhaps the best item in the "Evidence" section is the audio file "Life is so hard" (it is labelled with Garfield the cartoon character on the site), which I have given a certainty level of 100%. This item relates to harassment at my workplace in Canada in 1996. A co-worker called Mark was coming up with phrases and expressions which were repeating things being said at my Canadian residence, consequently leading me to believe that my apartment and home phone were bugged, and that the persecutors were passing their gathered information on to Mark. On one particular evening I said in my apartment, "life is so hard, and then you die". The following day I was able to record Mark saying exactly the same phrase at work.

Unfortunately when "they" know you are recording them, they simply dont say things which would unambiguously show harassment. When Mark the co-worker knew he was being recorded, he only made his remarks out of range of the recorder, for example outside the building. When the TV newscasters or radio disc jockeys know they are being taped, they limit themselves to saying things which are ambiguous, which even in my mind may or may not be personally directed against me.

Who knows about this persecution?

Surprisingly many people know. People in the media, such as BBC and ITN newscasters including Martyn Lewis and Michael Buerk, and radio disc jockeys such as Chris Tarrant of Capital Radio, know what is going on, and take part in it. Some co-workers at my former workplaces in England and Canada have known about the harassment. Quite a few people in the general public are also included. I believe the police are aware of the persecution, but, unfortunately, have chosen not to take any action to stop it. I have complained at my local police station in London several years ago, and I have stated on the internet newsgroups that I have done so, hence the police will be well aware of my wish to see the matter resolved. I believe their inaction denotes a dereliction of duty, but without good evidence, I am powerless to compel them to take steps to prevent further harassment, or deal with what has already taken place.

What is the purpose of sending these faxes?

These faxes are being sent to three distinct groups of people, namely Members of Parliament, the media, and diplomats & legal people. As you will have observed I am making use of the email-to-fax gateway at Demon Internet to send these faxes. I am forced to use this gateway since I currently live in North America, and cannot afford the high cost of direct phone calls to the UK.

My purpose in publicising my claims is firstly to discourage the persecutors from continuing their campaign, and also to attempt to bring their campaign out into the open, and thus perhaps identify the persecutors. Neither aim has been achieved yet, but I hope that with sufficient stimulation these aims may yet be accomplished.

The problem with the second aim is that those who read this article will fall into two groups, those who dont know anything about the persecution and consequently will disbelieve my claims as delusional, and those who do know about the harassment and may have some idea of who is behind it, but realise that if the harassers are exposed and the truth brought out into the open, then powerful British institutions will substantially lose prestige, and be exposed to ridicule.

It would give me hope to believe that these faxes will create a third group of people, those who find out that I am telling the truth, and who follow their consciences in standing up and seeing justice done. Only time will tell if this hope will be realized.

1509. MI5-Persecution: Why do you think MI5 are responsible? (2709)

Newsgroup: comp.sys.atari.8bit
Date: 2007-12-16 11:43:12 UTC
From: MI5-Victim@mi5.gov.uk
Message-ID: <m07111611431000@4ax.com>

comp.sys.atari.8bit,de.sci.informatik.ki,fr.comp.sys.mac.materiel,microsoft.public.sqlserver,sfnet.keskustelu.politiikka

Why do you think MI5 are responsible?

The question of who is ultimately responsible for this eight-year harassment is one which is very difficult to answer, as the persecutors have never clearly made their identities known to the persecutee. However, I believe I am correct in attributing the continuing victimisation to elements of the British Security Service MI5, and in this article, I will try to explain the reasons for this belief.

The British internet magazine ".net" featured my website on page 17 of their March 1998 issue (number 42). Their review kindly describes it as an "excellent site" and gives some details of what the net surfer will find there. Should you wish to reply to this article you can do so;

"When did you first suspect MI5 were responsible?"

Over Easter 1995 I went to see a local solicitor in London with a view to talking to the police about the harassment. Soon afterwards I did go to my local police station in Clapham and spoke to an officer there. The solicitor made a comment which suggested to me that the persecution I had been experiencing may have been organised by an intelligence service.

Up to this point, I did not have any clear idea as to who was behind the harassment. Only their agents were visible, in the media, on television news programmes, and on the radio; in the workplace, where things said at my home were repeated verbatim; and in some cases abuse in public and during travel, for example on the trip to Poland in June 1992 which I have already described.

Both from the fact that widely disparate individuals and organisations were employed as agents in the campaign against me, and from the fact that an entity would be required to marshal their resources in the areas of spying on my home and giving gathered information to their agents, it was clear to me that a single entity was responsible for carrying out the campaign. Yet from June 1990 until Easter 1995 I did not have a clear idea of who might be responsible. I guessed that perhaps some private individual or group of persons who saw themselves as my enemies had perhaps paid private detectives to organise the harassment. Alternatively, since the campaign had started in the media, I made a far-fetched supposition that perhaps it was an ad-hoc group of media people who had set themselves up in opposition to me. After Easter 1995 I saw that these guesses were wrong, and I made an I believe much more accurate estimate as to who my enemies really are.

"Why couldn't a private group be behind the persecution?"

There are several reasons why a private individual or group would not be behind this campaign.

Quantity of resources / Money. Here is what one Usenet (internet newsgroup) participant had to say (several years ago) on the topic of how much money it would cost just to keep the surveillance going.

PM: >But why? And why you? Do you realize how much it would cost to keep
PM: >one person under continuous surveillance for five years? Think about
PM: >all the man/hours. Say they _just_ allocated a two man team and a
PM: >supervisor. OK., Supervisor's salary, say, #30,000 a year. Two men,
PM: >#20,000 a year each. But they'd need to work in shifts -- so it would
PM: >be six men at #20,000 (which with on-costs would work out at more
like
PM: >#30,000 to the employer.)
PM: >
PM: >So, we're talking #30,000 x 6. #180,000. plus say, #40,000 for the
PM: >supervisor. #220,000. Then you've got the hardware involved. And
PM: >any transcription that needs doing. You don't think the 'Big Boss'
PM: >would listen to hours and hours of tapes, do you.
PM: >
PM: >So, all in all, you couldn't actually do the job for much less than
PM: >a quarter million a year. Over five years. What are you doing that
makes
PM: >it worth the while of the state to spend over one and a quarter
million
PM: >on you?

A private individual or group would not spend over a million pounds to verbally torture a victim without some financial motive or gain. Private industry is driven by the profit motive, and there is no financial profit to be had from carrying out a campaign in this way. If a private enterprise were behind it then they would have taken direct physical action a long time ago.

State enterprises, on the other hand, can afford to be wasteful, since they are funded by the taxpayer. They do not have to show a money profit. The employees or contractors employed by a state organisation such as MI5 are driven by their own personal profit motives, to make the most money out of their employers for the longest period of time. MI5 is funded to the tune of #150M p.a.; even a few hundred thousand a year would to them be affordable if their managers could convince themselves of the necessity of what they were doing.

Quality of resources / Technical resources - electronic and other surveillance. In summer 1994 a reputable and competent private detective agency was employed to conduct a counter-surveillance sweep of my home in London. They charged us over #400 for this, conducted a thorough search for radio transmitting devices, hard-wired "probe" microphones and also tested the telephone line. They found nothing. This was not altogether surprising, since it had been made very clear to me that there were bugs

in my home; the "buggers" would not have made this clear unless they had felt their bugs were of sufficient sophistication as to be safe from detection.

But there is another lesson to be gained from the failure of the private detectives to find anything. The agency employed was one of the most reputable in London. They were employed on the principle of "setting a thief to catch a thief", for if the harassment were being carried out by private detectives, as I then believed, then surely another set of private detectives would be able to find the bugs that they had planted. That these "private eyes" were unable to find anything, and that the harassers were confident that they would not be able to find any bugs, points to the harassers being an order of sophistication above a private agency, and leads me again to believe that a state intelligence service is responsible for the surveillance and harassment.

Quality of resources / Technical resources - Interception of Postal service. In summer 1994 when I emigrated to Canada to try to escape the harassment, I wrote letters home to my family and friends in London. Quite soon after my arrival in Canada, the harassers were able to find precisely where I was staying. The only way I can see of "their" being able to find out my new address was by interception of my letters to the UK.

Later in 1994, I conducted an experiment to see if my letters home were indeed being read. In a letter home I wrote of being depressed and talked in vague terms of suicide. I deliberately chose this topic, since I believed it was the outcome my harassers were trying to achieve, and that if they read the letter, they would "echo" its contents. Sure enough, soon afterwards there were two incidents of people shouting "suicide" at me in public places in Canada.

It is inconceivable for a private agency to have the ability to intercept postal mail. The state security service on the other hand is well known to engage in these activities.

Quality of resources / Access to Media. One of the strangest aspects of this case is the access "they" have to the broadcast and print media. I still do not understand what could persuade newscasters such as Martyn Lewis and Michael Buerk, who consider themselves "gentlemen", to behave in an almost voyeuristic way by "peeking" into the living room of one of their viewers. A year ago I wrote to the BBC asking if these newscasters would confirm or deny the accusations made against them. The BBC replied that their newscasters had denied the accusations, but refused to do so in writing.

It is well known that MI5 have the ability to plant stories in certain newspapers, but convincing television newscasters to "watch" a viewer while they read the news would surely be very difficult for them to accomplish, unless they presented themselves to these journalists as being, for example, a group in the media who were seeing to it that I got my "deserved" treatment. MI5 has a history of manipulating the media, so it might not be too difficult for them to accomplish such a trick, whereas

a private group would not have this ability.

"Have they ever denied that they are the Security Service?"

No. Never. This is in fact the main reason why I believe "they" are MI5 and not a privately funded group. If my guess had been wrong then I am sure that "they" would have crowed over my mistake, but they have never admitted nor denied that they are employees of MI5.

In early January 1996 I flew on a British Airways jet from London to Montreal; also present on the plane, about three or four rows behind me, were two young men, one of them fat and voluble, the other silent. It was quite clear that these two had been planted on the aircraft to "wind me up". The fat youth described the town in Poland where I had spent Christmas, and made some unpleasant personal slurs against me. Most interestingly, he said the words, "he doesnt know who we are".

Now I find this particular form of words very interesting, because while it is not a clear admission, it is only a half-hearted attempt at denial of my guess that "they" = "MI5". Had my guess been wrong, the fat youth would surely have said so more clearly.

"If MI5 were behind it, why would they wish to mask their involvement?"

I have heard a number of times a belief from people in the media that it is they, the media people, who are behind the abuse. In spring 1994 Chris Tarrant the Capital Radio D.J. said sarcastically on his breakfast show, "You know this bloke? he says were trying to kill him. We should be done for attempted manslaughter". We, we, we. Tarrant thought it was a media conspiracy.

Returning to the question of "interactive watching" by television newscasters, it would again be much easier for them to take part in that sort of activity if they convinced themselves that the surveillance and abuse were organised by "their own", by media people. It must be second nature to MI5 to mask their involvement in the matters they deal with; in this case, they pretend the campaign is organised by a group in the media, and any journalists who suspect otherwise keep their silence.

Conclusion

Over the last three years I have stated with some force my belief that MI5 are responsible for my misfortunes. I have done so on Internet newsgroups, in letters and faxes to people in politics and the media in the UK, and in 1997 I made a formal complaint to MI5 regarding their activities; the Security Service Tribunal replied in June 1997 that "no determination in your favour has been made on your complaint". (I believe the statement by the Security Service Tribunal can be disregarded, as they have never, ever made a ruling in favour of a complainant.) In three years of naming MI5 as my oppressor "they" have never denied the charge. To me, their silence on this point indicates that my guess was accurate. I believe my persecutors stand identified. The question of why they should carry out this campaign is one I will try to answer in a future article.

MI5 Persecution Update: Friday 15 May, 1998

The persecution has been quite severe for the last week. It appears that my enemies are reacting to the steady stream of faxes making their way over the Atlantic to the fax machines of Westminster politicians and the media. Here is whats happened in the last few days;

The week started off with an incident in the cafeteria at a local shopping centre where I habitually drink my morning coffee. My enemies have concentrated since winter 1995/96 on throwing a particularly horrible sexual slander against me. They "put people up" to repeat this slander against me, and this is what happened again here.

On Thursday morning (yesterday), instead of going to the usual cafeteria I went to a nearby convenience store for coffee. The same horrible sexual slander was shouted at me very loudly by a member of staff as I walked into the store. This was the first time I had ever bought morning coffee in that shop. The other staff obviously knew what was going on, one of them said, "they screwed up my life".

The fax gateway I use to send these faxes to the UK has been working hard these last few days to shut down my access by barring the accounts I use to send these faxes.

I have received an anonymous threat from fax number 0171-219-6101 (the machine gave its name as "ETRA-HoC") which said, "Stop sending to this fax no 0171-219-6101 or else" (the consequences of continued transmission were unspecified). I invited the sender to apologise for his threat, but received no response.

This all adds up to quite a severe reaction to my faxes of the last few weeks. I actually find this quite heartening since it shows that my faxes are finding the mark and there may yet be a breakthrough in my efforts to expose the Security Service conpiracy of abuse against me which has now been going on for eight years.

MI5 Persecution: "Why would they be doing this to you, sir?"

This article will concentrate on the difficult question of "Why". The question which forms the title of this piece was asked of me by the police officer I spoke to in Easter 1995, when I went to make my complaint.

There are really two sides to this question. Firstly, why should MI5 be harassing anybody in this fashion? Secondly, if they choose to behave in this way, why should they have selected me in particular, and not somebody

else? Alternatively, why did the persecution start, and why is it continuing?

I do not have definite answers to either side of this question, since my persecutors have usually kept themselves hidden and only acted through other parties. To know "why", one would have to know who the persecutors are, and something of their personalities, since their abuse is almost certainly symptomatic of a personality disorder of the abusers. Certain things however can be deduced about the abusers from the nature of their behaviour, and I will talk about this later in the article.

Why did it start?

It is clear that the persecution must have been initiated by someone who knew me personally, either at school, or at university, or socially, and knew that I was borderline mentally ill, since this is what makes me a target for the persecutors. Unfortunately, the originators have never been identified, and there are several possible candidates. Neither has the link from the originators of the persecution, to the persecutors themselves, ever been made clear. So who are the originators?

University Staff

The identity of the originators may lie in the timing of the persecution. It started in June 1990, while I was finishing a course at Imperial College in London, and a year after I graduated from Cambridge, where I received a degree in computer science. At Cambridge I had achieved some notoriety in the computer lab from various nefarious exploits. Roger Needham attacked me by saying that "there were great hopes for it, but it failed terribly". When I started at Imperial I found that my reputation had preceded me; Cambridge computer lab had spoken to I.C. lecturers about me. I.C. lecturer Frank McCabe summed up commenting about "setting up a straw man so you can tear him down". (Despite being "torn down" by the Cambridge computer labs lecturers, I still achieved a good first degree and a Masters degree at Imperial.)

Other students at university

So, the originators may have been university staff who knew me from my student days. But there are other possibilities. I had other enemies at university, including some fellow students. At my Cambridge college it was common knowledge that my mental health was dubious, and it was known that I talked to myself in my sleep - the floor and walls were quite permeable to noise, so other students heard. I was given the nickname "gibber" because of this habit. Sometime later, I managed to catch myself talking in my sleep when I woke up in the middle of the night.

Here is a quote from a participant in the internet newsgroup where I have been posting for the last three years;

>One thing which has been missing from this discussion is this simple
>prognosis: that maybe he is right and that, despite his admitted
>mental condition, there really is a campaign against him organised by

>now-influential ex-students of his university.

People I knew socially

I had yet other enemies in 1990 (I am a man of many enemies!). In January 1990 I broke up with some people I had been going out with socially. One of them, by the name of Andy Turner, wrote a letter to Alan Freeman, who at the time was a Radio 1 DJ. Freeman read part of the letter out on his Rock Show, about the "one who wore out his welcome with random precision", saying "thats a hell of a letter you wrote there Andy", and "with a schizophrenic youre never alone".

It is my belief that Andy Turner and his friends were trying to make trouble for me, and Turner wrote to Freeman with this in mind. Freeman may have discussed the letter with others, and things may have snowballed from there. This is, of course, pure supposition. The fact is that I do not know who the originators are, and can only guess.

Once it started, why is it continuing?

The answer to this question is obvious. It is unacceptable to the "powers that be" in the UK to have somebody running around who knows he has been targeted by the Security Service and media organizations, and who is in a position to embarrass British institutions. This has become particularly evident in the last week; as I send more faxes to UK politicians and media, so the pressure on me grows, and the volume of abuse increases.

Part of the reason the persecution continues is in the personalities of the abusers, and it is this subject to which I will turn to next, since the key to understanding the persecution lies in understanding those who carry it out, as much as we can.

The Security Service operatives, the persecutors, are they psychopaths?

Let us first examine the definition of the term "psychopath". DSM-IV defines "anti-social personality disorder" as a "pattern of disregard for and violation of the rights of others ... deceitfulness, irritability and aggressiveness ... consistent irresponsibility and lack of remorse". The Harvard Mental Health Letter of Sept 1995 describes these people as using "charm, manipulation, intimidation and violence to control others and satisfy their own needs. Lacking in conscience and in feelings for others, they cold-bloodedly take what they want and do as they please", having "no guilt or regret".

I must say, reading this description of the condition, that it fits the persecutors perfectly. The persecutors have never shown the slightest remorse or guilt. Even when I was severely ill, they continued to abuse me. They have repeatedly blamed their actions on me, which is another trait common amongst psychopaths. They have no respect for my legal or personal rights, and they use intimidation and verbal violence.

If the MI5 operatives are psychopaths then it would explain both why the persecution started, and the degree of verbal violence. Psychopaths by

definition damage other people; here, the MI5 operatives find an outlet for their personality disorder, through "cripple-kicking".

Xenophobia on the basis of mental illness, and race

My enemies have made clear many times that one of the reasons they are persecuting me is because of my admitted mental illness. However, it is my belief that they are also persecuting me because I am not of ethnic English origin, and the fact that there have been several incidents of an overtly racist nature reinforces this view.

In one case, two youths on a tube train in London made openly racist references to me as a "soft toy, not up to British Standards". Another person near my home made remarks about "Polish people". In yet another incident in Croydon, a youth made comments about "foreigners".

But the main thrust of their xenophobia is because of my mental illness. I should make clear that I do not look ill; if you met me, you would not know that I had the illness. I take a relatively low dose of medication, and feel quite well. But the persecutors have repeatedly harped on about my supposed serious mental illness; they have called me a "nutter", a "schizophrenic", etc. They have also persuaded other people to use these terms of abuse. They are able to get away with this because abusing the mentally ill is still something which is mostly acceptable in Britain; the media do it, "nutter" is not taboo in the way that "nigger" is.

Conclusion

There are several groups of people who might have wished to cause me trouble, and I still do not know who originated the persecution. Nor do I know how the originators came to be in contact with the (presumed) Security Service operatives who have been carrying out the campaign. To know conclusively why it started, we would have to know who started it, and this information is not available.

However, we can infer some things about the personalities of the persecutors from their methods, and from the degree of verbal violence they employ. It is clear that a main reason for the continuing harassment is the psychopathic disorder of the MI5 agents who carry it out. That they have never been "brought to book" for their misdeeds reinforces their belief that they do no wrong; and, unhappily, until they are brought to book, their persecution campaign looks set to continue.

MI5 Persecution: .net Magazine Applauds my Website

The March 1998 issue (number 42) of .net Magazine reviews the MI5
Persecution website describing it as an "excellent site". The webpages
describe in detail the nature of my persecution since 1990 by what are
believed to be elements of the UK security service.

(snip image)

You are encouraged to read the web pages which include

o a FAQ section outlining the nature of the persecutors, their methods
of harassment through the media, people at work and among the general public
o an evidence section, which carries audio and video clips of media and
workplace harassment, rated according to how directly I think they refer to me
o factual descriptions of the state security agencies involved
o scanned texts of the complaints I have made to media and state security agencies involved
o posts which have been made to netnews over the last three years on this topic

MI5 Persecution Update: Friday 13 November, 1998

If You Intend To Reply, Please Read This

If you have any questions or observations you would like to share with me, then you are very welcome to reply to my fax number 0171-681-1190. But please.... keep your response to one page if you can! I have had several people faxing my article back to me, including one MP faxing back twenty pages. I do not know if he had anything intelligent to say in his 20-page fax because I applied judicious use of the "Delete" key on my computer. Faxes over a page or two will be deleted without being read.

MI5 Resume Hostilities in Response to these Faxes

When I wrote last weeks "MI5 Persecution Update" I remarked how quiet my life had become. No longer! MI5 have restarted hostilities with a vengeance the past week, in response I believe to the faxes I have been sending to members of the House of Commons.

On Saturday 7 November I went to Clapham Picture House cinema to see the film "Antz" (a very enjoyable film). At the cinema, I was verbally assaulted by a group of teenagers with the words "still crazy", repeated about ten times. There was a film with that name showing at the cinema, but it was clear their abuse was directed at me. I do not look ill, so why would they pick on me? answer, the incident was set-up by the persecutors. One of the teenagers also said to another, "I don't know what we're laughing at".

The following day, Sunday 8/11/98, I was on my way to play squash when I was verbally assaulted by a youth who said "it was so funny", without the slightest trace of humour. What he meant by this phrase was that was funny, and they were trying to humiliate me. I have heard this phrase "it was so funny" used at me before many, many times over the last eight and half years.

Please Encourage Keith Hill MP to Help Me

I live in a bugged house, bugged both for audio and video. My movements are monitored by MI5. The Security Service have followed me to Canada, to Poland and the Continent, to the States. I cannot work anywhere, not in England, not in Canada, because MI5 will destroy whatever employment I am able to obtain. I have asked Keith Hill MP to help me, and he has refused.

The situation is intolerable. It is Mr Hills job to help me out of this mess. So, please, as I said in the last fax a week ago: Do not waste your

time returning multiple copies of my faxes to my fax mailbox, as some of you have done. Instead;

Please encourage Keith Hill M.P. to help me.

I am sorry to be using this device to encourage Mr Hill to help, but I think eight and half years are quite enough and it is time something was done to bring this matter to a close.

MI5 Persecution : BBC Newscasters Spying on my Home

This week's topic is the quite extraordinary claim that BBC newscasters such as Martyn Lewis and Michael Buerk have spied on my living room while they read the news. I currently have an advert running for the next six months in Private Eye's "Eye Say" column (at a cost of over ₰200) which says,"MI5 Persecution - BBC Newscasters Spying on my Home"; the story of my campaign in the Eye is on my Website at; http://www.pair.com/spook/evidence/plaint/priveye.htm

BBCs staff magazine Ariel also ran my advert "BBC Newsreaders Spying on my home" for one issue in the Personal category on 8/July/1997 before it was spotted and axed by editor Robin Reynolds; please see webpage; http://www.pair.com/spook/evidence/plaint/ariel.htm

Beginnings

The very first incident in the "MI5/BBC Persecution" occurred in June of 1990, when a newsreader reacted to what she saw in my living room at home as she read the news. My mother had brought an apple for me into the room, whereupon the newsreader smirked and giggled, apparently finding this funny. I couldn't believe what I was seeing. I carried on watching news and other television programmes to see if presenters would show signs of "interactive watching"; to my surprise, this happened again and again. Unfortunately, I did not have my wits sufficiently about me to videotape these programmes, and it is now almost impossible to obtain recordings dating back to 1990.

Most of the "TV watching" has occurred on the news, and most of it in summer 1990, although some as late as autumn 1993. My website has a few extracts of what might be politicians "getting at" me, in particular John Major and interviewer Dimbleby sharing a joke about the "Knutsford Guardian" which is almost certainly about me.

I sold my portable TV in autumn 1990 and stopped watching television regularly. I realise now that this may have been a mistake. What I should have done was to watch TV and listen to the radio, but tape-record everything and make a note of what each excerpt meant to me. I would then be in a much stronger position as regards to evidence that I am now. That is what I am trying to do now, but unsurprisingly the TV/radio presenters have stopped getting at me, now they know they are being recorded.

Examples of Media Harassment

Here are a few examples which I can still remember of media harassment;

In early 1992 I was watching the BBC news with Martyn Lewis on a small black-and-white portable television at my then home in Oxford. I threw a term of abuse at Lewis; he flinched, then gave a grin and made a comment from which I understood that he had been on my side, but might have changed his mind as a result of what Id just said to him.

Victor Lewis Smith in his TV (BBC2?) program at the end of 1993, had a taxi-driver saying, "theyre all out to get me", to which VLS replied, "but you're quite intelligent aren't you?" (what a nice chap VLS is, compliments no less!)

Paul Daniels the TV magician, sometime in 1990-92 (sorry I can't be more precise but it was so long ago), made a "crying face" and put his face in his hands, which was his way of expressing that I was frequently crying in 1990-92, and that he and other media people found my crying funny.

Kenny Everett (deceased) on some talk show, compared me to a "huge ape" who "scratches himself"; he made some other remarks about what the "ape" got up to which unfortunately I cant remember. (I remember that Everetts comments were quite sympathetic and human, but were obviously about me.)

Stephen Fry on another talkshow (Wogan I think) talking about "masturbatory fantasies", he then referred to me with the words "you prat"; I wonder if the studio audience knew what he was talking about and to whom his comments were directed?

Griff Rhys Jones on Clive James' TV show, made a "lunatic face" (wide fixed grin) to which I said to the TV that he had a "face like a horse's arse", to which Clive James said to GRJ "did you hear that?"

Crimestoppers summer 1990, remarks by a Midlands police officer on the programme, while Nick Ross was presenter (as far as I can remember). The officer talked about "in car entertainment". Nick Ross said to officer, "why don't you stop doing it?" to which he replied, "we can't while he's like this".

BBC2 Newsnight in autumn 1993 had a piece on football hooliganism. A black interviewee said apparently of the hooligans, but in fact of me; "they're just idiots, carry on with the surveillance".

There was an incident with Jonathan Ross which I remember clearly; he was on both BBC and ITV television at the same time, one (ITV I think) was recorded, the other channel was live. Ross has a speech impediment which causes him to pronounce his "r"s as "w". I sarcastically said something about "Mr Woss" to the recorded channel, then turned over to where he was live, and he repeated "Woss" with heavy emphasis and sarcasm.

On the radio, in spring 1994, Chris Tarrant made a sarcastic remark in his morning show, saying "he says were trying to kill him, we should be done for attempted manslaughter", to which another of the studio staff said, "oh no, dont say that". His comment was in reply to a comparison Id made the previous evening between my persecutors and the Polish secret police who murdered dissidents.

Martyn Lewis Denies & Lies, But Wont in Writing

In February 1997 I wrote to BBC Viewer & Listener Correspondence and asked them to investigate the claim that their newscasters had engaged in "interactive watching". They replied that they had asked Martyn Lewis and Michael Buerk whether they had engaged in such practices, and that they had both made verbal denials to VLC, but were refusing to put their denials in writing.

I can understand that they might think that if they were to make written denials to me, then many other people with my condition might write to them with similar questions. But Ive asked a couple of journalists if theyve been writing about me, theyve made written denials, Ive believed them, and I have not put their denials on my website because, since I believe their denials, it would not be relevant to publish them.

To me it looks as if Lewis and Buerk are happy to lie verbally but not in writing, because written falsehoods would place them unambiguously in the wrong, whereas they can try to talk their way out of verbal lies if they are ever caught, or perhaps even deny the verbal lies completely? If they lie without shame, then why would they have any shame about future lies about lying?

One of the strangest aspects of "TV watching" is that Buerk and Lewis have convinced themselves that their "interactive spying" is reasonable behaviour. Martyn Lewis thinks of himself as a "gentleman". He expressed in 1992 that he was "on my side". If this matter ever comes out into the open, I wonder what these newscasters will have to say for themselves, and what the British public will make of their behaviour?

Media Persecution Evidence on my Website

You may directly access the Evidence section on my website at URL;

The category currently contains four video segments, a number of audio files and three published articles. The first video of ITN's John Suchet is unfortunately a mistake - after looking at it again it is obviously not about me. The two Ken Clarke excerpts may or may not be about me; it is funny that he should keep on harping about "paranoia" and "madness", but I have given these ratings of only 30% certainty, as it is more likely that they are not about me in particular, and Clarke is simply displaying the normal prejudices against the mentally ill found in much of society.

The piece I find most interesting is the Dimbleby/John Major interview from April 1997. I have assigned this a 90% rating. Dimbleby starts by emphasising a report from the "Knutsford Guardian". Major recognizes what's going on and joins in with a falsely apologetic "heaven forfend". The emphasis is on the first syllable pronounced "nuts" in "Knutsford", which is repeated three times. Of course this is hardly anywhere near convincing evidence; the really clear items were all in 1990-92, and they are basically unobtainable now.

If you're reading the website, have a look at the two files from David Hepworth's programme on GLR radio. The first one from 21/Feb/1997 has him

talking about an "embarassment" of prizes and "absolute obscene", in reference I believe to the verbal sexual abuse that was being used against me at the time (and which unfortunately is still current). In the second file dated 9/May/1997 he again talks about "absolute embarrassment" of prizes, followed by laughter. To my mind he knows I am listening to his programme, and deliberately makes these remarks for my benefit, with very little attempt to disguise their purpose.

Bernard Levin - "Fanatic's Fare for the Common Man"

On 21 September 1991 this article by Bernard Levin appeared in The Times. It is reproduced in the Evidence section of the website, or may be accessed directly at URL;

To my mind, Levin's article described the situation at the time and in particular a recent meeting with a friend, during which I for the first time admitted to someone other than my GP that I had been subjected to a conspiracy of harassment over the previous year and a half.

Levin writes about a "madman running loose about London" who "bursts into tears, and swears it is all true. And it is." I am pleased to agree with his assertion that "it is all true" because the truth is what I presented to my friend in September 1991 and it is what is being presented to the readership of these articles now.

Conclusion

The harassment, in particular media persecution, was at its strongest in 1990-92. Today, I am recording everything I watch, read and listen, and the media have pretty much given up. It is now incidents "in public" which make up what there is of MI5s persecution. But much of the material from 1990-92 still exists in archives, although the organisations which have those archives generally wont make the material available to the public, for copyright and other reasons.

MI5 can no longer employ the media to persecute me, partly because journalists now know who is behind the persecution, and also because I would publish any instances. My mistake during 1990-92 was to not record instances as they happened; Ive learned from that mistake, and know better now.

MI5 Persecution Update: Friday 19 March, 1999

If You Intend To Reply, Please Read This

Please.... keep your response to one page if you can! I have had several people faxing my article back to me, including one MP faxing back twenty pages. Faxes over a page or two will be deleted without being read.

Theyve started again. Why? I have no idea.

Unhappily, the persecutors, whoever they might be, have started their activities again over the last two weeks. Usually they try to blame their activities on their victim, but this time they have stopped even pretending that the persecution is my fault. Their verbal abuse appears as gratuitous as it is vicious.

Last Sunday 14 March, I went for a meal in Londons Chinatown with some friends. As we were walking down Gerrard St, a man shouted loudly, twice, the obscenity which has been directed at me for some three years now. This followed previous incidents where the same words had been used. It is very upsetting to be verbally abused in this way and to know that the cowardly abusers are guaranteed to "get away with it" because if you report it then it will be assumed to be part of your illness.

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Persecution : How to Identify the Persecutors

Usually delusional thinking does not allow the perpetrators to be identified, or the alleged persecution to be proved. My so-called "delusions" are different, because I have several times over a period of some nine years seen the same people, in widely varying places. Most importantly, their names have been recorded, on aircraft passenger lists and hospital register; and if only the police would do their job conscientiously then the persecutors could be identified and this unhappy story brought to a final conclusion.

BA93 Heathrow->Toronto, 10 June 1993

In 1993 I flew to Toronto for a holiday. On disembarking from the aircraft, a group of four men who travelled together looked in my direction, and one of them said, laughing, "If he tries to run away well find him".

I was absolutely stunned when I heard this. I wasnt surprised that they had followed me to Canada, but it shocked me that they had been on the same flight, and that one of them had foolishly given their group away. Unfortunately I was so stunned that I made no attempt to stop them as they got off the flight and proceeded into the terminal. I did not see these people again during my visit to Toronto. I do not know whether they followed me, or whether they were only part of a larger group, some of whom may have already been on the ground and awaiting my arrival.

Over the next few years I made a number of attempts, all unsuccessful, to obtain the passenger list for this flight. British Airways keeps passenger flight coupons for each flight; so if only the police would do the job that is being asked if them, then these four persecutors could be identified, and thus their employing organisation, which is very likely to be the Security Service, determined.

These four men were, apart from the joker who looked the odd man out in the pack, very serious individuals. They appeared to be in their forties or fifties, and my impression on seeing them was that they might have been former soldiers. Their campaign against me concentrates on how "funny" their abuse is; but in this they are plainly lying, because they realise how awful will be the damage to the establishment of which they form part, if the truth about the persecution ever sees the light of day.

The riddle of "Alan Holdsworth"

During Oct/Nov 1996 I saw a doctor several times about an infection, and on 2 Nov 1996 I went to Emergency at the Ottawa Civic Hospital and saw Dr Worthington, who was then Chief of Emergency Medicine. I had to wait several hours before being seen, and several people jumped ahead of me in the queue. One of these was a grey-haired man in his forties or fifties. This may have been one of the men on the BA flight in 1993; I cannot be sure. When Dr Worthington asked his name, he loudly said, "Tad", which is the common abbreviation of my name. Dr Worthington looked puzzled, glanced at the sheet in front of him, and said, "but your name is Alan Holdsworth isnt it?". (I am pretty sure his Christian name was Alan; I cannot be sure of the surname). The man looked put out, and said quietly, "yes".

Unfortunately, I did not follow up this incident immediately. Some time later, I wrote to Dr Worthington to ask the name of this patient, but he refused to give the name out.

I saw this person again two and a half years later, at Ottawa Airport, just as I was about to leave for England. In the warm weather, he was wearing a coat and woolly cap, and pacing up and down in a menacing and aggressive manner. Presumably he thought he was pretending to be a "nutter" and in this way was getting at me; my impression is that he doesnt need to pretend, Holdsworth or whatever his name is is clearly a psychopath and in a healthy society such a person would be locked up, instead of being paid public money to exercise his psychopathic instincts. But todays Britain, a country where the MI5 secret police are given free rein and nobody dares raise a voice in protest, is not a

healthy society.

"He doesnt know who we are"

For some reason, whenever I take a British Airways flight, I get hassled by the "persecutors who wont admit theyre MI5". Since this business started, I have travelled BA three times; once in June 1993 BA93 (see above), once to/from Europe during Dec 95/Jan 96, and once in June 1998 with my mother to visit her family. The last journey, I was abused by two "plants" who kept repeating, loudly, "paranoid" (I have this recorded on minidisc). Presumably British Airways gives MI5 the seating plans for their flights, which allows MI5 to position their agents of abuse three rows behind me, so I cant face them, and they are throwing abuse at the back of my head. I have travelled BA as infrequently as possible; to Canada, I usually travel Air Canada.

Anyway, lets return to the second of the three BA trips, and in particular to the flight on 2 January 1996 from Berlin Tegel, to Heathrow, and onwards to Montreal Mirabel. Id waited all night at Tegel for the flight, and was very tired on reaching Heathrow. On the plane to Montreal, two youths sat about three/four rows behind me and to the right, in the window seats. One of them, a rather fat "asshole" to use the Americanism (it fits), kept on going on about "this bloke", saying among many other things, "he doesnt know who we are".

Now that form of words is particularly interesting, because from May 1995, some 8 months previously, I had been vigorously denouncing the "MI5 Persecution" on Usenet. So if Id guessed wrong, then you might expect the harassers to crow about it; which they have not done. If I had guessed right, and the persecutors have been silent before and since this flight, then they could either admit they were MI5, which would be a very serious thing for them to own up to, or they could brazenly lie, in which case I would report their lie, and since many people must surely know who they are, they would lose all credibility. So they have remained silent; apart from this one phrase on the BA flight, where one of their agents said, "he doesnt know who we are". Note carefully that this phrase is NOT a denial, it only appears to be a denial; since it does not say that my guess was wrong; it only states the objective fact that I do not know the identity of the persecutors, without giving any information as to the validity of my guess. Which leads me to posit that my guess was correct.

Please.... keep your response to one page if you can!. Faxes over a page or two will be deleted without being read.

The Usual Words

The persecutors-who-wont-admit-theyre-MI5 have been active again this week. On Saturday 20/3/99 I visited Ravenscourt Park in west London, and was verbally assaulted with the usual words, "something wrong with him". This audio file is on the web at URL;

This afternoon (Friday 26/March) I was again verbally assaulted while travelling by bus. The same sexual obscenity was thrown at me, and the incident was recorded on my minidisc-walkman. Because of the deeply offensive nature of the slander, I will not be posting this on the website.

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Persecution : Browse Website

The March 1998 issue (number 42) of .net Magazine reviews the website describing it as an "excellent site". Since August 11, 1996 over 50,000 people have browsed this website.

You are encouraged to read the web pages which include

a FAQ (frequently asked questions) section outlining the nature of the persecutors, their methods of harassment through the media, people at work and among the general public

an evidence section, which carries audio and video clips of media and workplace harassment, rated according to how directly I think they refer to me

objective descriptions of the state security agencies involved

scanned texts of the complaints I have made to media and state security agencies involved

posts which have been made to netnews over the last four years on this topic

This article outlines what is to be found on the webpages, which you are encouraged to browse for the complete story.

Frequently Asked Questions

Your excursion through the website starts with the "FAQ - Frequently Asked Questions" portion. MI5s campaign of harassment against me has been going on for almost 9 years, and its longevity and breadth is reflected in the FAQ. Many thousands of people in Britain and abroad, including some recipients of this fax, have known for many years of MI5s activities against me. The FAQ describes the mass "Omerta suppressing its publication"; we pretend Britain is part of the "Free World", yet the British Secret Police, which is what MI5 are, carry on for many years a campaign which politicians and the media know about, and rely on the silent complicity of so many thousands of people.

The FAQs introductory article names those who are "in the know"; media figures like Martyn Lewis, Michael Buerk, entertainment figures like Chris Tarrant, politicians and many in the general public, "all united in a conspiracy which breaks the laws which the UK does have regarding harassment, and all completely uncaring for any semblance of decency or elementary respect for individual rights.

Broadcast media play a key role in the harassment. The very first incident in June 1990 was when a television newsreader reacted to what she saw happen in my living room at home; such incidents of "interactive television" are still happening in 1999. The same goes for radio stations such as Capital FM. In spring 1994, Chris Tarrant on his Capital morning show made an aside to someone else in the studio, about a person he didn't identify. He said, "You know this bloke? He says we're trying to kill him. We should be done for attempted manslaughter". Tarrant and Capital have made strenuous efforts to avoid answering this charge.

Perhaps worst of all, MI5 have deliberately set-up many incidents in public places such as tube stations, shops, cinemas, where they have paid people to throw abuse at me. Since MI5 obtains funds to the tune of 160 million a year to fund its criminal activities, it has funds both to pay its operatives and to "buy" media figures and members of the public to take part in its campaign of persecution.

The Security Service are professional liars. They throw slanderous abuse, yet they refuse to admit out loud that they are doing so. When challenged about their activities through the Security Service Tribunal they lie and deny their activities. They induce other workers and managers at places of employment to take part in their campaign of abuse, presumably by buying them in the same way they buy media figures.

Complaints, and Press Coverage (BBC Lies, MI5 Lies)

As you might expect I have challenged both the Security Service, through the Security Service Tribunal, and offending broadcasters, to own up to what they have been doing. And as you might also expect, all of these people have lied through their teeth. Still worse, they have refused to commit unambiguous lies on paper; they have couched their lies in bureaucratic language, and allowed others to make false assurances and tell lies on their behalf. So when their lies are exposed, they will then tell further Clintonesque lies about how they werent really telling lies in the first place!

On 6/Feb/1997 the BBC told me they would "never engage in any form of surveillance activity such as you describe". The BBC told me Buerk and Lewis had refused to put their lies in writing, but had stated verbal falsehoods denying my accusations of "interactive watching" during news broadcasts. Clearly Buerk and Lewis fear being caught and exposed, so they hide behind their Viewer Correspondence department.

In March 1997 I issued a summons against the BBC to try to "smoke them out". This summons was struck out as "disclosing no reasonable cause of action", because I had acted as a Litigant-in-Person and most LiP summons are treated thus. My case was arguable in law, so the striking out was unjust.

In June 1997 the Security Service Tribunal wrote to me regarding the complaint I had brought against MI5 in February. They say, "The Security Service Tribunal have now investigated your complaint and have asked me to inform you that no determination in your favour has been made on your complaint." I think you can guess the contempt which I feel for the Security Service Tribunal, who have never made a determination against MI5, and act as merely a whitewashing body for the Security Service. Unsurprisingly in May 1997 the Interception of Communications Tribunal gave the same result.

The last few items of "Press Coverage" give details of mentions of the MI5 Persecution in various magazines and newspapers such as BBCs Ariel, the Observer and .net magazine.

Evidence

Some audio and video clips of evidence have been recorded. My weakness in this area is because most of the really unambiguous evidence would have been obtainable in 1990-92, but I wasnt taping anything at the time, and its very difficult to now obtain recordings from that period.

The audio clip "Life is so Hard" relates to harassment at my workplace in Canada. In the latter half of 1996, I was sitting near to co-worker Mark Lee, who kept coming out with words and phrases which showed MI5 were supplying him with data from my home life. For example, I would say something on the telephone at home, and the following day he would repeat verbatim what I had said. When Mark Lee saw I was recording what he was saying, he started to make his remarks more ambiguous, or make the obvious ones out of earshot of the recorder.

However, during the evening of 12 November 1996, at home in my apartment (flat to you UK-ers), I said "life is so hard, and then you die". A nihilistic, negative thing to say, but quite distinctive. The following day, 13 November, Mark said loudly, "life is so hard eh, and then you die" followed by loud laughter. I captured this on my tape-walkman and the computer-audio file is posted on the website.

There are a number of other audio files in the websites "Evidence" area demonstrating the abuse to which MI5 subject me to through their paid agents.

Also in this section is a very interesting article by journalist Bernard Levin, which followed a meeting I had with a friend in 1991, and to my mind describes in some details Levins "artists impression" of the meeting. He talks about a "madman" who "bursts into tears, and swears it is all true. And it is."

Internet Newsgroup (Usenet) archive

From May 1995 until the present day, this matter has been discussed exhaustively on internet newsgroups. The most interesting articles from the first two years of posts are documented here. This area is worth reading since most of the questions which the reader would ask, have been asked at some time or another by someone on usenet. Perhaps the very first article posted sums it all up so succinctly;

Date: Thu May 4 18:27:24 1995
Newsgroups: alt.conspiracy
Subject: BBC's Hidden Shame

Remember the two-way televisions in George Orwell's 1984? The ones which watched you back? Which you could never get rid of, only the sound could be turned down?
Well the country which brought Orwell into the world has made his nightmare follow into the world after him. Since 1990 the British have been waging war against one of their own citizens using surveillance to invade privacy and a campaign of abuse in the transmitted media in their efforts to humiliate their victim.
And the most remarkable thing about it is that what they do is not even illegal - the UK has no laws to protect the privacy of its citizens, nor does it proscribe harassment or abuse except in the case of racial abuse.
A lot of people in England know this to be going on, yet so far they have maintained perfect "omerta"; not a sound, not a squeak has escaped into the English press, and for all the covert harassment absolutely nothing has come out into the public domain.
Have the British gone mad? I think we should be told.

So how much deeper will the persecutors-who-wont-admit-theyre-MI5 sink in their campaign of lies and intimidation? Each time I thought they could sink no lower, they have managed to surprise me. You thought it could never happen here? When the MI5 British Secret Police make their smears against me, it is the corruption of the Establishment, which they are part of, that is demonstrated.

MI5 Persecution Update: Friday 16 April, 1999

If You Intend To Reply, Please Read This
Please.... keep your response to one page!. Faxes over a page or two will be deleted without being read.

BBC newscaster Nicholas Witchell cant stop himself laughing

During 1990-91 there were very many instances of "interactive television" where newscasters and other TV presenters saw on a screen before them what was happening in my home, and reacted, frequently by laughing at me. During this period I unfortunately did not record these programmes. For the last year or two, I have been recording everything I watch, and there has been a drastic decrease in such incidents.

However, on occasion, television presenters do still engage in "interactive watching" and react to what they see. This has been evident with Jon Snow of Channel Four News recently - a particularly interesting case, since it has been established that he cannot be corrupted by money (it is well-documented that MI5 offered him a tax-free salary and he turned them down). I wonder what device MI5 are using to encourage him to do the "interactive watching"?

On Saturday 10 April 1999 at 7pm, Nicholas Witchell on BBC2 News reacted when he saw that I was watching the programme, and I have his reactions stored safely on videotape. I have watched this tape several times and I am entirely confident that my evaluation of his reactions is correct. For several minutes his upper lip quivered in mirth as he attempted to keep a straight face. Then finally his self-control evaporated through the excuse of a weak joke and his face collapsed into a grin.

The strange thing is that I dont know why he was laughing at me, what I had done recently to "deserve" to be laughed at. The MI5 persecutors usually manage to invent some justification as to why people should laugh at and/or abuse me ("hes an X", "it was so funny" etc), so Mr Witchell could have been laughing for any number of reasons. Perhaps he found the views I have been expressing in these articles amusing? I suppose if youre paid enough money and ordered to laugh then even the most innocuous thing becomes funny.

Jon Snow of Channel Four News cant stop himself smirking, either.

On 12 February 1999 I was watching Channel Four News presented by Jon Snow. As usual, I was recording the programme, so that if anything out of

the ordinary happened, Id be able to go back and watch it again.

Now, Jon Snow, by his own claim, is uncorruptible. He says he turned down an offer of a substantial tax-free salary from MI5 - they wanted to make him their mouthpiece, and he told them where to get off.

So you will be most surprised to learn that Jon Snow "interactively watched" me that evening, and on many other evenings. Approximately fifteen minutes into the programme, he announced that the US President would be making a live appearance at about 7.30pm; I looked at the clock on the mantelpiece; and Snow saw me looking at the clock, and visibly tried to suppress a smirk.

Uncorruptible, are you, Mister Snow? If not money, then why are you watching me, Mister Snow? Are they forcing you to watch me? Cant you turn the monitor off, Mister Snow?

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

Comparing the MI5 Persecution with German "Final Solution"

It might seem offensive to compare the mass murder of millions of civilians in wartime with the peacetime persecution of merely one person. Yet the comparison has been coursing through my mind for several years now, because the brutality of German intent to "sub-humans" is very much comparable to the brutality of British intent to someone they vituperate and term "not up to British standards". The methods may differ, but the persecutors mindset is the same.

The Germans first targeted the mentally disabled, too

During WW2 millions of ethnic Russians, Poles, Jews, mentally ill, gypsies and other minorities were rounded up and murdered in purpose-built camps by the German regime, in the name of "racial superiority". Fifty years on, the British Secret Police, MI5, instituted a campaign of mass hysteria; but in their cowardice, limited their activities to one single victim.

It is instructive to note that the early German "cleansing" effort was directed primarily not at Jews, but at the mentally ill. The Nazis set up the T4 project in the thirties to "cleanse" away 70,000 mentally disabled people, including schizophrenics and epileptics. After WW2 the Jews with their media influence used the reaction from the holocaust to roll back anti-semitism in the Western countries; however, the mentally ill are today still a persecuted group in the modern Western world as they were under the Nazis (the current Jewish home secretary in the UK intends to bring in laws for incarceration without any criminal charge for some mentally ill people - he protects his own minority, but does nothing for the other minorities in todays society), and this continuing bias forms a central cause for the current acts of persecution in the UK.

Widespread knowledge of what is happening to the "un-British" minority

In both the German persecution of the thirties and early forties, and the current British persecution, many, many people are well aware of whats happening. There is widespread complicity through inaction of populace; and in a substantial proportion of the mainstread population, the persecution had/has widespread enthusiastic support; yet in both the German case in the 1940s and the British today, the existence of persecution is a mass secret which must be never admitted out loud. In the recent Lawrence case this "secret bigotry" has been termed "institutionalised racism", and that is a very good word for what the British are doing today The persecutory attitudes and omerta regarding them are so deeply ingrained in the national psyche that they define the national mood

During WW2 many Germans knew minorities were disappearing, and through inaction quietly condoned their government's mass murder of "un-German" minorities and inferior "foreigners"; and in the 1990s, similarly, many English people know what the MI5 British Secret Police have been doing, and not only condone it, but actively take part, because of xenophobia against the "un-British" unit minority that is the target of "British" actions. This attitude by the British persecutors has been made explicit through the words "he's not up to British standards"; the British seem to have found their very own "untermenschen" to victimise.

Why these obsessive "holy wars" happen

This type of aggression occurs when the majority is threatened or humiliated in some way, economically, militarily or culturally. In pre-WW2 Germany the threat was primarily economic and military, following Germany's humiliating defeat in the first world war and the reparations it was forced to pay. In modern Britain, one might guess that the majority English who are behind the persecution feel pressured by the swiftly diminishing status of Britain in the world, and the rapidly increasing coloured colonisation of their country, which in time will see the ethnic English a minority in their own land, and their more antisocial elements, unable to reply to the obvious threat, instead project their aggression onto another, weaker, unit minority

In both cases there is a whiff of "holy war" or irrational obsession with the persecution. Certainly the German behaviour fifty years ago bordered on the not-quite-sane, and the current British behaviour towards their chosen victim is strongly tinged with a leave-taking of reason. And the choices open to the victims are the same, since MI5 will never allow me to escape them, "if he tries to run away we'll find him", just like the commandant of Auschwitz telling the new arrivals, "the only escape is through the chimney".

The Victim Will Destroy Us if We Dont Destroy Him First

The persecutors propaganda is the same. Fifty years ago the Germans said, "if we don't do it to the Jews then the Jews will do it to us"; and MI5's propaganda in the early nineties concentrated on their victim as a "monster" aesome "untermenschen" minority.

"We are decent fellows" say the Brutal Persecutors

During the course of researching this article I read part of the very interesting book, "Hitler - A Study in Tyranny", by Alan Bullock. This volume contains a quote from Himmler on the "Final Solution";

"Most of you know what it means when a hundred corpses are lying side by side, or five hundred or one thousand. To have stuck it out, and at the same time .... to have remained decent fellows, that is what has made us hard. This is a page of glory in our history which has never been written and is never to be written."

In the MI5 persecution, too, there is a thread of deliberate brutality to the sick and vulnerable, while the persecutors maintain that "we are decent fellows". There is almost a conscious schizophrenia in the self-attitudes of the Security Service operatives and those in the public who they employ against me, which reflects the contradiction evident in the German attitude above. On the one hand, they stoop to the lowest and most base behaviour; yet at the same time, the MI5 operatives tell themselves that since they are civilised British people, then surely they must by definition be "decent fellows". Any indecency is made the fault of the victim; "hes making us persecute him, so we need feel no guilt".

Yet the conduct is atypical of the way these peoples see their normal modes of behaviour. Befslaughter was not typical of normal German behaviour up to that point. Similarly, the current MI5 abuse goes against the grain of British self-image as being "reserved" and "decent", since they are using terms of abuse which are common among blacks and other supposedly less-developed races, but not among the English.

Conclusion

The ultimate aim of both persecutions is the humiliation and physical extinction of the persecuted group. The Germans did this in a very direct way; the British Secret Police MI5 are acting indirectly and relying on self-extinction of their target, because in peacetime and in the current somewhat false climate of "political correctness" more direct methods are impossible. If MI5 undertook more direct action the mass "omerta" would be broken.

I have written this article with sincerity to show how a historically recent persecution in another country parallels what is being done in this country today. In both cases, the evil-doers are of their countries establishments, and rely on widespread tacit support to maintain the persecution and omerta around it. While the holocaust was undoubtedly the greater evil, it is important to be aware of the fact that had the Germans not been defeated fifty years ago, their plans would have gone through to total completion. In Britain today no force threatens the "permanent government" of which the Security Service forms a part; and it looks very unlikely that the wrongs perpetrated by the MI5 secret police will ever be revealed to public view, and the British secret state brought to justice for its evil actions.

MI5 Persecution Update: Friday 30 April, 1999

If You Intend To Reply, Please Read This
Please.... keep your response to one page!. Faxes over a page or two will be deleted without being read.

Somewhere between 0 and 100%

The last few days there have been no clear recordable instances of abuse. However, while travelling on the Underground, while walking around near my home and going to friends homes, I am constantly troubled by thoughts that those people over there might be about to get at me; that the couple sitting in the opposite seats laughing are in fact laughing at me; et cetera, et cetera.

A comment by a scientist to the BSE inquiry sticks in my mind. He described the possible scale of the epidemic as "between 0% and 100%". It might not be happening, it might not happen at all, to any discernable degree.... or it might be total. Without clear recording, which seems to have become impossible the last couple of weeks, there is no way of knowing whether the harassment really is continuing, whether we have entered a temporary hiatus, or whether perhaps it has perhaps stopped for now.

But for the time being I think there arent any reasons to dicontinue these faxes. I only re-started them six weeks ago in response to a resumption of MI5 harassment; and I think I will need to be more convinced of absence of persecution before I discontinue my complaints.

The Newscasters are still watching

In the last few weeks there have been at least a couple of fairly overt instances of "interactive watching" by newscasters. I reported this in a previous "MI5 Persecution Update".

These instances are really very rare compared to 1990-91, when there were many dozens of such occurrences. Undoubtedly the reduction is due to my practice of videotaping everything I see. Recently I had the opportunity of showing this years "happenings" (Jon Snow/Nicholas Witchell) to my psychiatrist, and he agreed that in both cases the newscasters were expressing merriment without visible cause, and that objectively it might be possible for my claims to be true - although of course other people reported similar thoughts to him, and this thinking is usually a symptom of illness.

Read About the MI5 Persecution on the World Wide Web

The March 1998 issue (number 42) of .net Magazine reviews the website describing it as an "excellent site". Since August 11, 1996 over 50,000 people have browsed this website.

You are encouraged to read the web pages which include

a FAQ (frequently asked questions) section outlining the nature of the persecutors, their methods of harassment through the media, people at work and among the general public

an evidence section, which carries audio and video clips of media and workplace harassment, rated according to how directly I think they refer to me

objective descriptions of the state security agencies involved

scanned texts of the complaints I have made to media and state security agencies involved

posts which have been made to netnews over the last four years on this topic

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Waste Taxpayer Millions on Pointless Hate-Campaign

Recently I was talking to an independent observer about the nature and purpose of the perceived campaign of persecution against me. The person I spoke to, a highly intelligent man, said he was struck by the utter pointlessness of the perceived campaign against me. He also said that, if my theories were in fact true, many people would have to be involved, in the surveillance itself, and in the technical side of the delivery of information from my home to TV studios for example, if the "interactive watching" were happening as described. He voiced these thoughts without any prompting from me; but both I and other observers had arrived at pretty much the same conclusions, some years ago.

I saw a team of four men at Toronto Airport in 1993

To carry out the surveillance alone, full-time, would employ four or five men, or their equivalent in terms of man-hours. Each man would "work" an eight-hour shift, so you would need at least three men doing the surveillance, plus a connecting link / manager. An indicator that this estimate is correct arrived in 1993, when I was accosted by one of a group of four men at Toronto Airport; he said, laughing, "if he tries to run away well find him". Plainly these were the men who had been involved in the intrusive surveillance of me for the preceding three years.

On other occasions, I have seen the same man on two or three occasions. On one such occasion, at Ottawas Civic Hospital in November 1996; he gave his name to the doctor as "Alan Holdsworth" or some such; my hearing is not very good sometimes and I am not sure of the surname, although I am sure "Alan" was his first name. I saw exactly the same man again in Ottawa, at the airport, in July 1998. Obviously, other people must be "working" with

this person; he would not be the sole agent employed in this case.

Usenet readers views on the Cost to MI5 of Running the Campaign

Here's what a couple of other people on internet newsgroups / Usenet (uk.misc) had to say regarding the cost of running such an operation...

PO: >Have some sense, grow up and smell reality. What you are talking about
PO: >would take loads of planning, tens of thousands of pounds and lots of
PO: >people involved in the planning, execution and maintenance of it. You
PO: >must have a very high opinion of yourself to think you are worth it.

and......

PM: >But why? And why you? Do you realize how much it would cost to keep
PM: >one person under continuous surveillance for five years? Think about
PM: >all the man/hours. Say they _just_ allocated a two man team and a
PM: >supervisor. OK., Supervisor's salary, say, #30,000 a year. Two men,
PM: >#20,000 a year each. But they'd need to work in shifts -- so it would
PM: >be six men at #20,000 (which with on-costs would work out at more
like
PM: >#30,000 to the employer.)
PM: >
PM: >So, we're talking #30,000 x 6. #180,000. plus say, #40,000 for the
PM: >supervisor. #220,000. Then you've got the hardware involved. And
PM: >any transcription that needs doing. You don't think the 'Big Boss'
PM: >would listen to hours and hours of tapes, do you.
PM: >
PM: >So, all in all, you couldn't actually do the job for much less than
PM: >a quarter million a year. Over five years. What are you doing that makes
PM: >it worth the while of the state to spend over one and a quarter million
PM: >on you?

Those are pretty much the sort of calculations that went through my head once I stopped to consider what it must be costing them to run this operation. At the very least, a quarter million a year - and probably much more, given the intrusive and human-resource-intensive methods employed. Times nine years. Equals well over two million pounds - and probably much, much more.

Its wasteful for someone with my skills to be unemployed

The wastefulness of the MI5 campaign against me is not just that of futile expenditure on their side. It is also extremely wasteful for someone with my talents to be unemployed and on a disability pension. I am highly qualified in numerate disciplines, yet am unable to work, specifically because of the MI5 hate-campaign against me. It is a terrible waste of resources for a supposedly efficient economy like that of the UK to be squandering the talents of a skilled and capable worker.

I made every effort to remain in employment for as long as I could, but ultimately I was defeated by MI5s employment of massive resources specifically targeted on my workplaces with the sole aim of seeing me

evicted from those workplaces. You might expect this sort of behaviour from the Stasi or some other secret police force in a communist country where labour is cheap, and the governments aim on seeing its citizens confined; but for a supposedly free and efficient economy like Britains, the wastefulness resulting both directly and indirectly from the Security Services activities is simply criminal, and should never be allowed.

The international dimension means the costs are multiplied many times overoer had any sense, then they have surely taken leave of them over the last nine years.

Four years of persecution in Canada

The persecution re-started within less than five minutes of my arrival in Canada, as documented above, and in the "frequently asked questions" article on the website. The words, "if he tries to run away well find him" spoken by one of the harassers at Toronto Airport are now imprinted on my mind.

A year later I emigrated to Canada, intending to find a job and settle there, hoping that MI5s interest in me might dim with time. I did manage to find work there, but my hopes of avoiding Security Service interest were ground into dust. As detailed above, I saw the same man in November 1996 and July 1998, both times in Ottawa. Apart from these encounters, there were numerous incidents between 1994 and 1998 of harassment, of an identical nature and in most cases using identical words to what had occurred in the UK. It became quite clear to me that the permanent surveillance and harassment operation which MI5 had subjected me to in England was being continued.

For a team of four or five men to be employed overseas must cost a lot more than if they operate in their home country. And for MI5 to continue the operation for a period of over four years, continuously, must cost many hundreds of thousands of pounds. This confirms my belief that the state is funding the campaign against mehat the Security Service receives current annual funding of #160M. Divided by 1850 staff, works out at #86,000. But the unit annual cost of each "watcher" must be much higher than this, especially given the frequently mobile and overseas nature of their actions of the last few years. A very conservative figure might be a little over #100,000 pa for each of a team of five people, or half a million pounds per year. For nine years, so far. So the most conservative estimate of the surveillance element alone is perhaps four or five million pounds since 1990.

This guesstimate is of course theoretical - I am not privy to inside details of how MI5 split their funding. But to take some other examples, the cost of a US counter-surveillance specialist per day is USD 5,000. Even if the agents permanently assigned to me are not of this calibre - even if they employ specialists when difficult work planting bugs etc is encountered - their salary and support costs must still be very high. The individual agents are doing well for themselves as they are well-paid to exercise psychopathic instincts which in any sane society

would see them in prison; but the taxpayers who must fund this terribly wasteful exercise are being "done" out of hundreds of thousands of pounds each year.

It must be emphasised that the above estimates are highly conservative. Besides the surveillance operation, it must carry a high cost in man-hours to propagate covert slanders through the population; to setup and maintain the "interactive watching" links to TV and radio stations, which these organisations continue desparately to "lie and deny"; and to induce antipathy in co-workers which would not otherwise exist.

Why they are wasting Millions of Pounds on a "Nobody from South London"

As remarked in the prologue to this article, it is really most extraordinary that the Security Service spends a chunk of its budget, every year for nine years so far, on a meaningless campaign against a "nobody from South London". That they are spending such a large amount of money has been confirmed to me on several occasions, usually by oblique references to "its costing this country millions". The supposed "logic" behind the persecution is that MI5 wish to avoid their harassment of me, and the involvement of the UK media, to be made public; yet as the reader will appreciate that is a circular argument, "theyre doing it because they want to keep it secret and avoid humiliation for themselves and their country" begs the question, "why did they start doing it in the first place?", to which in truth I myself do not know the answer.

Plainly MI5 with its rich budget can afford half a million pounds a year to waste on a "nobody from South London". Some time ago I was talking to a British surveillance professional on Compuserve who told me "this work costs a lot of money and is usally because the person I am following has done something (usually criminal) to warrant all this money and time being spent." Yet in this particular case it is plainly not the "victims fault" that the harassment is taking place. The hate-campaign against me is completely the creation of the obsessive psychologies of the MI5 agents who have made themselves my persecutors; it is obviously a "personal" campaign for them, and for years they misuse taxpayer funding to feed their insane, unnatural and fixated fantasies.

Four Years of "MI5 Persecution" Posts on Internet Newsgroups

For approximately the first three years of the MI5 persecution, from June 1990 until late 1992, I kept as quiet as possible, in the hope that by not reacting, MI5s interest in me would decrease and they would simply go away of their own accord. This is the sort of behaviour some people employ against bullies; if the bullies arent getting a reaction, then they might simply go away and victimize someone else.

Unfortunately, this tactic didnt work. The quieter I became, the more shrill and hysterical the noise from the Security Service operatives. For about two years I didnt watch TV news at all. Yet this only heightened their obsessed fixation; they continued to follow me wherever I went, they continued to induce harassment at work by managers and fellow workers, and they continued to encourage me to commit suicide. They seemed to regard my refusal to react as a crime which they would have to "put right" by ever more extreme forms of abuse.

Finally, in 1995, I changed tactics radically. Since late 1994 I had had accounts with internet providers in Ontario, Canada. I discovered the cornucopia of internet newsgroups, on every topic from consumer electronics, to politics and legal topics, and I discovered online services such as Compuserve and AOL. In May 1995, I made the first posting to the conspiracy newsgroup, on the subject of "BBCs Hidden Shame".

BBC's Hidden Shame

The internet newsgroup discussion, which has now reached its fourth anniversary, started with an article in alt.conspiracy, which I reproduce here.

Date: Thu May 4 18:27:24 1995
Newsgroups: alt.conspiracy
Subject: BBC's Hidden Shame

Remember the two-way televisions in George Orwell's 1984? The ones which watched you back? Which you could never get rid of, only the sound could be turned down?

Well the country which brought Orwell into the world has made his nightmare follow into the world after him. Since 1990 the British have been waging war against one of their own citizens using surveillance to invade privacy and a campaign of abuse in the transmitted media in their efforts to humiliate their "victim".

And the most remarkable thing about it is that what they do is not even illegal - the UK has no laws to protect the privacy of its citizens, nor does it proscribe harassment or abuse except in the case of racial abuse.

A lot of people in England know this to be going on, yet so far they have maintained perfect "omerta"; not a sound, not a squeak has escaped into the English press, and for all the covert harassment absolutely nothing has come out into the public domain.

Have the British gone mad? I think we should be told

At this point, I did not name MI5 as my persecutors. I was still unsure that they were the ones responsible for the "psychological terrorism". In followup posts however I did name them; and the persecutors have never denied the claim; so I think my guess is valid. (The Security Service Tribunal in 1997 have said "no determination in your favour was made", but it is a well established fact that MI5 lies routinely to the Tribunal which has never found in favour of a plaintiff, so no conclusions can be drawn from this.)

This first post was made to alt.conspiracy, but further posts were made to the UK-local newsgroups, in particular uk.misc but also uk.legal and uk.politics (which is now called uk.politics.misc). Some time ago I tried to take the battle to the Compuserve forums, UKPOLITICS (which is now called UKCURRENT - current affairs), but my articles were censored by the forum operators. Such censorship is impossible on the internet newsgroups.

Police Refuse to Act

I have complained several times to the Metropolitan Police, who have each time refused to help.

From: Green <Green@guidion.demon.co.uk>
Newsgroups: uk.misc,uk.politics,alt.politics.british,soc.culture.british
Subject: Re: MI5 Persecution: Why Aren't the British Police Doing Their Job?
Reply-To: Green@guidion.demon.co.uk
Date: Sun Apr 7 21:13:30 1996

In article <DpIE0r.736.0.bloor@torfree.net>
bu765@torfree.net "Mike Corley" writes:

>Last Easter (1995) I went into the local police station in London and spoke to
>an officer about the harassment against me. But I couldn't provide tangible
>evidence; what people said, in many cases years ago, is beyond proof, and
>without something to support my statements I cannot expect a police officer to
>take the complaint seriously.

This in itself dos not suggest that the police have it in for you. The old bill operates on extremely tight spending limits forced on them by that pillock Michael Howard, and without evidence, they often have higher priorities than chasing something that cannot go to court.

I doubt that the police are actually being leant on, but they probably realise that if they looked into this, they would be leant on hard. The met always stays away from anything that looks like it has Defence, Security or secret service interest already,

because they realise that they are below these government agencies in the general pecking order.

If I walked into my local nick and complained that MI5 were snooping on me, they would show me the door without even looking at my evidence, because that bored desk seargant with only five years to go before he retires doesn't want to start fucking about with somebody who has incurred the wrath of Stella Rimington. He would rather deal with the lost dogs and driving licence producers, eat his cheese and pickle sandwiches and piss off home at the end of his shift than have some high ranking spook having a go at his boss and getting him a bollocking.

In short, you have earned much sympathy but little surprise. Just remember that saying about the enemy of your enemies.

Most recently, I wrote in March 1999 to Charing Cross Police Station CID. They did not acknowledge or reply to my letter. When I phoned them up, the detective Id written to treated me to a sadly not unusual display of police bigotry, with an uneducated rant about "your paranoid rubbish".

It would be nice to think that such uneducated bigotry is something other than wholly typical of police behaviour, but unfortunately that is an illusion that is rapidly dispelled.

Uncorruptible Jon Snow of Channel Four News

From previous articles the reader will know what I think Jon Snow has recently been watching me while he reads Channel Four News in the evening. Recently I digitized a few moments of one such broadcast, where his face twists into a smile, without there being anything in the news broadcast to cause merriment. Here is a usenet post from some time ago on MI5s "bought and paid for" tools in the so-called "free" press.

Peter Harding (harding@ermine.ox.ac.uk) wrote:
: I was at speakers' corner on Sunday. There was one chap who was bellowing
: about something or other, I don't know what, but one thing he said to
: someone caught my ear:

: "BBC, MI5, same thing."

Can't disagree with that sentiment.

Wasn't it documented that MI5 sometimes "bought" journalists and broadcasters?
I remember reading a report by some jouralist who had been offered an extra
tax-free income by MI5 to become their covert mouthpiece, and had refused.
.....
> : >mouthpiece, and had refused.
> :
> : It was Jon Snow of Channel 4.
>
> Was it reported in any of the papers?

It has been reported several times. The most recent was in Private Eye, a few months back. As I recall they also wanted information from him; journalists would be a natural choice for members of the Security Service

and the Secret Intelligence Service for information sources.

> It might be interesting to see what he had to say regarding their
> attempt to recruit him.

He was most concerned that many others would have accepted such an offer. However, we can probably make an educated guess as to some of those who accepted: Nigel West (Rupert Allason, MP) and Chapman Pincher would come near to the top of the list.

Corrupt Security Service agents steal millions from taxpayers

Money is of course a factor in the grand equation which is the MI5 persecution. It costs money for the Security Service to "buy" people in the media etc. But that is only a small part of their expenditure of taxpayers resources. Most of the expenditure is directly on the salaries if the agents involved; and in this post I put forward the theory that MI5 are trying to draw out their involvement for as long as possible, very cynically, to maximise their income and line their own pockets.

At each stage they have tried to pretend that I am something out of the ordinary. Either I was very stupid ("he's an idiot") or very clever ("he's like a genius"). Either I was a threat to Western civilization (Levin once referred to me as the next Hitler) or I was completely defenceless ("a soft toy").

Now, it should be obvious to any person with common-sense that I am not out of the ordinary in any way. I have an IQ which is average for the Web, I am racially white European, and there are plenty of other people with schizophrenia or epilepsy out there who haven't been targeted for MI5 attention, so why me?

I think the answer is that the MI5 agents who harass me have cynically exploited the situation by painting me as extraordinary in order to assure themselves of well-paid employment funded by the ordinary British taxpayer. To put it bluntly, they are stealing millions of pounds from the taxpayer to feed their own pockets.

This assertion is supported by the observation that it's the same agents who are doing the harassment. Six months ago in a local hospital I was harassed by someone whose face I had seen (he had stared straight at me aggressively, at the time I just thought it was some nutter but it turns out he was one of "them") aboard a KLM flight a couple of years ago. It's presumably been the same people most of the time. I've seen the way contractors act when they don't want their positions terminated. Would these agents really want to lose their well-paid employment harassing me? Presumably they are promising their bosses a "breakthrough" (ie my demise) real-soon-now and have been for the last seven years, while all the while these MI5 agents skim millions

off the taxpayer.

I wouldn't mind a job like that. Perhaps if I persecute myself a little bit, like standing in front of a mirror and shouting mindless obscenities, do you reckon I'd get a slice of the caky Service Tribunal. This year Nick Brooks, current Tribunal Secretary, confirmed to me that he could not think of a single case where the Tribunal had found in favour of a complainant. Here is my usenet post from two years ago.

Subject: MI5: "It wasn't us"
Newsgroups: uk.misc,uk.legal
Organization: Toronto Free-Net

"The Security Service Tribunal have now investigated your complaint and have asked me to inform you that no determination in your favour has been made on your complaint."

Signed ER Wilson, Tribunal Secretary

Well that's a relief then. All that spamming for nothing eh. Gaw blimey, if they say they're not doing it then it can't be them, can it?

In a recent letter to Mr Brooks I expressed the opinion that the Tribunal were unable to fulfil their responsibilities in the face of MI5 falsehoods. Nevertheless, I do intend to make another complaint to the Tribunal in the near future, despite the Tribunal appearing to be a toothless watchdog.

Discrimination against a Unit Minority

MI5 have been very clear in their instructions as to what I should do. They have openly shouted at me the word "suicide", and also from the other abuse it is clear that they want my existence terminated.

This point is covered in more detail in a previous article. The following post describes the xenophobic nature of MI5s campaign against me. They have refined their bigotry down to a unit minority, yet they make use of the discrimination against the mentally ill which is a feature of current British society.

>Indeed. If you've ever had a 'conversation' with someone suffering
>from florid schizophrenia, you'll know how difficult it can be to
>'argue' with them.

I don't have florid symptoms. But I'm in a difficult situation, because those people who don't know, aren't going to believe, and those who do, they just go

along with the crowd. It's never a good idea to go against the grain, and the grain here is defined by interests in the establishment and the media. Even people who could say out loud what was happening won't, because then there's a risk that they'll be seen as traitors and ostracised.

Usually this type of 'hidden abuse' is racial and targetted at a racial minority within a country. You keep the minorities out of the good jobs, but you don't admit discrimination exists. It happens everywhere, not just in Britain. The persecution that is going on now is in reality a refined form of racism. Instead of "nigger" it's "nutter", and abusing the mentally ill is still socially acceptable today. In 50 years it might not be, but today there isn't any social or legal sanction against it.

So really they've refined racial harassment down to a minority of one. The words may be different, but the methods are the same.

MI5 Persecution: BBC Newscasters Lie & Deny They're Watching Me

Central to the persecution campaign waged against me for some nine years now by the Security Service is their use of the media, and in particular the broadcast media, to make clear to me that I am under surveillance and being watched within my own home, even by BBC newscasters while they read the news. This is really an act of arrogance; MI5 and their tools in the television and radio are so sure that they can never be caught, that they have many times made explicity clear on broadcast programmes that they are as capable of seeing me as I am of seeing the broadcast pictures. Even when they have known I am taping the programmes they still carry on this practice; for examples of TVand radio presenters caught "in action", see the Evidence area of my website.

If you wish to reply to this article......
then please include your name and fax number! I provide the means for recipients to send me their thoughts on the topics discussed, but ask that you provide me with your fax number or email address if you require a response. Also would you please send not more than one or two pages, if by fax. Thank-you!

It started with a Newscaster, and it continues with Newscasters today

The very first incident in the story started with a reaction by an ITN newscaster, Sue Carpenter, in June of 1990, almost nine years ago now. She reacted to what she saw in my living room at home as she read the news. My mother had brought an apple for me into the room, whereupon the newsreader smirked and giggled, apparently finding this funny. I couldn't believe what I was seeing. I carried on watching news and other television programmes to see if presenters would show signs of "interactive watching"; to my surprise, this happened again and again. Unfortunately, I did not have my wits sufficiently about me to videotape these programmes, and it is now almost impossible to obtain recordings dating back to 1990.

However, I have been busy recording everything Ive watched the last couple of years, and the taping has yielded some nuggets, which you will find if you point your Web browser at the "evidence" area of my website, whose URL address is given above. Strangely it is not particularly the BBC who are "after me" at the moment (with the exception of occasional fire from Nicholas Witchell), but that supposed paragon of virtue and decency Jon Snow of Channel Four TV News (he actually works for ITN), who once claimed hed turned down MI5s offer of a tax-free salary. I will cover Snows recent actions in a future article.

BBCs Hidden Shame

The first ever Usenet post (internet newsgroup article) on the subject of the MI5 bugging / BBC watching occurred, as stated in a previous article, in early May 1995. It is reproduced here;

Date: Thu May 4 18:27:24 1995
Newsgroups: alt.conspiracy
Subject: BBC's Hidden Shame

Remember the two-way televisions in George Orwell's 1984? The ones which watched you back? Which you could never get rid of, only the sound could be turned down?

Well the country which brought Orwell into the world has made his nightmare follow into the world after him. Since 1990 the British have been waging war against one of their own citizens using surveillance to invade privacy and a campaign of abuse in the transmitted media in their efforts to humiliate their "victim".

I suppose "BBCs Hidden Shame" is more of a wish than a fact. It may be hidden, but the BBC and other media and security organisations seem to have no shame whatever in their anti-social, not to say criminal, actions. Nor do the general public, who seem quite happy to parrot the vilest obscenities without much hesitation or apparently thought.

Martyn Lewis, Nicholas Witchell and the rest

Most of the harassment occurred in 1990-92, when I wasnt making any recordings, and the BBC wont release copies of current affairs programmes from that period.... so although I can remember there were many incidents in that time, even many specifics, I cant dig up the actual programmes to flesh out the bones.

This year, there has been at least one incident with Nicholas Witchell as newsreader, which I have successfully recorded and digitized, i.e. converted into a computer Quicktime movie file. This has not yet found its way onto my website (Im a busy man, dontcha know) but you can be sure I will let the readership of these articles know when that clip makes it onto the web. The Witchell clip was recorded on Saturday 10 April 1999 at 7pm, and shows Witchell trying to restrain his features from collapsing into a smirk. First his upper lip quivers for several minutes, then with the non-excuse of a non-joke his entire face twists into a grin. It looks as if he finds me so funny, that he allows himself to submerge any pretence at professionalism in a sea of MI5-inspired sarcasm and harassment.

The two BBC newscasters whose reactions to me I can remember most vividly over the years are Martyn Lewis and Nicholas Witchell. I can remember thinking years ago that Michael Buerk was also seeing me at home; and if the other two are watching then there would be no reason why he wouldnt be doing the same; but in all honesty I cannot remember a single clear instance of his reacting through facial or verbal expression to me.

I can remember several instances of Martyn Lewis reacting to what he saw of me, however. In early 1992 I was watching the BBC news with Lewis on a small black-and-white portable TV at my then home in Oxford. I threw a term of abuse at Lewis; he flinched, then gave a grin and made a comment from which I understood that he had been on my side, but might have changed his mind as a result of what Id just said to him.

And in spring 1991 I remember Martyn Lewis clearly reacting to what he saw of me at my then accommodation in Woking, Surrey, by continuing to stare at some fixed point near the camera after the news had finished - presumably this is where the monitor interactively showing pictures of my room was located.

Why would BBC and other Newscasters Watch and Harass Me, Watching Them?

This is a very difficult question, and I dont actually know the answer. It is a matter of record that the Secret Services are very much part of the Establishment. The recent exposure of the "MI6 Agent List" on the internet, and its coverage in the newspapers, reveals how much MI5 and MI6 are recruited from the ranks of the Establishment. Obviously the relationship is bi-directional; the Establishment influences MI5/MI6, but the secret services (well, perhaps not so secret now we know who works for MI6!!!) also influence the machinery of power and information dissemination i.e. media in this country. So they must have a lot of covert leverage with the BBC and ITN.

Some of this leverage is obviously through bribery. It is a matter of record that MI5 tried some years ago to "buy" Jon Snow of Channel Four TV. He turned them down - obviously they must have approached other media people as well, and from the lack of other reports of people turning them down, it may be presumed that some other journalists will have accepted the sugared carrots put before them. Ironically, Jon Snow has been taking part in the recent "watching" actions against me - but why he has allowed himself to be used by the secret services is something which I do not know.

Perhaps the Security Service uses blackmail to twist arms of journalists into co-operating with them? I have always thought there was something slightly odd about Martyn Lewiss demeanour. At the time of the Ron Davies "rough trade" scandal it was reported that MI5 had known all about Davies predilections and the sham of his pretence to be a happily married man. Perhaps MI5 have been able to dig something up from Martyn Lewiss private life to blackmail him into acting on their behalf? And if there wasnt anything before the "newscaster watching" started then there most certainly is something now.... once theyve started watching, the newscasters will surely wish their activities to remain covered-up, and co-operate with the security service.

"Newscaster Watching" Deliberately Constructed to Mimic Schizophrenia

Presumably this is the first case in history of television journalists actually taking part in acts of real-time, live spying and reacting against one of their viewers. What you have to understand, though, is that

I was quite mentally healthy in June 1990, certainly relative to November 1992, when after two and a half years of harassment I was finally admitted to hospital as an out-patient. MI5 decided from the outset that they would make me mad; they constructed the media harassment to resemble what would be reported by a person with mental illness; and then they carried on years of abuse to inflict on me the condition which they wished to use as an excuse to cover up their abuses.

I sold my portable TV in autumn 1990 and stopped watching television regularly. I realise now that this may have been a mistake. What I should have done was to watch TV and listen to the radio, but tape-record everything and make a note of what each excerpt meant to me. I would then be in a much stronger position as regards to evidence that I am now. That is what I am trying to do now, but unsurprisingly the TV/radio presenters have stopped getting at me, now they know they are being recorded.

When I started publicising my case on internet newsgroups in 1995, I was met with the disbelief one might expect to be accorded to a mentally ill person who talks about "newscaster watching" and media persecution. Some newsgroup participants thought I had started a "troll", an invention made to obtain a reaction; one bright spark even suggested a group of psychology students were behind the articles. But most people thought the articles were symptomatic of derangement - and that is exactly what MI5 want people to think. MI5 chose me as a target because I was mildly mentally ill at the outset in 1990, although I stress my illness then was very mild in comparison with November 1992, and because they knew that enough abuse would (a) make me much more seriously ill, and (b) once I was more ill, they would "get away" with a harassment deliberately constructed to look like the symptoms of paranoid schizophrenia.

Martyn Lewis Denies & Lies, But Wont in Writing

In February 1997 I wrote to BBC Viewer & Listener Correspondence and asked them to investigate the claim that their newscasters had engaged in "real-time spying" on me. They replied that they had asked Martyn Lewis and Michael Buerk whether they had engaged in such practices, and that they had both made verbal denials to VLC, but were refusing to put their denials in writing.

To me it looks as if Lewis and Buerk are happy to lie verbally but not in writing, because written falsehoods would place them unambiguously in the wrong, whereas they can try to talk their way out of verbal lies if they are ever caught, or perhaps even deny the verbal lies completely? If they lie without shame, then why would they have any shame about future lies about lying?

BBC-VLC also said that the BBC "would never engage in any form of surveillance activity" such as that described. Clearly Martyn Lewis and the rest have lied to their own organisations personnel about their criminal actions. So much for the "objective", "truthful" BBC, a nest of shabby liars.

Summons against the BBC, for Nuisance caused by Newscaster Spying

In March 1997 I issued a civil summons against the BBC, seeking injunction against further "newscaster spying", and token damages for what the BBC had done to me until that date. The purpose of the summons was to try to "smoke out" the BBC, since obviously I did not have good evidence which would be necessary for either a civil or criminal case to be made against them. My summons was worded as follows;

1. The plaintiff is and was at all material times residing at [home address]. At some time prior to or during June 1990, persons of unknown identity entered Plaintiff's premises and installed concealed television equipment in said premises.

2. A campaign of harassment was launched against the Plaintiff by the persons of unknown identity, which in part took the form of instigating harassment by BBC TV newscasters (including specifically Michael Buerk and Martyn Lewis) as they read news bulletins, by making direct and personal comments to Plaintiff.

3. The campaigns purpose was to subject Plaintiff to great mental stress and induce mental breakdown. As a result of it Plaintiff did indeed suffer from severe mental strain in 1990-97.

4. In order to avoid the mental strain being caused to him the Plaintiff has been compelled to stop watching BBC TV news. Defendant therefore committed the tort of private nuisance, since normal use of home was interfered with.

5. Plaintiff claims a permanent injunction prohibiting further nuisance, and damages for nuisance suffered limited to 5,000.

Naturally, my attempt to smoke-out the BBC and its lying newscasters failed. The BBCs litigation department sought to have my summons struck out; and they succeeded in doing so, on the grounds of my action "disclosing no reasonable cause of action". I was also prevented from issuing further civil claims against the BBC without leave of the Court. Apparently litigants-in-person frequently / usually have their claims struck out with this wording, regardless of the merit of their claims.

BBC Suppresses my Claims of "Watching by Newscasters"

BBCs staff magazine Ariel ran my advert "BBC Newsreaders Spying on my home" for one issue in the Personal category on 8/July/1997 before it was spotted and axed by editor Robin Reynolds; please see webpage; http://www.pair.com/spook/evidence/plaint/ariel.htm
Clearly the BBC will not allow claims of its wrongdoing to be made public in the media channels it controls.

On several occasions people said to my face that harassment from the TV was happening. On the first day I worked in Oxford, I spent the evening in the local pub the Rose and Crown with the company's technical director Ian, and Phil, another employee. Ian made a few references to me and said

to Phil, as if in an aside, "Is he the bloke who's been on TV?" to which Phil replied, "Yes, I think so".

The reader might think that mere "watching" by newscasters etc might be a relatively benign happening. But it is not; it is part of MI5s framework of harassment and lies. On many occasions the reactions of the BBCs newscasters to me has been in the nature of sarcasm, implicit contempt and abuse. This is visible in Witchells news programme mentioned above, where he engages in abuse by laughing at me during his newsreading. It was particularly visible in the early period of 1990-92, and as late as Autumn 1993, when during a Newsnight broadcast Jeremy Paxman interviewed a football person about soccer hooliganism, and the interviewee gave vent to an unsubtle rant about "theyre idiots, theyre just idiots, keep up the surveillance". Paxman started grinning, showing he understood and was taking part in the abuse being perpetrated on that programme.

Conclusion

The MI5 Persecution started with harassment by television newscasters, and today harassment by TV and radio presenters still forms a key part of MI5s activities against me. When this business started in June 1990 I was in relatively good health of mind. Years of persecution by the secret police and their mouthpieces in the state-run BBC and other media eroded my health until MI5 achieved their aim of seeing me rendered mentally ill in November 1992. The diagnosis which was forced on me unfortunately and ironically meant that my reports of the harassment are disregarded, because the mentally ill are second-class citizens in todays Britain.

Yet TV and radio harassment continues, albeit in a reduced form, despite my taping all the programmes I watch, resulting in my being able to obtain and demonstrate objectively on the website instances of media presenters attacking me. Unfortunately these recorded instances are quite tenuous; I might understand them, the presenters understand what it is theyre doing, but despite many thousands of people knowing the truth of the "newscaster watching", the omerta continues and they continue to refuse to admit the truth of the matter. It is a terrible indictment of British society that there is not even one decent person willing to speak out. I look forward to the day when the truth does finally emerge, and the mass corruption which has allowed the MI5 persecution to take place is finally purged and the Establishment criminals caught and appropriately punished.

MI5 Persecution: Molestation during Travel

MI5s persecution of me varies in intensity. Since 1990 it has been steady for perhaps 80% of the time; there was a notable quiet period in 1993, and another quiet period in Jan-Feb 1995, as well as a hiatus in the first two months of 1999. It puzzles me that they cease and restart, seemingly without any logic or reason. But one aspect of MI5s activities against me which is relatively predictable is this weeks articles topic, which is Molestation during Travel. Almost every time I cross the Atlantic, go to the Continent or even try to enjoy a holiday in this country, you can bet that MI5 will be there doing their utmost to wreck it all.

This aspect of the harassment is particularly relevant as I will be travelling to Europe again in a months time, with naturally the Minidisc recorder in tow; so it will be interesting to see if I can record the abuse which will almost certainly take place, either on the Tube going to the airport, at the airport, on the flight, in the terminal building - MI5 have previously instituted instances of abuse at each of these locations, so well see how much taxpayers money they waste this time, and whether it will prove possible to capture their abuse on minidisc.

Read about the MI5 Persecution on the Web

June 1992 in Polands mountain resort of Zakopane

The persecution started in June 1990, and for the first two years I stayed in the UK apart from a couple of brief day trips to Calais. By the summer of 1992 Id had enough of being cooped up in England with abusive fellow employees egged on by an abusive secret police service, and decided to spend 10 days in southern Poland, on what was intended to be a holiday at the mountain resort town of Zakopane.

Unfortunately the psychopaths of the Security Service were not willing to allow me to enjoy a holiday in peace and quiet. The journey to Zakopane was by coach from the meeting point at Londons Victoria coach station (National Express) followed by ferry followed by another coach across Europe. As we left Victoria a youth and his girlfriend started a loud tirade of abuse directed at "this bloke", where the "bloke" was never named, but it was very clear that the "bloke" was myself. The youth said "they" had "found somebody from his school, and he was always really stressed at school, a real psycho". Again, the label "they" was not elaborated on, but it was clear that "they" = the persecutors from MI5. The boy also said, "he was in a bed and breakfast for only one night and they got him". By a not unexpected coincidence I had been in a B&B in

Oxford a week previously, which had been booked from work; other things lead me to the conclusion that the company's offices were bugged for most of the 2 1/2 years that I was there, so "they" would have known a room in the B&B had been booked. After a few minutes of this I went back to where they were sitting and asked where they were travelling. The boy named a village in France, and the girl's giggling suddenly ceased; presumably it permeated to her brain cell what the purpose of the boy's abuse was.

It is now very clear to me that MI5 were trying to have me incarcerated, assaulted or killed on this trip across Europe. The degree of verbal violence inescapably leads to this conclusion. When we arrived at our destination, it became clear that many people, both in our tour group and its guide, and among the ordinary residents of the town, knew there was a movement under way to "get" me. MI5 employed many people and significant resources for an action which they knew would only take a maximum of ten days. A commercial operation would never have felt able to waste such resources on such an unproductive and temporary action; only a state-sponsored, taxpayer-funded entity like the Security Service would be able to be so wasteful.

To give some examples of what happened in those ten days; I was walking in some woods outside the town, when a Polish woman, looking at me, said the English "shit" in a strongly Polish-accented voice. For the first three years 1990-92 MI5 had been trying to force this word on me. Another example; I was walking near my "hotel" when a mother said laughing to her child, "a wiesz ze to prawdziwy wariat" which means "you know hes a real madman". And the "TV reacting" happened there too; on Polish TV, a bemused looking journalist said to another, "to jest sprawa Anglikow", which means "its the concern of the English", in other words, none of our business, despite what the English are trying to force down our throats.

Just before we left for home, I went with some others from our group to a nearby bar. There a man shouted at me the same sexual obscenity which MI5 have constantly thrown at me these last three years. I think MI5 try to justify their various terms of abuse by repeating them at me until I say them, either while conscious or while talking in my sleep; and then they seize on my saying those words to "prove" that the obscenities are "my fault", et cetera. This rather stupid reasoning of theirs can actually be seen as indicative of the psychopathic condition attributed to them in a previous article; blaming the victim for the crime you inflict on him is how psychopaths think.

Nor did the persecutors let up during the return trip. Returning on the ferry over the channel, a rather insalubrious-looking guy talked to his mates about "and you know this bloke, hes really mad you know, hes really mad". On the National Express return coach to London, a group of five or six young people started shouting at me. I slumped in my seat and tried to avoid presenting a target, so they got ever more strident - "whats the matter with you, cant you hear us?" One of the other people who had been on the trip to Poland asked them why they were shouting at me, and they said, "hes been to Cambridge", to which the co-holidayer asked them, "have

you been to Cambridge?" presumably thinking they were aggrieved fellow students, but they answered "no". Even after I left the coach at Elephant and Castle abuse continued; in the tube station, two kids started throwing abuse at me; one of them said to the other, "and you know he works?" to which the other answered "yes".

Immediate Aftermath of November 1992

As you will know from previous articles, my manager at OCG - ARIS/Oxford, Mr Mitchell, induced a mental breakdown in me in the months leading up to Nov/92. The diagnosis was regarded by the persecutors as a victory for them, because few if any people give credence to allegations of harassment when they are made by somebody suffering from schizophrenia. There is also a bias against the mentally ill, an "institutionalised bigotry" in society comparable to the institutionalised racism against blacks.

However, MI5 did not let up on persecuting me following Nov/92. In December 1992 I flew by charter jet to Alicante in Spain for two weeks recuperation. MI5 planted one of their people on the flight, a youth who tried to start some noises that "hes a nutter". One of the other passengers replied, "oh hes a nutter is he? oh well!" and the youth shut up and said nothing for the rest of the flight. I think it would be fair to say that the youth on the flight was embarrassed by what he had been asked to do in making the flight "uncomfortable" for me; he sounded defensive rather than aggressive.

My first trip to Canada in June 1993

Ive already covered this in a previous article so Ill just give a brief summary here. On 10 June 1993 I flew British Airways from Heathrow to Torontos Pearson Airport. On de-planing from the aircraft, one of a group of four fellow passengers looked at me and said, laughing, "if he tries to run away well find him". It was quite obvious that these four men were the ones who had been harassing me since 1990.

I did nothing to apprehend them or bring this incident to the attention of the airport authorities, mostly because this was my very first visit to Canada, and the last thing I wanted was to get into a dispute before I had even finished disembarking. In retrospect, I can see this was a terrible mistake; I should have made every effort to detain and identify these people.

Subsequently I have made numerous attempts to obtain the names of these people from British Airways passenger lists, by talking to BA, through a lawyer in Ontario, through a solicitor in England, through the UK police, and also through private detectives in the UK. But all my efforts have come to nothing. BA have told me they keep passenger lists for a period of seven years, so they will still have the list for this 1993 flight. I did not see or hear anything during the rest of my visit to Ontario in 1993 which would have lead me to believe that I was being watched or followed.

Journey across Canada in summer 1994

As I think Ive already said in previous articles I emigrated to Canada in late May 1994. For six weeks between late May 1994 and early July 1994 I travelled across Canada from coast to coast, starting in Toronto, visiting various cities and ending up in British Columbia. I saw this both as something of a holiday, and the chance to get to know a little better my adopted country.

As you can guess, MI5 followed me everywhere I went during these six weeks. In Toronto, where I started this trip in late May, I was spoken about by one youth to another with the words "hes an idiot", to which the other replied, laughing sympathetically, "good luck to him".

A couple of days later I went to Montreal and stayed at the YMCA downtown. As you can guess (this is all so predictable, isnt it?) MI5 followed me there and bugged my room at the YMCA. Not only that, but they managed to set-up an instance of "newscaster reaction" from a local television station; while I was watching a Vermont TV news programme on the set in my room, the woman reporter said, "well theyre just tired and they want to go home", which sounds like a pretty unprofessional thing to say until you realise she was trying to say of me that I was the one that was supposed to be tired, and they (ie MI5) wanted me to go home to the UK.

On the bus journey across the North American continent, it was quite clear that MI5 were following me every step on the way. For the first part of the journey they actually put someone on the bus with me, a youth who said at me "that guys paranoid" and tried to incite other passengers to attack me. I stopped for a couple of days in Winnipeg in central Canada, and on leaving the town heard on the radio a female presenter ranting about "insanity! insanity!". It is very tiring travelling such a long distance by bus; I took the journey in two steps, each of about 36 hours; and it is especially tiring when you know MI5 are watching you and harassing you every step of the way.

When I finally got to Vancouver, MI5 instituted the usual harassment, in very short order. I was surprised how quickly they were able to induce hatred towards me in elements of the general populace; the Security Service must have employed a number of agents and serious resources in a very short period of time; and for no real gain, because I havent been back to BC for almost five years, so all their "work" appears to be for nothing. In downtown Vancouver a street person said in front of me, "theyre all talking about him". For a few days I was staying at Pauls Guest House (345 W.14th Ave); on the day I left, the owner Paul shouted at no-one in particular, "hes going to Victoria" - which was quite accurate, I was indeed going to the provincial capital Victoria on Vancouver Island. But I had not told anyone at the guest house where I was going; I had only mentioned to my parents back in England on the phone that I was going away from Vancouver for a few days. Which leads me to suppose that MI5s bugging of the phone in my parents house yielded the "intelligence" that I intended to visit Victoria, and they had passed the information on to Paul.

When I got to Victoria it was again obvious that the persecutors were "doing their stuff" there as well. On the street I was identified as being English, although I had not said anything so my accent hadnt given me away; and returning by ferry to the mainland, I was abused by a Canadian woman who said, "hes a nutter! you can run but you cant hide". During my years in Canada I have never heard the word "nutter" on any other occasion; I do not think it is part of Canadians vocabulary; so the Canadian woman on the ferry, who was obviously talking about me, must have been supplied with this word by the English persecutors. And once I got back to Vancouver, staying at the Austin Hotel on Granville St, I listened to a conversation in the apartment block directly opposite, and a man saying, "hes paranoid, so thats as bad as it can be, so why are they doing this to him?".

Holiday in the States, August 1995

By 1995 I was living in Canada, and in August I went down the eastern seaboard to Florida and as far as Key West by car. As you can guess (this is all so boring and predictable, isnt it?) MI5 followed me every step of the way. I can see in retrospect that this must have been quite easy for them as they had my car bugged, both on the inside to listen to anything that was said and what radio station I was listening to, as well as what must have been a tracker device installed to track it across long distances.

The first city I visited was Philadelphia. In the old Congress Hall where the first US Congress assembled, the woman guide started referring to my situation, saying that "all these people in Europe were watching it", and they were "a little paranoid" at this 18th-century experiment in democracy. Also I had recently written a newsgroup post where Id described a (female) poster as "wet-nosed" (implying "canine"), and a young girl in Philadelphia remarked, "so he thinks were dogs?" There were two or three more incidents during this holiday in the eastern States, including a radio station down near Miami, showing "they" had tracked me all the way there, and were bugging the inside of my car; but I didnt record the details and Ive forgotten some of it now. Also down in Miami Beach a French tourist in a lift expressed support for me with the words, "cest incroyable" ie. its incredible, meaning that MI5s well-known actions against me were beyond belief.

To go back a bit, in about May/June 1995 Id visited New York, again by car, and was insulted several times by people using the same words that had been used against me in England. In Central Park, and elderly Englishman (not a real gentleman - but then the Engish view of themselves as "gentlemen" etc is quite laughable) looked at me and said "idiot". And while I was eating in a streetside restaurant a New York youth started laughing and said something like, "I cant believe it, hes actually here" - I think that was because I had had an expressed wish to visit New York for some years before this, although after this visit I wont be going there again for a very long time.

Visit to Poland December 1995/January 1996

In December 1995 I flew (BA again, unfortunately - every time Ive flown BA one of these incidents has happened, presumably MI5 is happier setting up harassment on British-domiciled carrier) from Montreal to Berlin and travelled on to Poland to visit family. MI5 naturally harassed me in Poland during my brief stay. They followed me around and got Polish people to take part in the harassment. In one case two Polish youths talked in front of me saying in English (with marked Polish accents), "fucked up men, fuck you". There were also other incidents which I dont remember too clearly since it was some time ago.

The return flight connected through Heathrow, and in the transit lounge MI5 again set-up harassment against me. In Poland they were talking their abuse in English, and in London they set Polish people after me to speak in Polish; they heard me on the phone to my father, and said "a wiesz ze to Polski wariat", in an almost sympathetic, inclusive fashion (translation. "you know hes a Polish nutter"). Once on the flight to Montreal I was again set upon by two English youths, one of whom spoke and the other listened. The aggressive "fat bastard" youth said, "if he wants to be a wanker" (its my fault theyre harassing me, you see), self-justification that "hes a nutter" (so we have to keep on abusing him, because hes ill), as well as talking about the town in Poland where I had been staying. He also said, "he doesnt know who we are", but as already remarked in a previous article, that was at best a half-denial of my guess expressed in internet newsgroups that the people after me were MI5 - if anything its a half-confirmation rather than a half-denial.

These incidents are still going on. You can hear digitised audio files of abuse on a BA flight to Berlin in 1998 on the Web at address

On this flight they were again attacking my mental health; "paranoid, hes paranoid" and "nutter" are discernable. The last "during travel" contact was at Ottawa Airport on 21 July 1998, when "Alan Holdsworth" the psychopath MI5 agent, dressed as a vagrant, was pacing aggressively in the departure area. In three weeks I will again be travelling to Europe; we will see what fresh acts of molestation MI5 perpetrate during this trip.

1520. MI5-Persecution: MI5 are Afraid to Admit Theyre Behind the Persecution (26722)

Newsgroup: comp.sys.atari.8bit
Date: 2007-12-16 16:49:50 UTC

MI5 are Afraid to Admit They're Behind the Persecution

MI5 have issued a formal denial of any involvement in my life to the Security Service Tribunal, as you might expect them to; but, more importantly, the persecutors have never denied that theyre from the Security Service, despite several years of accusations from my corner on usenet and in faxed articles. I am not surprised that the Security Service Tribunal found "no determination in your favour". I am however a little surprised that the persecutors have refused to confirm my identification of them; by doing so, they implicitly admit that my guess was right.

"No determination in your favour" says the Security Service Tribunal

In 1997, I made a complaint to the Security Service Tribunal, giving only the bare outlines of my case. I do not think it would have made very much difference if Id made a much more detailed complaint, since the Tribunal has no ability to perform investigatory functions. It can only ask MI5 if they have an interest in a subject, to which MI5 are of course free to be "economical with the truth". A couple of months after my complaint the Tribunal replied that;

The Security Service Tribunal have now investigated your complaint and have asked me to inform you that no determination in your favour has been made on your complaint.

Needless to say this reply didnt surprise me in the slightest. It is a well established fact that the secret service are a den of liars and the Tribunal a toothless watchdog, so to see them conforming to these stereotypes might be disappointing but unsurprising.

It is noteworthy that the Tribunal never gives the plaintiff information on whether the "no determination in your favour" is because MI5 claims to have no interest in him, or whether they claim their interest is "justified". In the 1997 report of the Security Service Commissioner he writes that "The ambiguity of the terms in which the notification of the Tribunals decision is expressed is intentional", since a less ambiguous answer would indicate to the plaintiff whether he were indeed under MI5 surveillance. But I note that the ambiguity also allows MI5 to get away with lying to the question of their interest in me; they can claim to the Tribunal that they have no interest, but at a future date, when it becomes clear that they did indeed place me under surveillance and harassment, they can claim their interest was "justified" - and the Tribunal will presumably not admit that in their previous reply MI5 claimed to have no

interest.

"He doesnt know who we are"

In early January 1996 I flew on a British Airways jet from London to Montreal; also present on the plane, about three or four rows behind me, were two young men, one of them fat and voluble, the other silent. It was quite clear that these two had been planted on the aircraft to "wind me up". The fat youth described the town in Poland where I had spent Christmas, and made some unpleasant personal slurs against me. Most interestingly, he said the words, "he doesnt know who we are".

Now I find this particular form of words very interesting, because while it is not a clear admission, it is only a half-hearted attempt at denial of my guess that "they" = "MI5". Had my guess been wrong, the fat youth would surely have said so more clearly. What he was trying to do was to half-deny something he knew to be true, and he was limited to making statements which he knew to be not false; so he made a lukewarm denial which on the face of it means nothing, but in fact acts as a confirmation of my guess of who "they" are.

On one of the other occasions when I saw the persecutors in person, on the BA flight to Toronto in June 1993, one of the group of four men said, "if he tries to run away well find him". But the other three stayed totally quiet and avoided eye contact. They did so to avoid being apprehended and identified - since if they were identified, their employers would have been revealed, and it would become known that it was the secret services who were behind the persecution.

Why are MI5 So Afraid to admit their involvement?

If you think about it, what has been going on in Britain for the last nine years is simply beyond belief. The British declare themselves to be "decent" by definition, so when they engage in indecent activities such as the persecution of a mentally ill person, their decency "because were British" is still in the forefront of their minds, and a process of mental doublethink kicks in, where their antisocial and indecent activities are blamed on the victim "because its his fault were persecuting him", and their self-regard and self-image of decency remains untarnished. As remarked in another article some time ago, this process is basically the same as a large number of Germans employed fifty years ago against Slavic "untermenschen" and the Jewish "threat" - the Germans declared, "Germans are known to be decent and the minorities are at fault for what we do to them" - so they were able to retain the view of themselves as being "decent".

Now suppose this entire episode had happened in some other country. The British have a poor view of the French, so lets say it had all happened in France. Suppose there was a Frenchman, of non-French extraction, who was targeted by the French internal security apparatus, for the dubious amusement of French television newscasters, and tortured for 9 years with various sexual and other verbal abuse and taunts of "suicide". Suppose

this all came out into the open. Naturally, the French authorities would try hard to place the blame on their victim - and in their own country, through the same state-controlled media which the authorities employ as instruments of torture, their view might prevail - but what on earth would people overseas make of their actions? Where would their "decency" be then?

This is why MI5 are so afraid to admit theyre behind the persecution. Because if they did admit responsibility, then they would be admitting that there was an action against me - and if the truth came out, then the walls would come tumbling down. And if the persecutors were to admit they were from MI5, then you can be sure I would report the fact; and the persecutors support would fall away, among the mass media as well as among the general public. When I started identifying MI5 as the persecutors in 1995 and 1996 there was a sharp reduction in media harassment, since people read my internet newsgroup posts and knew I was telling the truth. The persecutors cannot deny my claim that theyre MI5, because then I would report their denial and they would be seen as liars - but they cannot admit it either, as that would puncture their campaign against me. So they are forced to maintain a ridiculous silence on the issue of their identity, in the face of vociferous accusations on internet newsgroups and faxed articles.

Have MI5 lied to the Home Secretary?

In order for the Security Services to bug my home, they would either have needed a warrant from the Home Secretary, or they might have instituted the bugging without a warrant. Personally I think it is more likely that they didnt apply for a warrant - I cannot see any Home Secretary giving MI5 authority to bug a residence to allow television newscasters to satisfy their rather voyeuristic needs vis-a-vis one of their audience. But it is possible that the Security Service presented a warrant in some form before a home secretary at some point in the last nine years, for telephone tapping or surveillance of my residence, or interception of postal service.

So the possibility presents itself that a Home Secretary might have signed a warrant presented to him based on MI5 lies. Just as MI5 lie to the Security Service Tribunal, so they might have lied to a Home Secretray himself. MI5 and MI6 are naturally secretive services former home secretary Roy Jenkins said, they have a "secretive atmosphere ... secretive vis-a-vis the government as well as [enemies]". Jenkins also said he "did not form a very high regard for how they discharged their duties".

It was only a few years ago that MI5 was brought into any sot the extraordinary thing is that British media organisations like the state- and taxpayer-funded BBC take such an active part in the MI5-inspired campaign of harassment. We have after all heard of MI5 trying to bribe broadcast journalists; but surely there must be a substantial number who are not bought or blackmailed by the Security Services, and who take part in the "abuse by newscasters" of their own volition? The BBC is supposed

to be independent of the government of the day as well as the Establishment in general. While perhaps it is childish to think that the BBC is anything other than effectively state-controlled, the degree of collusion between the BBC and the British Secret Police MI5 is something you would not find in many countries. Individual tele-journalists in other countries would have enough self-esteem not to allow themselves to be controlled by their secret police - seemingly, BBC broadcasters like Martyn Lewis and Nicholas Witchell have such a low opinion of their employing organisation that they see no wrong in dragging the BBCs no-longer-good name through yet more mud, at the mere request (whether supported by financial or other inducements) of the British secret Police, MI5.

And when challenged, these broadcasters LIE about their involvement, with just as little shame as MI5 themselves. The BBCs Information dept have said that;

"I can assure you that the BBC would never engage in any form of surveillance activity such as you describe"

which is an out-and-out lie. Buerk and Lewis have themselves lied to their colleagues in the BBCs Information department over the "newscaster watching", but unsurprisingly they refuse to put these denials in writing. Doubtless if the "newscaster watching" ever comes to light, Buerk and Lewis will then continue to lie by lying about these denials. So much for the "impartial" BBC, a nest of liars bought and paid for by the Security Services!

It is obvious that the persecution is at the instigation of MI5 themselves - they have read my post, and only they have the surveillance technology and media/political access. Yet they have lied outright to the Security Service Tribunal. Similarly, BBC newscasters Michael Buerk and Martyn Lewis have lied to members of their own organisation. The continuing harassment indicates they are all petrified of this business coming out into the open. I will continue to do everything possible to ensure that their wrongdoing is exposed.

MI5 Persecution Update: Friday 11 June, 1999

Harassment in a pub in Clapham, Tuesday lunchtime

Once a month, or once every other month, I meet a Polish friends of mine who lives in Clapham North, and sometimes we go to a particular pub near where he lives. The last time was some two months ago; I did not have my minidisc-walkman with me, and consequently was seriously harassed by people MI5 had instructed to harass me, in the pub.

This Tuesday, 8 June 1999, we again went to the same pub for a pre-meal drink. This time I did have my minidisc-walkman with me. As you can guess, we were followed into the pub by a couple of young people (Im getting older and older - isnt it funny how the MI5 agents all look young these days?). They started talking about my situation, in particular some travel I had booked the previous day. Unfortunately, they were talking fairly quietly, and my minidisc didnt pick up their speech.

MI5s schizophrenic reasoning is that simultaneously I am very important and worthy of their acts of persecution, and I am also totally unimportant and their abuse of me "doesnt matter". Perhaps they should test their agents and managers for obsessive personalities or psychotic features in the same way as employees are drug-tested. MI5 might lose their "worst cases" employees if some psychological testing were applied to their recruitment procedure.

Toothless Watchdogs. What a Surprise.

Recently I have been engaging in communications with two watchdogs, the Security Service Tribunal which deals with complaints against the security service (and always clears MI5 of any wrongdoing), and the Data Protection Registrar, which is mandated to investigate misuse of personal data held on computer.

In a letter to Nick Brooks, Security Service Tribunal secretary, dated 20 April, I asked him if the Tribunal, as an allegedly independent body, had the means to investigate complaints against MI5 other than asking MI5 to themselves investigate complaints. To my disappointment, his reply two weeks later answered the question only indirectly, in the negative. Whatever the reader might think of the merits of the case I have been putting before you in faxed articles this last year and half, you will surely recognise that it is a significant anomaly for the Tribunal to have no independent means of investigating complaints, particularly given the view expressed even by previous home secretaries that the security

services are untrustworthy.

MI5 Persecution: No Justice for the Victims of MI5

In a previous article I detailed the similarities between the current MI5 Persecution in England, and other historical instances of similar persecution, notably that by the Nazi Germans in the thirties and forties. The Germans persecuted first the mentally ill, the epileptics and those suffering from schizophrenia, then moved on to racial groups; in todays Britain the persecution is again directed at those with mental illness, which the British in their cowardice find easier than taking on racial groups as the Germans did. But just as in Thirties Germany there was no recourse against a malign and omnipotent state, so the MI5 Secret Police in the modern British Fascist State allow no justice for their victims.

No Recourse Against the Security Services Illegal Harassment

It has become apparent to me over the last nine years just how loaded the dice are in todays Britain, a fundamentally fascist country which masquerades as a democracy. Britain is a democracy in name only; the Establishment, the defence and MI5 secret police are always there, regardless of which party has been voted into power most recently - and from "New Labours" conduct in office one finds it difficult to tell them apart from Old Tories, in their crackdowns on the sick and vulnerable in society.

In thirties Germany the victims of the Nazi regime had no legal recourse against their State oppressors; and in todays Fascist British state, the victims of the Establishment and its MI5 Secret Police similarly have no recourse against the illegal state-funded and organised oppression. There is supposed to be a mechanism for dealing with MI5 crimes, in the shape of the Security Service Tribunal and Commissioner; yet these have never found favour of a plaintiff. One might as well ask the Nazi SS to investigate crimes against epileptics or Jews as ask the Security Service Tribunal to investigate MI5 crimes against British citizens; it is quite obvious what the answer is going to be, regardless of what you say to them, and what evidence you provide. The Tribunal and Commissioner are a mere formality, a whitewashing body to give the Secret Services a veneer beneath which they hide their shabby criminality.

"Institutional Racism" and Bigotry in the Metropolitan Police

The recent inquiry into the racist murder of Stephen Lawrence found clear evidence of systematic and deliberate racism in the Metropolitan Police, which cannot have surprised anyone. Commissioner Sir Paul Condon accepted a somewhat lukewarm definition of institutional racism as being "unconscious". In truth, and this truth must surely be obvious to anyone who has any familiarity or encountered the great British police, the Met has not just "unconscious" racism, but very clearly "conscious" and deliberate racism, of the kind that would have done Thirties Germans proud. And it is a bastion of such open racism - when many other parts of

society are learning to live in a multicultural environment, the Met is still living in the past in its attitude to the minorities.

But in addition to the systematic racism confirmed by the Lawrence inquiry, there is also something much more relevant to this case, which is systematic police bigotry against the physically and mentally disabled, which I personally have experienced in my dealings with the police over the years. You cannot expect equal treatment if you are mentally disabled. I tried to make a complaint to the police in 1995 about the harassment I had been subjected to for several years. As soon as they found out I had mental illness, they refused to even talk to me. I tried again in March 1999; the police made various threats to me, while ranting about "your paranoid rubbish" in reference to the complaints expressed to them.

The police refusal to do the job they are employed and paid to do is extremely serious, particularly as this case is highly important, indeed key to the whole issue of British self-perception at the end of the 20th century and the beginning of the 21st century. Britain has lost much in the last fifty years - it has lost an empire, it has lost its self-respect and its identity as a people. If the MI5 persecution finally makes it into the light and the Security Services are seen for the rather cheap bullies their behaviour indicates, it will have a massive and harmful effect on British self-perception in the new century.

Security Service Tribunal - Blatant Whitewashing

A few weeks ago I spoke on the phone to Nick Brooks, the Secretary of the Security Service Tribunal, which is supposed to deal with cases of MI5 transgression. I asked him if the Tribunal had ever found in favour of a plaintiff and against the Security Service. He answered that as far as he knew, it had not.

I also asked Mr Brooks if the Tribunal had any means of investigating allegations of criminal activity by MI5, other than asking MI5 themselves if they had engaged in such activity. His rather circuitous written reply states that the 1989 Security Service Act provides that "it shall be the duty of every member of the Service to disclose or give to the Tribunal such documents or information as they may require for the purpose of enabling them to carry out their functions under this Act". Which is a very round-about way of saying - "No" - the Tribunal has no way of investigating MI5 crimes - None At All.

Setting up the S.S. Tribunal, and creating a Security Service Commissioner, was really an act of falsehood by the government. It is generally recognised that MI5 are out of reach of the normal criminal justice system - the police, as we have seen, have no intesot answer to the government; in a previous article I quoted Roy Jenkins speaking of "a secretive atmosphere.... secretive vis-a-vis the government as well as [enemies]", and a "lack of frankness" from MI5.

If the government wanted to, it could reform the secret services and ensure they acted in conformance with the laws which have been enacted for them in the last ten years. But apparently the present government does not see any need to ensure security service compliance with the law. As noted above, the regulatory machinery for MI5 is deliberately weak; the Tribunal has no independent means of investigation, and it is simply a waste of time complaining to the Tribunal or Commissioner.

Every so often, fresh revelations come to light of secret service transgressions. We have heard from Shayler that MI5 bugged Jack Straw and Peter Mandelson; we have heard from Peter Wright that MI5 plotted to see Wilson ejected from office; yet so closed is the system of government that the law is never enforced against MI5 when they "bug and burgle" everyone from politicians to ordinary citizens.

No Justice from the Legal System, either

Britain has a civil and criminal justice system which effectively limits many complaints from being heard. For a civil complaint to be brought before a court, you need a solicitor willing to act on your behalf. Supposedly it is possible to represent yourself as a Litigant-in-Pthe basis of being "frivolous and vexatious" or "disclosing no cause for action in law". This is exactly what happened to me in 1997 when I twice tried to take the BBC to court for spying on me in my living room at home; my case was twice struck out, and on the second occasion an order was made against me that I could not bring further civil litigation against the BBC without leave of the court.

As the reader can guess it is quite impossible for a person with schizophrenia, who complains about the secret services and media interfering in his life, to find a solicitor willing to represent him in legal action against the persecutors. I have quite a lot of evidence of the continuing persecution which I have posted on the website, even if the evidence is quite tentative and perhaps open to varying interpretations. But I have tried several firms of solicitors; some of them have acted unprofessionally and abused me; all of them have refused to represent me. My psychiatrist gave me the name of the firm of Bindman and Partners in central London, and I have approached them twice. On each occasion they refused to accept my instructions. Plainly the problem with Bindmans, which they have admitted, is their bigotry against mentally disabled people; yet this is not just something that is wrong with Bindmans, it is something that is wrong with the legal system as a whole, since the legal system necessitates finding a solicitor willing to represent you in order to bring a case to court, but it does not have a mechanism for providing a lawyer in the case where no solicitor is willing to take on your case. So the British legal system is such as to prevent cases such as mine from ever receiving an airing in a court.

So much for the civil courts. But the criminal justice system is no better. Two years ago the Protection from Harassment Act came into force. But again, while the Act is all very well on paper, in practice it is unenforceable in my case, since it would require Police action to see the law implemented, and if the police cannot even be trusted to conduct a

murder investigation competently (in the Lawrence case), then what chance is there of their investigating complaints against the Security Service? Of course, it would be possible for me to personally issue proceedings through a private prosecution either against MI5 themselves, or against one or more of their media tools; but here we see the same problems as with the civil courts, because first of all I would have to find a lawyer willing to act on my behalf. Litigants-in-person do exist in the criminal courts, but the Attorney General can bring such a prosecution to an end by taking it over and entering a plea of "nolle prossequi"; and I suspect that if I were to bring a private prosecution against either MI5 or one of their media tools, then this is exactly what would happen.

So much for British justice. But if anything the wrongs that have been perpetrated on me by the British justice system are quite mild to what others have suffered. Others have been wrongly convicted based on police evasions and lies, and spent many years in jail based on false charges. I should count myself lucky that despite the best efforts of the MI5 secret police, I have not acquired any criminal charges or convictions; which shows that for all their resources and influence, and the clear imperfections in the British legal system, there are still limits on how much subversion MI5 can achieve.

The latest in a long line of injustices

A comment I heard during the recent scandal of the police mishandling of the Lawrence murder investigation is that "its not as if the police themselves murdered him". This is not a particularly wise statement to make about the case, since it could be argued that the four alleged murderers were aided in their crime by the expectation that the police would deliberately botch the investigation - which of course is exactly what the police did.

But in my case, this would be a completely inaccurate thing to say - since the MI5 secret-police have expressly been trying to nine years now to see an end put to my life, either by having me incarcerated and my liberty ended, or by forcing self-termination on me. It is exactly as if the secret police "themselves murdered [me]", since that is what their aim is in their campaign against me.

The public has heard of instances of police mishandling of cases, of police manufacturing evidence, lying in court, extracting false confessions to clear up crimes, et cetera. Various instances of extra-legal activity by the secret services have also come to light in the last few years. The unhappy truth is that what MI5 have been doing to me for the last nine years is really nothing out of the ordinary for them. To me it seems unbelievable that this sort of systematic campaign of harassment, which thousands and thousands of people in this country and abroad are well aware of, could exist for such a long period of time with the media maintaining "omerta". But my case is not the first such instance of persecution by the "British secret police", and judging by the lack of any real controls on MI5, I very much doubt it will be the last.

MI5 Have Systematically Destroyed My Life

This is getting depressing. From the feedback Ive received, the recipients of these faxes are tired of hearing my complaints, and in truth I am tired of sending them. The reason I havent yet ceased sending faxes is because I cannot think of any other effective means of replying to MI5s actions against me, and I feel I have to do something to try to defend myself. Three/four years ago I got the MI5 harassment out of my system by posting about it on Internet newsgroups, and for a few months this tactic was quite effective - I received (and indeed still do today) support from newsgroup regulars, and felt I could make my voice heard and break the MI5 monopoly on access to the British media. But that was years ago, and today nobody gives a tinkers cuss about my internet posts - so I have sought to escalate matters by communicating directly with the politicians who allegedly say how this country is supposed to be run.

Of course, its quite expensive to keep up a campaign of fax messages for many weeks. Each set of faxes takes approx 50 hours to send over the weekend, and costs perhaps 35. My phone bill for the last quarter was 350. These figures are naturally insignificant compared to what MI5 have been spending against me over a similar period. It also takes a lot of time and energy to create a new article every week, and try and find new and fresh aspects and viewpoints on MI5s persecution of me. I am beginning to run out of both new topics and energy to write these articles.

So I have a suggestion to put before the MI5 persecutors who have been wrecking my life since 1990. In a few days time I will be going on holiday to Poland and Germany, for a couple of weeks. Previously, almost every time I have travelled by plane, or gone anywhere on holiday, the MI5 "wreckers" have been most assiduous in destroying these trips. My suggestion is; if MI5 leave me alone on this next trip, I will cease transmitting these articles. If, however, there are any clear instances of harassment (and I am very capable of recognising MI5 harassment when I see it), then I will make public these instances and publish any recordings I may make of them, and, unwillingly and unhappily, continue the articles.

Read about the MI5 Persecution on the Web

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Refuse to Allow me to have a Normal Life

Its kind of difficult to contemplate having a normal existence when you know your entire house is bugged from top to bottom, for audio and, very unpleasantly, video; when your employment is systematically destroyed, over and over again; when every time you leave the country your travel is disrupted by MI5 plants on the plane yelling abuse at you..... you get the idea. I would like to have some semblance of a normal life, like my Polish and English friends do. But MI5 have made this impossible, and they have leached massive resources from the taxpayer to institute a life not worthy of the name on me.

A few years ago MI5 were very open about their aims in persecuting me. They were shouting "suicide" at me, both in Canada where I lived at the time, and during my occasional visits to London. You cant get much clearer than that. There have been instances as recently as a few weeks ago of this intention being voiced by their side; on 15 April 1999, a woman at the next ticket counter at the Royal Festival Hall said;

"it would kill it, you know, it would just be overkill... they can't stop can they"

meaning that "they" were trying to "kill it" i.e. me and they "cant stop". The audio file is at;

I wonder why they "cant stop". Nobody (who doesnt know already) believes my claims - so what difference would it make, if they were to "stop" persecuting me? Perhaps what this persons remarks indicates, is the depth of the obsession MI5 have with this case. They have chosen at random a person from the general population, and done their worst to ruin my life. What is wrong with these people, that they persecute a national of the country whose citizens they are supposed to protect?

No Chance of a Harassment-Free Job

Since the harassment started in 1990 I have had three jobs, the first near Guildford, the second in Oxford, and the third overseas in Canada. All three jobs have been systematically destroyed by MI5. It is so ironic that MI5 employs a team of agents, each well compensated for their efforts, to persecute just one person paid a mere fraction of what they get for their "work". In fact, it is a joke that MI5 is allocated resources for this sort of effort. If this area of government were run along commercial lines then MI5 would be very rapidly closed down, they produce nothing of any value, instead spending their time obsessed with the bugging and surveillance of their former employees like Shayler, dangerous subversives like Straw and Mandelson, and "threats to national security" like yours truly.

Applying for my first post university job

When I was applying for my first post-university job in the closing months of 1990, I found at two or three job interviews that MI5 had got there ahead of me. Interviewers knew what words to repeat from what had been said at my home recently; MI5 had supplied them with words to hurt me, and the "British secret police" were trying to wreck my job search and discourage me from joining the world of work. This and the continuing

harassment in the media and by the public meant that the search for a job took very much longer than it would ordinarily be expected to take for a person with my qualifications.

With my first job near Guildford came the knowledge that MI5 were doing everything possible to make me lose the job. Despite their efforts I managed to stay in work for ten unhappy months, during which they made very clear to me that they were bugging my workplace, my accomodation in Woking, my car, my home..... and they also made clear that they had "got to" my employer in Guildford.

Employment with Oxford

I was able to find a new job, with Oxford Computer Training Services (now ARIS/Oxford), quite quickly. But it became very clear, very quickly, that MI5 were treating this job the same as the first; they tried to get the other employees and in particular the managers to attack me. It was plainly MI5s intention that I be sacked fro this job. But I was not sacked; instead, after almost a year of abuse from OCTS managers, I was forced to seek medical help, and had to take two months off for medical leave. OCTS MD Hugh Simpson-Wells was motivated in keeping me on by the fear that if he sacked me, then I would take him to court for the treatment OCTS managers had meted out to me during 1992.

Emigration to Canada

When I emigrated to Canada in 1994, I did think that perhaps MI5 would leave me alone, given that I had made the effort to leave the UK and try to find a new life overseas. I could not see any reason why they would continue to harass me over in Canada. But clearly the MI5 agents had their salaries to think about, since continue to harass me they most certainly did, at my home in Ottawa, and by getting fellow employees to speak against me, as had happened with previous jobs in the UK.

MI5 are denying me a future in work

Former Chief Constable of Devon and Cornwall John Alderson had this to say regarding MI5's activities;

"MI5 is not under the same restraints as the police. They infiltrate organisations, people's jobs and lives. They operate almost like a cancer."

Currently I am on disability, and I can see that MI5 are denying me a future in work. It would be an insult to logic for me to return to work and find a job, in the knowledge that an entire team of MI5 agents, paid in total many times what I would be earning, would have the objective of seeing me "done down" in the employment, and ejected from the place of work. This situation is completely wrong and nonsensical - I would very much like to have a job, but MI5 are preventing me from even thinking about returning to work. The culture of secrecy in MI5/MI6 means there is no objective oversight of their expenditure, when external oversight and greater transparency might lead to wasteful and illogical operations such

as that against me being shelved.

Watched and Harassed at my Home and Accommodation

As you will know if you have been reading these articles, MI5 have watched and harassed me at my home, and at every accommodation Ive had since 1990. Theyve also watched me at neighbours houses in London, and at short-term accommodation such as hotels and bed-and-breakfasts. They have used the "words" gained from these watching activities against me, by passing these words on to other people such as OCTS managers for them to make clear that I am being watched where I live.

Harassed at rented rooms in Oxford in 1992

This was at its worst in 1992 in Oxford, where during the week I lived at rented accommodation in Oxford, and at weekends returned to my parents home in London. I was being severely harassed by managers at my place of work, OCTS; and it was clear from the things they said that they were being supplied by MI5 with details of my home life, that they were being supplied with words to repeat at me.

In 1992 I moved house in Oxford many times, living at a total of five rented accommodations in ten months. In January I started off living in a rented room at Headington near the ring road / A40 intersection; then when it became clear that house was being bugged, moved to a rented room in Botley, some miles away. It was at the house in Botley that I had an "interactive watching" experience with Martyn Lewis while he was reading the news; I threw a term of abuse at him; he first flinched, then gave a gsult of what I had just said, he was no longer "on my side".

So I moved house again. This time to a place in Cowley, near the Rover car works, where I stayed for a few weeks. Because of continuing harassment at work, I soon moved from this accommodation, to yet another rented room on Iffley Road. By this time I was very ill and being abused continuously at work. Again, MI5 followed me to the rented room on Iffley Road, and created new instances of "newscaster watching". There was a television in the room which I watched, and as you can guess the newscasters got at me when I was watching the television. Also once I was assaulted, if thats the word for what happened, on leaving the house; a youth grabbed me by the coat lapels, roughed me up a bit with various terms of abuse. I did not report this assault to the police, because what was happening to me at work was very much worse, and nobody seemed to think that that was worthy of being reported to the police. Later that day at work, Alex G, a fellow employee, said "I heard he was assaulted".... I had not told anyone at work about the incident that morning..... so once again it was made very clear that MI5 were watching my rented accommodation and giving information about what was going on there to managers at work.

So I moved house yet again in late autumn 1992, this time to a rented room in a large house on Woodstock Road. I stayed there for several weeks as the situation at work deteriorated due to OCTS managers abuse, until I was forced to take sick leave from work for two months and attend hospital as

an outpatient; at which point I gave notice on the room, and returned to London.

MI5 continued to harass me after the diagnosis of serious illness was made. As reported previously, they harassed me on a flight to Spain in December 1992; and in 1993, when I returned to live and work in Oxford, they again bugged my rooms, as well as my workplace, although the intensity of the harassment was very much less than in 1992.

Watched, followed and harassed in Canada

It dismayed me to find that MI5 would not leave me alone after I had settled in Canada. In January 1995 I rented an apartment at the Bayshore complex in Ottawas west end. For some weeks there was no sign of the "buggers". But then it started all over again. They first bugged my car, which had a car alarm installed - the alarm went off two or three times in a single evening, and the following day gave a signal that the car had been broken into. Then they bugged my apartment, and in particular they installed bugs on the phone line in my apartment.

In September 1995 I moved to a new apartment in Ottawas Bytown Market area, the restaurant and entertainment heart of Canadas capital. This proved a serious mistake. In the west end I had been fairly distant from the centre of town where MI5 concentrated their efforts at turning people against me. In the Market area it was much easier for the persecutors to motivate people to harass me, and over the next couple of years there were frequent instances of harassment by the general public.

From 1995 I had some Polish friends in Ottawa, and as the reader can guess, MI5 have spent much effort trying to break up this friendship. They supplied various things about my home life to these friends, for example where I was living in the Market, directly over the road were the studios of a music radio station, which you had to "look up" to see; and MI5 told these friends that I was "looking up" to see the radio station; so the friends then replayed these words back to me, that I was "looking up". MI5 have also made various sexual slanders against me, and these friends also unwittingly replayed some of the words they had been imprinted with by the MI5 persecutors.

MI5 Will Never Allow Me to have a Normal Life

I have heard many excuses as to why MI5 continuously prevent me from having a normal life. We are told that MI5 are defending the country against a tere to zero.

When I have travelled abroad, they always put their people on the flights, on the journeys I undertake, to continue the harassment, so that I am put off further overseas travel, and chained to my home in London. Yet even this is illogical, because when I lived in Canada, they would still put people on flights back to the UK.... and what possible reason would they have for doing that? Perhaps the truest words to describe the MI5 persecution is that reason has nothing to do with their activities - sane people do not behave in the way the MI5 British Secret Police have been

doing.

Summer 1999 - more MI5 harassment?

In only a few days time I will be going to Europe again. This time I have deliberately chosen to travel by a non-UK airline; so we will see if they put their paid agents on this foreign carrier, we will see if they try to harass me on this non-British flight.

If they do harass me on this trip to Europe, or if they resume the harassment in London after I return home, then I will continue to report their activities in these faxes. As I said at the beginning of this article, I would very much like to not have to send these articles any more, but that is not my decision to make - it is entirely up to MI5 to cease their pointless persecution of me, once and for all.

While I can't help, I have a similar problem with the Bit 3. I have a 256K ram
card I can't use at the same time due to address overlapping. And I also have
no ram past 32K.

1533. Atari BBS NEWS!

Newsgroup: comp.sys.atari.8bit
Date: 2007-12-20 22:39:31 UTC
From: Greg Goodwin <Greg.Goodwinp0.f2.n8.z8@fmlynet.org>
Message-ID: <0e222ef9@familynet-international.org>
Source record: 3772

FamilyNet International Newsgate

Some interesting BBS news... this is just to catch you up so that you can go into the BBS's without having to dig for this and can therefore just jump in....

1) Boot Factory - sysop Abdul
(Atari 8-bit BBS, emulation, ATASCII option)
Running well. Marius (of the fifth BBS to be mentioned here) mentioned thinking about selling his Atari equipment on the message base here. I really hope he didn't.

GAMES ON THE BOOT FACTORY
1. Blackjack
2. Rule Prometheus! (Kingdom)
3. Pro-Zee
4. Keno!
5. Life Expectancy
-. Coal Mines of Midlothian (Selectable from main menu ATASCII needed)

2) Inside The Atari 8 Bit - sysop Steve (Atari 8-bit BBS, Real equipment, ATASCII option) Up and going. Been a little activity on the first message base. The game menu does not seem to be active at this time. However this BBS is known for being possibly multi-channel, so you can have more than one user on at a time, and this is run on the real equipment. Good ANSI screens and menus too for the
non-Atari user getting on this one.

3) Mousenet BBS
(Atari 8-bit BBS, Real Equipment?, ATASCII option)
"11-04-07 BBS Crash"
"sh*t happens, the BBS was crashed the last days and killed all the Boardfiles and my Boot partition. The userist was not deleted. not I have installed an older Backup from 10-03-07 (only the Boardfiles on Partition 5)"
When I checked the message base was not letting me post. So if someone could please let the sysop know if you know him.

MOUSENET has ATASCII cartoons and ASCII picture galleries.

4) Darkforces BBS
(Atari ST BBS run on a Mega ST 2)
UDS-10 (Serial to Ethernel adaptor) is down. Will be back up when a replacement comes.

DARKFORCES, when it comes back up, is a great ST BBS that has a variety of message areas, and many online games. More on this soon.

5) Atari 8-bit Inside - Sysop Marius (Atari 8-bit BBS run on the real hardware)
See the first entry for the Boot Factory. Possibly down for good. :(

6) ST Guild BBS - Sysop Chuck B
(ST BBS run on... ???)
telnet://stguild-bbs.dydns.org/
On Thu, 25 Oct 2007 22:16:19 -0400, Chuck B wrote:
> I have had some problems with over the last few months. I and had to shut it
> down. But if you want I will put it back up right now!! I am going to see
> how things go for a month so give it a try.

Will have to see if he is willing to give this another go. Posted a
message on the Atari ST newsgroups to see what the plans are. Hopefully Chuck
will reply.

7) Closer To Home - Sysop Tom Hunt (Atari 8 bit BBS run under emulation,
ATASCII option)

This long time BBS has been basically up for forever. It has spells where
it is down while family uses the computer, so who knows on this one. There is
a discussion about Tom Hunt's work at http://www.atariage.com/forums/index.php?
showtopic=101584&pid=1310240&st=0&#entry1310240

8) The Grove BBS
(Atari ST BBS run under emulation.) Telnet://shadow.skeleton.org
(Type BBS and then nothing for the password)

Just got on this BBS the other day, looks really promising.

Here are the games...
1. Assassin
2. Galactic Empire 2.41
3. Final Frontier 1.53
4. Space Trader Elite
5. Mount NevereST Trivia
6. Cows 9.0
7. Super Star Trek
8. Death
9. Air Defence 3.8
10. Moria/ST
11. DDST (AD&D ST)
12. Pirate Adventure
13. Ghost Town Adventure
14. Blackjack
15. James Bond: World Domination
16. Trivial Pursuit

PLEASE if you know of any BBS's that are up that are not listed, please
let me know ASAP as we are adjusting the BBS list at telnet://rdfig.net (again
"X" at the main menu for internet options, then "A" for Atari, then select the
Atari BBS on the list. There are broken links, this will be all updated
completely soon).

Also don't forget the Atari IRC chat starting at 8 pm CST. (I'll be a late arrival, but plan to be there eventually.) (telnet://irc.atarichat.net port 800 will take you there, otherwise irc.newnet.net #atari)

Take care fellow Atari 8-bitters!

Doc Clu - beige 800 user!

Sweet!!

I was thinking the same thing. So has anyone tried to hack this? I've been thinking this would be great on the Jaguar. Of course you would need a different interface, or at least an adaptor to adapt Jaguar to 2600 ports.

And what would you use for the music? I think it would be great on the Atari 8-bit if maybe you could hack an AMS player or something to play along.

Remember the one that showed the notes as you played? What if you had something like that, only have the notes fall into place and you play as they hit the keyboard.

Actually maybe really learn an instrument. :D

Anyway, love Guitar Hero.

FamilyNet International Newsgate

Sweet!!

I was thinking the same thing. So has anyone tried to hack this? I've been thinking this would be great on the Jaguar. Of course you would need a different interface, or at least an adaptor to adapt Jaguar to 2600 ports.

And what would you use for the music? I think it would be great on the Atari 8-bit if maybe you could hack an AMS player or something to play along.

Remember the one that showed the notes as you played? What if you had something like that, only have the notes fall into place and you play as they hit the keyboard.

Actually maybe really learn an instrument. :D

Anyway, love Guitar Hero.

I belong to two group. Once is in my area and that is IMAGE (Indiana-Michigan-Atari-Group-Exchange). I conduct the meetings at my house and I write most of the newsletter. There is about 7 people that come to the meetings and about 15-20 more that receive our newsletter either my email or regular mail. The other groups is SCAT which is in Chicago. Nice group of people that group.

Posting-Frequency: 7 days
Last-modified: October 20, 2007

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE, 130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from 1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by Atari Interactive, which is managed by today's Atari, Inc. Both of these are divisions of Infogrames Entertainment.

NEWSGROUP BACKGROUND
comp.sys.atari.8bit was created in November 1986 (as part of the Great Renaming) as a direct replacement for: net.micro.atari8

comp.sys.atari.8bit is unmoderated, and has no formal newsgroup charter.

The comp.* hierarchy of Usenet newsgroups is managed by the Big-8 Management Board: http://www.big-8.org/

RELATED USENET NEWSGROUPS
alt.binaries.comp.atari8bit
Programs for Atari's 6502-based orphans.

comp.sys.atari.advocacy
Attacking and defending Atari computers.

comp.sys.atari.announce
Atari related hard/software announcements. (Moderated)
Moderator: Kevin Savetz
comp.sys.atari.announce web page: http://www.atariarchives.org/csaa/

comp.sys.atari.programmer
Programming on the Atari computer.

1546. Atari Telnet Gateway 2008 1st Quarter

Newsgroup: comp.sys.atari.8bit
Date: 2007-12-23 08:02:27 UTC
From: Greg Goodwin <Greg.Goodwinp0.f2.n8.z8@fmlynet.org>
Message-ID: <0e2282a6@familynet-international.org>
Source record: 3785

FamilyNet International Newsgate

[We are looking for current BBS's of other retro platforms aside from Atari. Please write the E-mail address at the bottom of this message!]

[[This announcement will be the last posting regarding the Atari Telnet BBS Gateway till at least March 2008, so please save this message. The Prison Board BBS is not here to Spam newsgroups, but inform of a FREE SERVICE of the Prison Board BBS to make access to the Atari BBS's and chats much much easier.]]

FANS OF BBS's and Atari chat rooms...

The ATARI GATEWAY has all known Atari BBS's, and a some unknown. To find out which is which, come check it out. :)

There are also links to the Atari IRC chat (which meets at 8 pm CST Thursday, and off and on throughout the week at random times.)

And there is a link to the telnet chat (Which meets at 10 am CST Sunday and 7 pm CST Tuesday, and it good as a message area after that)

All this updated TODAY! icon_mrgreen.gif Merry Christmas to all BBS & chat fans, and please come see what is new at the Atari Gateway...

telnet://rdfig.net

X at the main menu (after you get past all the intro screens) for "Internet" A for the Atari menu
Then select 1 though 11.

Important details and FAQ Answers
- I don't think Inside the Atari 8-bit second line is active, but left there since it is off and on.
- Dark Forces is not currenlty up, but will be VERY soon.
- Some of these BBS's like Boot Factory will output character in a strange order when you type. This is a strange echo effect over telnet that needs to be ironed out eventually. However, you can read fine, and if you just type away, the output will look normal on the other side. it is only messed up on your side of the screen.
- The Prison Board BBS that runs the Atari Gateway can run as low as 300 baud, however, it will take about 45 minutes to get past the intro screens. We are currently working on this.
- The Prison Board BBS has a dialup line in addition to telnet access at 972 329 0781
- The Prison Board BBS is considering adding Atari Newsgroups as well as making areas for other computer enthusiasts such as Commodore and others.

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by
Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of
Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from
1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by
Atari Interactive, which is managed by today's Atari, Inc. Both of these
are divisions of Infogrames Entertainment.

I don't understand the point. Atari++ comes with its own Os, backwards
compatible, and sources available, of the Os, and the emulator. Of
course, programs jumping into fixed ROM addresses won't work.

So long,
Thomas

1560. Happy Holidays!

MI5. Persecution: Molestation during Travel

MI5s persecution of me varies in. intensity. Since 1990 it has been steady for perhaps 80% of the time; there was a notable quiet period in. 1993, and another quiet period in Jan-Feb 1995,. as well as a hiatus in the first two months of 1999. It puzzles me that they cease. and restart, seemingly without any logic or reason. But. one aspect of MI5s activities against me which. is relatively predictable is this weeks articles topic, which is Molestation during Travel. Almost every time I cross. the Atlantic, go to the. Continent or even try to enjoy a holiday in this country, you can bet that MI5 will be there doing their utmost to. wreck it all.

This aspect of the harassment is particularly relevant as. I will be travelling. to Europe again in a months time, with naturally the Minidisc recorder in tow; so it will be. interesting to see if I can record the abuse which will almost certainly take place, either on the. Tube going to the airport,. at the airport, on the flight, in the terminal building - MI5 have previously. instituted instances of abuse at each of these locations, so well see how much taxpayers money they. waste this time, and whether it will prove possible to capture their. abuse on minidisc.

Read about the MI5 Persecution on the. Web

June 1992. in Polands mountain resort of Zakopane

The persecution started in June 1990, and for the. first two years I stayed in the UK apart from a couple of brief day trips to Calais.. By the summer of 1992 Id had enough of being cooped up in England with abusive. fellow employees egged on. by an abusive secret police service, and decided to spend 10 days in southern Poland, on. what was intended to be a holiday at the mountain resort town. of Zakopane.

Unfortunately. the psychopaths of the Security Service were not willing to allow me to enjoy a holiday in peace and. quiet. The journey to Zakopane was by coach. from the meeting point at Londons Victoria coach station (National Express) followed by ferry followed. by another coach across Europe. As we left Victoria a youth. and his girlfriend started a loud tirade of abuse directed at "this. bloke", where the "bloke" was never named, but. it was very clear that the "bloke" was myself. The youth said "they" had "found somebody from. his school, and he was always really stressed at school, a real. psycho". Again, the label "they" was not elaborated on, but it was clear that "they" = the persecutors. from MI5. The boy also said, "he was in a bed and breakfast for. only one night and they got him". By. a not unexpected coincidence I had been in a B&B in

Oxford a week previously, which had been. booked from work; other things lead me to the conclusion that the company's. offices were bugged for most of the 2 1/2 years that I was there, so "they" would have. known a room in the B&B had been booked. After a few minutes of this I. went back to where they were sitting and asked where they were travelling. The boy. named a village in France, and the girl's giggling suddenly. ceased; presumably it permeated to her brain cell. what the purpose of the boy's abuse was.

It is now very clear to me that. MI5 were trying to have me incarcerated, assaulted or killed on this trip across. Europe. The degree of verbal violence inescapably leads to this conclusion.. When we arrived at our destination,. it became clear that many people, both in our tour group and its guide, and among the ordinary residents of the. town, knew there was a movement under way to "get" me. MI5 employed many people. and significant resources for an action which they knew would. only take a maximum of ten days. A commercial operation would never have felt able to. waste such resources on such an unproductive and temporary action; only. a state-sponsored, taxpayer-funded entity like the Security Service. would be able to be so. wasteful.

To give some examples of what happened in those ten days; I was. walking in some woods. outside the town, when a Polish woman, looking at me, said the English "shit" in a strongly Polish-accented voice. For the. first three years 1990-92 MI5 had been trying to force. this word on me. Another example; I was. walking near my "hotel" when a mother said laughing to her child, "a wiesz ze to prawdziwy wariat" which. means "you know hes a real madman". And the "TV reacting" happened there. too; on Polish TV, a bemused looking journalist said to another, "to jest sprawa Anglikow", which. means "its. the concern of the English", in other words, none of our business, despite what the English are trying to force. down our throats.

Just. before we left for home, I went with some others from our group to a nearby bar. There a man shouted at me. the same sexual obscenity which MI5 have constantly thrown at me these last three years. I. think MI5 try to justify their various terms. of abuse by repeating them at me until I say them, either while conscious or while talking in my sleep; and. then they seize on my saying those words to "prove". that the obscenities are "my fault", et cetera. This rather stupid reasoning of. theirs can actually be seen as indicative of the psychopathic condition. attributed to them in a previous article; blaming the victim for the crime you inflict on. him is how psychopaths. think.

Nor did the persecutors let. up during the return trip. Returning on the ferry over the channel, a rather insalubrious-looking guy talked to. his mates about "and you know this bloke,. hes really mad you know, hes really mad". On the National Express return coach to. London, a group of five or six young people started shouting at me. I slumped in my. seat and tried to avoid presenting a target, so they. got ever more strident - "whats the matter with you, cant you hear us?" One of the other people who. had been on the trip to Poland asked them why they were shouting at. me, and they said, "hes been to Cambridge", to which the co-holidayer. asked them, "have

you been to Cambridge?" presumably thinking. they were aggrieved fellow students, but they. answered "no". Even after I left the coach at Elephant and Castle abuse continued; in the tube station, two kids started. throwing abuse at me; one of them said. to the other, "and you know he works?" to which the. other answered "yes".

Immediate Aftermath of. November 1992

As you will know from previous articles, my. manager at OCG - ARIS/Oxford, Mr Mitchell, induced a. mental breakdown in me in the months leading up to Nov/92. The diagnosis was regarded by. the persecutors as a victory for them, because few if. any people give credence to allegations of harassment when they. are made by somebody suffering from schizophrenia. There is also a bias against the mentally. ill, an "institutionalised bigotry" in society comparable to the institutionalised racism against. blacks.

However, MI5. did not let up on persecuting me following Nov/92. In December 1992 I. flew by charter jet to Alicante in Spain for two weeks recuperation. MI5 planted one of their people on the. flight, a youth who tried to. start some noises that "hes a nutter". One of the other passengers replied, "oh hes a nutter is he? oh well!". and the youth shut up and. said nothing for the rest of the flight. I think it would be fair to say that the youth on the flight was embarrassed by what he. had been asked to do in making. the flight "uncomfortable" for me; he sounded defensive rather. than aggressive.

My. first trip to Canada in June 1993

Ive already covered this in a previous article so. Ill just give a brief summary here.. On 10 June 1993 I flew British Airways from Heathrow to Torontos Pearson Airport. On de-planing from the aircraft, one. of a group of four fellow passengers looked at me and. said, laughing, "if he tries to run away well find him".. It was quite obvious that these four men were the ones who had. been harassing me since 1990.

I did nothing to. apprehend them or bring this incident to the attention of the airport authorities, mostly because this was my. very first visit to Canada,. and the last thing I wanted was to get into a dispute before I had even finished disembarking. In retrospect, I can see this was a. terrible mistake; I should have made. every effort to detain and identify these people.

Subsequently I have made numerous attempts. to obtain the names of these people from British Airways passenger lists, by talking to BA, through. a lawyer in Ontario, through a. solicitor in England, through the UK police, and also through private detectives in the UK. But all my. efforts have come to nothing. BA have told me they keep passenger. lists for a period of seven years, so they will. still have the list for this 1993 flight. I did not see or hear anything during the rest of my visit to Ontario in. 1993 which would have lead me to. believe that I was being watched or followed.

Journey. across Canada in summer 1994

As I think Ive already said in. previous articles I emigrated to Canada in late May. 1994. For six weeks between late May 1994 and early July 1994 I travelled across Canada from coast. to coast, starting in Toronto, visiting various cities and ending up in British Columbia. I saw this both. as something of a. holiday, and the chance to get to know a little better my adopted. country.

As you can. guess, MI5 followed me everywhere I went during these six weeks. In Toronto, where I started this trip in. late May, I was spoken about by one youth to. another with the words "hes an idiot", to which the other replied, laughing sympathetically, "good luck to. him".

A couple of days later I went to Montreal. and stayed at the YMCA downtown. As you can guess (this is all. so predictable, isnt it?) MI5 followed me there and bugged my room at the YMCA. Not only that,. but they managed to set-up an instance of. "newscaster reaction" from a local television station; while I was. watching a Vermont TV news programme on the set in my room, the. woman reporter said, "well theyre just tired and they want to go home", which sounds like a. pretty unprofessional thing to say until you realise she was trying to say of me that I was. the one that was supposed to be tired, and they (ie MI5) wanted me to go. home to the UK.

On the bus journey across the North American. continent, it was quite clear that MI5 were following me every step on the. way. For the first part of the journey they actually put someone on the bus with me, a youth who. said at me "that guys paranoid" and tried to incite other passengers. to attack me. I. stopped for a couple of days in Winnipeg in central Canada, and on leaving the town. heard on the radio a female presenter ranting about "insanity! insanity!". It is very tiring. travelling such a long distance by bus; I took the journey in two steps, each of. about 36 hours; and it is especially tiring when you know MI5 are watching you and harassing. you every. step of the way.

When I finally. got to Vancouver, MI5 instituted the usual harassment, in very short order.. I was surprised how quickly they were able to induce hatred towards me in elements of the general. populace; the Security Service must have employed a. number of agents and serious resources in a very short period of time; and for no. real gain, because I havent been back to BC for almost five years, so all. their "work" appears to be for nothing.. In downtown Vancouver a street person said in front of me, "theyre all talking about. him". For a few days I was staying at Pauls Guest House (345 W.14th Ave); on the day. I left, the owner Paul shouted at no-one in particular, "hes. going to Victoria" - which was quite accurate, I was. indeed going to the provincial capital Victoria on Vancouver Island. But I had not told anyone at the guest house where I. was going; I had only mentioned to my parents back in. England on the phone that I was going away from Vancouver. for a few days. Which leads me to suppose that MI5s bugging of the. phone in my parents house yielded the "intelligence". that I intended to visit Victoria, and they had passed the information on. to Paul.

When I got to Victoria it was. again obvious that the persecutors were "doing their stuff" there as. well. On the street I was identified as being English, although I had not said anything so my. accent hadnt given me away; and returning by ferry. to the mainland, I was abused by a Canadian woman who said,. "hes a nutter! you can run but you cant hide". During my years in Canada I. have never heard the word "nutter" on any other occasion;. I do not think it is part of Canadians vocabulary; so the Canadian woman. on the ferry, who was obviously talking about me, must have been supplied with this word by the English persecutors. And once. I got back to Vancouver, staying at the Austin Hotel on Granville St, I. listened to a conversation in. the apartment block directly opposite, and a man saying, "hes paranoid, so thats as bad as it can. be, so why are they doing this. to him?".

Holiday in the States,. August 1995

By 1995 I was living in Canada, and in August I. went down the eastern seaboard to Florida and as far as Key West by car. As. you can guess (this is all so boring and predictable,. isnt it?) MI5 followed me every step of the way.. I can see in retrospect that this must have been quite easy for them as they had my car bugged,. both on the inside to listen to anything that was said and what radio station I was listening to, as. well as what must have. been a tracker device installed to track it across long distances.

The first city I. visited was Philadelphia. In the old Congress Hall where the first US Congress assembled,. the woman guide started referring to my situation, saying that "all these people in Europe were watching it",. and they were "a little paranoid" at this 18th-century experiment. in democracy. Also I had recently written a newsgroup. post where Id described a (female) poster. as "wet-nosed" (implying "canine"), and a young girl in Philadelphia remarked, "so. he thinks were dogs?" There were two or three more. incidents during this holiday in the eastern States, including a radio station down near Miami, showing "they" had tracked me all the. way there, and were bugging the inside of my car; but I didnt record. the details. and Ive forgotten some of it now. Also down in Miami Beach a French tourist in a lift expressed support. for me with the words, "cest incroyable" ie. its incredible, meaning that MI5s well-known. actions against. me were beyond belief.

To go back a. bit, in about May/June 1995 Id visited New York, again by car, and was insulted several times by people using the same. words that had been used against. me in England. In Central Park, and elderly Englishman. (not a real gentleman - but then the Engish view of themselves as "gentlemen" etc is quite laughable) looked at me and. said "idiot". And while I was. eating in a streetside restaurant a New York youth started laughing and said something. like, "I cant believe it, hes actually here" - I think that was because I. had had an expressed wish to visit New York for some years. before this, although after this visit I wont be going there again for a very. long time.

Visit to Poland December. 1995/January 1996

In. December 1995 I flew (BA again, unfortunately - every time Ive flown BA one. of these incidents has happened, presumably MI5 is happier setting up harassment on British-domiciled carrier) from Montreal to. Berlin and travelled on to Poland to visit. family. MI5 naturally harassed me in Poland during my brief stay. They followed me around. and got Polish people to take part in the harassment.. In one case two Polish youths talked in front of me saying in English. (with marked Polish accents), "fucked up men, fuck you". There. were also other incidents which I dont remember too clearly since it was some. time ago.

The return flight connected through Heathrow, and in. the transit lounge MI5 again set-up harassment against. me. In Poland they were talking their abuse in English, and. in London they set Polish people after me to speak in Polish; they heard me on. the phone to my father, and said "a wiesz ze to Polski wariat", in an almost. sympathetic, inclusive fashion (translation.. "you know hes a Polish nutter"). Once on the flight to Montreal I was again set upon by two English youths, one of whom spoke. and the other listened. The. aggressive "fat bastard" youth said, "if he wants to be a wanker" (its my fault theyre harassing me, you. see), self-justification that "hes. a nutter" (so we have to keep on abusing him, because hes ill), as well as. talking about the town in Poland where I had been staying. He also said, "he doesnt know. who we are", but as already remarked in a previous article, that was at best. a half-denial of my guess expressed in internet. newsgroups that the people after me were MI5 - if anything its a half-confirmation rather than. a half-denial.

These incidents are still going on. You can hear. digitised audio files of abuse on a BA flight to Berlin in. 1998 on the Web at address

On. this flight they were again attacking my mental health; "paranoid, hes paranoid". and "nutter" are discernable. The last "during travel" contact was at Ottawa Airport on. 21 July 1998, when "Alan Holdsworth" the psychopath MI5 agent, dressed. as a vagrant, was pacing aggressively in the departure area. In three weeks I will. again be travelling to Europe; we will see what. fresh acts of molestation MI5 perpetrate during this trip.

MI5 are Afraid to Admit They're. Behind the Persecution

MI5 have issued a formal denial of. any involvement in my life to the Security Service Tribunal, as you might expect them to; but,. more importantly, the persecutors have. never denied that theyre from the Security Service, despite several years of accusations from my corner. on usenet and in. faxed articles. I am not surprised that the Security Service Tribunal found "no determination. in your favour". I am however a little surprised that. the persecutors have refused to confirm my identification of them; by doing so, they. implicitly admit that my guess was right.

"No determination in your favour" says the Security Service. Tribunal

In 1997, I made a complaint to the. Security Service Tribunal, giving only the bare outlines of my case. I do. not think it would have made very much difference if Id made a much. more detailed complaint, since the Tribunal has no ability. to perform investigatory functions. It can only ask MI5 if they have an interest in a subject, to which MI5 are of course free. to be "economical. with the truth". A couple of months after my complaint the Tribunal replied. that;

The Security Service. Tribunal have now investigated your complaint and have asked me to inform. you that no determination in your favour has been made. on your complaint.

Needless. to say this reply didnt surprise me in the slightest. It is a well. established fact that the secret service are a den of liars and the Tribunal a toothless watchdog, so to see them conforming to. these stereotypes might be. disappointing but unsurprising.

It is. noteworthy that the Tribunal never gives the plaintiff information on whether the "no determination in your. favour" is because MI5 claims to have no. interest in him, or whether they claim their interest is "justified". In the 1997 report of the. Security Service Commissioner he writes that. "The ambiguity of the terms in which the notification of the Tribunals decision is expressed is intentional", since a. less ambiguous answer would indicate to the. plaintiff whether he were indeed under MI5 surveillance.. But I note that the ambiguity also allows MI5 to get away with lying to the question of their interest in me; they can. claim to the Tribunal that they have no interest, but at a future date, when it. becomes clear that they did. indeed place me under surveillance and harassment, they can claim their interest was "justified" - and. the Tribunal will presumably not admit that in their. previous reply MI5 claimed to have no

interest.

"He doesnt. know who we are"

In early January 1996 I flew on. a British Airways jet from London to Montreal; also present on the. plane, about three or four rows behind me, were two young men, one of them fat and voluble, the other silent. It. was quite clear that these two had been planted on the aircraft. to "wind me up". The fat youth described the town in Poland where I had. spent Christmas, and made some unpleasant personal slurs against. me. Most interestingly, he said the words, "he doesnt know. who we are".

Now. I find this particular form of words very interesting, because while it is not a. clear admission, it is only a half-hearted attempt at denial of. my guess that "they" = "MI5". Had my guess been wrong, the fat youth would surely have said so more clearly. What he was trying to do was. to half-deny something he. knew to be true, and he was limited to making statements which. he knew to be not false; so he made a lukewarm denial which on the face of it means nothing, but in fact. acts as a confirmation of my guess of who "they". are.

On one of the other occasions when I saw. the persecutors in person, on the BA flight to Toronto in June 1993,. one of the group of four men said, "if he. tries to run away well find him". But the other three stayed totally quiet and avoided eye contact. They did so to avoid. being apprehended and identified - since if they were identified,. their employers would have been revealed, and it. would become known that it was the secret services who. were behind the persecution.

Why are. MI5 So Afraid to admit their involvement?

If you think about it,. what has been going on in Britain for the last nine years is. simply beyond belief. The British declare themselves to be "decent". by definition, so when they engage in indecent activities such as the persecution of a mentally ill person, their. decency "because were British" is still in. the forefront of their minds, and a process of mental doublethink kicks in, where their antisocial and. indecent activities are blamed on the. victim "because its his fault were persecuting him", and their self-regard. and self-image of decency remains untarnished. As remarked. in another article some time ago, this process is basically the same as a large number of Germans employed. fifty years ago against Slavic "untermenschen" and the Jewish "threat" -. the Germans declared, "Germans are known to be decent and the minorities are at fault for what. we do to them". - so they were able to retain the view of themselves as being "decent".

Now suppose this entire episode had. happened in some other country. The British. have a poor view of the French, so lets say it had all happened in France. Suppose there was a Frenchman, of non-French. extraction, who was targeted by the French internal security apparatus, for. the dubious amusement of French television. newscasters, and tortured for 9 years with various sexual and other verbal. abuse and taunts of "suicide". Suppose

this all came out into. the open. Naturally, the French authorities would try hard to. place the blame on their victim - and in their own country, through the same state-controlled media. which the authorities employ as instruments of torture, their view might prevail - but. what on earth would people overseas make of. their actions? Where would their "decency" be then?

This is why MI5 are so afraid to admit. theyre behind the persecution. Because if they did admit. responsibility, then they would be admitting that there was an. action against me - and if the truth came out, then the walls would come tumbling. down. And if the persecutors were to admit they were from MI5, then you can. be sure I would report the fact; and the persecutors. support would fall away, among the mass media as well as among the general. public. When I started identifying MI5 as the persecutors in 1995 and 1996 there was a sharp reduction. in media harassment, since people read my internet newsgroup posts. and knew I was telling the truth. The persecutors cannot deny my claim. that theyre MI5, because. then I would report their denial and they would be seen as liars - but they cannot admit. it either, as that would puncture their campaign against me. So they are forced to maintain a ridiculous silence. on the issue of their identity, in the face. of vociferous accusations on internet newsgroups and faxed. articles.

Have MI5 lied to. the Home Secretary?

In order for the Security Services to bug my home, they. would either have needed a warrant from the Home Secretary, or. they might have instituted the. bugging without a warrant. Personally I think it is more likely that they didnt apply. for a warrant - I cannot see any Home Secretary giving MI5 authority to bug a residence to. allow television newscasters to satisfy their rather voyeuristic. needs vis-a-vis one of their audience. But it is possible that the Security Service presented. a warrant in some form before a home secretary at some point in the. last nine years, for. telephone tapping or surveillance of my residence, or interception of postal. service.

So the possibility presents itself. that a Home Secretary might have signed a warrant presented to him based. on MI5 lies. Just as MI5 lie to the Security Service Tribunal, so they might have lied to a. Home Secretray himself. MI5 and MI6 are naturally secretive services. former home secretary. Roy Jenkins said, they have a "secretive atmosphere ... secretive vis-a-vis the government as well as [enemies]".. Jenkins also said he "did not form a very high regard for how. they discharged their. duties".

It. was only a few years ago that MI5 was brought into any sot the extraordinary. thing is that British media organisations like the state- and taxpayer-funded BBC. take such an active part in the MI5-inspired campaign of harassment. We have after all heard of MI5 trying to. bribe broadcast journalists; but surely there must be a substantial. number who are not bought or blackmailed by the Security Services, and. who take part in the "abuse by newscasters" of their. own volition? The BBC is supposed

to be independent of. the government of the day as well as the Establishment in general. While perhaps it is childish to think that. the BBC is. anything other than effectively state-controlled, the degree of collusion between the BBC and the British. Secret Police MI5 is something you would not find in many countries. Individual. tele-journalists in other countries. would have enough self-esteem not to allow themselves to be controlled by their secret. police - seemingly, BBC broadcasters like Martyn Lewis and Nicholas Witchell have such a low opinion. of their employing organisation that they see no wrong in dragging the. BBCs no-longer-good name through yet more. mud, at the mere request (whether supported by financial or. other inducements) of the British secret Police, MI5.

And when challenged, these broadcasters LIE about their involvement,. with just as little shame as MI5 themselves. The. BBCs Information dept have said. that;

"I can assure you that the BBC would never. engage in any form of surveillance activity such as. you describe"

which is an out-and-out lie. Buerk and Lewis. have themselves lied to their colleagues in the BBCs Information. department over the "newscaster watching", but unsurprisingly they refuse to put these denials. in writing.. Doubtless if the "newscaster watching" ever comes to light, Buerk and Lewis will then continue to lie by. lying about these denials. So much for the "impartial" BBC, a nest of liars bought and paid for. by the Security. Services!

It is obvious. that the persecution is at the instigation of MI5 themselves - they have read my post, and only. they have the surveillance technology and media/political access. Yet they have lied. outright to the Security Service Tribunal. Similarly, BBC newscasters Michael. Buerk and Martyn Lewis have lied to members of their. own organisation. The continuing harassment indicates they are all petrified of this. business coming out into the open. I will. continue to do everything possible to ensure that their wrongdoing. is exposed.

MI5. Persecution Update: Friday 11 June, 1999

Harassment in a pub in Clapham,. Tuesday lunchtime

Once. a month, or once every other month, I meet a Polish friends of mine who lives in Clapham North, and sometimes. we go to a particular pub near where he lives. The last time was some two months ago; I did not. have my minidisc-walkman with me, and consequently was. seriously harassed by people MI5 had instructed. to harass me, in the pub.

This Tuesday, 8 June 1999, we again went to the same pub. for a pre-meal drink.. This time I did have my minidisc-walkman with me. As you can guess, we were followed into the pub by a couple of young. people (Im getting older and older - isnt it funny how the MI5 agents. all look young these days?). They started talking about my. situation, in particular some travel I had booked the previous. day. Unfortunately, they were talking fairly quietly, and my minidisc didnt pick. up their speech.

MI5s schizophrenic reasoning is that simultaneously I. am very important and worthy of their acts of persecution, and I am also totally. unimportant and their abuse of me "doesnt matter". Perhaps. they should test their agents and managers for obsessive. personalities or psychotic features in the same way as employees are drug-tested. MI5. might lose their "worst cases" employees if some. psychological testing were applied to their recruitment. procedure.

Toothless Watchdogs.. What a Surprise.

Recently I have been engaging. in communications with two watchdogs, the Security Service. Tribunal which deals with complaints against the security service (and always clears MI5 of. any wrongdoing), and the Data Protection Registrar, which is mandated to investigate misuse of personal data. held on. computer.

In a letter to Nick Brooks, Security. Service Tribunal secretary, dated 20 April, I asked him if. the Tribunal, as an allegedly independent body, had the means to investigate complaints. against MI5 other than asking MI5 to themselves investigate complaints.. To my disappointment, his reply two weeks later answered the. question only indirectly, in the negative. Whatever. the reader might think of the merits of the case I have been putting. before you in faxed articles this last year and half, you will surely recognise. that it is a significant anomaly for the Tribunal to have no independent means of investigating complaints, particularly. given the view expressed. even by previous home secretaries that the security

services are. untrustworthy.

MI5 Persecution: No. Justice for the Victims of MI5

In a previous article I detailed. the similarities between the current MI5 Persecution. in England, and other historical instances of similar persecution, notably that by. the Nazi Germans in the thirties and forties. The Germans persecuted first the mentally ill, the. epileptics and those suffering from schizophrenia, then moved on to. racial groups; in todays Britain the persecution is. again directed at those with mental illness, which the British in. their cowardice find easier than taking on racial groups as the Germans did. But. just as in Thirties Germany there was no recourse against. a malign and omnipotent state, so the MI5 Secret Police in the modern British Fascist State allow no. justice for their victims.

No Recourse Against the Security Services. Illegal Harassment

It has become. apparent to me over the last nine years just how loaded the dice are. in todays Britain, a fundamentally fascist country which masquerades as a democracy. Britain is a. democracy in name only; the Establishment, the. defence and MI5 secret police are always there, regardless of which party has been voted into power most recently. - and from "New Labours" conduct. in office one finds it difficult to tell them apart from Old Tories, in their crackdowns on the. sick and vulnerable in society.

In thirties Germany the victims of. the Nazi regime had no legal recourse against their State oppressors; and in todays. Fascist British state, the victims of the Establishment and its MI5 Secret Police similarly have. no recourse against the illegal state-funded. and organised oppression. There is supposed to be. a mechanism for dealing with MI5 crimes, in the shape of the Security Service. Tribunal and Commissioner; yet these have never found favour of a plaintiff. One might. as well ask the Nazi SS to investigate crimes against epileptics or Jews as ask the Security Service. Tribunal to investigate MI5. crimes against British citizens; it is quite obvious what the answer is going to be, regardless of what you say to them,. and what evidence you provide. The Tribunal and. Commissioner are a mere formality, a whitewashing. body to give the Secret Services a veneer beneath which they hide. their shabby criminality.

"Institutional. Racism" and Bigotry in the Metropolitan Police

The recent inquiry into the racist murder. of Stephen Lawrence found clear evidence of. systematic and deliberate racism in the Metropolitan Police, which cannot have surprised. anyone. Commissioner Sir Paul Condon accepted a somewhat lukewarm definition of institutional racism. as being "unconscious". In truth, and this truth. must surely be obvious to anyone who has any familiarity or encountered the great British. police, the Met has not. just "unconscious" racism, but very clearly "conscious" and deliberate. racism, of the kind that would have done Thirties Germans proud. And it is a bastion of such open racism - when many other. parts of

society. are learning to live in a multicultural environment, the Met is still living in the past in. its attitude to the minorities.

But in addition to the. systematic racism confirmed by the Lawrence inquiry, there is also something much more relevant. to this case, which is systematic police bigotry against the. physically and mentally disabled, which I personally have experienced in my dealings with the. police over the years. You cannot expect equal treatment. if you are mentally disabled. I tried. to make a complaint to the police in 1995 about the harassment I had been subjected to for several years.. As soon as they found out I had mental illness,. they refused to even talk to me. I tried again in March. 1999; the police made various threats to me, while ranting about "your paranoid rubbish" in reference to the. complaints expressed to them.

The. police refusal to do the job they are employed and paid to do is extremely serious, particularly as this case is highly. important, indeed key to the whole issue of British self-perception at the end of the. 20th century and the beginning of the 21st century. Britain has lost much. in the last fifty years - it has. lost an empire, it has lost its self-respect and its identity as a people. If the MI5 persecution finally makes it. into the light and. the Security Services are seen for the rather cheap bullies their behaviour indicates, it will have. a massive and harmful effect on British. self-perception in the new century.

Security Service. Tribunal - Blatant Whitewashing

A. few weeks ago I spoke on the phone to Nick Brooks, the Secretary of the Security Service Tribunal, which is supposed to deal with. cases of MI5 transgression. I asked him if the. Tribunal had ever found in favour of a plaintiff and against the Security Service. He answered that as. far as he knew, it. had not.

I also asked Mr. Brooks if the Tribunal had any means of investigating allegations of criminal. activity by MI5, other than asking MI5 themselves if they had engaged in such activity. His rather circuitous written. reply states that the 1989 Security Service Act. provides that "it shall be the duty of every member of. the Service to disclose or give to the Tribunal such documents. or information as they may require for the purpose of enabling them to carry out their. functions under this Act". Which is a very round-about way of saying -. "No" - the Tribunal has no way of investigating MI5 crimes -. None At All.

Setting up the S.S. Tribunal, and creating. a Security Service Commissioner, was really an act of falsehood by the government. It. is generally recognised that MI5 are out of reach. of the normal criminal justice system - the police, as we have. seen, have no intesot answer to the government; in a previous article I quoted Roy. Jenkins speaking of "a secretive atmosphere..... secretive vis-a-vis the government as well as [enemies]", and. a "lack of frankness" from MI5.

If the government wanted to, it could reform the secret services. and ensure. they acted in conformance with the laws which have been enacted for them in. the last ten years. But apparently the present government does not see any need to ensure security service compliance with the law.. As noted above, the regulatory machinery. for MI5 is deliberately weak; the Tribunal has no independent means of. investigation, and it is simply a waste of time complaining to the Tribunal or. Commissioner.

Every so often,. fresh revelations come to light of secret service transgressions. We have heard from Shayler that MI5 bugged Jack. Straw and Peter Mandelson; we have heard. from Peter Wright that MI5 plotted to see Wilson ejected. from office; yet so closed is the system of government that the law is never enforced against MI5. when they "bug and burgle" everyone from politicians to ordinary. citizens.

No. Justice from the Legal System, either

Britain has a civil and criminal justice system which effectively. limits many complaints from being heard. For a. civil complaint to be brought before a. court, you need a solicitor willing to act on your behalf. Supposedly it is possible to represent. yourself as a Litigant-in-Pthe basis of being "frivolous and. vexatious" or "disclosing no cause for action in law". This is exactly what happened. to me in 1997 when I twice tried. to take the BBC to court for spying on me in my living room at home; my case. was twice struck out, and on the second occasion an order was. made against me that I could not bring further civil litigation against the BBC without. leave of the court.

As the reader can. guess it is quite impossible for a person with schizophrenia, who complains about the. secret services and media interfering in his life, to find. a solicitor willing to represent him in legal action against the persecutors. I have quite a lot of. evidence of the continuing persecution which I have posted on. the website, even if the evidence. is quite tentative and perhaps open to varying interpretations. But. I have tried several firms of solicitors; some of them have acted unprofessionally and abused me; all of. them have refused to represent me. My psychiatrist gave me the name. of the firm of Bindman and. Partners in central London, and I have approached them twice. On each occasion they refused to accept my instructions. Plainly the problem. with Bindmans, which they have. admitted, is their bigotry against mentally disabled people; yet this is not just something that. is wrong with Bindmans, it is something that is wrong with the legal system as a. whole, since the legal. system necessitates finding a solicitor willing to represent. you in order to bring a case to court, but it does not have a mechanism for providing a. lawyer in the case where no solicitor is willing to take on your case.. So the British legal system is such as to prevent cases. such as mine from ever receiving an airing in a court.

So much for the civil courts. But the criminal justice system. is no better. Two years ago. the Protection from Harassment Act came into force. But again, while the Act is. all very well on paper, in practice it is unenforceable in my case, since it would require Police. action to see the law implemented, and if. the police cannot even be trusted to conduct a

murder investigation competently (in the Lawrence. case), then what chance is there of their investigating. complaints against the Security Service? Of. course, it would be possible for me to personally issue proceedings through a. private prosecution either against MI5 themselves, or against. one or more of their media tools; but here we see the same problems as with the civil courts,. because first of all I would have to find a lawyer willing to act on my behalf. Litigants-in-person. do exist in the criminal courts, but the Attorney General can bring such a. prosecution to an end by taking it over and entering a. plea of "nolle prossequi"; and I suspect that if I were to bring. a private prosecution against either MI5 or one of their media tools, then this is exactly. what would happen.

So much for British justice. But if. anything the wrongs that have been perpetrated on me by the British justice system. are quite mild to what others have suffered. Others have been wrongly. convicted based on police evasions and lies, and. spent many years in jail based on false charges. I should count myself lucky that despite the best efforts of the. MI5 secret police, I have not. acquired any criminal charges or convictions; which shows. that for all their resources and influence, and the clear imperfections in the British legal system, there are still. limits on how much subversion MI5. can achieve.

The latest in a. long line of injustices

A comment I heard during. the recent scandal of the police mishandling of the Lawrence murder investigation is that "its. not as if the police themselves murdered him".. This is not a particularly wise statement to make about the case, since it could be. argued that the four alleged murderers. were aided in their crime by the expectation that the police would deliberately botch the investigation - which of. course is exactly what. the police did.

But in my case, this would be a. completely inaccurate thing to say - since the MI5 secret-police have expressly. been trying to nine years now to see an end. put to my life, either by having me incarcerated and my liberty ended, or by forcing self-termination on me. It is exactly as. if the secret police "themselves murdered [me]", since that. is what their aim is in. their campaign against me.

The public has heard of instances of police mishandling of cases,. of police manufacturing evidence, lying in court, extracting. false confessions to clear up crimes, et cetera. Various instances. of extra-legal activity by the secret services have also come. to light in the last few. years. The unhappy truth is that what MI5 have been doing to me for. the last nine years is really nothing out of the ordinary for them. To me it seems unbelievable that this sort of systematic campaign. of harassment, which thousands and thousands of people. in this country and abroad are. well aware of, could exist for such a long period of time with the media maintaining "omerta". But my case is not the first. such instance of persecution by the "British secret police", and judging by the lack. of any real controls on MI5, I very much doubt it will be. the last.

MI5 Have Systematically. Destroyed My Life

This is getting depressing. From the feedback Ive received, the. recipients of these faxes are tired of hearing. my complaints, and in truth I am tired of sending them. The reason. I havent yet ceased sending faxes is because I cannot. think of any other effective means of replying to MI5s actions against me, and I feel I have to do. something to try to defend myself. Three/four years ago I got the MI5 harassment out of my system. by posting about it on Internet newsgroups, and for a few. months this tactic was quite effective - I received (and indeed still do today). support from newsgroup regulars, and felt. I could make my voice heard and break the MI5 monopoly. on access to the British media. But that was years ago, and today nobody gives a tinkers cuss about. my internet posts - so I have sought to escalate matters by communicating directly with the. politicians who allegedly say how. this country is supposed to be run.

Of course, its quite expensive. to keep up a campaign of fax messages for many weeks. Each set of faxes takes approx 50 hours to. send over the weekend, and costs perhaps 35. My phone bill for the last. quarter was 350. These. figures are naturally insignificant compared to what MI5 have been spending against me over a similar period. It also takes a lot. of time and energy to. create a new article every week, and try and find new and fresh aspects and viewpoints on MI5s. persecution of me. I am beginning to run out of. both new topics and energy to write these articles.

So I have a suggestion. to put before the MI5 persecutors who have been wrecking my life since. 1990. In a few days time I will be going on holiday to Poland and Germany, for. a couple of weeks. Previously, almost every time I have travelled. by plane, or gone anywhere on holiday, the MI5 "wreckers" have been. most assiduous in destroying these trips. My suggestion is; if MI5. leave me alone on this next trip, I will cease transmitting. these articles. If, however, there are any clear instances of harassment (and I am very capable of recognising MI5 harassment when I. see it), then I will make public these instances and. publish any recordings I may make of them, and, unwillingly and unhappily,. continue the articles.

Read about the MI5 Persecution on. the Web

Keith Hill MP (Labour - Streatham), my elected. representative, as ever refuses. to help.

MI5 Refuse to Allow me. to have a Normal Life

Its kind of difficult to contemplate having a normal existence. when you know your entire house is bugged from top to bottom,. for audio and, very unpleasantly, video; when. your employment is systematically destroyed, over and over again; when every time you leave. the country your travel is disrupted by MI5 plants on. the plane yelling abuse at you..... you get the idea. I would like to have some semblance. of a normal life, like my Polish and English friends do. But MI5 have made this. impossible, and they have leached massive resources from the taxpayer to institute. a life not worthy of the name. on me.

A few years ago MI5 were very open. about their aims in persecuting me. They were shouting "suicide" at me, both in Canada. where I lived at the time, and during my occasional visits to London. You. cant get much clearer than that. There have been instances as recently as a. few weeks ago of this intention being voiced. by their side; on 15 April 1999, a woman at the next ticket counter at. the Royal Festival Hall said;

"it would kill it, you know, it would just be overkill.... they can't stop can. they"

meaning that "they" were trying to "kill it". i.e. me and they "cant stop". The audio file is. at;

I wonder why they "cant stop". Nobody (who. doesnt know already) believes my claims - so what difference would. it make, if they were to "stop" persecuting me? Perhaps. what this persons remarks indicates, is the depth of. the obsession MI5 have with this case. They have chosen at random a person from the general population,. and done their worst to ruin my life. What is wrong with these people, that they persecute a. national of the country whose citizens they are supposed to. protect?

No Chance of a Harassment-Free. Job

Since the. harassment started in 1990 I have had three jobs, the first near Guildford,. the second in Oxford, and the third overseas in Canada. All three jobs have been systematically destroyed by MI5. It is so ironic. that MI5 employs a team of. agents, each well compensated for their efforts, to persecute just one person paid a mere fraction of what. they get for their "work". In fact, it is a joke that MI5 is allocated resources for. this sort of effort. If this area of government were run along commercial. lines then MI5 would be very. rapidly closed down, they produce nothing of any value, instead spending their time obsessed with the. bugging and surveillance of their. former employees like Shayler, dangerous subversives like Straw. and Mandelson, and "threats to national security" like yours truly.

Applying for my. first post university job

When I. was applying for my first post-university job in the closing months of 1990, I found at two or three job interviews that. MI5 had got there ahead of me. Interviewers knew what words to repeat from what had. been said. at my home recently; MI5 had supplied them with words to hurt me, and the "British secret police". were trying to wreck my job search and discourage me from joining the world of work.. This and the continuing

harassment in the media and by the public meant that the search for a. job took very much longer than it would ordinarily be. expected to take for a person with my. qualifications.

With my first job near Guildford came. the knowledge that MI5 were doing everything possible to make me lose the job.. Despite their efforts I managed. to stay in work for ten unhappy months, during which they made very clear to me that they. were bugging my workplace, my accomodation in Woking,. my car, my home..... and they also made clear that they had "got to" my employer in. Guildford.

Employment. with Oxford

I was able to find a new job, with Oxford Computer. Training Services (now ARIS/Oxford), quite quickly. But it. became very clear, very quickly, that MI5 were treating this job the. same as the first; they tried to get the other. employees and in particular the managers to attack me. It was plainly MI5s intention that I be sacked. fro this job. But I was not sacked; instead, after. almost a year of abuse from OCTS managers, I was forced to seek medical. help, and had to take two months off for medical leave.. OCTS MD Hugh Simpson-Wells was motivated in keeping me on by the fear that if he. sacked me, then I would take him to court for the treatment OCTS managers had meted. out to me during 1992.

Emigration to. Canada

When I emigrated to. Canada in 1994, I did think that perhaps MI5 would leave me alone, given that I had made the effort to leave. the UK and try to find a new life. overseas. I could not see any reason why they would continue to harass me over in Canada. But clearly the MI5. agents had their salaries to think. about, since continue to harass me they most certainly did, at my home in Ottawa,. and by getting fellow employees to speak against. me, as had happened with previous jobs in the UK.

MI5 are. denying me a future in work

Former Chief Constable of Devon. and Cornwall John Alderson had this to say regarding MI5's. activities;

"MI5 is not under. the same restraints as the police. They infiltrate organisations, people's jobs and lives. They. operate almost like a cancer."

Currently I am on disability,. and I can see that MI5 are denying me a future in work. It would be an insult to logic for me to return to. work and find a. job, in the knowledge that an entire team of MI5 agents, paid in. total many times what I would be earning, would have the objective of seeing. me "done down" in the employment, and ejected from the place of work. This situation is completely. wrong and nonsensical - I would very much like to have. a job, but MI5 are preventing me from even thinking about returning to work. The culture of secrecy. in MI5/MI6 means there is no objective oversight of their. expenditure, when external oversight and greater transparency might lead. to wasteful and illogical operations such

as. that against me being shelved.

Watched. and Harassed at my Home and Accommodation

As you will know if you have been reading. these articles, MI5 have watched and harassed me at my home, and at every accommodation. Ive had since 1990. Theyve also watched me. at neighbours houses in London, and at short-term accommodation such as. hotels and bed-and-breakfasts. They have used the "words". gained from these watching activities against me, by passing these. words on to other people such as OCTS managers for them to make clear that I am being. watched where I live.

Harassed. at rented rooms in Oxford in 1992

This was at its worst in 1992 in Oxford, where during the week I. lived at rented accommodation in Oxford, and at weekends returned. to my parents home in London. I was being severely harassed by managers at my. place of work, OCTS; and it was clear. from the things they said that they were being supplied by MI5. with details of my home life, that they were being supplied with words to repeat at. me.

In 1992 I moved house. in Oxford many times, living at a total of five rented accommodations in ten. months. In January I started off living in a rented room at Headington near the ring road /. A40 intersection; then when it became clear that house was being bugged, moved to a rented. room in Botley, some miles away. It was at the house in Botley. that I had an "interactive watching". experience with Martyn Lewis while he was reading the news; I threw a term of abuse at. him; he first flinched, then gave a gsult of what I had just said, he was no longer. "on my side".

So I moved house. again. This time to a place in Cowley, near the Rover car works, where I stayed for a few weeks.. Because of continuing harassment at work, I soon moved from this accommodation, to yet. another rented room on Iffley Road. By this time I was. very ill and being abused continuously at work. Again, MI5. followed me to the rented room on Iffley Road, and created new instances of "newscaster watching".. There was a television in the room which I watched, and as you can. guess the newscasters got at me when I. was watching the television. Also once I was assaulted, if thats the word for. what happened, on leaving the house; a youth grabbed me by the coat. lapels, roughed me up a bit with various terms of abuse. I did not report this assault to. the police, because what was happening to me at work was very much worse, and nobody seemed. to think that that was worthy of being reported to the police. Later that day at work,. Alex G, a fellow employee, said "I heard he was assaulted".... I. had not told anyone at work about the incident that morning..... so once again. it was made very clear that MI5 were watching my rented. accommodation and giving information about what was going on there. to managers at work.

So I moved house yet again in late autumn 1992, this time to a. rented room in a large. house on Woodstock Road. I stayed there for several weeks as the situation. at work deteriorated due to OCTS managers abuse, until I was forced to take sick. leave from work for two months and attend hospital as

an outpatient; at which point I gave notice on. the room, and returned to London.

MI5 continued to harass me. after the diagnosis of serious illness was made. As reported previously, they harassed me on a flight. to Spain in December 1992; and in 1993, when. I returned to live and work in Oxford, they again bugged my rooms, as well. as my workplace, although the intensity of the. harassment was very much less than in 1992.

Watched, followed. and harassed in Canada

It dismayed me. to find that MI5 would not leave me alone after I had settled in Canada. In. January 1995 I rented an apartment at the Bayshore complex in Ottawas west end. For some weeks. there was no sign of the "buggers". But then it started all over again. They first. bugged my car, which had a car alarm installed. - the alarm went off two or three times in a. single evening, and the following day gave a signal that the car had been broken into.. Then they bugged my apartment, and in particular they installed bugs on the phone line. in my apartment.

In September 1995 I moved to a new apartment in Ottawas. Bytown Market area, the restaurant and entertainment heart of Canadas capital.. This proved a serious mistake.. In the west end I had been fairly distant from the centre of town. where MI5 concentrated their efforts at turning people against me. In the Market area it was much easier for the. persecutors to motivate people to harass me, and over the. next couple of years there were frequent instances. of harassment by the general public.

From 1995 I. had some Polish friends in Ottawa, and as the reader can guess, MI5 have spent much effort trying to break up this. friendship. They supplied various things about my home life. to these friends, for example where I was living in. the Market, directly over the road were the studios of a music. radio station, which you had to "look up" to see; and MI5 told these friends that I was. "looking up" to see the radio station; so the friends then replayed these words back to me, that I was. "looking up". MI5 have also made various. sexual slanders against me, and these friends also unwittingly replayed some of the words they had been imprinted. with by the MI5. persecutors.

MI5. Will Never Allow Me to have a Normal Life

I have heard many excuses as to why MI5. continuously prevent me from having a normal life. We are told that MI5 are. defending the country against a tere. to zero.

When I have travelled abroad, they always put their people on the. flights, on the journeys I undertake, to. continue the harassment, so that I am put off further. overseas travel, and chained to my home in London. Yet even this is illogical,. because when I lived in Canada, they would still put people on flights back to the UK.... and what possible reason would. they have for doing that? Perhaps the truest words. to describe the MI5 persecution is that reason has nothing to do with their. activities - sane people do not behave in the way the MI5 British Secret Police. have been

doing.

Summer 1999 - more MI5. harassment?

In only a few days. time I will be going to Europe again. This time I have deliberately chosen to. travel by a non-UK airline; so we will see if they put. their paid agents on this foreign carrier, we will see if they try to harass. me on this non-British flight.

If they do harass me. on this trip to Europe, or if they resume the harassment in London after I return home, then I will. continue to report their activities in these faxes. As I said at the beginning. of this article, I would very much like to not have. to send these articles any more, but that is not my decision to make - it is entirely. up to MI5 to cease. their pointless persecution of me, once and for all.

MI5 Persecution Update: Friday 9 July,. 1999

Harassment. in Poland, July 1999

And still it continues..... in my last fax I said that provided MI5 made no attempts at harassment during my two-week holiday this summer, or. after I returned to England,. then I would discontinue these faxes. Unfortunately MI5. have continued to harass me, both during the holiday and after my return to London. I really dont want to continue these articles,. since they take up so much time and effort,. not to mention expense; but the Security Service wont even let me have a holiday in peace and. quiet, so I have to make further efforts to bring their activities. out into the open.

In early July I visited my aunt and her family in Poland.. On Saturday 3 July 1999, I went to a family. barbecue at an allotment outside the city. One of my aunts family. has previously shown himself to be in the "enemy" camp, by saying the Polish equivalent of "something. wrong with him", and various other unprovoked insults. It is disappointing that. one of my family could forsake. the usual ties of blood and take part in the actions against me, but thats the way it is. This guy turned. up at the barbecue, and started. making insults against me. In particular, he started to say something about the. video camera which I had brought along on the trip, and the relevance of the video-camera to my. fight against the persecution. It seemed pretty obvious to me that my enemies had told. him to turn up to this occasion, and most likely. schooled him in precisely what words to say;. since hes an unintelligent person and would not be able to think for himself what insults. to make against me.

Harassment in London, week ending Friday 9 July. 1999

Got. back to London Wednesay afternoon. Two incidents on the Underground returning from the airport. Unfortunately I. wasnt recording because I wasnt expecting trouble, so these slipped through the. net. One of these was verbal sexual abuse, of the type Ive. heard many, many times before these last three-and-a-half. years.

Yesterday, Thursday. 8/July/1999, I switched on Heart FM which had never "got at" me. before.... and the presenter started making jokes about "mad, crazy" etc. Again, wasnt recording this because Id never had any. trouble from this radio station and wasnt. expecting any.

Also yesterday, on a bus (155?) from Balham. to Clapham, a couple of girls started harassing me with taunts. of "crazy". By now I was expecting trouble and recorded. an audio file of this instance of abuse, at web URL;

The. cynical reader might think my demeanour or behaviour had given rise to the taunts of "crazy". recorded above. But I assure you my behaviour on the bus would not have made anyone think I was ill; and the taunts. the previous day were the same sexual words as previously; so I'm quite. sure that. these incidents are either deliberately staged, or indicative of an overall high. level of awareness among the London public, particularly in the. part of London where I live.

Keith Hill MP (Labour - Streatham), my elected representative, as. ever refuses. to help.

MI5. Persecution: Harassment through the Radio

One of the aspects of the MI5. persecution has been harassment through the broadcast and print media; and. one of the aspects of harassment through the broadcast media is being "got at" by radio. presenters. This being "got at" from the radio takes. various forms, the most obvious form being through overt or hidden words and insults. But there. are other, subtler forms. In Canada a couple of years ago, I used to listen. to the local radio stations. every morning driving to work, and listened to the music only, switching. between radio station presets rapidly as soon as a presenters voice came on, so that I would not. be subjected to any verbal harassment by the D.J.s. But they. found a way around this; they kept on playing the same song, every bl**dy morning at the. same time, which had the words "all coming back. to me"; the perceptive reader will remember that the words "coming back" have special meaning. (see the Private Eye cover. at web URL; for the
hidden. meaning).

And thats not the only time theyve allowed the. songs themselves to be used as abuse against me; many years ago Radio-1 in the UK did exactly. the same, and the DJ even made it explicitly clear by saying, "dont. you sometimes. feel as if the songs were made just for you".

"We. should be done for attempted manslaughter" says Chris Tarrant

Capital Radio DJs have been. "in on it" from the start. One of the first things I heard in the summer of 1990 was. from a Capital DJ who said, "If he listens to Capital then he can't be. all bad" (supportive, you see. We're not bastards).. Much of what came over the radio in 1990 is now so far away. the precise details have been obliterated by time. No diary was kept of the. details, and although archives if they exist may give pointers,. the ambiguity of what broadcasters said would leave that open to re-interpretation.

In spring 1994, Chris Tarrant on his Capital morning. show made an aside to someone else in the studio, about a person he didn't identify.. He said, "You know this bloke? He says we're trying to kill him. We should be. done for. attempted manslaughter".

That mirrored something I had said a day or two before. What. Tarrant said was understood by the staff member in the studio he was. saying it to; they said, "Oh no, don't say that" to. Tarrant. If any archives exist of the morning show (probably unlikely). then it could be found there; what he

said was so out of context that he would be very hard put. to find an explanation. A couple of days later, someone. at the site where I was working repeated the remark although in a different way; they. said there had. been people in a computer room when automatic fire extinguishers went off and those people were "thinking of suing for attempted. manslaughter".

Pirate Radio "gets. at" me

In another incident in 1990/91, Id been listening to. a pirate radio station in South London for half an hour, when there was. an audible phone call in the background, then total. silence for a few moments, followed by shrieks of laughter. "So what are. we supposed to say now? Deadly torture? Hes going to. talk to us now, isnt he?" which meant that they could hear what I would say in my room. Note the word "deadly". - they give away their. purpose.

It constantly surprised me that MI5 are so easily able to. subvert broadcasters, and, in this case of the pirate. station, to do so, so quickly. I think the answer to this question is that they. must have very wide contacts in the broadcast media;. presumably some or in fact many of those contacts are. literally "bought". In the same way as they tried to buy Jon Snow of Channel Four news, they must have bought many. broadcasters and use them both. directly to make insults against me, and promulgate their points of. view; but also, they must use these "bought" broadcasters to influence other television and radio presenters, who might not even. be aware that it was on MI5s behalf that they. were being influenced to "get at". me.

BBC-Radio-1 D.J.s celebrate my job termination. in November 1991

This is another one from the "early. years". At the beginning of November 1991 my employment in. Woking, Surrey was terminated. Chris Tarrant of Capital-FM had already made nasty remarks about. both my work for the company, and the managers of the company themselves. - "so theyre not really a serious. company, well theyd have to be to employ you wouldnt they".

So when I was terminated, as you can. expect, BBC Radio 1 D.J.s celebrated. On the Saturday afternoon (either. 9/Nov/1991 or 16/Nov/1991 - I cannot remember. precisely) I briefly listened to Radio-1 and heard the disc jockeys loudly. proclaiming "youre useless, you should be sacked". On the same day, I went down to. the Kwik-Fit in Tooting to get my cars tyres replaced, and in the office ran into a couple of their staff, one. of them with an Australian accent, who said "what do you think about it then?. Its getting killed on. the radio."

Plainly, if a random car-repair shop in Tooting. knew about the persecution, then many. thousands of other people across the capital and all over the country must have known. And the phrase. "getting killed" shows very clear awareness of what the MI5. Persecutors intentions towards me were in 1991, and. judging by the continuing harassment, still remain. today.

Recent Feedback. from Virgin-Radio

As readers will know,. from mid-March 1999 for some four months, every weekend, I have bombarded Westminster MPs. with faxes about the terrible, all-encompassing MI5 Persecution. (Jesting aside,. it really is terrible and all-encompassing, in the UK anyway.) In June 1999, after. I'd been at it. some three months, I started getting "covert" feedback from Virgin Radio.

The first feedback I got was from Danny Baker, on Sunday 13th. June. That weekend. I was sending an article which contained biting criticism of the police inaction in this case. Danny Baker on his Virgin. radio show started an angry rant that "he knows it's rubbish", ie. he was rubbishing. what I'd said in that weekend's. faxed article. Unfortunately I wasn't recording this. programme.

The next possible Virgin-Radio feedback was a week later on. 19th June 1999. This is contained in the audio file. above, in which Johnny Boy on his "Wheels of. Steel" programme says;

"and if you would like. to put a triple play together, ahhh.... because quite frankly Hipster. and me are running out of ideas...."

He goes on to counter Hipster's "how dare you" with. a protestation that he is "only. joking". You can listen to this incident on my website at URL;

What I reckon is that my article faxed to MPs that. weekend was forwarded by one. of the recipients to Virgin Radio. My article had included the words;

"I am beginning to run out of both new topics and. energy to write these articles."

So. what I reckon is that Johnny Boy read the article.... and rephrased the above line "run out of ... new. topics" to "running out of ideas". I recognise that this is a pretty tenuous inference to make.... but. do listen to the audio file,. from the "ahhh...." pause in JB's speech you can guess he is about to say something "risky" and at. someone's expense. Anyway, I listen to the Wheels. of Steel regularly and will continue to do so, recording it as I always do. - so any future funny remarks will get immortalised on my website! (There was. a previous incident from August 1998. which is preserved at web URL;

but I am sufficiently uncertain about it that I have not. included it in this. article.)

First Ever Radio Reference - Alan Freeman. of BBC-Radio-1

The first time I was ever referred to on. the radio was sometime in May or June of 1990, by Alan Freeman of BBC-Radio-1. Note. that this isnt an "interactive listening" episode, its different, this. was Freeman reading out a. letter from one of my "real life" enemies.

Id acrimoniously broken up with some former. friends in January of 1990, and I think. they were still trying to cause me trouble in June of that

year. Freeman. on his rock show read out a letter from an "Andrew Turner"; one of my acquaintances from January 1990 had. been called Andy Turner, so I think its the same guy. Freeman quoted Turner as. saying various things about me, in particular Freeman said "thats. a hell of a letter you wrote there Andy", "with a schizophrenic you're never. alone", and something. about the "one who wore out his welcome with random precision" (from the words. of the Pink Floyd song).

When I was looking for. primary causes of the MI5 persecution, this letter which Freeman. had read out on his programme struck me as being potentially one of the sources of the persecution. I. know Turner and various others in that group were very bitter at what they saw. as their failure and my undeserved success, and they. were quite determined to upset the applecart. Of course several other primary causes are possible;. I do not know why MI5 chose. me as opposed to someone else, and MI5 are hardly likely to. tell me.

"Absolute Obscene" David Hepworth of. GLR

This one Ive assigned a 100% rating on the. website. There are actually two separate incidents, which are. linked through the D.J.s choice of words. The first incident can be heard in computer audio at web. URL;

On 21/Feb/1997, I was listening to BBC GLR, by stealth.. Back in 1990 I used to have. Capital blaring out of the speakers all over the garden ("if he listens to Capital then he can't. be all bad", thanks ever so much). But now I listen on my walkman on headphones with the volume turned. right down. It could not possibly be. overheard by any listening device, no matter how sensitive, because sound does. not carry from the phones.

Yet somehow they. are still able to tell which station I am listening to on the walkman. And last night, I bravely tuned. to GLR 94.9FM at around 8.45pm. Everything went well for the first half hour. or so. Around 9.10pm, Hepworth said the following after the song "Come. Around" by the Muttonbirds.

"coming up after this,. we got the rock-and-roll A-level, we have, I assume, Brian do we have an embarrassment of prizes in. there, we do, don't we, absolute obscene amounts of prizes, there will no doubt be. a riot at the back door, and that's, er, A-level coming up after. this"

The key phrases. in what he said are, "EMBARRASSMENT of prizes", and what he himself emphasized verbally, "ABSOLUTE OBSCENE. amount of prizes". It is my belief (based on content and. tone of voice) that when he spoke these phrases he knew I was listening, and that the phrases refer. directly to my situation. The "EMBARRASSMENT". is the embarrassment he and other media people would feel at. having their wrongdoing exposed; the "ABSOLUTE OBSCENE". (which he verbally emphasized) described the disgusting sexual abuse which. the harassers have been throwing at me.

There was a second incident, on 9/May/1997, which may be found on the. web (with computer audio) at. URL;

This incident. again contains the words "absolute embarrassment of prizes", with the same emphasis as the first. instance, and laughter following the phrase. So theyre aware of the complaint I made on Usenet. after the first incident; and they are. so arrogant that they do exactly the same again. They are so arrogant, they know they are. being recorded and that what they say will be. published on the web, but they dont care. What corrupt media, and what a corrupt country. to have such corruption in its media.

Three Years of "MI5. Persecution" Faxes

Ten Thousand Faxes, and Still. No Breakthrough

In the last three years I. have sent at least 5,301 faxes directly from my computer, and 4,478 faxes through Demons extremely useful TPC.INT. service, to politicians and the media, in the subject. of the "MI5 Persecution". This has obviously cost me quite. a lot of money, not to mention. time and effort. The aim of all this communication has been to try to put discussion. of the "MI5 persecution" into the public arena; unfortunately, this aim has not. been achieved, yet.

This fax will be. my last transmission for the time being, since the summer recess is almost upon us. Depending on what the persecutors do between. now and the autumn, I may or may not resume. faxing later this year. In the article dated 18/6/99 I said Id. stop the articles if MI5 left me alone; but they seem to have no fear of these articles,. since they kept pursuing me in Poland and after. my return to the UK. Again, if they leave me alone this summer then. I wont have to resume the articles in the autumn; but I think its fairly obvious that MI5 have nothing better. to do with their time than to go after me, and. its almost pointless to make this offer when I know. they wont cease harassing me.

TPC.INT 1996,. 1997, 1998.....

Three years ago I was living in. Canada, and the only economic way of sending faxes to. the UK was through the international email-to-fax gateway TPC.INT. This highly useful and totally. free service converts emails (which may have Postscript-formatted attachments). into faxes which it delivers to. any number within the UK. Using the telephone book, I constructed a computer database of. M.P.s fax numbers, and used this database to deliver copies of the "FAQ. - frequently asked questions" article which Id written some time. earlier.

This service is still operational, but given that I have. resided in London for the last year, I do not need to use Demons service when. I can send articles directly from my own computer using its fax/modem,. which is what I have been doing since. 1998. However, instead of just sending the FAQ article, Ive been composing articles on various aspects. of MI5s treatment of. me. Since their activities have been going on for nine years now, and there have been various. aspects to their actions; they have harassed me at work, at home, through the media, etc; I have so far. not run out of things to say, particularly since their harassment of me is still. ongoing, and I have been able to record the actual words used by their. paid agents on my

minidisc-walkman.. Since mid-March 1999 I have been sending these articles pretty much. every weekend.

Anyway, as mentioned above, I intend this to be the final. transmission before the summer recess, and it would. be nice not to have to continue these articles in the autumn. But thats something that depends. on them, not me, and their attitude is. unfortunately clear.

Why am I sending these. articles?

Because I want the harassment to stop. The cynical reader might. think from these articles that I "thrive on adversity" and. would be lost without the harassment. to complain about; but that is not the case. In a perfect world I would like to return to work, in a job unsullied by. MI5s attempts to ruin it; I would. like to live in a house which wasnt bugged, with my words being repeated at me wherever I go; I would like a normal life. I. do not particularly thrive on adversity; I am beaten. down by adversity; the purpose of these faxes is to try to. bring the whole matter out into the public arena, where the rights and wrongs. would be visible to all, and once that were to. happen, the adversity might cease. I have had something approaching a normal life a couple of times. in the last nine years, but always, in the end, MI5 turn up and ruin it. I just want. these people out of my life, permanently, and the only way of doing that is to. kick this business into the public. arena, and shame MI5 so that they are incapable of. doing me further damage.

Having. said that, unfortunately it seems fairly obvious by now that these faxed articles are. not going to achieve that aim. Some of the recipients know what I am. saying is true; but they choose to stay quiet - wisely, because if they were to. admit the truth of these articles, then they would bring the wrath of MI5 down on their heads. Presumably. most recipients do not know these articles are true; their reaction to me is the same. as my reaction to the. other apparently deluded people who have sent me email after reading my webpage to tell me it happened to them too;. the reaction being, "leave me alone, I dont want to. know". Its sad that many M.P.s have given me this. reaction, because my case genuinely is different; I genuinely am telling the. truth, and the harassment genuinely is happening to me, and some recipients of this fax know. this to be true.

"Write to. your own M.P."

My local M.P. is Mr Keith Hill, Labour-Streatham. He refuses to. have anything to do with me. He. refuses to represent me, he refuses to talk to me, he has told me. not to communicate with him. He has done absolutely nothing to help me, and he has told me he will do. absolutely nothing to help. me.

Other M.P.s, recipients. of these faxes, have for quite some time been telling me, "write to your own M.P.". On 23 March 1998,. Paul Burstow M.P. wrote to me; "Whilst I. take the issues that you raise seriously, there is a strict Parliamentary convention that. one Member of Parliament does not take up anothers casework. Can I suggest that you write. to your

own. M.P. at the House of Commons?" Hopefully the above paragraph will make clear that I have written to my own M.P.. and he has proved unhelpful.

Other M.P.s have. told me the same thing. On 21 May 1998, John McFall M.P. told me, "... there is a parliamentary convention that M.P.s do. not take up cases of people not in their constituency..... therefore can I suggest that you write to your local M.P. who will be better able. to assist you." And on 8 June. 1998, Michael Foster M.P. wrote to me that "M.P.s are inundated with unsolicited faxes .... M.P.s. have a considerable amount of constituent work to deal with,. thus other M.P.s constituents cease to be of concern in. so far as they should have a voice and representation".

Simon Hughes M.P. wrote to. me on 5 November 1998, "There is a strict parliamentary convention which states. that I am not able to represent individuals who are not constituents of mine. My advice. is that you find out. who your own Member of Parliament is rather than circulating your story to all. M.P.s.". To my suggestion that Keith Hill M.P. was doing nothing to. help me, George Foulkes M.P. sent the following faxed response; "If Keith Hill your. own M.P. cannot help no-one else in the House of Commons can.". But it is clearly not a case of "cannot" help, but "will not" help. I have detailed in letters to Mr Hill specific ways. in which. he could help me, first of all by finding a lawyer to represent me. It is Mr Hills job as a Member of. Parliament to represent his constituents; if he chooses not to do so, then it reflects badly. on him.

Kate Hoey Sympathises, but says,. "Write to your own M.P."

Here is part of a letter Ms Hoey sent to me on 15 June. 1999.

I appreciate that you have concerns about. the persecution and harassment that you feel you. are experiencing but I note that your MP is in fact Keith Hill. There is a very strict Parliamentary. code which means that M.P.s can only take action on matters that. relate to their own constituents. I am. aware that you are not happy with the fact that you do not feel Mr Hill will assist you but I am afraid that I. cannot take any action on your. behalf.

Ms Hoey. plainly belongs in the camp of people who do not know about the reality of the "MI5 Persecution". She doubts its existence;. "the harassment you feel you are experiencing".. She urges me to see Mr Hills assistance, as have other M.P.s. detailed above.

Really, the fact that I am unable to obtain assistance from any. other M.P., if my own. alleged "representative" Mr Hill chooses not to represent me, is a very basic weakness. in the Parliamentary system. Beinggmainly events at my. former employers in Oxford during 1992, when I was harassed constantly by manager Steve Mitchell for most of 1992, and was forced. to begin attending hospital as an outpatient as a result. This harassment. was obviously of Mitchells own volition, since. I observed him harass similarly another new worker two years later; but. it was also at MI5s instigation, since they kept providing him with words from my home life which. he then

proceeded to abuse me with. Yet this is not the. only employment that MI5 have destroyed;. the MI5 persecution has lasted from the end of my student days until the present time, during. which I have had three jobs, all of which have been in various ways destroyed by. MI5s deliberate actions.

In March 1999 I decided to try to force the issue. once and for all. Ever weekend for the last four months, apart from two weeks when I was. on holiday, I have sent original articles by fax directly from my. computer to Westminster politicians. Here is a summary of the. articles of the last four. months;

How to. Identify the Persecutors

Their use of Schizophrenia to. discredit my claims
Comparing the MI5. Persecution with German "Final Solution"
MI5. are Plainly Trying to Kill Me
MI5 Waste Taxpayer Millions on Pointless. Hate-Campaign
Four Years of "MI5 Persecution" Posts on. Internet Newsgroups
MI5 Agents are Clinical. Psychopaths
BBC. Newscasters Lior the Victims of MI5
MI5. Have Systematically Destroyed My Life
Harassment through the. Radio

To my deep worry these fourteen faxed articles. have still not achieved the objective. of kicking the matter out into the public arena and forcing an admission either from the persecutors, or. from those "in the know", which includes. some M.P.s.

I dont really know what. else to do to try to bring the "MI5 persecution" out. into the open. I would have expected that these weekly faxed articles. would have had some effect, but the only result has been M.P.s telling me to contact my own. representative Mr Hill who refuses to talk to me. I. understand the convention that M.P.s deal with their own constituents and not those of other M.P.s, but there seems to be a. gap in the process. since it allows your own M.P. to refuse to deal with you, and then you are totally denied any representation. at all.

Conclusion

The only conclusion I. can inform the readership of these articles of, is that there is no conclusion to this matter, yet!. Three years of intermittent articles, and four months of. faxes every weekend, have been absorbed by some of. the most powerful people in the country, to no effect.

Whether these articles continue in the Autumn is entirely up. to the "opposition". I offered them a cessation of complaints if they would. leave me alone on holiday in June/July, and they went right. ahead and harassed me anyway, on holiday and after I returned to London. If. MI5 cease their activities now, then I wont have to continue these faxes. in the autumn; but I suspect they wont cease, which means. youre in for more articles later this year. "There will. be no conclusion."

MI5 Want Me to Send. You these Faxes

MI5 seem to Want. to Spin this Business out for as Long as Possible

The MI5. persecution has now been going on, starting from June 1990, for well over nine years. If I knew how to. put an end to it then I would do so. Of course MI5 have indicated. how they wish to finish the matter, by finishing me. off; they indicated this very clearly years ago when they were shouting. "suicide" at me.

But a deeper. truth is that the MI5 agents carrying out the persecution rely on it for their income and their. livelihood. They have absolutely no interest in anything other than spinning out. the whole business, because that is how they will maximise. their earnings from their employer for the "work" they do. against me.

A vital part of the fantasy structure MI5 have created about me is that. I am somehow a worthwhile target. If you bother to read these faxes,. if you browse my. website, or perhaps read my posts on the uk.misc newsgroup, you will have by now twigged that I am a totally insignificant. person who in a proper dictatorship like East Germany would. not merit five minutes of Stasi time. But Britain is improper in the methods. of its corruption, and the Security Service seeks to present me as being. a an evil fascist, an evil communist, an evil something-else, and even. a "national institution".

It occurs to me that to some extent I am. playing into their hands, into their scheme of things, by writing these articles and. sending these faxes. By. doing these things, I elevate my profile, and fuel MI5s paranoid obsession with me. But to stop sending faxes would. be to give up the only hope I have of seeing their campaign "outed" and justice done.. Certainly there is no point going to the police again; and as. remarked in a previous article, the. Security Service Tribunal routinely whitewashes every complaint that is. placed before it.

So although MI5 seems. to want me to continue sending these faxes, doing this is the only real. chance of getting this business out into the open. And so Ill continue trying to kick down. their house of cards. At least my. situation is less serious than that of some other victims of the secret services; unlike Shayler I am not broke and exiled; unlike Fayed. I have not lost a son to the posited activities of the secret services.. All I have. lost is some of my health, some of my life, and some of my possible career.

MI5s Abuse of me is without Cause. or Reason

It constantly puzzles me that MI5. refuse to leave me alone, wherever I go and whatever I do, or rather, whatever I dont do, since Im not. a very socially or otherwise active person. When I am in England,. they chase me all over the place, and once. theyve found me, they pay people to shout rude words at me. When I. am in Europe, they again chase me all over the place,. and as usual pay people to shout obscenities at me. When I am in Canada or visiting the States,. they faithfully chase me all over the place, and when they find me, pay. people to shout obscenities at me.

It is. hard to avoid the conclusion that these MI5 operatives who chase me are total lunatics.. You will remember from a previous articles the assessment "MI5 Agents are Clinical Psychopaths". They have. tried to blame me for what. they do and what they say; yet their lies have been wafer-thin, and are clearly seen to be oiled. by the money which they acquire. from the Government, and ultimately from the taxpayer.

They have tried various lies to put the blame on me; "we have to abuse. him because hes a nutter", as if there werent many tens of. thousands of other people with schizophrenia in the United Kingdom. Their choice of. abuse words is telling; subconsciously perhaps they realise. that it is they who are the "nutters", and they try. to project their own illness onto their target.

MI5. Operatives have Nothing Else to Do With Their Time

Ive seen the same "Alan Holdsworth" person three or four times over. a period of several. years. I saw him at the Civic Hospital in Ottawa in the Emergency Ward,. where he falsely declared his name to be "Tad"; at Ottawa airport in summer 1998; and. on board another flight in 1995.

So what we see from the above paragraph is, the same people. are delegated to watch me for many years. Without me, they. wouldnt have a job. They literally have nothing else to do. with their time, except indulge their voyeurism against me. With this observation, we come to the core. of MI5s campaign against me; these people are. not fit for any job other than the exercise of voyeurism against me,. and if sanity were to land on MI5 then they would. be out of a job. If sanity were truly to land then these people and their employers. would be prosecuted for offences under the Protection from Harassment legislation, which they are. clearly breaking.

It is one of the. ironies of their campaign that MI5 have been trying to make me an object of ridicule. for completely trivial things I have done, while MI5 themselves have simply not mentioned how ridiculous. is their own behaviour and that of. broadcast media journalists, in spying on me while they read the news for example. If. the whole truth of this business is ever exposed, and despite all my. efforts it still seems there is a block on its exposure in Britain, then the rights and wrongs will be. clear to all, and no amount of MI5 lies will be able to change. that. MI5 presumably do realise just how damaging such a. revelation would be both to themselves, and to broadcast media such as the BBC and. ITN, because there has. not been even the slightest chink in the armour, despite four and a half years. of my complaints on internet newsgroups and by fax to politicians and. the media.

MI5s Final Kick. in the Teeth to the British State

For someone like myself born in the late sixties it seems. peculiar to think that. Great Britain once used to have a say in the destiny of foreign peoples in far-off. sections of the globe. Modern Britons tacitly accept the lowering of their country to. a third-rate power reliant on the United States for what little. say it has in the world. A third-rate power, now "reverse-colonised" by third world peoples it once ruled and riven. with internal problems so severe the government. hardly dares acknowledge them.

To this third-rate power the MI5 secret police are delivering the. final kick in the teeth through a campaign. of persecution which is guaranteed to hold the state up to ridicule throughout the. world when it is finally exposed. As a "thought experiment". suppose the French or the Spanish security service had done to one of their own. born citizens what MI5 has done in this country. Suppose say the Spanish had planted. hidden cameras in his home, for the perverted. pleasure of their state television newscasters, just as hidden cameras have been placed in. my home for the perverted pleasure of Martyn Lewis, Nicholas. Witchell et al. Suppose the Spanish service had. for nine years been trying to force suicide on their target; at times, so. blatantly that they shouted the word "suicide".

Now. suppose they were caught.

Of course,. as long as MI5 arent caught, theyre laughing. The psychopathic security service agents gets their. kicks from shouting abuse at me; the newscasters,. Lewis, Witchell etc get their jollies, "it was so funny", we were watching this bloke and. he couldnt do anything about it.

But once theyre caught, the sky falls in. Of course,. the "patriotic" MI5-funded media. in Britain will try to put the best spin on the MI5/media activities; it. was the targets fault, of course. But most of the world bears no allegiance to Britain. If this. business is ever exposed then a weakened Britain will become the laughing-stock of the. world. And I promise you, the security services persecution of. me will be exposed. MI5 has delivered a final kick in the teeth. to the British state, and I will do everything I can to ensure the world hears about what. they have done.

Metropolitan Police Refuse to Investigate the MI5. persecution

I have on. a couple of occasions tried to motivate the police to investigate MI5s actions against me. On each occasion. they have refused to do so. In 1995 I went to my. local police station and spoke to an officer there; he refused to accept my complaint, and seemed interested only. in seeing me leave. the station as quickly as possible.

Earlier this year I. had some communications with Det.Sgt.Richards of Charing Cross police. Again I asked him to deal. with MI5s actions against me. Unfortunately DS Richards conformed to the negative. stereotype of the bigoted, ignorant "copper"; he said, "I have read your various bits. on the internet. I'm afraid there is no substance or. credence to it. It's an absolute load. of rubbish. I don't investigate rubbish. I can't be more blunt or to the. point than that."

You have to wonder at the state of law enforcement. in Britain. If the victim of a murder is black, as happened in the Lawrence. case, the police deliberately botch the investigation.. If the victim of a crime is mentally ill, and the perpetrators. are the secret services, as in my case, then the police refuse to even begin to investigate. the crimes committed. Politically. Britain is a third-rate country, but from the point of view of. obtaining justice, Britain ranks down there with third-world countries. You almost feel that MI5. and their media buddies would not even have any shame if their activities against me were exposed; after. all, why should they? they have. the money, they have the control, OK so perhaps theyve broken a few dozen laws, but doesnt the fact that. the police are too corrupt. to investigate these crimes, doesnt that prove that in fact no crimes. have been committed?

I should say again what I have said. earlier in this article. My losses over the last nine years have not been as great as those of. other victims of British. Secret Police malefaction. Fayed lost his son to their murderous activities; in. my occasional communications with former MI5/MI6 employees I have been informed. that a "permanent solution" is not uncommon for. opponents of the British secret police. I have lost health and financially,. but am obviously well enough to keep fighting my case. Others have lost much more than I. If. the joke which is British "law enforcement" refuses. to enforce laws against the security services then that is something that is recognised in other countries and. Britains stock correspondingly falls. Not that it has. very far to fall; the days when England had any. say in the world are long gone.

MI5 Want These Faxes. to Continue

Before the holiday, I said that if MI5s harassment of me stopped, then. I would cease my complaints. They have. known very well that if they continued to harass me then I would. resume the fax campaign in the autumn. Yet they have not stopped persecuting me. Recently a. woman outside my domicile screamed her head. off with abuse in the direction of my window; and on Saturday 2 October, when I was shopping. at a nearby supermarket, a man shouted. the particularly vile sexual swear word which I have heard many times before. over the last few years.

MI5s attitude. shows complete arrogance. Yet it also shows that they want the faxes to continue and deliberately try to provoke me. into sending further faxes. The reasons for this are given in the first. paragraphs of this article; the MI5. operatives who persecute me have nothing else to do with. their time; to make their campaign, against an apparently unreacting target, have some value, they have to force me. to react in some way against their actions; and by reacting in this way,. by bringing their campaign. to the attention of British politicians, I play into their hands, by. giving their campaign the attention and importance which they feel it deserves.

In the short term, by sending. these faxes, perhaps I am doing something they want me to. do, but in the longer term it is undoubtedly more in my interest than. theirs for their activities to be exposed. If their operatives. truly do wish to see these faxes continued then they are

committing a serious mistake, because it significantly increases. the risk if M.P.s (some of whom already know about MI5s activities against. me) are advised of my side. of the story.

I will continue to monitor and record. the secret services activities against me over the. next few weeks. If they diminish and cease, as I hope they will, then I may be able. to call a halt to these faxes; but that it something which is entirely up to them; recently. their continued harassment makes clear that they do wish the faxes to continue, and in. all sincerity I do think they will continue their. activities and make it impossible for me. to cease these faxes. It may trouble you to receive these articles, but it troubles me much more to be. on the receiving end of a. national persecution campaign; and while Britain does not have free speech provisions as. does Canada in the Charter of Rights and Freedoms, and the US in the first amendment to the constitution, in practice I. do not think anyone is going to try to have me. locked up for speaking the truth. I. still cherish the hope that the veracity I express will be shown for what it. is, and that the truth will prevail and make me free.

Removing the Mask. of Anonymity from the MI5 Operatives

Undoubtedly one factor encouraging the MI5 agents actions against me. has been the. fact that they can shelter behind a mask of anonymity while they carry out their. abuse. This is both a sign of their realisation that their actions are criminal; for crimes are harder to pin down and. make a coherent complaint about when their. perpetrators are unknown; and it is a sign of their cowardice, since they lack the. backbone to say things to my face themselves; instead they almost always rely on third. parties to carry out the. actual acts of abuse.

On a few occasions I have seen the perpetrators, but on. each occasion they have managed to preserve their anonymity. They travelled on. the same British Airways flight as me in 1994; but BA have ever. since refused to give up the passenger list for the flight, and. the police and lawyers have proved useless in obtaining their identities from the. list. Also one of them followed me into A&E. department of Ottawas Civic Hospital a couple of years ago, and. gave his name as (if I heard correctly) "Alan Holdsworth"; but the doctor refused to give out his identity when. I later tried to speak to. him.

If only we knew the identities of the individual. operatives, then it would be possible to find out the identity of their. employing organisation. But I think we know the latter already,. since I have been accusing them on internet newsgroups for four and a half years now, and they have. never denied my guess. Indeed, when I was travelling in. January 1996 back to Ottawa, two youths on the (British Airways again,. unfortunately) flight made a lot. of noise at me, one of them saying to the other that I "didnt know who we are". That is a wafer-thin. denial; I had been saying for a year that they. were MI5, so a stronger denial would be necessary if my guess were. truly mistaken. I think the lukewarm denial was worse than no denial at all, since it confirmed my guess that the employing. agency was indeed. MI5.

Conclusion

It. has been suggested to me that by sending these faxes I could be making trouble for myself; but I dont think so. My psychiatrist. knows what I am doing; indeed I have given him a couple of these articles for him. to cast an eye. over.

I dont want to have to send faxes for the. next year, or the year after that. But that. is entirely up to MI5. If they continue to persecute me then I am. forced into defending myself. The ball is in their court, and it is entirely up to them what they do. If as I suspect it is. their intention that. these faxes continue, if that is what they insist will happen then so be. it.

MI5 Persecution Update: Friday. 31 March, 2000

22,544 Faxes Delivered. in Three Years, and Still No Breakthrough

In the last three years I. have sent at least 22,544 faxes to recipients in the UK, of which at least 13,974. have gone to Westminster. Last weekend alone I sent 832 completed faxes to. politicians, the media and various others, on the subject of MI5s mistreatment of me. these last ten years.

I believe some of the recipients know of MI5s actions against me in. the last decade; yet they maintain strict "omerta" in. fear of the security services persecution. actions being made public.

MI5. Insist that these Faxes must Continue

Between September. 1999 and mid-January 2000, the persecutors, whoever they might be, mostly left me alone. I counted only three incidents. in almost five months - which is a lower rate than. at any time since June 1990, when this. business started.

By leaving me alone for several months,. the "oppressors" were making an implicit assurance that they would continue to leave. me alone in the future. On 11 January. I posted to an internet newsgroup accepting what I saw as. their assurance of no further harassment, stating that I would cease sending these faxes. - which is the only thing I do in my defence - if they continued to leave me alone. And for two weeks I. did indeed refrain from distributing these. articles.

But MI5 acted in bad faith.. From the last week of January until the beginning of March, they resumed. their hate campaign against me with a vengeance. They even put people in my road three times in. February, one instance of which I recorded. They. resumed their normal behaviour of bugging. my phone and house, listening to where I would go, and then placing people in that location to "aggravate. and annoy" me.

What MI5 did. in February is plainly a contravention of the Protection from Harassment Act 1997, since it has caused me "alarm and distress". as specified in the Act. But it is a waste of time going to. the police with a complaint, since the police. have done, and will do, absolutely nothing. I complained to the. Metropolitan Police in 1995, and they refused to take my complaint. When. I complained again in 1999, the detective sergeant laughed at my complaint, with the. words, "It's an absolute load of rubbish. I don't investigate rubbish. I can't be more blunt or to. the point than that." It. is useful to remember that the Met also treated Stephen Lawrences parents with similar discourtesy; police prejudices are. similar

in my case, so I can take some comfort from that case and. hope that one day I. will get a fair hearing.

MI5 acted in bad faith, but they also acted with arrogance.. They do not care if I send 800 faxes. every weekend, since they know I cannot prove my claims,. and the recent Shayler case shows how weak external oversight is of the. secret services. But they acted with more than arrogance - the MI5 agents actually. want my faxes to continue, they insist that these faxes continue, since. my communications give them an excuse to continue their activities, and continue in the paid employ of the. secret service. Despite their use of diverse proxies over the last ten years, it is the same. MI5 officers behind the campaign all. the time - I have seen one of them on three occasions in Canada. over a period of years, and it is a safe belief that that same person continues to be. paid for his "work" in harassing me in London now. The average cost. of an MI5 employee is some 75,000 per annum, so one may infer that their officers are. amply compensated; their insistence that "hostilities" are maintained is understandable when. placed in. this light.

MI5 Persecution Update: Friday 7 April,. 2000

22,544 + 837. = 23,381

Last weekend I delivered another 837 faxes to. politicians and the media on the subject of the security service conspiracy which has. destroyed my life. This brings the total in the last three years. to at least 23,381. These totals do not include partially. delivered faxes.

Some. of the recipients of these faxes must know that what I say is true; and I hope to. motivate those people to acknowledge the reality of the harassment which has followed. me for ten years. It takes much time to transmit these articles, but as OCG MD. Simpson-Wells said to me in 1992, you have to be a good communicator if. you are to succeeed.

Harassment in February. 2000

Following a quiet period of almost. five months, the persecution resumed with a vengeance in late January/February 2000. At this. time I was at home in Clapham, London and was a. relatively easy target for the persecutors. They have my house bugged, for audio and. I believe video in some rooms as well; so they. can find out easily where I will be going on a particular day, and. place people in that location to mouth words of abuse at me. (I know the last sentence sounds. like classic paranoia, but it happens. to be true, and some of the people reading this know it to be true.)

On Friday. 11 February 2000 I went shopping in Croydon, to buy a watch at H. Samuels jewellers. in the Whitgift Centre. While I was there two youths came into the shop, one of them quietly uttered an obscenity at. me, and they immediately walked out. They showed no. interest in the shop.

That Sunday I met with a friend in Clapham,. who started needling me about "do you. know anything about the CIA and FBI?". Rather unsubtle, and worrying considering Ive known this guy for 20. years. From the words and demeanour of this "friend" and others in February, I. saw that the persecutors have again been trying to. separate from me what remains of my social. life.

Incidents in. my Road in February

MI5 very rarely place people in my home road to harass me, but. such was their persecutory fervour in. February that they did so on three separate occasions. On the. first such occasion, I was met my two youths who, grinning, said a deeply. offensive sexual obscenity at me - at which I

coughed at them, so they called me a "wanker".. This incident is safely recorded on minidisc-walkman, but because of. the offensive nature of their abuse the recording will. not be made public.

Another incident very early in the morning of. Sunday 20/Feb/2000 occurred outside my home, following an evening in Croydon with. some schoolfriends. Again there were two youths - for some reason. the persecutors always travel in twos or threes, very rarely is there. just one of them - perhaps they need a group to bolster. their courage, perhaps just one of them wouldnt have the guts to. say something unpleasant. One of the youths said quietly, and bitterly, "shitty,. very shitty".

Anyway, in March there were. no further incidents near my house in in my road, and. our neighbours are very well disposed towards us, so let us hope that. the current quiet continues.

Source record: 3860

Chances are high that you have received a phish in your e-mail within the few months or even last week. By the time this book is published and into your hands, the operations that involve phishing scams will have accelerated due to aggressive malware propagation (trojans, viruses), automated botnets, and the overall infrastructure that has been established by these cyber-scammers.

So let's step back for a moment. Our world has changed significantly since I was a kid. Just 10 years ago, the sophistication of hackers and the tools available to them were somewhat limited from both the national and international security perspective.Yes, there was cyber-crime, no denying that, but not at the audacious level we are experiencing today. Breaking into computer systems was motivated by the need for exploration, information, and education.That was the world of the late-night, for-fun hackers, which are now but a memory (who would have thought we would be nostalgic for them one day!).

The hackers of the past are likely now working as information security professionals, attempting to close the very same Pandora's box they contributed to opening not too long ago.The knowledge contributed by hackers today, also known as security researchers, are molded by ethics and discipline; they are reticent to release their findings, not because of "controversial" activity but because of the responsibilities required to protect this double-edged sword. People hackers and researchers call script kiddies are the principal breed of criminals on the Internet today.They are usually young and not terribly creative or skilled at hacking, but they have three attributes that make them extremely dangerous: time, persistence, and proof-of-concept code written by the creative and skilled security researcher. These "kids" can and will scan the entire Internet, breaking into computers (also known as owning a system) and using your personal machines inappropriately and arbitrarily for their own purposes.

Ten years ago, most hackers were not looking at breaking into Windows desktops (since most of them ran on a 14.4kbps modem); they were usually targeting Windows NT and various flavors of UNIX systems.Typically targeting corporate and government computers, libraries, and universities, most cyber acts were usually performed with benign intentions and curiosity as the primary motives.

With the recent proliferation of broadband, the targets have shifted to literally anything and everything that is vulnerable. According to the Internet Storm Center (http://isc.sans.org), the average time for a default unpatched Windows box to survive uncompromised on the

Internet is 20 minutes. But why break into my Windows computer if I have nothing valuable on there? The intentions behind of most "break-ins" today are utilitarian in nature, ranging from something as dense as using your machine for hard drive space and bandwidth to store and trade music files (MP3s) to supporting spammers' and phishers' activities (most of these compromises are in the form of automated malware).

--- Thank You ---

I made a number of. efforts to find the bugs, without success; last year we employed professional counter-surveillance people to scan. for bugs (see later) again without result. In autumn 1990 I disposed. of my TV and watched virtually no television for the next three years. But harassment. from TV stations. has gone on for over six years and continues to this day. This is something that. many people obviously know is happening; yet the TV staff have the morality. of paedophiles, that because they're getting away with it they feel. no wrong.

Other people who. were involved in the abuse in 1990 were DJs on BBC radio stations, notably disc jockeys from Radio 1 and other. stations (see the following section). Again, since they don't have sense. in the first place they can't be expect to have the moral sense not. to be part of criminal harassment.

```
-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-
-= MI5: bugging. and counter-surveillance -=
-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-
```

PO: >Did you ever look for the bugs in your house ? If not,. why not ? I mean if
PO: >I thought that was happening to me, I'd search the. place from top to bottom,
PO: >I mean I live there I would know if anything was out of. place. If I was
PO: >really suspicious, I would. call in one of those bug detection teams which
PO: >have those machines that pick. up the transmitted radio waves. This
PO: >reminds me of BUGS, that new programme on BBC1. on

That's exactly what we did.. We went to a competent, professional detective agency in London,. paid them over 400 quid to debug our house. They used scanner devices which go to over 1 GHz and would pick up. any nearby transmitter in that range, they also checked the phones and. found nothing... but if the tap was at the exchange, then they. wouldn't find anything, would. they?

CS: >Doesn't this suggest to you that there are, in fact, no bugs. to be found?

You can assume that they've done this sort of thing to other people in. more "serious" cases, where. they would know the targets would suspect the presence of electronic. surveillance. So they will have developed techniques and devices which are not readily detectable either. by visual inspection or by electronic. means. What those techniques might be, I couldn't guess.

In this case, the existence of bugging devices. was clear from the beginning, and they "rubbed it in". with what was said by the boy on the coach. It. was almost as if they wanted counter-surveillance people to be called in,. who they knew would fail to detect the bugging devices, causing loss of credibility to the other things I would. have to say relating to the harassment.

I did all the things someone in my situation would do. to try to find the bugs. In addition to calling in. professional help using electronic counter-surveillance, I. made a close visual inspection of electrical equipment, plus any. points where audio or video surveillance devices might have. been concealed. Of course, I found nothing. Normal surveillance "mini-cameras" are. quite noticeable and require visible supporting circuitry. It. seems to me the best place to put a small video surveillance device would be additional to a piece of. electronic equipment such as a TV or video. It would be necessary to physically break in. to a property to fit such. a device.

```
-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-
-=. MI5: cost of the operation -=
-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-
```

Here's what a couple of other people on Usenet (uk.misc) had to. say
regarding the cost of running such. an operation...

PO: >Have. some sense, grow up and smell reality. What you are talking about
PO: >would take loads of planning, tens of. thousands of pounds and lots of
PO: >people involved in the planning,. execution and maintenance of it. You
PO: >must have a very high opinion. of yourself to think you are worth it.

PM: >But why? And. why you? Do you realize how much it would cost to keep
PM:. >one person under continuous surveillance for five years? Think about
PM: >all the man/hours. Say they _just_ allocated a two man. team and a
PM:. >supervisor. OK., Supervisor's salary, say, #30,000 a year. Two men,
PM: >#20,000 a year each. But they'd need to work in. shifts -- so it would
PM: >be six men at #20,000 (which with on-costs. would work out at more like
PM: >#30,000 to the employer.).
PM:. >
PM: >So, we're talking #30,000 x 6. #180,000. plus say, #40,000. for the
PM: >supervisor. #220,000. Then you've got the hardware involved.. And
PM: >any transcription that needs doing. You. don't think the 'Big Boss'
PM: >would listen to hours. and hours of tapes, do you.
PM:. >
PM:. >So, all in all, you couldn't actually do the job for much less than
PM: >a quarter million a year. Over five. years. What are you doing that makes
PM: >it worth the while of the state to spend over one and a quarter. million
PM: >on. you?

Those are pretty. much the sort of calculations that went through my head
once I stopped to consider what it must be. costing them to run this
operation. The partial answer is, there have been periods. when the
intensity has been greater, and times. when little has happened. In fact,
for much of 1993 and. the first half of 1994, very little happened. Although
I don't think that was for reasons of. money - if they can tap into the
taxpayer they're not. going to be short of resources, are they?

The more complete answer is in. the enormity of what they're doing. Relative
to the cost. to British pride of seeing their country humiliated for the
persecution of their. own citizens, isn't is worth the cost of four or five
people to try to bring things to a close in the manner they would. wish? To
the government a million or two. is quite honestly nothing - if they can
convince themselves of the necessity of what. they're doing, resources will
not be the limiting. factor.

-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-
-= how and why did it start?. -=
-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-

The harassment didn't start. by itself, so someone must have been there at the outset to give it a firm push and set. the "animals" after me. It looks as if I was set up in June 1990, and the timing. indicates someone from university. was responsible.

>One thing which. has been missing from this discussion is this simple
>prognosis: that maybe he is right and that, despite. his admitted
>mental condition,. there really is a campaign against him organised by
>now-influential ex-students of. his university.

In May or June 1990,. Alan Freeman on Radio 1 read out a letter from someone who. had known me for a few years, who wrote of the one who "wore out his welcome with random precision" (from the Pink Floyd song).. Freeman went on to say to the writer. "that's a hell of a letter you wrote there". The indication is strongly that people I had parted. from soon before nursed a grudge against me and were trying to cause trouble. for me.

The suggestion is that Freeman might have shown the letter. to other people, and things could. have snowballed from there. Right from the start the real source (security services presumed). didn't announce themselves as the origin, but let the "talkers", the radio DJs, believe. that they were the originators. Think about it; if you. announce, "we're MI5 and we have a campaign. against this bloke" then people might not go along with it; but if you say, "everyone else. is getting at this bloke because he 'deserves' it" then people will join in with. fewer qualms.

>Why would. "they" wish to assassinate your character?

It's the classic case of hitting a. cripple to prove you're stronger. Why would the security services expend hundreds of thousands of pounds. and more than six years of manpower to try. to kill a British citizen? Because they are motivated by people who knew me at. university and feel personal animosity; because they knew me to be emotionally weak,. and it is in the nature of bullies to prey on. those known to be weak; and because they can rely. on the complicity of the establishment, which the security services manipulate and derive funding from. This is England's. biggest humiliation today, and the British security. services are intent on preventing their humiliation becoming reality by. continuing their campaign of attempted murder to suppress the truth from. becoming public.

-=-=-=-=-=-=-=-=-=-=-=-
-= who knows about. it? =-
-=-=-=-=-=-=-=-=-=-=-=-

Many people know,. both in the establishment and media, and among the general public. Despite an absence of its target from the UK for. more than two. years, the echoes of paranoia can still be heard loud and clear from across the water. When it started in 1990, the only people who knew. were those in BBC television who were. spying on my home, and a few radio broadcasters. There were a few cases of. public harassment, but very little compared to the situation that developed a couple of. years later.

The list today includes BBC TV staff (newsreaders such. as Martyn Lewis, Michael Buerk, Nicholas Witchell),. people from radio stations such as Chris Tarrant of Capital and Radio 1 DJs, people. in the print media, but also many people in the. general public. All united in a conspiracy which breaks the laws. which the UK does have regarding harassment, and all completely uncaring for any semblance of decency or. elementary respect for individual. rights.

The British police (obviously) do know the nature of. the harassment and in all probability the identity. of those behind it. Some time ago I made a complaint. to my local police station in London, without positive result. The UK police are. failing in their duty to see the law enforced in not checking. the abuse.

The article of which part is reproduced below was penned by. Bernard Levin
for the Features section of the Times on 21 September 1991. To my mind,. it
described the situation at the. time and in particular a recent meeting with
a friend, during which I for the first time admitted. to someone other than
my GP that I had been subjected. to a conspiracy of harassment over the
previous year and a. half.

>There. is a madman running loose about London, called David Campbell; I have
>no reason to believe that he. is violent, but he should certainly be
>approached with caution.. You may know him by the curious glitter in his
>eyes. and a persistent trembling of his hands; if that does not suffice, you
>will. find him attempting to thrust no fewer than 48 books into your arms,
>all hardbacks,. with a promise that, if you should return to the same
>meeting-place next year,. he will heave another 80 at you.
>
>If, by now, the police have arrived and are keeping. a close watch on him,
>you may feel. sufficiently emboldened to examine the books. The jackets are
>a model of uncluttered typography, elegantly and simply laid out; there. is
>an unobtrusive colophon of a rising sun, probably not picked at. random.
>Gaining confidence - the lunatic is smiling by now, and the policemen,. who
>know about such things, have significantly removed their helmets. - you
>could do worse than. take the jacket off the first book in the pile. The
>only word possible to describe the binding. is sumptuous; real cloth in a
>glorious shade of. dark green, with the title and author in black and gold
>on. the spine.
>
>Look at it more closely; your eyes do not deceive you -. it truly does have
>real top-bands and. tail-bands, in yellow, and, for good measure, a silk
>marker ribbon in a lighter green.. The paper is cream-wove and acid-free,
>and the book is sewn,. not glued.
>
>Throughout the encounter, I should have. mentioned, our loony has been
>chattering away, although. what he is trying to say is almost impossible to
>understand; after a time, however, he becomes sufficiently coherent to. make
>clear that he. is trying to sell the books to you. Well, now, such quality
>in bookmaking. today can only be for collectors' limited editions at a
>fearsome price. - #30, #40, #50?
>
>No, no, he says, the glitter more powerful than ever and the trembling. of
>his hands rapidly spreading throughout his entire body; no,. no - the books
>are priced. variously at #7, #8 or #9, with the top price #12.
>
>At this, the policemen understandably put their. helmets back on; one of

>them draws. his truncheon and the other can be heard summoning
>reinforcements on his. walkie-talkie. The madman bursts into tears, and
>swears it. is all true.
>
>And. it is.
>
>David. Campbell has acquired the entire rights to the whole of the
>Everyman's Library, which died a lingering. and shameful death a decade or
>so ago, and he proposes to start it all over. again - 48 volumes this
>September and 80. more next year, in editions I have described, at the
>prices specified. He. proposes to launch his amazing venture simultaneously
>in Britain and the United States, with the massive firepower of. Random
>Century at his back in this. country, and the dashing cavalry of Knopf
>across the water,. and no one who loves literature and courage will forbear
>to. cheer.

At the time this article was written I had believed for. some time that columnists in the Times and other journalists had been. making references to my situation. Nothing unusual about this you may think,. plenty of people have the same sort of ideas and obviously. the papers aren't writing about them, so why should. my beliefs not be as false as those of others?

What makes this article so extraordinary is that. three or four days immediately preceding its publication, I had a. meeting with a friend, during the course of which we discussed the media. persecution, and in particular that by Times. columnists. It seemed to me, reading the article by Levin. in Saturday's paper, that he was describing in some detail his "artist's impression" of that meeting. Most. telling are the final sentences, when he writes, "The madman bursts into tears, and swears it. is all true. And it is." Although I did not "burst. into tears" (he seems to be using a bit of poetic licence. and exaggerating) I did try hard to convince my friend that it was all true; and I am. able to concur with Mr Levin, because, of course, it. is.

At the beginning of the piece Levin. reveals a fear of being attacked by the "irrational" subject of his story, saying. "I have no reason to believe that he is. violent, but he should certainly be approached with caution". This goes back to the. xenophobic propaganda of "defence" against a "threat" which was seen at the very beginning of the harassment. The. impression of a "madman running loose" who needs to be. controlled through an agency which assigns to itself the mantle of the "police" is also one which. had been expressed. elsewhere.

In the final paragraph. of this extract, his reference to Everyman's Library as having "died a lingering and shameful death a decade or so ago". shows clearly what sort. of conclusion they wish to their campaign. They want a permanent solution, and as. they are prevented from achieving that solution directly, they waste significant. resources on methods which have been repeatedly shown. to be ineffective for such a purpose.

-=-=-=

line. Two men and their girlfriends recognised me; the women sprang to. my defence, saying "He looks perfectly. normal, he doesn't look ill". Their boyfriends of. course knew better, and followed the party line; one of them made reference to an "operation", apparently to work at the tube. station but implicitly to a visit that I had. made to hospital a couple of weeks previously.

In August 1990 going home. from college, soon after getting on a tube train at Gloucester. Road I was followed by a group of four youths, who started a chant of abuse. That they were targeting. me was confirmed by other people in the. carriage, one of whom asked the other "who are they going on at, is it. the bloke who just got on?" to which the second replied "yes, I think so". I was tempted to reply, but as in every. other instance the abusers are enabled in their. cowardice by physically outnumbering the abused; any confrontation. would result in my being beaten up, followed by a complaint to the police that "he attacked us", and of. course he's ill, so he must have been imagining that we. were getting at him. Shitty, aren't they?

But the shittiness of the four. youths on the tube train is as nothing compared to the episode on the National Express. coach to Dover in the summer of 1992. While going on holiday to the Continent I was. verbally set upon by a couple. travelling sitting a few rows behind. The boy did the talking, his female companion. contributing only a continuous empty giggling noise. He spoke loudly to ensure other people. on the coach heard, always about "they" and "this bloke". but never naming either the abusers or the person he. was talking about. He said "they" had "found somebody from his school, and he was always really stressed. at school". They must have dug deep to. find enemies there; perhaps someone who dropped out of school, someone who didn't do too well later, who was jealous and keen to. get their own back? The boy also said "he was. in a bed and breakfast for only one night. and they got him". By a not unexpected coincidence I had been in a B&B in Oxford a week previously, which had been booked from work;. other things. lead me to the conclusion that the company's offices were bugged for most of the 2 1/2 years that I was there,. so "they" would have known a room in the B&B had been booked. (But. I'll bet "they" didn't tell the company's managers their. offices were bugged, did they?).

After a few minutes of this I went back. to where they were sitting and asked where they were travelling. The boy named a village. in France, and the girl's giggling. suddenly ceased; presumably it permeated to her brain cell what the purpose. of the boy's abuse was.

This and other set-up situations. are obviously calculated to provoke a direct confrontation which would bring in. the police, with the abusers claiming that they were the ones attacked. Again in 1992,. outside the house where I was living in Oxford I was. physically attacked by someone - not punched, just grabbed by the coat, with some verbals. thrown in for good measure. That was something the people at work shouldn't have. known about... but soon after. a couple of people were talking right in front of me about, "I heard he was attacked". The UK police have a. responsibility for preventing assault occurring, but. they do not seem to take any interest

in meeting that responsibility. I suppose. their attitude is that harassment does not come within their remit unless it involves physical assault,. and they will only become involved once that happens. That is of course. quite the wrong attitude for them to take, but as. I now understand, the police investigate only the crime they wish to investigate; if they. do not take your complaints seriously then there is nothing. you can do to make them take. action.

-=-
-= my. response to the harassment -=
-=-

My first reaction in. 1990/91 was to assume that if I broke contact then they would not be able to follow and would lose interest. So. I did the things that have. been suggested by other people; I sold my television, stopped listening to the radio and tried to withdraw away. from the sources of abuse as much as possible. I reasoned that. they must have more important things to deal with and that normal people. would simply leave me alone if it were made difficult for them. to continue their harassment.

I reckoned. without the sheer vindictiveness of the abusers. They did not let up but. instead "got to" people around me, mainly people at work, to do their dirty work for them. I went to. see my GP, who refused to believe what he was. being told, and refused to direct me on to anyone who could be of practical assistance. It was not until. three years had passed that the GP admitted the matter. was outside his competence and suggested going to the police.

In the summer of 1994 we called in counter-surveillance experts. from a private detective agency to sweep. our house and telephone for bugging devices. They conducted a thorough. search and found nothing; but as noted above, since the existence of surveillance was being forced in my. face by the harassers, you would expect them to have taken the possibility of. a counter-surveillance sweep into account when planning. the type of devices to be. employed.

In Easter 1995 I made a complaint to my local Police. station in London, but the police have not expressed any intention to. do anything about the continuing. harassment ("we're not saying it's happening and we're not saying it. isn't happening" were the words used). I think the officer I spoke to at Easter wasn't aware of. it happening, although other members of the police force obviously. do know.

From April 1995 until the present. time the matter has been discussed in a lot of detail on the Usenet. (Internet) "uk.misc" newsgroup. That discussion has given birth. to the article which you are now reading. My hopes in posting to Usenet were that wider. publicizing would discourage the security services from continuing their harassment,. and "draw people out" into concurring with the truth of what was being said. Neither. of those have followed, but the discussion has served a purpose in. allowing this structured report to be. created.

-=-=-=-=-=-=-=-=-=-=-=-=
-= harassment at work. -=
-=-=-=-=-=-=-=-=-=-=-=-=

Once I stopped watching. television and listening to the radio at the end of 1990, "they". had to find other ways of committing abuses. So they took what must be for them a tried and tested route; they get. at you by subversion of those around you. Since they wouldn't be able to do that with my family. or friends,. that meant getting at people in the workplace to be their mouthpieces and do. their dirty work for them.

They supplied my employers in Oxford. with details from what was going on in my private life, and what I. and other people had said at my home and accommodation in Oxford. So people. at work repeated verbatim words which had been said. in my home, and repeated what I'd been doing recently. Often the most trivial things, the ones from. your domestic life, are the ones which hurt most. One manager in particular at. Oxford continuously abused me for ten months with. verbal sexual abuse, swearing, and threats to terminate my employment.. After ten months I was forced to seek psychiatric help and start taking medication, and was away from. work for two months. I spoke later with a solicitor about what had happened. at that company; he advised it was only possible to take. action if you had left the company as a result of harassment, and such an action. would have to be started very soon after leaving.

Over a year later the same manager picked on. another new worker, with even more serious results; that employee tried to commit. suicide with an overdose. as a result of the ill-treatment, and was forced to leave his job. But he. didn't take action against the company, either. Abuse at work is comparable to that. elsewhere in that tangible evidence is difficult to produce, and the abusers will always have their denials ready. when challenged. And even if a court accepts what you. say happened, it still remains to prove that abuse causes. the type of breakdown I had at the end of. 1992. In a recent case before a British court, a former member of the Army brought a case against others who had. maltreated him ten years previously. Although the court. accepted that abuse had occurred, it did not agree that depressive. illness necessarily followed, and denied justice to the. plaintiff.

BBC. h2g2 16/Sept/1999

The BBC's h2g2 website is billed as "Earth Edition of. The Hitchhiker's Guide to the Galaxy!". Naturally, one of its pages
is about me, me,. me. It starts off with the lines;

Every now and then something comes. along which makes you
think "Ah! That's what the Internet is for!" Mike. Corley
is one. such case.

The page itself can be found at. http://www.bbc.co.uk/dna/h2g2/alabaster/A164404

The user comments linked from h2g2 are less than respectful, but given. the point of view my website promulgates that is
understandable. It's true that without the communications. ability afforded by the internet, which came along at just the
right time, my complaints would be getting nowhere. But that's. a two edged sword also; miniature cameras only appeared
around 1990, so the advantage of technology is. up to the adopter. Secret service intrigues, and on the other side of the
coin human paranoia, have both been going on for centuries; what changes now is an increased. technologisation of both sides.

In case anyone's interested, I'm listed a ton of my surplus accessories and Atari 8bit related components on eBay. The auction can be viewed at:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&rd=1&item=180204502691&ssPageName=STRK:MESE:IT&ih=008

The collection includes:

1x XEP80 w/Power Supply (with original packaging)
1x Atari 130xe w/576k, US+ OS Rom/MUX OS Rom, SuperVideo & SuperAudio upgrades (not functional, possibly bad solder joint(s))
1x Atari 800 Cover (reads Atari 800 Home Computer)
1x Atari 800 Cover (no text)
4 x Atari 2600 Game system cover (no text)
2 x Atari to PC Compatible power supply adapter cable
1 x PBI Tester (CA026033-001)
1 x Mosaic 32k RAM for Atari 400/800
4 x Adaptec 4000A Adapters
3 x Adaptec 4070 Adapters
1 x Atari 130xe PBI Interface extender/adapter (ICD)
1 x Voicemaster Speech and Music Processor (uses joystick port)
1 x Model A U-Print Parallel printer interface
1 x Graphix AT by Xetec parallel interface
4 x New rolls of 1020 Printer paper
1 x MicroPrint Parallel interface by Supra
1 x New package of Atari 1020 printer/plotter black replacement pens (BX4206) never opened
2 x New Atari CX89 Color Monitor Cable - never opened
2 x Atari 800xl keyboards
1 x New XETouch for 65XE, 130xe, XEGS Keyboard Internal contacts (62 count) Only fits Sugiyama made keyboards
2 x Atari Trak-Ball
1 x Pair of Wireless GameMate Joysticks (with base and 2 x joysticks)
1 x Mindscape PowerPlayer joystick
1 x Video touchpad (with Star Raiders template)
1 x Slik Stik joystick
1 x 2way joystick splitter cable
3 x Atari CX85 keypads (with templates)
1 x Atari SX212 Modem
1 x Atari XM301 Modem
2 x PR:C Connection
1 x Atari Kids Controller
1 x KoalaPad
xQty SIO Cables (~15)
1 x APE Pro! cable

1 x APE SIO2PC Universal Cable
1 x Express! Cart
1 x RTime8 Cart (new battery)

And no, I'm not leaving the 8bit Community, as I still have my trusty 256mb upgraded 800xl actively connected and using it as a Telnet/SSH front-end to my website (I monitor the access_log using the 8bit) via my Lantronix MSS10.

Yeah, but I desperately needed to make room and most of that equipment was redundant. I have multiple SDX, RTime8, APE Cables, and I use a MUX instead of the PR:C, and I use a Lantronix MSS-10 instead of a modem.

Hate to part with any of my 8bit stuff, but after having it sit for 10+ years, it finally had to go.

you already have a PC serial <-> Atari SIO cable (hardware).

Anyone get idea for me?
>
> Thanks!
> Jack

I would surmise you want an interface to connect a 1050
SIO port directly to a PC serial port. Such a device is called
10502PC interface.
A 10502PC interface/cable is sort of unusual because most
people have an Atari computer to help out in the copying process.
I guess a 10502PC cable is usually used to copy copy protected
floppy disks to a PC, however, I believe a APE PRO cable
and software will do the job.
Maybe if you describe what you want to do, eg. copy commercial
Atari floppy to PC .atr or .pro file, it would be helpful to answer you.

Atari++ should then do for you, though I never actually tested this
since I lack the cable.

So long,
Thomas

If I have this right, no such animal.

The only emulator that used a real 1050 was Xformer and that didn't use any flavor of serial communication. Used bit banging on an ST or PC printer port to drive the 1050.

Both Steve Tucker and Nick Kennedy have serial interfaces to drive a 1050, but they only do so to make disk images on the PC. I recall a few people working with emulators asked for an explaination of the formats but it wasn't to hook up a real drive to the emulator, it was to use the disk images with the copy protection information rather then run a real drive.

That is amazing that IMAGE still has meetings. Are any of the original guys coming to the current meetings? I was active in the club from the time it first started. They let me be an "officer" in the club back in the day, even though I was just a kid then. I wrote game reviews for the newsletters, did demos at the meetings, etc. I have many fond memories of that group.

Yes IMAGE still meets at my house. Infact, there is one this Monday the 14th.
Steve Elek is the club President. Paul Hochstetler is the Treasurer. I do the
meetings and write most of the newsletter. Some of the original guys come
around from time to time. I have been a member from about 1987.

Look on the bottom of your machines, what do you see?

Here's what I have, can you add or correct?

Atari computers were made in....

400 - Hong Kong
800 - USA
1200XL - USA and Taiwan
600XL - Hong Kong
800XL - Hong Kong, Taiwan
65XE - Taiwan, China
130XE - Taiwan, China
800XE - China
XEGS - ?????

Thanks,

-Michael

Source record: 3667

I checked a 16k stargate.xex and it didn't
require a menu disk.
The crc32 I tried on the file was
890AEF37 hex . It was a stargate.xex from
Holmes archive. There is also a stargate courier,
but that is different.
You sure your 800 has 48K? It loads all the
way to $BFFF.

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by
Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of
Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from
1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by
Atari Interactive, which is managed by today's Atari, Inc. Both of these
are divisions of Infogrames Entertainment.

My 130XE was made in Mexico. Curious about that, I asked the seller at
the time about it, and here's the answer I got back (just in case anyone
is curious or bored enough to read it):

When Atari closed we bought thousands of computers from them. Most do
not have manuals or power packs. Those were added after they new where
they were going to be shipped. That particular computer was assembled in
Mexico City and would have been shipped to Cental or South America. When
Atari closed there plant in Mexico everything was shipped back to
California. We also have computers from plants in Canada, Ireland and
many Asian countries. We have very few English 130XE manuals left and
will run out long before we run out of computers. We have a bunch in
Spanish. Because we have had trouble with customers in the past we open
each computer and initial the keyboard and mother board with date
sold/tested. Most Atari 8-bit computers and games had no warranty tag on
them. In fact most of the brand new 130 XE Computers we have do not have
any label at all on the bottom. The bottom label would change with the
destination country.

1635. Latest Vintage Technology magazine issue (online & print) out now

Newsgroup: comp.sys.atari.8bit
Date: 2008-01-16 01:21:16 UTC
From: vintagetechnology@yahoo.co.uk
Message-ID: <4945f65e-8a60-4641-8a4d-22601a50f367@s19g2000prg.googlegroups.com>
Source record: 3674

Go to www.vintagetechnology.co.uk to download latest issue (February '08). Only £0.79p / $1.60 for a 40+ page magazine devoted to the collection, preservation and history of all aspects of digital and electronics technology, including computers, arcade games, calculators, led watches, mobile phones, appliances, gadgets, robots, radio, audio and tv.

This issue features:

The first LCD watches and their evolution
Early computing predictions - how many came true?
The first walkmans
Personal robots of the 1980s
Magnavox Odyssey - first home video game
Early pocket TVs
Review of the best modern TV retro-games consoles
The first computer viruses
Doom and the birth of LAN games
Epson HX-20
Interview with Tilly Blythe - curator of Computing at the Science Museum
Computer time sharing memories
What type of collector are you?
Cleaning old electrical equipment
Commodore calculators

Plus sections on museums & collections, latest events & news and book review.

You can also get the printed version for £1.99

VTM aims to explore the legacy of recent past technology, explore new 'electronica' which could become or already is collectible, be an enjoyable resource for collectors & historians and celebrate the history and personalities surrounding this subject.

Edward, I am sorry I do not remember you, although I might recognize you if I saw you. I graduated high school in 1987, and I was doing less with the group by then. I do remember Mr. Elek. He was president when I was with the group. That is great that he is still active with it and is club president.

Don Turnock, Bruce A., Keith - those are the guys I remember. Mr. Elek would most likely remember them. We started out in the Atari computer store in downtown South Bend, then moved around as we grew in size. The 8-bit days were the best times in the club for me, but I did continue with it after I got my ST. I would definitely attend current meetings if I still lived in the area, but I am in Colorado.

Greg mentioned that there is a newsletter available through email. Since you are writing it, could I get a copy?

So were you the winner of this? If so, would you be interested in selling the Mosaic 32K RAM card? I'm trying to see if a Mosaic 32K card will work alongside a Magna 512K ramdisk and a Bit-3 80 column card to allow my 800 48K of "normal" RAM and access to the capabilities of those two boards.

Quite possibly. I was planning to put it in my 800, but then I realized
you can't take the 800 past 48K without adding some back switching logic.
Then I was planning to put it in my 400, but then I found out the keyboard
on my 400 doesn't work. So, the Mosaic card has thus far brought me
nothing but pain. :)

Anyway, I'll drop you an email directly to discuss.

Source record: 3682

I have an Axlon 32K card, however the problem is it will only work properly in RAM slot 2, which is the one my 512K Magna card wants to reside in.

What I really need to find out is if the Mosaic 32K card will work from RAM slot 1, with a normal 16K card in slot 2, to provide the full 48K of normal memory. I have the Bit-3 card in slot 3, so slot 1 is the only possible location that would allow my 48K, the Ramdisk, and the Bit-3 card simultaniously. If you have time and could test it from this location it would let me know whether this might work for me. If it does, I would happily send you the Axlon 32K card in addition to cost.

Thanks.

Jason Harmon

Most interesting, thanks.

I'm thinking someone should create a web gallery of pics of the bottoms of
all the 8-bit Atari computers, demonstrating where all they were made.
Has this been done already?

It is of interest, since they were produced in
many countries. There is some difference I've
heard of that the Chinese built ones had
some problems. I don't remember which
model had problems or what the problems were.
But I would steer clear of mainland Chinese
built ones if I could tell that.

:-(

I need a copy of XDIR ... or at least I think I do.

I need to copy files from my windows xp into an ATR disk image. Formatted to ss/sd which contains the apx20173 disk menu.

I've tried googling but every link I find is outdated. Umich doesn't have this file either.

TIA

http://www.langesite.com/Atari/Holmes/Holmes%202/PC%20Atari%20Programming%20Utils/

That may not wrap well. Uhm...
www.langesite.com/Atari/Holmes

Then pick Holmes 2. Then PC Atari Programming Utils.

This is for imageman.exe, which will work with
a DOS 2.5/MyDOS single density .ATR.
To put a PC saved Atari file on a DOS 2.5
style single density ATR.

You don't want xdir, I don't think it has been
fixed, because xdir won't work on XP.
But, you can find xdir at the langesite.com/Atari/Holmes anyway.

I believe there is another utility, that I don't
remember the name of, that will write PC files
to ATR images, maybe someone will remind.

I still use imageman.exe.

Oh, I think the other utility is Ken Siders
atrutil.exe, found in the same location as
imageman. Get atrutil.zip, it works in XP,
I checked. And it works with DOS 2.5
and FTeDOS (SpartaDOS). I think
single density.

Taking numbers from the jiffy clock should
be pretty random. That may be how the
RND functions, however.
```

```
There's a RANDOM at 53770.
It takes a number from a poly counter.
In BASIC you could get a random number
between 0 and 9 with:
10 X=PEEK(53770)
20 Y=INT(X/25.5)

For instance. PEEK(53770) returns a random
number between 0 and 255.
```

I have this in the FAQ:

- Chelco version has Stop/Eject, then Pause buttons
- Sanyo version has Pause, then Stop/Eject buttons

but I don't know the Why or When.

er... that should be either >= or simply >9

the idea is that eventually the location will return a good number w/
equal probability distribution, and if the program isn't time
constrained, then the wait shouldn't be all that long. btw, IMHO I think
that the Atari random number generator is the best for a personal pc
there is - all of the other ones i believe are math formula generated and
therefore, predictable.

LOL. I have always thought the same. I got started programming on an Atari and saw how "truly" random the number at 53770 was. Then I went to other systems and saw they were based on math formulas that would need to be seeded first and then would only continue changing after the random function was called. So giving it a seed of, lets say, 10, then you already knew what the next number would be. Of course, they expected you to seed using something like the current time clock so it would be more "random".

The Atari random numbers start at system startup. And doesn't wait for you to ask for a number before creating another one. I'm surprised this wasn't more common in future computers ... but then again, pc's (the serious ones) weren't designed for games ... they were designed for business where randomness was the last thing you wanted in a pc.

IMHO

>wait for you to ask for a number before creating another one....

IIRC the random numbers are generated by POKEY, by way of hardware (random noise from what is effectively a reverse biased diode).

As you say, why more machines haven't used such a technique is mystifying.

TTFN - Pete.

I'm pretty sure it wasn't a reverse biased diode, but a good ol' LFSR (linear feedback shift register). See De Re Atari, IIRC, for the diagrams showing this. These create long strings of pseudo-random numbers, but indeed do repeat after a known time. IIRC, POKEY keeps creating numbers in this fashion at its clock speed (1.79 MHz?), and your program gets the "current" one at the time. So "most" programs will never notice any repeating sequences, as the majority of the LFSR output is being ignored.

Your 8-bit friend,

Jeff Potter

Doesn't look immediately familiar to me. I'll ask around. Have you
tried over at Atarimania?

1676. Welcome to comp.sys.atari.8bit!

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by
Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of
Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from
1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by
Atari Interactive, which is managed by today's Atari, Inc. Both of these
are divisions of Infogrames Entertainment.

> In my opinion, the RND command don`t create real random numbers...

The RND command in Atari Basic is based on the Pokey poly counter
register, which is really fairly random. An emulator has to emulate this
of course, properly. Depends on the emulator how well this works, but
for atari++, it uses the rnd() c standard library, but seeds it with
user input and the emulator timing, i.e. you do not get the same
sequence of random numbers over and over again.

So long,
Thomas

Wonder, did Atari do this with any other periphials (change the mechs,
or internal parts) and still keep the same number on the box (ie the
1010)?

It would almost appear to be something that would have come with the
computer itself. If it was with a cartridge, I would think they would
mention the cart name in the text.

You might want to try the Bill Kendrick new person faq.
I don't believe much of a manual came with
the 130XE.

The 810 drives with MPI vs. Tandon mechanisms springs to mind..

There's also the early 850 Interface that's in a radically different
looking case, but the internals are the same.

They actually did - I have a 132-page spiral bound owner's manual (newer
ones came with the typical paperback binding) here. If I had a better
scanner, I would scan it for you...

The link was helpful. I no nothing about the Atari line. I just picked up my first 130xe. There is enough information on the web to do BASIC programming. Doing simple things like bringing up the internal system check or disabling basic or what is the pot for on the bottom side for? I figure all that would be in the manual. I am sure that I will win an auction sooner or later that will have a user manual in it.

Not necessarily....but you've got me thinking that perhaps that little sheet
came with Atari cartridges?

Unfortunately I can't get at any of my cartridges at the moment to check,
they're all boxed up and inaccessable. :-(

I think I have a pic of the early "black box" style somewhere. I'll
look for it.

And as long as we're on the topic, didn't the 410 undergo a radical
transformation early on?

From: Andreas Koch <andiko.nospam@web.de>
Message-ID: <fn89h6$p0a$01$1@news.t-online.com>
Source record: 3732

Well,
I also do not know why or when. But looking at my two 1010 recorders,
they are as different as you mention it...
- the one with Stop/Ej. and Pause buttons has a black label and is made
in Hong Kong
- the one with Pause and Stop/Ej.buttons has a white label and is made
in Japan
Alas, none of the two recoders has a year printed on it...

Hmm, I remember that Atari also used different mechs in XF551 drives,
the older models had Mitsumi drives (which also came with various
pcb`s), these drives only checked the index hole when formatting, so you
could read and write to the backside of a formatted disk without
problems. When you threw in the disk, nothing happened and when you
opened the drive knob the disk did NOT flop out... so the Mitsumi drive
was not really a floppy drive...

The later XF551 models (maybe only in Europe, I really don`t know) had
Chinon drives. Afaik, Chinon drives were also used for the Amiga
computers at some time, maybe they were cheaper than the Mitsumi
drives... Anyway, the Chinon drive always checks the index hole, thus if
you throw in the backside of a disk, it will not stop spinning, meaning
one cannot read, nor write nor format *the backside* of a disk on such
drives unless the disk has two index hole or some selfmade upgrade (in
german: Indexlochumgehung, maybe index hole redirection is the correct
english word for this)... But therefore, when you throw in a disk
(front/upperside) into the Chinon drive, the drive starts spinning for a
short moment, guess this could have been used for density detection, but
alas the XF OS does not support it. Next, when you open the knob of the
Chinon drive, the disk flops out, just as it should - it is a floppy
drive...

Enough said, but mystery still unsolved. I guess, they chose another
firm for the 1010 recorders after a while, simply because it was cheaper
than the one before... -Andreas Koch.

1694. Re: Real random numbers in Basic

Newsgroup: comp.sys.atari.8bit
Date: 2008-01-23 21:15:12 UTC
From: Bill Glaholt <toothy@glaholt600.coldwinterknights.net>
Message-ID: <slrnfpfbig.dsh.toothy@glaholt600.coldwinterknights.net>
Source record: 3733

There are some methods you can use to generate a very random number. It would require some programming from some documentation, but it's relatively trivial -- I implemented a formula in COBOL, for example. Google search on some academic white papers (I used a 1995 master's research project from the University of Southern Florida back in 1996) on random number generation. You're bound to find one you can use.. Now, granted - they are all based on seed as well, but they're very strong, mathematically speaking.

You are mistaken. You must be thinking of the Commodore-64 and Amiga.
Those were gay. Come on ... what kind of name is Commodore? Plus we know
about the fruitcakes that developed for Amiga.

It's really sad that things have gone the way they have. I can remember a time, back before everybody became so "enlightened," when if you said you were "gay" it merely meant that you were happy. No sexual connotations involved.

In that context, the above-quoted statement is indeed true.

You're right about what De Re Atari says.

Was it CBM's SID then that used a reversed biased diode to generate noise/random numbers? I'm sure one of them did (though I was certain it was POKEY)....

TTFN - Pete.

That is ok Steve. In 1987 I was not doing too much with the club and did not come to ever meeting. I was more involved with my own Atari stuff. I saw Don Turnock about 2 years ago He is into PC's now and even put together my wife's setup. I have alot of the club's old 8-bit stuff, so I enjoy myself there. I will see what Steve has to say about getting you a copy of the newsletter. I do not care myself, but Steve would want you to become a member first. Dues are $10 a year which is reasonable. I did forward you last email to me to Steve, so he knows. I will see what he has to say at the next meeting in February. Take care..

how do you do ssh on the 8-bit? i didn't think the 8-bit would be fast
enough to do ssh encryption.

The SSH would be handled via whatever device server is doing the serial
to ethernet translation. In this case, James mentions he uses a MSS10,
which I assume was supposed to be MSS100, and it handles accepting
serial connections and then telneting out via ethernet. Some device
servers support SSH as well as telnet, but I don't believe the MSS100 is
one of them (otherwise, mine is really due for a firmware upgrade :)),
so perhaps James will jump and clear that one up for us.

You can look at lantronix.com for info on their serial device servers.
Other viable options include the PortMaster line built by
Livingston/Lucent for use as ISP dial-up servers. And there are
others...

>
> In my opinion, the RND command don`t create real random numbers...

Random enough for most cases. Poly counters random generator would
create something like that too. If you need more randomness then
just use RND or POKEY directly as a seed for one of whole bunch
random generators you can find (use Google Luke :P). This is of course
about real machine - I dont know how it's emulated and you did not
say which emulator you're talking about ;). Anyway - best way to
avoid problems is to use any software driven random generator and
not to worry about RND, POKEY etc. You can even put generator code
(it will not be big) in RND$ and do USR(ADR(RND$),SEED) first time
and then subsequent USR(ADR(RND$)) will produce numbers. Of course
to use this in BASIC you still have to write 6502 code for RND$:)
or you can do generator in basic too (GOSUB called), but it will
be sooooooo slooooooow that it makes no sense in my opinion.

Source record: 3604

Hello:

Could/would someone please direct me to the latest available
information on the SIO protocol, frame and device assignments?
I've scanned the web and only found a lot of broken links!

Has anyone ever documented the 'boot up' sequence that the 8bits used
for downloading drivers on bootup (as in the 850 interface)

Is the OS Listing and Manual available on the web somehwere?
(I have an old hard copy somewhere - not accessible right now!)

Thanks,
TomCee

1716. Raster Blaster

AFAIK it was developed for the Apple II and is pretty much
the first realistic computer pinball game.
I don't know the Atari conversion but it should be close.

Bill Budge later wrote Pinball Construction Set which was
IIRC one of the first games with an editor available.

there's not much happening in here since i've been following it the past couple weeks. could it be that the atari 8-bit has finally truly died? there hasn't really been much of interest on ebay in the last little while either.

I don't believe the 8bit Atari has died. Given it's age, I'm certain that 'interest' - as guaged by activity in this (and other) forum(s), and ebay will goes through peaks and valleys. Perhaps we're in a valley right now! I am an original owner, and my interest peaks and wanes over the years/decades!

Given the Atari 8bit's place in history, I'm sure it will always have a dedicated following.

A most interesting fact about these systems is that Atari actually published the source code of the Operating System ROMS and Disk Operating System.This was THE commented source code by the authors of the OS - not some disassembled and reconstructed code. This may be overlooked, but this is/was a most powerful tool for developers and interested users. I'm not sure who may still hold the rights to this code and if it could be posted on the web. They had also published the Hardware Manuals - fully documenting the Hardware with descriptions and full schematics.

Atari was way ahead of its time; being 'Open Source' - perhaps before the term (as we now know it) existed!

I think Apple may have been a bit ahead of Atari in this respect.
Apple actually published source code in their user manuals -- not for
the Macintosh, but for the old Apple II machines. Apple did
everything in their power to ensure that Apple users knew everything
they possibly could about the machines they had purchased. The Atari
8-bit machines that I had owned and continued to own, by contrast,
shipped with very little by way of technical information. ie. source
code for the ROMs and operating system.

Still, I found the old Atari 8-bit machines to be the most pleasureable
to use. Much more fun than the Commodore 64 for the simple fact that
they actually used a Disk Operating System that was booted from a
floppy disk. This made the Atari much more interesting in my view.
The old Apple machines I found to be really simplistic. As such they
were not much fun to use at all.

I will probably have at least one old Atari 8-bit computer for as long
as I live.

That's because, unlike Apple, Atari published the information seperately.

There were three hefty manuals: the hardware reference guide, OS reference guide and the OS listing. All available as a pack from your friendly Atari dealer. :-)

I've got an Apple II owner's manual, not because I've ever owned an
Apple II, but because it is really cool how much technical info they
put in there. It was truely geared toward the hacker, where it is
evident that the Atari owner's manual was for the average consumer.

Not sure about 2.5, MyDos, etc; but DOS 2.0 came with
an AUTORUN.SYS which loaded the serial port driver
from the 850 and puts the R: device in the handler table
at boot time. The P: printer code was already in the OS
ROM along with E: S: K: and C:. Handlers can be added
or changed at any time up to the size limits of HATABS;
drivers are normally added at boot only because they
usually affect LOMEM.

Apple also published volumes of technical information separately from
the computers that they shipped.

> for downloading drivers on bootup (as in the 850 interface)

I don't think it has been "documented", but it's easy enough.

First step is to read the boostrap parameters, that's command
'?' = $3f for device $50, 12 bytes. The 12 bytes are copied into
the SIO vector directly ($300 to $30c) and SIO is then called
again. This is supposed to provide bootstrap code at $500, which
is then launched like a "disk base" boot file at $506, which does
all the rest. A very minimal 850 bootstrap code looks like this
(taken from the atari++ built-in operating system):

;;; *** Boot850
;;; *** Boot the external 850 interface
;;; *** returns with carry set on error, other
;;; *** wise with carry clear.
.global Boot850
.proc Boot850
ldx #12-1
lp:
lda Init850Boot,x
sta SIODeviceId,x
dex
bpl lp
jsr SIOVector
bmi fail
ldx #12-1
lp2:
lda BootSpace,x
sta SIODeviceId,x
dex
bpl lp2
jsr SIOVector ; boot the handler
bmi fail
jmp BootSpace+6 ; run the boot code
Init850Boot:
.byte $50,$01 ; RS232-handler, unit 1
```

```
.byte '?',$40 ; get boot parameter, read
.word BootSpace
.byte $06,$00 ; timeout
.word 12,0 ; size, aux1,2
fail: ; runs into the following
sec
rts
```

The 850 did also listen to the Os bootstrap from disk, then providing the very same data at the bootstrap area at $500 so you could initialize the 850 even without an autorun.sys file. (At least my 850XL does that, probably the original doesn't, I don't know.)

Thank you all! That is most helpful information.

I've been working through the OS listings and Hardware manual to
better understand the boot process; a most tedious process.

I am looking for details on the specifics of the boot process, in
particular the bootup process when both a 850 and a disk drive are
present.

A few questions:
1. Is the disk drive booted first, after which the RS232 driver is
loaded from the 850?
2. Can the 850 driver be loaded without the presence of a disk drive?
3. Does anyone have a assembly or hex listing of the 850 ROM?
4. Any other links to original Atari Hardware and Software Documents
is most appreciated.

Thank you again and Regards,
TomCee

"Use the source, Luke!" The boot process is actually not so complicated.

> 1. Is the disk drive booted first, after which the RS232 driver is
> loaded from the 850?

If a disk is present, then the Os first loads the boot sector from disk, which again contains information on how many sectors from the disk are to be read to which address. Then the boot process continues at the init vector of the bootstrap code (load address + 6). This is usually the FMS bootstrap code, which will load "DOS.SYS" into the main memory. "DOS.SYS" then again loads "AUTORUN.SYS", which - could be - again load the 850 (serial interface) driver. The init process then returns with the carry bit clear if everything went fine. If the carry is set, the Os prints "BOOT ERROR" and tries again. Then, depending on the system configuration, several things can happen: If a cartridge is present, it is started thru its run vector at 0xBFFA. If no cart is present, the dup vector at $0a is called, which will call back into the FMS and boots or runs the DUP.SYS from disk (or from memory, depending on the DOS).

The 850 code has a nice "gotcha" in the sense that it is relocatable. It first loads its own init code, and this init code then bootstraps the main part of the driver to LOMEM. Then, additional data containing the relocation offsets are loaded, again from the 850 ROM. It is a table containing offsets, low and hi-bytes, that have to be adjusted to the target position of driver.

> 2. Can the 850 driver be loaded without the presence of a disk drive?

Yes, due to a special logic in the 850 interface. The interface box *also* replies to the "load first sector from disk" request, i.e. acts as a disk drive if no other disk is available on the SIO chain. See my reply above.

> 3. Does anyone have a assembly or hex listing of the 850 ROM?

Yes. I might have the binary somewhere. The ROM is for one degree the "operating system" of the 850, and to another degree the R: driver that

gets loaded into the main memory of the system. For the latter part, I have a complete rewrite (part of Atari++) which has a couple of bugs of the original code fixed (< 8 bit communication, handling of parity, etc).

So long,
Thomas

In addition to what Thomas said.

If both the 850 and disk drive are present only the DOS loads. Typically
an autorun program on the disk will need to run to initialize the 850
IF you want to use RS232.

The SIO was really designed to be flexible to handle both smart and dumb hardware on the chain. For instance, the printer handler is in the computer OS so it doesn't have to load from the 850, the 850 just has to understand SIO info sent to printer is meant for it and route it. ~Same for the cassette handler being in the OS but cassettes are even dumber since they only has to record and playback.

By having things set up this way it allowed you to use other hardware like the MPP modem which hung off a joystick rather then get forced into using devices on the SIO chain.

Some SIO devices, like the 1030 modem, needed nothing else. You could just have the computer and 1030 plugged in and it would automatically load everything including a terminal program with dialer. Most people would just boot a disk drive and load a handler with more capabilities like file transfers rather then the program in the 1030 boot.

FWIW: I've heard the guy who did the Atari SIO is one of the guys on the USB patent.

Rick

True it has slowed down, but I do not think the Atari 8-bit has truly died. I know of a number of people who have Atari 8-bit owners that have never come on here to chat.

Yes, I have heard of it and have a copy. Nice game and really shows off what
the 8-bit can do.

Greetings,

I am looking for information on any current ongoing Atari 8-Bit/ST-Falcon,
CD/Disk based, Magazines and Newsletters.
Printed Magazines and Newsletters.

If anyone knows of any sources in North America or Overseas,
I would like info on how to subscribe, and contact info on the publisher(s).

Also would like to know about how many subscribers/active members if
possible.

Although the Internet is a great tool for information, I still enjoy a good
disk
and paper mag/newsletter. phantomm@suddenlink.net

I hope not. I've two 800XLs, a 65XE and a XEGS (all hen's teeth in
these parts) that I've barely turned on and I was hoping someone would
show me the ropes. Would it be rude to ask where the Atari 8 Bit
people hang out if not here?

Greetings, DanSolofish. Funny meeting you here. I too have been dipping my feet in the Atari pool lately and I must say, the water is fine. There is a bit of a learning curve as the Atari 8 bit machines are so different from what we're use to. Anyway, I would start with Atarimania which is the Atari equivalent of Lemon. I would also check out Atari.org and Atariage. I have yet to find any forums that are as active as L64 though. :(

http://www.atarimania.com/start.php

http://www.atari.org/

http://www.atariage.com/

If anyone knows of any other good resources, please post them. There are alawys new people looking to gain a foothold.

Hello,

Well, for file copiers, having extra ram only helps in a 1 drive system. In
that case, copy the files to a ramdisk, then to the dest. disk, as many times
as needed. Very fast since the source is done once.

There are disk copiers that support extra ram though. SCXM is the 1 I use
most.

I was reading www.atarimagazine.com one of the old computes and it
gives the following information for being able to determine what
version of the OS you have. Why does Rev A on the 400/800 return 3
possible values? was there 3 different version of version A?

Operating System PEEK(65527)
400/800 Revision A 221, 87, or 243
400/800 Revision B 230
1200XL Revision A 10
1200XL Revision B 11
600XL 1
800XL 2

Source record: 3640

It's been about 20 years or so since I stopped doing any graphical design using the Atari computers. I had moved on to the PC's and different types of programming. Now I use Flash to do different graphical interfaces for websites and realize that, using Actionscript in Flash I can again do graphical design like I did on the Atari using program commands (like using the plot, drawto etc). One thing I would like to be able to do, which I used to know how to do on the Atari is create a 3D wireframe globe that can be rotated in 3 dimensions. I recall how to do a 2d version of it using sin, cos, pi etc. But a 3d version is somethign I just cant seem to remember.

I would liek to be able to give the program an x,y position (like a lattitude and longitude) , a close or near flag, and a direction of rotation and have the wireframe rotate that position so it is in the center of the wireframe. I know the basic wireframe could be drawrn with a "simple" formula and stepped throu to make the movement, but other than making the basic circle, I cant remember the formuleas. I hope I am explaining this correctly

Bill H

1752. Re: 400/800 rev A os

Newsgroup: comp.sys.atari.8bit

Source record: 3641
Body handling: HTML body converted to readable text

Bill,

The info for each different revision resides in TWO memory locations:
65527 *and* 65528.

Mapping The Atari - Revised Edition - By Ian Chadwick
http://www.atariarchives.org/mapping/appendix12.php
65527 and 65528 should read 221 ($DD) and 87 ($57) for the
400/800 revision A ROMS; 243 ($F3) and 230 ($E6) for the B
ROMS. PAL versions read 214/87 ($D6/$57) and 34/88 ($22/$58),
respectively. The 1200XL should read 10 at 65527 for revision A
and 11 for revision B. The 600XL should read 1 at 65527, and the
800XL, 2. For the 1200XL, 64728 ($FCD8) should not read 162
($A2).

From: Jack Tseng <tseng4@hotmail.com>
Message-ID: <UZ3qj.26116$E01.16783@newsfe22.lga>
Source record: 3645

I figured out how to enable Indus Syncmonch for SuperDOS 5.1. SuperDOS actually does not work with Indus. DOS XL with Synchromesh boot first, then turn off the computer, insert the SuperDOS in Indus, turn on the computer. SuperDOS boots WARP! as US Double 1050 speed. IF Indus is turned off and ram is reset, SuperDOS wont work and freezes Indus. SpartaDOS 1.1 HS wont work after DOS XL boot.

2008.01.14 MadTeam: Graph2Font 3.8.5.6, MADS 1.8.0

------------------------------

Subject: Introduction

Conventions
-----------
All commercial vendors, developers, publishers, and repair shops should be
listed here. "Active" PD/freeware/shareware developers should also be listed.
```

Persons or entities holding rights to products, but not selling or supporting them in any way, should NOT be listed here.

"Vendor" = Reseller of products produced by others. Types of products sold are given in categories: new hardware, used hardware, PD/freeware/ shareware, (new) commercial software, used (commercial) software.

"Developer" = Producer of products. Titles of products produced by the developer are listed. No prices are given.

"Publisher" = Publishes a print or disk magazine, or a book. Complete subscription or ordering information should be given, including prices. Authorized online publishers of originally print or disk magazines are also listed. Online books are not listed.

"Repair Shop" = Can repair 8-bit Atari or related hardware devices. Be sure to make advance contact before sending anything to work on!

Entries are presented alphabetically by company name, or publication title. If no company name exists, a personal name is used. "See" references indicate complete information may be found under the given heading. "See also" references indicate closely-related information may be found under the given heading.

The month/year that vendor information was most recently fully verified is given at the "upper-right" of each entry.

Every entry must contain a valid postal address or web page address.

Unless explicitly requested by the vendor, no entries will include an email address due to the overwhelming amount of spam that would result.

The following is from http://www.upu.int/irc/en/ (2004.03.27)

When one writes to a stranger and requests a reply, it is considered polite to enclose a self-addressed stamped envelope. This works well when both persons live in the same country. However, if they are from different countries, the enclosed postage stamp will not be valid.

This technical problem was solved in 1906 when the Universal Postal Union, during its Congress in Rome, introduced the International Reply Coupon service. International Reply Coupons (IRC) are exchangeable in all member countries for the minimum postage of a priority item or an unregistered airmail letter sent to a foreign country.

The UPU's International Bureau processes approximately six million coupons each year and takes care of all accounting aspects. Developed countries are the largest users. The International Bureau does not sell ICRs directly to customers; they must buy them from their local post office. Although they are not obliged to sell ICRs, it is mandatory for all Posts of the UPU member countries to exchange the coupons.

Verfications -> YOU!

This list is in a constant state of development, and comes with no
guarantees. Information of this nature constantly ages; therefore, the
information contained in this list is constantly updated. Please use the
latest release of this list whenever possible!

Remember, the success of this list is dependent on YOU, the reader, to
send me updates that correct errors that you find. If you use this
list, please do your part in keeping it useful for everyone!

Archive-name: atari-8-bit/welcome
Posting-Frequency: 7 days
Last-modified: October 20, 2007

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by
Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of
Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from
1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by
Atari Interactive, which is managed by today's Atari, Inc. Both of these
are divisions of Infogrames Entertainment.

NEWSGROUP BACKGROUND
comp.sys.atari.8bit was created in November 1986 (as part of the Great
Renaming) as a direct replacement for: net.micro.atari8

comp.sys.atari.8bit is unmoderated, and has no formal newsgroup charter.

The comp.* hierarchy of Usenet newsgroups is managed by the Big-8 Management
Board: http://www.big-8.org/

RELATED USENET NEWSGROUPS
alt.binaries.comp.atari8bit
Programs for Atari's 6502-based orphans.
```

comp.sys.atari.advocacy

Hey guys - In an effort to get rid of a number of extra items in relatively short order, I've broken down and listed some stuff on eBay. This includes some Atari 8-bit hardware, software, and related items, including extras from that recent "deal of the year" auction (no, I did NOT actually need all 7 of those Adaptec boards :)) and other random parts that I either have have too many of or simply can't put to good use. At any rate, if you see anything you really want that does not yet have a bid, feel free to let me know so we can kill the auction and deal offline. At any rate, here's the link:

http://search.ebay.com/_W0QQsassZjwilkinson43

To contact me directly, just reverse each segment of my public email address.

thanks!

Best I saw was Shadow IIRC written by some whiz from NTAC (North Texas Atari Club); it was 2.0 based and all ML with an interface similar to Sparta's where you could flag files from a directory. Total memory was used and multiple files transfered in each pass. We were all impressed when Mike Beard demoed it at our local club. Sadly I did not find it on XLSearch...

I dont believe Bob Puff sells the Black Box directly to the Public anymore,
but he does sell them through Lance at Video61@tcq.net

As far as I know Bob Puff still makes the Black Box. Thanx! =-=Ben=-=

Hello,

I'm trying to run an old BASIC program on Atari800Win Plus 4.0. The program has a CAS (cassette) extension although the program is no longer actually on a cassette. I've done the following commands, but can't get the program to load and run. What am I doing wrong?

1. Ran Atari800Win Plus 4.0
2. Loaded ROMs (everything works fine)
3. Pressed F5 to get to the BASIC screen
4. Fron the FILE menu, I selected ATTACH TAPE. I then located the program file and double
click it. Atari800Win then returns me to the BASIC screen, but nothing happens.
The cursor appears on the screen and that is all.

Also, how can I get a printed copy of the program from Atari800Win?

Any help is greatly appreciated!

Thanks!

Mark

You might need to give a "CLOAD" command in Basic.
```

Atari800Win CAS files are special binary files,
I don't think it will load a CSAVED or SAVE "C:"
image. You have to have the SIO patch, at least
on At800win 3.1 I have.
If you aren't notified when you 'attach' the cas
file, then it is recognized by At800wp. At800wp
will say 'don't recognize the format' if it isn't a compatible
cas file. So, I suspect you have a binary cas file, and
it isn't BASIC. If that is the case, you engage the SIO
patch in the options menu, hit ALT B and tell it to
load the file. Then hold SHIFT and F5 for a cold
boot (no disk in D1:) and hold F4 same time.
Then hit ENTER and wait for a while, it should load.

Where did you get this cas file? Is it something you made,
or something you got from an archive. I ask, because
most .cas files in today's archives are the special At800WP format.
Can you look at the cas file with a, say, notepad, or hex
editor on the PC? If so, does it look like a BASIC load file?
As for printing the listing out, I think there are such

utilities for printing Atari files to PC printer.

Thanks for all your help. I got it to work! I had all the right
commands, I just wasn't using them properly.
Here is what I did to get the program to run.

1. Press F5 for BASIC screen.
2. Select "FILE" and then "Attach Tape". Select your program.
3. Type "Cload" on the BASIC screen
4. WAIT. It takes time to load the program. This was my main error. I
didn't wait long enough.
5. When the words "Ready" appear with the cursor, you're done!
6. Type "RUN" and you're done!

Now, how do I print the BASIC listing? Any help would be greatly
appreciated!

Thanks!

Mark

You can probably get a listing like Roy Biv says, "LIST P:".
However, it won't print inverse or special characters.
Printing ATASCII listings was a problem until the
G: device handler came. It allowed listing ATASCII
to a STAR dot matrix printer.
There may be some modern utility that will do it.
However, you have a problem, I think, that it is
on tape, and I don't know how you could extract it
to a disk file, no DOS is loaded.
There are some carts, like maybe the SpartaX
cart, that might allow a mixture of tape and disk,
but, of course, you can't put SpartaX as far as I know.

And err, you do not even need two joysticks. use one joystick and a)
left for the left flipper and b) fire button for the right flipper. you
can also use a pair of paddles and their firebuttons (or use a Multipad
or Powerpad by Portronic and press left+right direction buttons
simultan. to activate both flippers)... -Andreas Koch.

Well, for a disk based A8 magazine: Abbuc magazine ! Read more about
Abbuc and its (german) magazine here: www.abbuc.de

For an online magazine covering retro games, RGCD is also a good adress
www.rgcd.co.uk

There is also the czech FLOP magazine for the A8 which arrives once a
year (alas, all texts are in czech language, but the software on the
magazine is great)... http://raster.infos.cz/atari/flop/homepage.htm

1778. using a printer on the xformer8 emulator

Newsgroup: comp.sys.atari.8bit
Date: 2008-02-12 04:39:05 UTC
From: ibji <ibji@yahoo.com>
Message-ID: <cb36d901-4bef-437a-9548-80b442843591@s37g2000prg.googlegroups.com>

hi

just recently discovered the xformer8 emulator, seems to
emulate atari basic very well. only thing is, its been so long since
i've used it i've forgotten how to 'print', (no, i don't mean the
print command, i mean print as in sending info to the printer)

does anyone know how to get the emulator to recognize my printer?
(using a pc running windows xp), and what commands i would type in to
say, print out a 'list' of a program?

I don't know if xformer does printer printing.
I believe Atari800winplus does do some straightforward
printer printing (LPRINT and DOS COPY XXX.XXX
P:)
Maybe you need change emulators.
I don't belive there is any emulator that emulates
ATASCI special characters, like the old G: device
did to Star printers.

1781. Hyper XF

I have Hyper XF rom that was created by Stefan Dorndorf/Germany for XF551,
like XF35. I see boot from the rom without the inserted disk.

Mode A B C D M F S X ...

Can you describe the different modes?

Thanks!
Jack

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by
Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of
Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from
1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by
Atari Interactive, which is managed by today's Atari, Inc. Both of these
are divisions of Infogrames Entertainment.

1784. Latest Vintage Technology magazine issue (online & print) out now

Newsgroup: comp.sys.atari.8bit
Date: 2008-02-14 10:01:26 UTC
From: vintagetechnology@yahoo.co.uk
Message-ID: <873ad5fe-07da-4580-917a-0af001a3c0ef@u10g2000prn.googlegroups.com>
Source record: 3573

Go to www.vintagetechnology.co.uk to download latest issue (March '08). Only £0.79p / $1.60 for a 40+ page magazine devoted to the collection, preservation and history of all aspects of digital and electronics technology, including computers, arcade games, calculators, led watches, mobile phones, appliances, gadgets, robots, radio, audio and tv.

This issue features:

GO Compuserve!
Back when mice ran on wheels
I love my Tandy CoCo
ColeoVision - the arcade experience brought to the home
Mattel handheld games
Sinclair calculators - elegant little number crunchers
Seiko TV-Watch and its legacy
Early Technics receivers
The first one-way teletext services
Don Wetzel, co-patentee of the automatic teller machine
70s & 80s answering machines
When compulsive hoarding gets out of hand
Adjusting CRT colour monitors
The Atari user shows

Plus sections on museums & collections, latest events & news and book review.

You can also get the printed version for £1.99 and it is now possible to get single printed issues of current editions.

VTM aims to explore the legacy of recent past technology, explore new 'electronica' which could become or already is collectible, be an enjoyable resource for collectors & historians and celebrate the history and personalities surrounding this subject.

winrar is a good way to package a number of files, its an easy program
to get (unregistered version will open it for you)

the name of the folder is xf2000 which is the name of the emulator
xformer8 comes it, the txt file is the instructions

1790. Transfering ATR Images via Nullmodem & 850 Interface

Newsgroup: comp.sys.atari.8bit
Date: 2008-02-14 17:16:58 UTC
From: Mr Nukem <mrnukem@gmail.com>
Message-ID: <2eea626e-8b55-4827-80a6-cbe67b6263c3@s19g2000prg.googlegroups.com>
Source record: 3579

My goal is to take .ATR images and have them written to real Atari disks via my 800 XL. Here is what I am working with.

I have an Atari 800 XL, 1050 Disk Drive, 850 Interface, Null Modem Cable connected to the 850 Interface and to my Windows XP computer's serial port and a copy of both Atari Dos 3 and Smartdos 6.1 for software on the Atari 800 XL. I also have Atari 1030 Modem but it's not hooked up.

I believe my biggest problem is that I do not have a terminal program on the Atari side of things. I tried the APE software package but it appears it wants to work via an SIO2PC type cable and not a direct serial port interface.

Is there a program out there that will allow me to transfer disk images from the Windows system to the Atari and then write disk images onto the 1050 drive without having software initially on the Atari side of things? I know that for the Amiga and Apple II series of computers I found programs that did the same thing I want to do here (For both of these platforms the software did an initial bootstrap off the serial port and created a program disk on the Apple & Amiga for use to transfer disk images)

Hope this all makes sense. I did read the different FAQ's and Googled many different search terms but am now at the point where I felt I could ask for help.

I know I can buy software and an SIO2PC cable but money is tight and I have plenty of blank floppy disks to use and really prefer to have my collections as "vintage" as possible.

Thank you

I'll assume building your own SIO2PC cable is not an option either. Parts are only ~$5 if you use the 1489 version and just have to buy a DB9 connector and cut up an Atari cable.

More info then you really need perhaps but even going the route you want you will have to build an Atari 850 to IBM null modem cable. It's a non standard item that will end up costing you as much as building an SIO2PC interface. See what I mean? You are still going to be buying a part or two and last time I checked the cables and hoods will cost about the same for less functionality.

But yes, you can do it exactly as you described but it is just a bit complicated. Easiest way would be to ask here if someone would send you a disk with Disk Communicator and Bobterm 850 on it and an Atari to IBM null modem cable.

For a real retro experience w/o getting a disk, you could use Miniterm which you should be able to find on the net somewhere. You still need the cable to connect from the 850 to the IBM of course. Miniterm is just a ~10 line BASIC program that allows you to capture text that is sent from another computer. Since you are booting the 1050 disk drive you have to load the handler for it. It will either be on the one of the disks you have now or like Miniterm, you can type in a short program that will load the 850's built in handler after DOS loads.

From there you have two approaches to getting stuff to the Atari.

1) Get a terminal program written in BASIC that has Xmodem transfer from the IBM using Miniterm. You may have problems with special characters and Atari's odd EOL but it should work. You may even have to load an emulator on the IBM to LIST a terminal program so it isn't tokenized, just printable characters. Procedure would be load Miniterm on the Atari, put it in capture mode, send text file from the IBM using Hyperterm which is on just about everything Clone. Once you have the program on the Atari you can connect just like hooking up to a BBS.

2) After the Miniterm stage you can alternately use uuencode which converts binary files to text. You would capture a BASIC UUE decoder from the IBM with miniterm just like the terminal program. Once on the Atari you would uuencode files, send them to the Atari via Miniterm, convert them back into binaries on the Atari.

Honestly, the first file I would probably transfer using this method would be Bobterm 850 so I wouldn't have to do all the jerking around with UUE. After I got Bobterm I would get disk com and everything with Hyperterm transfers would be simple from there.

Rick

I have a standard RS232 Cable with a Null Modem adapter on it which is what I use to transfer data from my Windows box to other vintage systems This is null modem cable not usable with the Atari 850 interface? Sorry if I misunderstood

Thank you for all the info it helps get me going in the right direction. I would not mind spending money for a pre-built SIO2PC type cable but the only ones I have seen are on e-bay and are $30 - $50 or more depending on if I would want a USB or Printer interface cable. I will look into building my own and see if I have the skills needed to solder and create one.

Thank you again for the pointers.

I am a big Star Trek fan and would love to play your game, but I'm tired of trying to get it to work. Your text file instructions got me nowhere.You need to find a better way to make the game accessible to the end user (me). Let me know when you've done that. I'm anxious to play.

Slightly OT, but winrar will break Windows XP's built in compression
(ie right click, send to compressed folder). Even when removed you
will always be prompted that XP's compression is not the default and
there is no fix other than reinstall.

Correct, a IBM type serial cable will not work with
the 850.

> Thank you for all the info it helps get me going in the right

OK, so you need an Atari serial cable. You need
Atari communication software (Bobterm). And
finally, you need PC comm. software (Hyperterm?).
```

Old DOS program like PROCOMM would work
on a non-XP/Vista machine. I say this because
XP doesn't allow some DOS applications.
I'm surprised you have a XP with serial port,
almost everything is USB now.

The Atari serial cable will be hard to find, and cost
some. I really suggest APE stuff, APE for DOS
is shareware, crippled for what you want to do
(PC to Atari transfers). You could go build your
own SIO2PC 1489, it isn't real hard, but I don't
recall where the instructions are.
An APE serial interface with terminals (you have
to cut a SIO cable) is $24.95. And APE DOS
registration is $39.99. I'm not sure if APE DOS
will work on an XP box.
Hmm... cheapest route, assuming you can get
a Atari serial cable, or rig your own by swapping
some wires on your PC one (see the Atari8 FAQ).
Then the Bobterm and Procomm.
I believe the 850 R: handler will boot with SmartDOS,
forget DOS 3. Better to have the Bobterm R: handler.

Good luck and have fun.

To: Bill H - Sorry you have such issues with winrar, can't help you
there

To: Personable85:

1) download folder to desktop
2) click on 'extract to', then 'ok'
3) click on folder xf2000
```

4) click on folder inside, also called xf2000
5) click on xformer8.exe, this starts the emulator
6) on splash screen go to 'options', then 'disk properties'
7) double click on D2 line (second line down), on 'select disk image'
page, double click on dos26.xfd, hit 'close'
8) hit 'continue' to start emulator
9) type in EXACTLY....LOAD "D2:E"
10) type RUN to start game
if this doesn't work, try dragging the inner folder xf2000 to the
desktop so it isn't nested, try again to target dos26 file in d2 line

Thanks. I managed to get it to work.

I've always loved this text based Star Trek game. I always seem to come back to it despite all the modern stuff. There's something magical in its simplicity.

I hate to be the bearer of bad news, but the version of the Star Trek game you created already exists. Just check Atarimania.com and search under Star Trek. One of my future projects is to improve on the original.

Thanks for keeping the game (and the Star Trek dream) alive!

Mark

You understood right except for the 'standard' thing. Atari came first so it could be argued it is standard and everything else is non standard. Truth is I used to have a book that was just tables of all the different RS232 implementations so there never really was a standard.

Your cable does make it a little simpler. When confronted with the same problem all I did was get 3 short pieces of solid copper core hook up wire and jumpered the connections. I think I had straight through gender changer at the time so I could push the wires into the sockets. The only wires you need to connect are TD<transmit data> and RD<recive data> and ground. The Atari uses pin 3, 4, and 5 respectively on its 9 pin connector, the IBM uses 3, 2, and 5 respectively. Pretty simple hook up, just wires straight accross for 3 and 5 and run from 2 to 4 on the third assuming your going to use your current null modem cable which probably already switches TD & RD internally.

Tip if you are trying to save a buck, more then once I have just used a DEAD IBM serial mouse cable for making serial connectons. They always have TD, RD, and Ground hooked up. Long as you get one that doesn't have an internal break in wire they are fine. If it was discarded because of a break, it usually occurs right at the mouse so you can just cut the cable a foot or two away.

The new cables are really a lot more club then you need for the distance. I mean Steve Tucker's actually performs like two cables in one, allowing you to do things like back up copy protected software to your IBM!

A simple design that would do everything you need
http://www.wolfpup.net/atarimods/

Clarence got a little carried away with adding options. If you are using a Windows based computer just hardwire the 1489 version for DSR and use APE for Windows. The DSR version is a little more responsive under Windows then the RI verions. If you have a fast computer you can probably get away with the RI version and APE has the option to use it.

If you are going to use a DOS based computer, then the RI wired one will work with both APE for DOS and Nick Kennedy's SIO2PC.

MyDOS 4.53 or SpartaDOS 3.2g boots up in Atari 1050 as primary drive. I have secondary 3.5 drive with Hyper XF rom in XF551. I tried to format 3.5 double density disk but it shows the error 144. How do I format 720K in one partition?

I have high density 5.25 drive that allow 80 tracks but we do not use 1.2MB floppy disk. Can the drive format 5.25 double density disk to 720K ?

Where do I find Hypmode.com and Hyper XF tool disk?

Thanks!
Jack

Back up and running folks. I finally got another Lantronix box in. They no longer make the UDS10, so I had to get the 1100. Happily, I can report that it seems to function indentically to the UDS10, at least as far as working with my BBS goes.

Apologies for taking so long, and many thanks to all our patient callers.

The Fuji Lives! :)

Right. I think, if he has a 9 pin - 9 pin PC cable,
he would connect the 2 PC pin to the 4 pin, the
1 PC to 2 pin and the 4 PC to 1 pin to make
a 100% Atari 9/9 cable. Just the 2 PC to 4 make
the RCV line correct, and you have to remember that
you cross the XMT and RCV lines to make a null
modem cable.

Hmm... Perhaps the hyper XF will only do 720K 3.5", ie. double dens.
disk (only one corner hole, as opposed to 1.44meg with 2 holes.)
SpartaDOS 3.2g might do a 3.5" 720k floppy format, no partitions.
I bet SpartaX will.

I don't understand using 5.25" disks, I thought we were talking 3.5"
XF. You aren't going to get a 720K 5.25", it is either 360K
or 1.2 meg, I think. A 360K 5.25" is double density, same
as for use on stock XF551 (has hub ring), but XF551 double
sided is an unusual format, it can't be 'flipped'.

Regards, I'm a bit confused here.

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by
Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of
Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from
1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by
Atari Interactive, which is managed by today's Atari, Inc. Both of these
are divisions of Infogrames Entertainment.

oh not talking about 3.5 drive. talking about High Density 5.25 drive that
use Quad Density, 80 tracks and 9 sectors (IBM formatted), can format 720K
instead of 360K. It is very similar as 3.5 drive DSDD.

5.25 drive DSQD = 3.5 drive DSDD

Thanks!
Jack

I've just listed a number of issues of the vintage video game &
computer magazines "Video Games" & "Electronic Games". These issues
date back to the period 1982 - 1984.

Articles cover most popular console & computer systems of the time as
well as pinball & arcade machines.

The link to the auction listing follows. http://tinyurl.com/yvkmo5

I'll post worldwide and will be happy to consolidate postage for
multiple purchases.

If you have any questions contact me via the link on the listings
page.

I'll send it again. I checked the .zip file against the original and on
at800winplus, it booted and gave a directory.
So the .zip is good, I'll send it again.

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by
Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of
Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from
1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by
Atari Interactive, which is managed by today's Atari, Inc. Both of these
are divisions of Infogrames Entertainment.

1822. Help with 80 Column, ANSI Terminal Program for 800XL

Newsgroup: comp.sys.atari.8bit
Date: 2008-02-29 16:43:43 UTC
From: Mr Nukem <mrnukem@gmail.com>
Message-ID: <07d74199-daba-4e4e-8a15-8508bfbfa363@s12g2000prg.googlegroups.com>
Source record: 3511

I have the disk image of the terminal program called IceT800 (this is the one that will run on a standard Atari 800XL not the 128K version.) When I load the program on my 800 XL it gives some instructions on how to get the program usable the 1st time it is run using the Atari DOS Append command but I have had no luck getting this to work. I was wondering if anyone has a copy of the disk image ready to run that I could download or have e-mailed to me.

My goal is to find a terminal program that has 80 Column display as I am trying to telnet to bbs's using APE. Bobterm works great but trying to read the BBS on 40 Columns is not going well and I saw no way to kick Bobterm into 80 Col mode

Any recommendations on a good terminal program for use on an 800XL with the 80 Column mode option? Any terminal programs with ANSI display support would be even better

Thank you

If I remember correctly, Bobterm's 80 column mode was meant to work with the Atari 80 column adapter. There were other terminal programs that produced an 80 column display in Graphics 8 mode (4-pixel-wide characters). I think there was an 80 column Kermit.

You shouldn't actually have to Append, I don't think. I think you should be able to first load the R: handler into memory, then load Ice-T.

Which R: handler you load depends on what modem you're working with. Or more specifically, how the modem is attached to the computer. (joystick port, via 850 interface, direct SIO connection)

You mention you're going through APE. I knew that was possible, but I don't know what that means for an R: handler. My guess would be that APE can act like an 850 interface, and load an R: handler on startup. Anyone?

Right, BobTerm is 40 columns (unless used on an XEP80).

> Any recommendations on a good terminal program for use on an 800XL
> with the 80 Column mode option? Any terminal programs with ANSI
> display support would be even better

Ice-T was my favorite, though the 128K was a good step better than the last 48K version.

For ANSI, you could try FlickerTerm 80 or Term 80. FlickerTerm worked well, but I couldn't stand the readability (not the flickering, it was just tough to read!). I never tried Term 80, but it sounds promising.

I have that and the other one with the bomber. Both work fine and are fun to play. It is amazing to see just how good with grahics the Atari 8-bit computers are.

Yes, and there was also an 80 column omnicom (which I used to access
a university computer).

Good Game, took me a little while getting used to using both joysticks to
play the game. Graphics aren't bad for it either!

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by
Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of
Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from
1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by
Atari Interactive, which is managed by today's Atari, Inc. Both of these
are divisions of Infogrames Entertainment.

You may want to try a work around. Add trig tables as byte or card
arrays if you just need it for screen output. Been a long time for math
too but the trig functions repeat themselves so you don't need all 360
for 360 degrees. Something like they repeat every 180 degrees<???> and
can be caculated from the first 45 degree tables? So *IF* you use degree
as your smallest division and byte as your scale you get 1/360 and 1/64k
or .3% and .0015% accuracy from a 180 card table. This is as ~good as
the screen output of the Atari screen so you shouldn't have any plotting
errors.

What I mean is

Sin 1 degree = .0175 so you store it as 175
Sin 2 degrees = .0349 so you store it as 359
...
Sin 45 degrees = .7071 so you store it as 7071

For doing stuff like drawing circles this works fine and is pretty fast.

Rick

Thanks.

I'll give that a try. I wonder if this uses more or less RAM that a
mathematical implementation. Will have to look and see what is in the BASIC
ROM.

As you know, all programming involves trade-offs. Typically the trade-
off between look-up tables and the mathematical algorithm is speed/size.
```

On average, look-ups are very fast but use more RAM.

FWIW: Probably uses 4x the memory at 10x faster. Reason I believe this is amoung other factors you would have to go to Atari floating point format to get accuracy to 6 byte floats. Just giving the CORDIC method a cursitory glance, you are still going to need a ~100 element table and the other method requires factorials and powers.

I did recall just a bit about look up tables I constructed. Cos is just Sin +90 degrees with a sign change. That is, Cos 30 degrees = |Sin 120 degrees|.

So I used of table of 180 elements to get both the sin and cos rather then two 90 element tables. I seem to recall I used BASIC and printed to a flie after scaling the numbers. i.e. multiplied the result by ~32000 to get the numbers int sized and printed those numbers to a file that I loaded into Action!

Thinking about it, I should have been able to get it down to 90 elements i.e. sin 1 degrees = cos of 89 degrees but I quit as soon as I got something that worked. Once again, it was just for drawing to the Atari 320x192 screen so the point 120x66 was just as good as 120.1212x66.045 in my use.

Hiya, Charles.
You might want to check the comp.sys.atari.8bit FAQ.
It has a lot of technical details on pinouts, etc.
The 1200XL is probably one of the harder to find for sale.
You might want to check ebaY. Good luck.

1843. Re: Trig Functions for Action!

The accuracy and resolution you require for your application will
determine the complexity of either the lookup table or algorithm.

I would recommend a few sources:
1. The Atari Basic Source code.
2. Look at some embedded controller websites - these people are often
needing to implement fast and/or accurate trig functions on processors
with very limited resources.
3. Study either power series expansion or CORDIC. HP Journal
articles in 1972 have had details. Also see the original paper by
Volder.

I hope this helps a bit.

Regards,
TomCee

1844. DarkForce! February 2008 winner!

Greetings everyone!

Here is the lucky and the proud winner of the February prize at The
DarkForce! BBS:

February 2008
1. ST Magazine - Gemini8 wins the free 3 mag. subscription

Congratulations to our winner!

Also, here is the prize for March 2008:

1. ST Magazine - some lucky Atari caller will win a free 3 magazine
subscription.

Congratulations to our winner, and good luck to this months callers!

:)

Hi,

I think you are talking about a 5.25 disk and drive that formats with 512 byte sectors. A task almost impossible on Atari 8 bits yet.

Rick
DO NOT REPLY TO a8maestro"a t"a8maestro.com.

Go to www.vintagetechnology.co.uk to download latest issue (April '08). Only £0.79p / $1.60 for a 40+ page magazine devoted to the collection, preservation and history of all aspects of digital and electronics technology, including computers, arcade games, calculators, led watches, mobile phones, appliances, gadgets, robots, radio, audio and tv.

This issue features:

Vintage VHS video recorders - why we love them
The brave new world of videotex
Whatever happened to the teasmade?
Sega Master System - worthy rival to the NES
Sinclair ZX80 - 1st computer for under £100
Hard disks - humble, but collectible
Review of retro games for the Xbox & Playstsation
1970s Sanyo calculators
Vintage hi-fi headphones
1980s novelty radios
Interview with Dave Johnson - ColecoVision programmer
Lets party retro-tech style
Imagination Machine memories

Plus sections on museums & collections, latest events & news and book review.

VTM aims to explore the legacy of recent past technology, explore new 'electronica' which could become or already is collectible, be an enjoyable resource for collectors & historians and celebrate the history and personalities surrounding this subject.

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by
Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of
Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from
1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by
Atari Interactive, which is managed by today's Atari, Inc. Both of these
are divisions of Infogrames Entertainment.

Brian,
You can download A.N.A.L.O.G. issue #5 at this website:

http://www.cyberroach.com/analog/

I don't think much is being done these days on the incomplete
magazines here, but it lists #5 as being complete.

Keith

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by
Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of
Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from
1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by
Atari Interactive, which is managed by today's Atari, Inc. Both of these
are divisions of Infogrames Entertainment.

NEWSGROUP BACKGROUND
comp.sys.atari.8bit was created in November 1986 (as part of the Great
Renaming) as a direct replacement for: net.micro.atari8

comp.sys.atari.8bit is unmoderated, and has no formal newsgroup charter.

The comp.* hierarchy of Usenet newsgroups is managed by the Big-8 Management
Board: http://www.big-8.org/

RELATED USENET NEWSGROUPS
alt.binaries.comp.atari8bit
Programs for Atari's 6502-based orphans.
```

comp.sys.atari.advocacy
Attacking and defending Atari computers.

comp.sys.atari.announce
Atari related hard/software announcements. (Moderated)
Moderator: Kevin Savetz
comp.sys.atari.announce web page: http://www.atariarchives.org/csaa/

comp.sys.atari.programmer
Programming on the Atari computer.

1862. Atari 800 Memory Problems

Newsgroup: comp.sys.atari.8bit
Date: 2008-03-21 16:01:57 UTC
From: Jason Harmon <jharmon@us.net>
Message-ID: <NpednWxwUa8XRn7anZ2dnUVZ_ternZ2d@comcast.com>
Source record: 3401

I have an Atari800 that is showning some strange memory problems.

I have a number of memory cards (512K Magna, 32K Mosaic, and a bunch of standard 16K cards).

When I run the SALT memory test when 3x16K cards are installed, it shows only 40K of memory is installed (no there isn't a cart in there). Running the same test on a virtual 800 in Atari800WinPlus shows 48K.

I've tried rearranging the 3 16K cards and regardless of the config it only shows 40K installed.

Running the RAM test in this config shows all the 40K as OK, But the main screen just doesn't see the extra 8K. Is there anything on the motherboard that might cause this problem (aside from 1 or more bad RAM cards).

Running the tests of my 32K Mosaic or 512K Magna cards are consistently showing RAM errors, so I'm ignoring that at this point and just trying to find out what is wrong with the setup.

Thanks.

Jason Harmon

I was gonna say that Basic is in that area but I see that you have no
carts in it. Does the DOS you are using set flags so you cant use that
section of RAM (mark it as ROM?) even if there is no ROM there?

Hi Keith,

Thanks for the info, I had seen that site before. Having all of the paper mags but #5 is the only reason I was hoping to purchase it. I guess I could always print out what is on that site. I guess I'm just being a completist collector. :)

thanks for the help guys,
~brian

I'm with you. I am 2 shy of all the Antic and about 8 shy of the full Analog set. I have started on STart and ST Log now. Have most all the disks for Antic, Analog and STart.

From: Jason Harmon <jharmon@us.net>
Message-ID: <Y_SdnZP9hcmBunnanZ2dnUVZ_hisnZ2d@comcast.com>
Source record: 3406

I'm not using a DOS in this case. It's an autoboot disk image I'm using.

The really wierd thing is that I am using the same disk image from
Atari800WinPlus (which shows 48K), and the real 800 (showing 40K) via APE.

-Jason

snip
I have dups of some ANALOG and Antic, not
in the first 20 or so. The first ten are the hardest
to come by.
I'd be glad to check my dups next month (April),
if you need some I have.

1870. Re: Atari 800 Memory Problems

Not a lot of help but 40k to me implies the cartridge detection and
memory remapping has probably gone south. That is, something like an IC
fried in the cartridge present mode which would make that 8k invisible.

Rick

Hey, Jason;
Any way you could send an ATR of that autoboot disk image? I would like to
see the SALT utilities...

thnx,
RetroJess

I also have several duplicate Antic and a few Analog, mostly above #12 or so... The bad news is postage is getting completely outrageous and mailer envelopes too!!!

-Jess

Has javascript and porn site, with download
codec.

1876. Anniversary of BASIC Star Trek game

Newsgroup: comp.sys.atari.8bit
Date: 2008-03-26 08:24:14 UTC
From: Stanley Hunt <stanley_hunt@shawRemoveThis.ca>
Message-ID: <OKnGj.122935$pM4.58053@pd7urf1no>
Source record: 3415

Greetings!

For all you Trek-heads out there, I found a PD Star Trek game called
Enterprise.
It's written in Atari BASIC, and barely fits in memory.
It was made on October 15, 1983, by G. T. Harvey.
Since the 25th anniversary is just over 6 months away, I'm going to try to
mod it.

I remember playing a modded version of it back in 1986.
It was the very first Star Trek game I ever played.
That was the year I got my first Atari and started learning BASIC.

If anyone else is interested in playing (or even modding) it, it can be
found here:

http://www.langesite.com/atari/Holmes/Holmes%203/BELLCOM/001.ATR

The .atr has it's own menu system.
ENTPRIS1.BAS is the tutorial.
ENTPRIS2.BAS is the actual game.
The other Star Trek files are a different game.

If anyone wants to mod it, I would recommend using Turbo Basic or Basic XE.
As I said, this game barely fits in memory!

-Stan

1877. ALL ATARI 25% OFF!

Newsgroup: comp.sys.atari.8bit
Date: 2008-03-27 08:24:31 UTC

Welcome to the comp.sys.atari.8bit newsgroup!

Discussion about 8 bit Atari micros.

Welcome to the Usenet newsgroup for discussion about the Atari 8-bit family
of computers! These include the Atari 400, 800, 1200XL, 600XL, 800XL, 65XE,
130XE, and 800XE personal/home computers, and the Atari XE video game system.

The 400/800/1200XL/600XL/800XL computers were produced from 1979-1984 by
Atari, Inc., of Sunnyvale, California, USA, while Atari was a division of
Warner Communications.

The 800XL/65XE/130XE/800XE computers and XE game system were produced from
1984-1992 by Atari Corp., also based in Sunnyvale, California, USA.

The Atari computer intellectual property rights are currently owned by
Atari Interactive, which is managed by today's Atari, Inc. Both of these
are divisions of Infogrames Entertainment.

Hi,

Method 2 is a little involved but.... disassemble the entire computer.

Slightly pry up all socketed chips.

Push back down

Reassemble and test.

What is method 1? Pick up and drop from 2" onto a hard surface.

Hello,

Rix Computer Activity Tools:
I have released several more NEW items at my site....

SIO BOB is a break out board for the SIO port. Gives access to the
lines. AND...
PEEKER is the first board for SIO BOB. Shows activity on the data
lines. Also works with Spider.
http://morethangames.a8maestro.com/proda8/adv-ek0112.htm. 14 items.

SPEEDIER: Type 2...Same speedier but in a hood for db25 to RJ45(ethernet
type cable), so makes a much smaller set.
http://morethangames.a8maestro.com/proda8/adv-eh0106.htm. 1 item.

Ricks' Electronics Entertainment Emporium:
Simple Mixer..mixes several computers, MP3/CD/Tape plyers thru 1 set of
powered speakers. AND...
Skinny Mixer...For car radio or portable speaker use, mixes 2 items.
http://morethangames.a8maestro.com/prodmisc/adv-lh0001.htm. 2 items.

More items soon.

Hi, I'm Ben here in Portland, Oregon USA! Proprietor of Bravo Sierra Computers! Occupying a unique niche in the Atari World! Most Atari Dealers sell NEW, I also sell Used Atari Goods! Not only do I sell NEW Atari Goods at a competitive price, I also sell used Atari Goods you wont find at Swap Meets, Thrift Stores or Auction Sites! And I sell for less! Unlike those remaining anonymous! I test Goods before I sell them. Not only can I sell you some Great New stuff! I can also sell you hard to find 2nd Hand Goods, because I'm the guy people goto to give Ataris a New Home! Saving Orphaned Atari's from Oblivion!Goto http://BensCatalogs.Atari.org or (503)256-9974!

I've got a fast turnaround rate. Usually, Once I receive payment your order goes out the same day. Customers love the speedy service! I have lots of Atari SoftWare & Books. Which I can send by Media Mail Rate!

Please Direct all Replies Through E-Mail to: BenSells@Atari.org or Atari@aracnet.com. If you can't reach me, see my info at the Bottom!

Atari 8 Bit and ST Games/Software, Hardware/Accessories and Books/References!
FREE Catalogs @ http://BenSells.Atari.org or http://BensCatalogs.Atari.org or
Catalogs Requested by E-Mail at Atari@aracnet.com or BenSells@Atari.org and
Please Specify Atari 8 Bit, ST or Both! Or Call Ben anytime at (503)256-9974!

1886. Atari 815 question

Newsgroup: comp.sys.atari.8bit
Date: 2008-04-03 23:35:43 UTC
From: Jack Tseng <tseng4@hotmail.com>
Message-ID: <iRdJj.44243$QC.41608@newsfe20.lga>
Source record: 3425

Atari 815 is true double density drives. Atari DOS 2.0D can not reconfigure to Single Density. Can 3rd party DOS like SmartDOS reconfigure 815 to Single Density ? Can 815 read Single Density ?

Jack

1887. Atari 810 Mechanism

>I am confused... Atari 810 uses Shugart Mechanism or MPI or Tandon?

My understanding is that there are two versions of the 810. The most common type (don't know the numbers made) has the MPI mechanism. Versions with the Tandon mechanism were also made in smaller numbers (I have one of these).

I don't know the 815, but all the double density
drives I've used (1050 USDBLR, Rana 1000,
Indus GT) it will detect the density when you
boot up. You stick a single dens boot disk
in and it will boot, same with stick a dbl dens
disk in and it will detect and boot.
I wrote a density set program that worked after
bootup, you could set single, dble, enhanced.
I'm not sure it would work on an 815.
The Indus and/or the Rana could set dens.
on the from panel, if I recall.
You need a dbl dens DOS to use dbl dens disks.
SmartDOS, MyDOS, FTe(Sparta)DOS. Atari
DOS 2/2.5 won't do dbl. 2.5 does enhanced.

Hi,

> Atari 815 is true double density drives....

I wasn't aware the 815 was double density....you learn something new every day....

The following web page will give you a few more details:
http://www.atarimuseum.com/computers/8bits/400800/815/815.html

2008.01.27 Mark Watson, Atari800 1.2 for GP2X, 1.2 for Gizmondo
```

Subject: Introduction

Conventions

All commercial vendors, developers, publishers, and repair shops should be listed here. "Active" PD/freeware/shareware developers should also be listed. Persons or entities holding rights to products, but not selling or supporting them in any way, should NOT be listed here.

"Vendor" = Reseller of products produced by others. Types of products sold are given in categories: new hardware, used hardware, PD/freeware/ shareware, (new) commercial software, used (commercial) software.

"Developer" = Producer of products. Titles of products produced by the developer are listed. No prices are given.
